

- 2) **data on background services** being made available to the user, such as the user's location, could lead to their non-compliance. It may be possible to make the background services more generic, like AOL and MSN, which do not collect location data.
- 3) In the absence of evidence to the contrary, we assume that the background services are assumed to be *effectively* transparent connections.
- 4) This survey has been carried out in a limited number of locations, and the results are being underwritten at scales of 1000 x 1000.
- 5) Underground service information should be made available to the user, such as the user's location, could lead to their non-compliance. It may be possible to make the background services more generic, like AOL and MSN, which do not collect location data.
- 6) This survey has been carried out in a limited number of locations, and the results are being underwritten at scales of 1000 x 1000.
- 7) Underground service information should be made available to the user, such as the user's location, could lead to their non-compliance. It may be possible to make the background services more generic, like AOL and MSN, which do not collect location data.

UNDERGROUND SERVICES

[illegible]

GPR REFLECTIONS

[illegible]

NOT

- THE SITE AND LOCATION OF SERVICES SHOULD BE CONFIRMED ON SITE PRIOR TO ANY EXCAVATION WORKS.
