Timber and wood-derived products supplied or used in performance of the Services that are not recycled are referred to as "virgin" timber when the distinction needs to be made for clarity. Short-rotation coppice is exempt from the requirements for timber and wood-derived products and falls under agricultural regulation and supervision rather than forestry;
- (b) **“Legal and Sustainable”** means production and process methods, also referred to as timber production standards, and in the context of social criteria, contract performance conditions (only), as defined by the document titled *"UK Government timber procurement policy: Definition of Legal and Sustainable for timber procurement"* (available at www.gov.uk/government/publications/timber-definition-of-legal-and-sustainable or CPET). The edition current on the day the Contract is awarded shall apply;
- (c) **“FLEGT”** means Forest Law Enforcement, Governance and Trade, and is a reference to the EU scheme to address the problem of illegally logged timber;
- (d) **“FLEGT-licensed”** means production and process methods, also referred to as timber production standards, and in the context of social criteria, contract performance conditions only, as defined by a bilateral Voluntary Partnership Agreement (**“VPA”**) between the European Union and a timber-producing country under the FLEGT scheme, where both Parties have agreed to establish a system under which timber that has been produced in accordance with the relevant laws of the producing country, and other criteria stipulated by the VPA, are licensed for export by the producing country government;
- (e) **“Recycled”** means recovered wood that prior to being supplied to the Authority had an end use as a standalone object or as part of a structure. The term "recycled" is used to cover the following categories: pre-consumer recycled wood and wood fibre or industrial by products but excluding sawmill co-products (sawmill co-products are deemed to fall within the category of virgin timber), post-consumer recycled wood and wood fibre, and drift wood. It also covers reclaimed timber which was abandoned or confiscated at least ten years previously. Documentary evidence and independent verification also apply to recycled materials, but will focus on the use to which the timber was previously put rather than the forest source;
- (f) **“Short-rotation coppice”** means a specific management regime whereby the poles of trees are cut every one to two years and which is aimed at producing biomass for energy. It is exempt from the UK government timber procurement policy requirements and falls under agricultural regulation and supervision rather than forestry. The exemption only refers to short-rotation coppice, and not 'conventional' coppice which is forest management and therefore subject to the timber policy; and
- (g) **“CPET”** means the UK Government’s Central Point of Expertise on Timber.

- D6.2 All Timber supplied or used by the Contractor in providing the Services (including all Timber supplied or used by Sub-Contractors) shall comply with Schedule 1 and shall originate from a forest source where management of the forest has full regard for:
- (a) identification, documentation and respect of legal, customary and traditional tenure and use rights related to the forest;
 - (b) mechanisms for resolving grievances and disputes including those relating to tenure and use rights, to forest management practices and to work conditions; and
 - (c) safeguarding the basic labour rights and health and safety of forest workers
- (the “**Social Criteria**”).
- D6.3 If requested by the Authority and not already provided in its Tender, the Contractor shall give the Authority evidence that the Timber supplied or used in providing the Services complies with the requirements of Schedule 1 and with the requirements of the Social Criteria.
- D6.4 The Authority may at any time during the Contract Period and for 6 years after final delivery under the Contract require the Contractor to produce the evidence required for the Authority's inspection within 14 days of the Authority's written request.
- D6.5 The Contractor shall maintain records of all Timber delivered to and accepted by the Authority for 6 years from final delivery under the Contract.
- D6.6 The Authority shall decide whether the evidence submitted to it demonstrates legality and sustainability, or FLEGT-licence or equivalent, and is adequate to satisfy the Authority that the Timber complies with Schedule 1 and complies with the requirements of the Social Criteria. If the Authority is not satisfied, the Contractor shall commission and meet the costs of an "independent verification" and resulting report that will: (a) verify the forest source of the timber or wood; and (b) assess whether the source meets the relevant criteria.
- D6.7 In the Contract "**Independent Verification**" means that an evaluation is undertaken and reported by an individual or body whose organisation, systems and procedures conform to *ISO Guide 65:1996 (EN 45011:1998) General requirements for bodies operating product certification systems (as amended from time to time)* or equivalent, and who is accredited to audit against forest management standards by a body whose organisation, systems and procedures conform to *ISO 17011: 2004 General Requirements for Providing Assessment and Accreditation of Conformity Assessment Bodies (as amended from time to time)* or equivalent.
- D6.8 The Authority may reject Timber that does not comply with Schedule 1 or with the Social Criteria. If the Authority rejects any Timber the Contractor shall supply alternative Timber which does comply at no additional cost to the Authority and without causing delay to delivery of the Services.

