

SERDS Industry Brief Questionnaire CQs and Responses

Question #	Question	Response
1	What are you looking for in a new supplier over and above what you are getting from your current contract?	The Authority is looking to work with a partner collaboratively, working against the required outcomes. This includes building and developing applications, as well as supporting and maintaining them. Please note that this may change in the ITT pack that is published.
2	Given there are three separate programmes under the current contract, with RSP and EMP operating in a different governance model to the Waste Tracking Programme, is there a particular driver or benefit for keeping them together going forward under the SERDS contract procurement? Or would you consider separating the scope out so that one or more programme is delivered through an alternative route to market, particularly if there were benefits in doing so?	It should be noted that currently the scope of the Waste Tracking workstream has now been removed. It is possible that these outcomes will be brought back into the contract scope after the contract has been awarded as this contract will be made available to all of DEFRA and its ALBs to use. Please note that this may change in the ITT pack that is published.
