ND3CMR0001 – Radia reporting server

Radia client software on the System (the current 7.x client is compatible with the 9.x infrastructure and will not be upgraded. A new client will be deployed to those servers moving from Windows 2000/2003 to 2008.
The Proxy/Satellite servers will not be upgraded immediately but a Radia 9.1 version of the proxy will be available to be deployed (New Sites/Replacements). A review will need to be undertaken to ensure AUTHORITY Locations are covered with a proxy since the major changes during the NPS/CRC split. The aim will be to reduce the number of proxies where possible.