F 2 Monitoring of Contract Performance

- F2.1 The Contractor shall immediately inform the Authority if any of the Services are not being or are unable to be performed, the reasons for non-performance, any corrective action and the date by which that action will be completed.
- F2.2 At or around 6 Months from the Commencement Date and each anniversary of the Commencement Date thereafter (each being a "**Review Date**"), the Authority shall carry out a review of the performance of the Contractor ("**Checkpoint Review**"). Without prejudice to the generality of the foregoing, the Authority may in respect of the period under review consider such items as (but not limited to): the Contractor's delivery of the Services; the Contractor's contribution to innovation in the Authority; whether the Services provide the Authority with best value for money; consideration of any changes which may need to be made to the Services; a review of future requirements in relation to the Services and progress against key milestones.
- F2.3 The Contractor shall provide at its own cost any assistance reasonably required by the Authority to perform such Checkpoint Review including the provision of data and information.
- F2.4 The Authority may produce a report (a "**Checkpoint Review Report**") of the results of each Checkpoint Review stating any areas of exceptional performance and areas for improvement in the provision of the Services and where there is any shortfall in any aspect of performance reviewed as against the Authority's expectations and the Contractor's obligations under this Contract.
- F2.5 The Authority shall give the Contractor a copy of the Checkpoint Review Report (if applicable). The Authority shall consider any Contractor comments and may produce a revised Checkpoint Review Report.

- F2.7 Actions required to resolve shortcomings and implement improvements (either as a consequence of the Contractor's failure to meet its obligations under this Contract identified by the Checkpoint Review Report, or those which result from the Contractor's failure to meet the Authority's expectations notified to the Contractor or of which the Contractor ought reasonably to have been aware) shall be implemented at no extra charge to the Authority.

F 3 Remedies for inadequate performance

- F3.1 If the Authority reasonably believes the Contractor has committed a Material Breach it may, without prejudice to its rights under clause H2 (Termination on Default), do any of the following:

 - (c) withhold or reduce payments to the Contractor in such amount as the Authority reasonably deems appropriate in each case; and/or
 - (d) terminate the Contract in accordance with clause H2.
- F3.2 Without prejudice to its right under clause C3 (Recovery of Sums Due), the Authority may charge the Contractor for any costs reasonably incurred and any reasonable administration costs in respect of the supply of any part of the Services by the Authority or a third party to the extent that such costs exceed the payment which would otherwise have been payable to the Contractor for such part of the Services.
- F3.3 If the Authority reasonably believes the Contractor has failed to supply all or any part of the Services in accordance with the Contract, professional or industry practice which could reasonably be expected of a competent and suitably qualified person, or any legislative or regulatory requirement, the Authority may give the Contractor notice specifying the way in which its performance falls short of the requirements of the Contract or is otherwise unsatisfactory.
- F3.4 If the Contractor has been notified of a failure in accordance with clause F3.3 the Authority may:
- (a) direct the Contractor to identify and remedy the failure within such time as may be specified by the Authority and to apply all such additional resources as are necessary to remedy that failure at no additional charge to the Authority within the specified timescale; and/or
 - (b) withhold or reduce payments to the Contractor in such amount as the Authority deems appropriate in each case until such failure has been remedied to the satisfaction of the Authority.
- F3.5 If the Contractor has been notified of a failure in accordance with clause F3.3, it shall:
- (a) use all reasonable endeavours to immediately minimise the impact of such failure to the Authority and to prevent such failure from recurring; and
 - (b) immediately give the Authority such information as the Authority may request regarding what measures are being taken to comply with the obligations in this clause F3.5 and the progress of those measures until resolved to the satisfaction of the Authority.
- F3.6 If, having been notified of any failure, the Contractor fails to remedy it in accordance with clause F3.5 within the time specified by the Authority, the Authority may treat the continuing failure as a Material Breach and may terminate the Contract immediately on notice to the Contractor.

F 4 Transfer and Sub-Contracting

- F4.1 Except where clauses F4.6 and F4.7 both apply, the Contractor shall not transfer, charge, assign, sub-contract or in any other way dispose of the Contract or any part of it without Approval. All such documents shall be evidenced in writing and shown to the Authority on request. Sub-contracting any part of the Contract shall not relieve the Contractor of any of its obligations or duties under the Contract.
- F4.2 The Contractor shall be responsible for the acts and/or omissions of its Sub-Contractors as though they are its own. If it is appropriate, the Contractor shall provide each Sub-Contractor with a copy of the Contract and obtain written confirmation from them that they will provide the Services fully in accordance with the Contract.
- F4.3 The Contractor shall ensure that its Sub-Contractors and suppliers retain all records relating to the Services for at least 6 years from the date of their creation and make them available to the Authority on request in accordance with the provisions of clause E9 (Audit). If any Sub-Contractor or supplier does not allow the Authority access to the records then the Authority shall have no obligation to pay any claim or invoice made by the Contractor on the basis of such documents or work carried out by the Sub-Contractor or supplier.
- F4.4 If the Authority has consented to the award of a Sub-Contract, the Contractor shall ensure that:
- (a) the Sub-Contract contains a right for the Contractor to terminate the Sub-Contract if the relevant Sub-Contractor does not comply in the performance of its contract with legal obligations in environmental, social or labour law;

F 5 Waiver

- F5.1 The failure of either Party to insist upon strict performance of any provision of the Contract, or the failure of either Party to exercise, or any delay in exercising, any right or remedy shall not constitute a waiver of that right or remedy and shall not cause a diminution of the obligations established by the Contract.
- F5.2 No waiver shall be effective unless it is expressly stated to be a waiver and communicated to the other Party in writing in accordance with clause A4 (Notices and Communications).
- F5.3 A waiver of any right or remedy arising from a breach of the Contract shall not constitute a waiver of any right or remedy arising from any other or subsequent breach of the Contract.

