## Schedule 3 The Services

### A. Commencement and Duration

The Contract shall commence on Monday 13<sup>th</sup> March 2023 and subject to any provisions for earlier termination, shall end no later than Monday, 30<sup>th</sup> June 2025.

### B. Scope of Services to be Provided

The successful bidder for this contract will manage the portfolio of agreed UK activity for the MicroCarb mission, providing technical advice the UKSA with regards Assembly, Integration and Test (AIT) competition, monitoring milestones and ensuring delivery of work to budget and within timescales.

In 2017 TAS-UK has been awarded a contract to complete the AIT for MicroCarb which is currently due to launch in 2024. The main aims and reason for this tender is to appoint a technical advisor, with relevant skills and experience, to provide technical advice the UKSA with regards AIT competition. The contract will terminate when MicroCarb is maximum 3 months post launched.

#### Objectives

The successful bidder will provide a technical support to the UKSA until the launch Microcarb. This support will include attending relevant meetings with the UKSA Programme team to provide support, review relevant documents and correspondence and proactive monitor the project schedule and flag any risks and concerns to the UKSA. Further information about the specific outputs and expectations can be found in section 5 scope.

#### Background to the Requirement

The UK Space Agency and Centre National d'Etudes Spatiales (CNES) signed an Implementation Arrangement in April 2017 setting out their partnership on the MicroCarb satellite mission. The science objective of the MicroCarb mission is to monitor and characterize CO<sub>2</sub> surface fluxes, that is, the exchanges between sources (natural or anthropogenic) and sinks (atmosphere, ocean, land and vegetation). The instrument will be flown on a microsatellite built around CNES's Myriade spacecraft.

Under the implementation arrangement with CNES, the UK Space Agency contracted TAS-UK for and support the realization of the Assembly, Integration and Test (AIT) activities applied to the platform and to the satellite, with a technical delegation given to CNES. The UK Space Agency also finance UK industrial contributions to the development of the instrument calibration unit, Ground Support Equipment (GSE) necessary for the integration or the calibration of the instrument, subsystems of the platform, development of parts of the Payload Ground Segment (PLGS), and subsystems of the instrument.

The UK Space Agency is seeking technical support from an organisation with the relevant expertise and experience to ensure these activities are delivered on time and within budget, with maximum value for money and economic return achieved for UK plc.

#### Scope

The successful bidder must:

- Provide oversight of the technical management of the AIT activities, liaising closely

with the AIT contractor and CNES, and provide support to UK Space Agency's management of the contractual and financial aspects of the AIT contract.

- Participate jointly with CNES and UK Space Agency in progress meetings and reviews of the AIT contract- providing robust assessment of progress against agreed milestones, identifying any issues which may affect the schedule or cost. These reviews take place every month.
- Provide technical advice in support of UK Space Agency decision making in relation to the completion of agreed milestones by the AIT contractor.
- Provide technical advice in support of UK Space Agency decision making in relation to the completion of agreed programme milestones by UK subcontractors that are supplying agreed activities under a CNES contract or through ADS France.
- Provide regular updates to UK Space Agency on the progress of the AIT and other activities funded by the UK Space Agency, identifying and tracking any issues which may affect the schedule or cost.
- Provide technical support in the form of a briefing document and briefing meeting, to the UK representatives of the MicroCarb Steering Committee, which will meet at least twice a year, to enable them to make effective decisions regarding the mission progress against agreed milestones and allow them to resolve any issues concerning the interpretation or the implementation of the present MicroCarb Implementation Arrangement.
- The work will vary from month to month and therefore the successful bidder must be able to prioritise the most urgent tasks and be able to determine which tasks should be completed and by when.

## **Requirement**

### **Essential Skills**

- Bidders shall demonstrate that their organisation have highly developed technical communication skills, specifically a proficiency in understanding and clearly communicating complex technical matters to a range of audiences- both technical and non-technical in both written and oral formats.
- Bidders shall demonstrate that their organisation has an awareness of the risks and issues that may arise on a satellite mission, in particular the AIT process, that affect schedule and cost, and have demonstrable experience in mitigating against and/or managing these.
- Bidders shall demonstrate how work will be managed and delivered, including any quality assurance and risk assessment procedures.
- Bidders shall demonstrate an awareness of the UK Government's Space Growth Strategy and Industrial Strategy and demonstrate how their approach shall ensure that the UK's partnership on the MicroCarb mission remains aligned with high level Government strategies.
- Key personnel shall be named at contract award and named member/s of the successful applicants programme team shall be required to complete a No Conflict of Interest statement and Confidentiality agreement. If and when required, Named Member/s of the successful bidder's programme team shall also consent to obtaining any security clearance level necessary for carrying out the required work.
- Bidders shall provide assurances as to the availability of personnel and resources to deliver this programme over the full duration of the MicroCarb mission and show how any potential changes, such as unforeseen absence, in personnel or resource will be managed.

### **Timetable**

- Procurement activity for MicroCarb has been already completed, with the AIT

contract being awarded to TAS-UK in 2017. The MicroCarb mission is currently scheduled to launch in 2024, and technical support and oversight of UK activities and contributions will be required across the one and half year period up to the launch. This period may extend if the launch is delayed. There will be peaks and troughs of activity within this period, it is not envisaged that activity will require more than 2-6 days per month-including attendance of meetings, preparatory work and general support, however there may be months when additional support may be required, if significant AIT issues occur.

- Bidders if successful will be required to periodically invoice UK Space Agency under the terms of the contract for work conducted under the instruction of UK Space Agency.
- The bidders's programme team may be required to travel to Toulouse for technical review meetings with CNES. Travel to UK Space Agency headquarters in Swindon or London may be required on an ad-hoc basis to provide progress reports and to brief members of the MicroCarb steering committee in advance of committee meetings. Travel and subsistence for these events will be costed and paid for by UK Space Agency, in line with the BEIS Travel & Subsistence Policy, as and when they occur.

**Duration**

The Contract duration shall be for a period of 18 months from commencement of the Contract. UKSA will have the right, without cause and without liability, to end this Contract, by giving at least three month's written notice to the successful bidder.

**Price**

Bidders are to submit a rate card of staff rates by grade/type, inclusive of any overhead costs which will be used as the basis for price evaluation and packages of work defined by future Microcarb meetings. For the avoidance of doubt, the successful bidder will be paid an hourly rate for work completed. All Prices should be in £GBP and exclusive of VAT. Payment will be made on UKSA's acceptance of key deliverables.

**Terms and Conditions**

Bidders are to note that any requested modifications to the Contracting Authority Terms and Conditions on the grounds of statutory and legal matters only, shall be raised as a formal clarification during the permitted clarification period.

the 1990s, the number of people in the UK who are aged 65 and over has increased by 1.5 million, and the number of people aged 75 and over has increased by 1.1 million (Office for National Statistics 2000). There is a growing awareness of the need to address the health and social care needs of older people. The strategy is based on three main principles: (1) to improve the health and social care of older people; (2) to ensure that older people are able to live independently and actively; and (3) to ensure that older people are able to participate in society.
