Timings

The research should aim to complete by the end of March 2021.

Groups of people the research will focus on:

Building energy managers representing landlords, owner-occupiers or single occupants of buildings

Industry experts including representatives of relevant companies or organisations in the industry, academics or groups that are currently carrying out research in this area, and anyone who is currently involved in rating schemes

Building landlords and owner occupiers.

Geographical areas to be covered by the research

The research should cover England and Wales.

Deliverables

BEIS would like the following deliverables from the research project at the timings below:

- **Interim report** updating on key findings to date: by early February.
- **Slide pack** to communicate the key messages coming out of the research: in advance of final report.
- **Final report** covering the evidence gathered from fieldwork and desk-based research to answer the key research questions: at the end of the project.
- **Technical annexes** which will provide a more detailed breakdown of the evidence gathered from the fieldwork: at the end of the project.

In addition to these outputs, BEIS would also expect to have regular communication with the contractor updating on progress and any issues that they may encounter.