- F6.2 The Authority may request a Variation by notifying the Contractor in writing of the Variation and giving the Contractor sufficient information to assess the extent of the Variation and consider whether any change to the Price is required in order to implement the Variation within a reasonable time limit specified by the Authority. - F6.5 A CCN takes effect on the date on which both Parties communicate acceptance of the CCN via Atamis. On the date it communicates acceptance of the CCN in this way the Contractor is deemed to warrant and represent that the CCN has been executed by a duly authorised representative of the Contractor in addition to the warranties and representations set out in clause G2.
- F6.6 The provisions of clauses F6.4 and F6.5 may be varied in an emergency if it is not practicable to obtain the Authorised Representative's approval within the time necessary to make the Variation in order to address the emergency. In an emergency, Variations may be approved by a different representative of the Authority. However, the Authorised Representative shall have the right to review such a Variation and require a CCN to be entered into on a retrospective basis which may itself vary the emergency Variation.

F 10 Remedies Cumulative

F10.1 Except as expressly provided in the Contract all remedies available to either Party for breach of the Contract are cumulative and may be exercised concurrently or separately, and the exercise of any one remedy shall not be deemed an election of such remedy to the exclusion of other remedies.

H8.2 The Authority shall take all necessary precautions to ensure that the information referred to in clause H8.1 is given only to potential providers who have qualified to tender for the future provision of the Services.

H8.3 The Authority shall require that all potential providers treat the information in confidence; that they do not communicate it except to such persons within their organisation and to such extent as may be necessary for the purpose of preparing a response to an invitation to tender issued by the Authority; and that they shall not use it for any other purpose.

H8.4 The Contractor shall indemnify the Authority against any claim made against the Authority at any time by any person in respect of any liability incurred by the Authority arising from any deficiency or inaccuracy in information which the Contractor is required to provide under clause H8.1.

H8.5 The Contractor shall allow access to the Premises in the presence of the Authorised Representative, to any person representing any potential provider whom the Authority has selected to tender for the future provision of the Services.

H8.6 If access is required to the Contractor's Premises for the purposes of clause H7.5, the Authority shall give the Contractor 7 days' notice of a proposed visit together with a list showing the names of all persons who will be visiting. Their attendance shall be subject to compliance with the Contractor's security procedures, subject to such compliance not being in conflict with the objectives of the visit.

H8.7 The Contractor shall co-operate fully with the Authority during any handover at the end of the Contract. This co-operation shall include allowing full access to, and providing copies of, all documents, reports, summaries and any other information necessary in order to achieve an effective transition without disruption to routine operational requirements.

H8.8 Within 10 Working Days of being requested by the Authority, the Contractor shall transfer to the Authority, or any person designated by the Authority, free of charge, all computerised filing, recording, documentation, planning and drawing held on software and utilised in the provision of the Services. The transfer shall be made in a fully indexed and catalogued disk format, to operate on a proprietary software package identical to that used by the Authority.

H 9 Exit Management

H9.1 Upon termination the Contractor shall render reasonable assistance to the Authority to the extent necessary to affect an orderly assumption by a Replacement Contractor in accordance with the procedure set out in clause H10.

H 10 Exit Procedures

- H10.1 Where the Authority requires a continuation of all or any of the Services on expiry or termination of this Contract, either by performing them itself or by engaging a third party to perform them, the Contractor shall co-operate fully with the Authority and any such third party and shall take all reasonable steps to ensure the timely and effective transfer of the Services without disruption to routine operational requirements.
- H10.2 The following commercial approach shall apply to the transfer of the Services if the Contractor:
- (a) does not have to use resources in addition to those normally used to deliver the Services prior to termination or expiry, there shall be no change to the Price; or
 - (b) reasonably incurs additional costs, the Parties shall agree a Variation to the Price based on the Contractor's rates either set out in Schedule 2 or forming the basis for the Price.
- H10.3 When requested to do so by the Authority, the Contractor shall deliver to the Authority details of all licences for software used in the provision of the Services including the software licence agreements.
- H10.4 Within one Month of receiving the software licence information described above, the Authority shall notify the Contractor of the licences it wishes to be transferred, and the Contractor shall provide for the approval of the Authority a plan for licence transfer.

H 11 Knowledge Retention

- H11.1 The Contractor shall co-operate fully with the Authority in order to enable an efficient and detailed knowledge transfer from the Contractor to the Authority on the completion or earlier termination of the Contract and in addition, to minimise any disruption to routine operational requirements. To facilitate this transfer, the Contractor shall provide the Authority free of charge with full access to its Staff, and in addition, copies of all documents, reports, summaries and any other information requested by the Authority. The Contractor shall comply with the Authority's request for information no later than 15 Working Days from the date that that request was made.

I. DISPUTES AND LAW

I 1 Governing Law and Jurisdiction

- I1.1 Subject to the provisions of clause I2 the Contract, including any matters arising out of or in connection with it, shall be governed by and interpreted in accordance with English Law and shall be subject to the jurisdiction of the Courts of England and Wales. The submission to such jurisdiction shall not limit the right of the Authority to take proceedings against the Contractor in any other court of competent jurisdiction, and the taking of proceedings in any other court of competent jurisdiction shall not preclude the taking of proceedings in any other jurisdiction whether concurrently or not.

