

Clarification to Bidders

Peugeot e-Boxer 440L4H3 110 KWH Professional

Ref: CLUP X010

We received the following question

Could you please confirm if you require a panel van, or would a platform cab fitted with a suitable body for the load space requirement be applicable?

A platform would be suitable as long as it

- Is electric, with a range of 250miles
- Can be delivered before the delivery date
- Has the equivalent load space and spec as described in the ITT.

Clarification of the exact specs with the upgrade packs can be downloaded from the Peugeot website.

Thanks,
