## Schedule 1: Services

## Solution Approach

Our approach has proved to be successful throughout the work completed to date on the Programme and would welcome the opportunity to be able to continue in that vein. Our open, honest, and collaborative engagement will continue with the teams to ensure the creation of quality products can be used both internally for the MoJ business as well as shared within the cluster.

The request for the managed service is defined into the 5 areas defined within the requirements and are represented under the 5 headings in the following section. To deliver quality and timely outcomes we require MoJ to support the design of the outputs and to support regular reviews to ensure all parties are protected.

MoJ will need to share the current plan of activities for this contract and define the expected end points for each of the tasks within the requirements. From this the deliverables can be agreed and used to manage the contract and delivery of services going forward. In the event there are delays Blue Border will aim to accommodate changes at no cost but in the event there is a cost to Blue Border that is not the direct fault of Blue Border, this may result in additional costs.

It should be noted that in the 2.5 years of the previous contract Blue Border had absorbed all risk and mitigated any increases in costs to MoJ.

Blue Border request a planning session in the first month with MoJ to ensure we can map the deliverables to a calendar delivery.