I 2 Dispute Resolution

- I2.1 The Parties shall attempt in good faith to negotiate a settlement to any dispute between them arising out of or in connection with the Contract within 20 Working Days of either Party notifying the other of the dispute and such efforts shall involve the escalation of the dispute to the finance director of the Contractor and the commercial director of the Authority.
- I2.2 Nothing in this dispute resolution procedure shall prevent the Parties from seeking from any court of competent jurisdiction an interim order restraining the other Party from doing any act or compelling the other Party to do any act.

- 12.3 If the dispute cannot be resolved by the Parties pursuant to clause 12.1 either Party may refer it to mediation pursuant to the procedure set out in clause 12.5.
- 12.4 The obligations of the Parties under the Contract shall not cease, or be suspended or delayed by the reference of a dispute to mediation (or arbitration) and the Contractor and the Staff shall comply fully with the requirements of the Contract at all times.
- 12.5 The procedure for mediation and consequential provisions relating to mediation are as follows:
- (a) a neutral adviser or mediator (the “**Mediator**”) shall be chosen by agreement between the Parties or, if they are unable to agree upon a Mediator within 10 Working Days after a request by one Party to the other or if the Mediator agreed upon is unable or unwilling to act, either Party shall within 10 Working Days from the date of the proposal to appoint a Mediator or within 10 Working Days of notice to either Party that he is unable or unwilling to act, apply to the Centre for Effective Dispute Resolution to appoint a Mediator;
 - (b) the Parties shall within 10 Working Days of the appointment of the Mediator meet with him in order to agree a programme for the exchange of all relevant information and the structure to be adopted for negotiations. If appropriate, the Parties may at any stage seek assistance from the Centre for Effective Dispute Resolution to provide guidance on a suitable procedure;
 - (c) unless otherwise agreed, all negotiations connected with the dispute and any settlement agreement relating to it shall be conducted in confidence and without prejudice to the rights of the Parties in any future proceedings;
 - (d) if the Parties reach agreement on the resolution of the dispute, the agreement shall be recorded in writing and shall be binding on the Parties once it is signed by their duly authorised representatives;
 - (e) failing agreement, either of the Parties may invite the Mediator to provide a non-binding but informative written opinion. Such an opinion shall be provided on a without prejudice basis and shall not be used in evidence in any proceedings relating to the Contract without the prior written consent of both Parties; and
 - (f) if the Parties fail to reach agreement within 60 Working Days of the Mediator being appointed, or such longer period as may be agreed by the Parties, then any dispute or difference between them may be referred to the Courts unless the dispute is referred to arbitration pursuant to the procedures set out in clause 12.6.
- 12.6 Subject to clause 12.2, the Parties shall not institute court proceedings until the procedures set out in clauses 12.1 and 12.3 have been completed save that:
- (a) The Authority may at any time before court proceedings are commenced, serve a notice on the Contractor requiring the dispute to be referred to and resolved by arbitration in accordance with clause 12.7;
 - (b) if the Contractor intends to commence court proceedings, it shall serve notice on the Authority of its intentions and the Authority shall have 21 days following receipt of such notice to serve a reply on the Contractor requiring the dispute to be referred to and resolved by arbitration in accordance with clause 12.7; and
 - (c) the Contractor may request by notice to the Authority that any dispute be referred and resolved by arbitration in accordance with clause 12.7, to which the Authority may consent as it sees fit.
- 12.7 If any arbitration proceedings are commenced pursuant to clause 12.6,
- (a) the arbitration shall be governed by the provisions of the Arbitration Act 1996 and the Authority shall give a notice of arbitration to the Contractor (the “Arbitration Notice”) stating:

- i) that the dispute is referred to arbitration; and
 - ii) providing details of the issues to be resolved;
- (b) the London Court of International Arbitration ("LCIA") procedural rules in force at the date that the dispute was referred to arbitration in accordance with 12.7(b) shall be applied and are deemed to be incorporated by reference to the Contract and the decision of the arbitrator shall be binding on the Parties in the absence of any material failure to comply with such rules;
- (c) the tribunal shall consist of a sole arbitrator to be agreed by the Parties;
- (d) if the Parties fail to agree the appointment of the arbitrator within 10 days of the Arbitration Notice being issued by the Authority under clause 12.7(a) or if the person appointed is unable or unwilling to act, the arbitrator shall be appointed by the LCIA;
- (e) the arbitration proceedings shall take place in London and in the English language; and
- (f) the arbitration proceedings shall be governed by, and interpreted in accordance with, English Law.

SCHEDULE 1 - SPECIFICATION

1. BACKGROUND

- 1.1 The UK maintains a publicly available inventory of pollution from industrial sites and other specified sources. Known as the United Kingdom (UK) Pollutant Release and Transfer Register (PRTR), this is a searchable database providing information on the pollution from a wide range of industrial sites and for 91 pollutants dating back to 2007. It can be accessed [here](#). As an inventory on industrial pollution the data published on the PRTR aims to improve public access to information and to exert a downward pressure on levels of pollution, by providing transparency to the general public on the sources of pollution across the UK. The data also contributes to the National Atmospheric Emissions Inventory (NAEI) and pollutant projections to 2020 and 2030 required by the National Emissions Ceiling Directive (NECD).
- 1.2 The PRTR is an environmental database of potentially hazardous chemical substances and/or pollutants released to air, water and soil, and the transfer of waste off-site for treatment or disposal. It includes data from specific industrial activities, over a certain capacity, and which exceed stated pollutant thresholds. This means that an installation whose details are not shown on the PRTR is either not an industrial activity within scope of the PRTR, is below the capacity threshold for the activity or is below the pollutant specific thresholds. Further detail on the applicable industrial activities, pollutants and thresholds can be accessed [here](#).
- 1.3 The UK is a signatory to the United Nations (UN) Kiev Protocol on PRTR which aims 'to enhance public access to information through the establishment of coherent, nationwide PRTRs'. This international Protocol puts in place a legally binding requirement on the signatories to provide information on pollution sources to members of the public which is web-based, free and accessible always. The UK PRTR website and database are important aspects of the UK Government's implementation of the Kiev Protocol.
- 1.4 Since May 2016, the Kiev Protocol had been ratified by 34 countries and the European Union (EU). The UK PRTR Regulation 166/2006 constitutes UK's response to, and implementation of, the UN Kiev Protocol. Thus, this contract is to deliver the requirements for the UK PRTR to meet UK obligations under the UN Kiev Protocol and to meet UK obligations under Regulation 166/2006.
- 1.5 The E-PRTR Regulation, including any requirements around reporting, was a directly applicable EU law and made operable in UK law following EU exit. However the Environmental Permitting Regulations (EPR) 2016 in England and Wales makes the compilation of an inventory of emissions a function of regulators (even if they are not regulated facilities themselves), and provide regulators with powers to require data from any operator for the purpose of compiling those inventories. There are similar Regulations in Scotland, Northern Ireland and UK offshore waters. Under the UK PRTR the precise way in which the data is gathered and presented is standardised and specified in the UK PRTR Regulation and the implementing decision 2019/1741 (which has been made operable in UK law). UK competent authorities and their operators must provide information on at least the 91 pollutants which are specified in Annex II of the PRTR Regulation (this is more than the 86 listed in the Kiev Protocol), and data on releases to air and water.
- 1.6 Article 5 of the PRTR Regulation imposes an obligation on operators of the specified industrial operations/activities (which are listed in Annex I to the Regulation) to report data on the release of pollutants and waste transfers above a set threshold. This data is then submitted to the competent authority according to the format specified in Annex III to the Regulation on an annual basis (following the calendar year pattern).
- 1.7 Competent authorities have a responsibility to collate and validate the operator's data. In the UK, the competent authorities are the environmental regulators: in England and Wales the Environment Agency (EA) and Natural Resources Wales (NRW) respectively are responsible for the larger, or potentially more polluting, installations. The approximately 400 Local Authorities' (LAs) in England and Wales are the competent authorities for collecting

information from smaller, potentially fewer polluting installations. This responsibility derives from a local authority direction issued by the Authority (Defra) and the Welsh Assembly Government. In Scotland, the Scottish Environmental Protection Agency (SEPA) is the competent authority for all installations. In Northern Ireland, the Department of Agriculture, Environment and Rural Affairs (DAERA) is the competent authority. The Department for Business, Energy and Industrial Strategy (BEIS) is the competent authority for the offshore sector.

- 1.8 Previously under Article 7 of the E-PRTR Regulation, the UK had to supply a national collated report to the European Commission (EC) by electronic transfer, having brought together data from the competent authorities mentioned above. However, since the UK exited from the EU, the PRTR regulation has been made operable in UK law and therefore will continue to compile PRTR data each year. The data reporting requirement was updated through Commission implementing decision 2019/1741 to 11th month following the end of the reporting year annually and published 1 month after 30 November statutory deadline annually.

2. OVERVIEW OF CURRENT DATA COLLECTION AND COLLATION PROCESS

- 2.1 The purpose is to collate, quality assure, and submit data on industrial emissions to enable the UK to meet its statutory obligations under the [Kiev Protocol](#).
- 2.2 The aim of this specification is to continue the activities below (detailed in *Specification of Work Required*) and to continuously improve the tools and processes to ensure continued delivery of the specification of work going forward.
- 2.3 There are currently two websites associated with this work: the publicly accessible UK PRTR website (), and the Local Authority and Natural Resources Wales (NRW) PRTR data management system (), the latter has restricted access to only those with log-in details.
- 2.4 The Contractor shall collate data from all the UK competent authorities (including Local Authorities and NRW directly via the Local Authority and NRW PRTR data management system) and ensures effective data management and processing. This includes data manipulation, data quality assurance, and verification. The Contractor shall work closely with competent authorities to ensure timely submission of data, and to identify and resolve potential data issues at an early stage (i.e. to help competent authorities improve and deliver their own initial validation of the data). In the case of Local Authority data, the Contractor should liaise promptly and work closely with the Authority's PRTR policy official during data submission cycles to ensure the tool can be accessed by operators and Local Authorities. The identification and resolution of potential errors is done directly between the Authority and the Local Authorities, with assistance from the Contractor to inform prompt, targeted solutions.
- 2.5 At least one month before the data for the reporting year is required to be formally submitted, the Contractor will carry out a review of the dataset to identify potential errors. These results should be promptly shared with the Authority's policy lead and the competent authorities to which the error list relates. The competent authorities have an obligation to resolve the identified errors. The review should include:
- 2.5.1 A spreadsheet breakdown of data outliers, significant changes from previous reported data, top twenty facilities for emissions, missing facilities and pollutants. This breakdown should account for variation in data between this reporting year and the last reporting year, against thresholds and activity codes (i.e. has an installation changed activity codes between reporting years). It should also be clear which competent authority is responsible for reviewing the data.
- 2.5.2 An accompanying summary document (maximum 10 pages) highlighting the key messages based on the data from the spreadsheet. This should outline possible errors, omissions, etc. requiring attention and by which competent authority (who may then need to go back to the operators for clarification).

- 2.6 Once the identified data issues have been corrected the Contractor will be required to publish the UK's collated dataset on the UK PRTR website by the end of December, once authorised to do so by the Authority. The data will also need to be submitted to the Authority in a format compatible and compliant with the data quality checks normally in an XML format.
- 2.7 Prior to the Contractor's publication of the data on the UK PRTR website, the Contractor will be required to produce a short analysis document with a suggested length of two pages. This will identify significant differences between the year under report and the previous year, a summary of long-term trends and the associated caveats in the data (e.g., the levels of uncertainty). The analysis should focus on the emissions of oxides of nitrogen (NO_x), sulphur dioxide, particulate matter (PM₁₀), ammonia and volatile organic compounds (VOCs) to air. Emissions of other pollutants to air, to water and changes to the reported hazardous and non-hazardous waste should be included where a significant change between reporting years has been identified. This analysis should be provided three weeks before the submission of the data on UK PRTR.
- 2.8 The competent authorities or the Authority may decide to revisit data submitted from previous years. Therefore, should it be necessary to resubmit data for previous reporting cycles, the Contractor may be required to reprocess data from the 2007 reporting year to the year under report. Reprocessing includes correcting and validating the data, error checking, and conversion of the data to XML in the correct format. Any changes to the data will need to be reflected in the UK PRTR datasets. A maximum of one dataset may need to be re-submitted in one reporting year. If further re-submissions are required these will fall outside the scope of the specification and will be determined on a case-by-case basis by the Authority. The Contractor should, so far as it is within its power, eradicate the need for resubmissions. If data re-submissions are required due to errors caused by the Contractor, this will need to be completed at the responsibility of the Contractor.
- 2.9 The Contractor will be required to keep to data preparation and publication deadlines as agreed with the Authority at the commencement of the contract to ensure the UK continues to meet its international obligations.

3. SPECIFICATION OF WORK REQUIRED

- 3.1 The scope of services related to UK PRTR website and the Local Authority and Natural Resources Wales (NRW) PRTR data management system includes:
- 3.1.1 Host and manage the existing UK PRTR website and the Local Authority and Natural Resources Wales (NRW) PRTR data management system.
- 3.1.2 Update the existing UK PRTR website and the Local Authority and Natural Resources Wales (NRW) PRTR data management system as new requirements emerge from the Authority to satisfy the requirements of the UN Kiev Protocol.
- 3.1.3 Maintain both the UK PRTR website and the Local Authority and NRW PRTR data management system by ensuring that they are fit for purpose, stable, secure (i.e. not hackable), capable of handling significant volumes of internet traffic and (in the case of the UK PRTR website) allow for data searches in a variety of ways including river basins and showing graphic trends (across years and sectors) in relation to pollutant releases and waste transfers.
- 3.1.4 Work within the UK Government Web Guidelines and commit to working flexibly towards meeting new standards and guidance that may come out in the future. Changes and upkeep needed to keep the UK PRTR website and the local authority and NRW PRTR data management system in compliance with the UK government's web guidance are in scope of regular maintenance in this contract. Additional changes to the website, such as new requirements for data collection resulting from policy changes, are outside of the regular maintenance and will be costed as part of the ad-hoc budget. Supplier shall undertake the task of adding in River basin and NUTS codes using the longitudes and latitudes for facilities from the EU Registries for the Competent Authorities. Supplier shall also add in the meta data to Competent Authorities' data sets using the latest EU Registry data sets.

- 3.1.5 Provide regular update maintenance windows to allow corrections and updates to take place on the UK PRTR website. This is required if, for example, rare but urgent changes to the data are required. Supplier shall also address any issues caused by change of personnel within operators and LAs. This may include changing passwords, creating new accounts and unlinking old users from facilities, and checking and approving administrative changes to facilities such as change of company name.
- 3.1.6 To retain and maintain the current filters and searches on the UK PRTR website.
- 3.1.7 Provide re-submissions of additional datasets.
- 3.1.8 Maintain the validation of the Local Authorities data set to reduce the risk of errors'.
- 3.2 If work is required to update the PRTR MS Access template (data transfer utility), which is required by the BEIS, DAERA, EA and SEPA to collate data at a competent authority level and format data into PRTR standards, this will fall outside the specification of this contract and should be an additional piece of work agreed by the Authority with the Contractor.
- 3.3 If work is required to update Visual Basic for Applications (VBA) codes so that information is handled in a certain way, and/or cell, row and column changes, this work will fall outside the specification of this contract and should be an additional piece of work agreed by the Authority with the Contractor.
- 3.4 Output 1: Web hosting, ongoing maintenance, updates and support for the Local Authority and NRW PRTR data management system and the UK PRTR website**
 - 3.4.1 The Contractor will be required to carry out web hosting services for the Local Authority and NRW PRTR data management system and the UK PRTR website, and ensure the two are appropriately linked. The Contractor will be required to follow the UK Government Web Guidelines (please refer to footnote five) and any other guidelines or changes as requested by the Authority.
 - 3.4.2 The Local Authority and NRW PRTR data management system should be maintained to ensure data can continue to be entered accurately and quality assured. The system should allow for appropriate validation of the data prior to National Data Manager sign-off. It should continue to be flexible so that, for example, upgrades or changes to validation criteria and data fields are possible if required. If this work is required, it will fall outside the specification of this contract and should be an additional piece of work agreed by the Authority with the Contractor.
 - 3.4.3 The Contractor will be required to resolve issues raised during the use of the Local Authority and NRW PRTR data management system and the UK PRTR website in a prompt manner taking account of any deadlines specified by the Authority.
 - 3.4.4 The Contractor will be required to review the existing guidance documents, and update where necessary to ensure information is correct and up to date. These documents provide users with support on the workings of the Local Authority and NRW PRTR data management system. This should occur as soon as possible after the contract start date. If updates are required these should be re-published on the tool's landing page and should be downloadable.
 - 3.4.5 Summary of output 1:
 - 3.4.5.1 Web hosting services for the Local Authority and NRW PRTR data management system and the UK PRTR website.
 - 3.4.5.2 Maintain the existing functionality and accessibility of both sites.
 - 3.4.5.3 Resolve issues raised during the use of the Local Authority and NRW PRTR data management system and the UK PRTR website in a timely manner.
 - 3.4.5.4 Review and update the existing guidance documents (where required to ensure correct and up to date) on the workings of the Local Authority and NRW PRTR data management system.

3.5 Output 2: UK PRTR data collation and the annual publication on the UK PRTR register

3.5.1 The Contractor will be required to undertake the following tasks taking full account of the steps outlined in the current data collection and collation process section of the specification:

3.5.1.1 Taking receipt of the current reporting years data sets from competent authorities, including the data from the Local Authority and NRW PRTR data management system .

3.5.1.2 Review validate and quality assure the data once it's been received. For the purposes of this contract the validation checks will also need to comply with the UK PRTR requirements. The results of these checks should be promptly shared with the Authority's policy lead and the competent authorities, to which the error list relates, allowing sufficient time for corrections to be made. The Contractor will be required to update the UK dataset with the corrected data from the competent authorities.

3.5.1.3 In parallel to this the Authority may decide to revisit data submitted from the 2007 reporting year onwards. Therefore, should it be necessary to resubmit data for previous reporting cycles (to address issues highlighted by, Competent Authorities or the Authority), the Contractor will be required to reprocess¹ data from 2007 onwards and ensure timely resubmission to the UK PRTR to ensure the datasets are correct. A resubmission would incorporate any required amendments that competent authorities wish to make, and which have been agreed to be essential for effective data management by the Authority. Please note section 2.8 which details the re-submissions within the scope of this specification.

3.5.1.4 The updated data sets need to be collated into one UK dataset and then submitted to the UK PRTR website once authorised by the Authority.

3.5.2 Summary of output 2:

3.5.2.1 Receive datasets from UK competent authorities and collate into one UK dataset in a timely manner.

3.5.2.2 Undertake suitable validation and quality control of this data, providing a summary report to the applicable competent authorities to action and correct. The UK dataset should be updated following corrections from the competent authorities prior to publication.

3.5.2.3 Reprocess previous reporting years' data for re-submission if required (one resubmission in a calendar year).

3.5.2.4 Publication on the UK PRTR website.

3.6 Output 3: PRTR submission and data re-submission

3.6.1 The Contractor will be required to undertake the following tasks taking full account of the steps outlined in current data collection and collation process section of the specification:

3.6.1.1 Follow the steps in work package 2 which are the same as for UK PRTR data collation and the annual publication on the UK PRTR register.

3.6.1.2 After step 3.5.1.3 the same UK dataset should be ready for submission to the Authority by 21 November annually followed by publishing on UK PRTR within a month after 30 November each year for the duration of the contract.

3.6.1.3 It should be noted that resubmission date of data is not hardwired into the UK PRTR Regulation and could therefore change, or the facility may be withdrawn entirely. The Authority will inform the Contractor when the re-submission windows for UK PRTR are in a timely manner to allow for the steps in section 2.8 to be undertaken.

3.6.2 The dataflows of PRTR and LCP are now integrated including reporting of this data. The Contractor will be required to assist the Authority in answering questions regarding any risks

¹ This includes data validation, error checking, collation into a single MS Access tool as described in 2.8 and publishing the updated dataset on the UK PRTR site.

and issues from an Integrated PRTRLCP data management perspective.

3.6.3 Authority will forward any emails received to the Defra PRTR mailbox. Supplier shall maintain a record of these email requests and act upon these emails to resolve any issues that may be raised. Supplier shall also keep a record of actions taken, seeking clarification from Authority, if required. A record of these actions will be sent to Authority as and when requested.

3.6.4 Summary of Output 3:

3.6.4.1 Undertake the same steps as for PRTR

3.6.4.2 Reprocess previous reporting year's data for re-submission.

3.6.4.3 Send to the Authority for publication on the UK PRTR website.

3.6.4.4 Assist the Authority in understanding the risks and issues from the UK PRTR / LCP data management perspective

3.7 Output 4: Data Quality Assurance for PRTR and Summary Report

3.7.1 The Contractor will be required to ensure the datasets go through suitable data quality assurance and pass the UK validation processes providing a complete and accurate dataset.

3.7.2 As outlined in the current data collection and collation process section of the specification, the Contractor will be required to provide a spreadsheet analysis (accompanied by a summary document) before publication. This spreadsheet analysis should include the following assessments:

3.7.2.1 Changes from the previous year's data (releases and transfers) for each site where these are statistically significant

3.7.2.2 Top 5 sites for each of the UK PRTR 91 pollutants to air and water – including wastewater);

3.7.2.3 Outliers where one or more facilities contribute 30% or more of the national total for releases and transfers wastewater;

3.7.2.4 Top 5 sites for waste transfers - hazardous and non-hazardous;

3.7.3 The quantity of accidental releases as per UK PRTR Regulation Annex I activity. The accidental release of a specific pollutant should be compared with the total pollutant release for a specific medium and activity. Accidental releases which contribute more than 5% of the total should be highlighted.

3.7.4 Relative to the previous reporting year the following should be highlighted

3.7.4.1 Facilities, pollutants (for each medium) and transfers which are no longer reported.

3.7.4.2 Number of facilities reporting per Annex I activity;

3.7.4.3 Comparison of activity codes and INSPIRE ID's (i.e. have any installations changed activity codes and or INSPIRE ID's between years), and

3.7.4.4 The number of pollutant release/transfer reports by pollutant and Annex I activity and the total quantity of releases/transfers in the reporting year and the previous reporting year per, medium and pollutant;

3.7.5 The accompanying summary document should concisely summarise the spreadsheet analysis, highlighting the key messages, issues and potential risks, and outline possible mitigation of the risks going forward (e.g., the possible issue related to misclassification with emissions from sub-sectors identified in the 2016 report). Tables should be used to illustrate potential inconsistencies between activity under report and pollutants reported; improbably high or low figures in reported data using sector trends as a guide; pollutant omissions where knowledge of sector/process dictates that such should not be missing, and facilities which are no longer reporting. The focus of this report should be on what the competent authorities

need to know so that they can remedy potential issues to ensure a credible and accurate UK dataset. The summary document and spreadsheet should be made available by the Contractor to the Authority and competent authorities. Sufficient time should be given to allow the competent authorities to correct the data and for the Contractor to amend the UK dataset before submission.

3.7.6 Finally, the supplier shall be required to produce a short analysis on the most up-to-date UK dataset at the time (as outlined in 2.7), clearly highlighting any associated caveats.

3.7.7 Summary of Output 4

3.7.7.1 The Contractor will be required to ensure the datasets go through suitable data quality assurance and pass the UK validation processes.

3.7.7.2 The Contractor will be required to provide a spreadsheet analysis (accompanied by a summary document) before publication. The focus of this report should be on what the competent authorities need to know so that they can remedy potential issues to ensure a credible and accurate UK dataset. It should be clear which competent authorities will need to act for each issue.

3.7.7.3 Sufficient time should be given to allow the competent authorities to correct the data and for the Contractor to amend the UK dataset before submission.

3.7.7.4 Prior to data submission the Contractor should prepare a short analysis as outlined in 2.7, clearly listing any caveats with the report.

3.8 Output 5: Sulphur content of liquid fuels (SCLF)

3.8.1 The contractor shall provide regular progress reports to the Authority indicating the following information:

3.8.1.1 Extent of fuel user database updates

3.8.1.2 Number of data requests made to fuel users

3.8.1.3 Number of users who have provided gas oil data

3.8.1.4 Number of users who have provided heavy fuel oil data

3.8.1.5 Results to date

3.8.1.6 Any issues arising

3.8.2 The contractor shall report the results of the analysis programme to the Authority's contract manager. The data shall be provided in the same format to that used in previous reporting and include the following details:

3.8.2.1 The name of location of each site, including contact details

3.8.2.2 Date samples taken (month/year)

3.8.2.3 Sample reference i.e., number/laboratory reference

3.8.2.4 Type of samples taken, i.e., gas oil or heavy fuel oil

3.8.2.5 Results of the analysis for sulphur content in the samples taken using the analytical method specified

If such action is taken in response to a breach that is determined by the Authority acting reasonably not to be covered by the obligations of the Contractor under the Contract, then the Contractor shall be entitled to refer the matter to the CCN procedure set out in Schedule 3.
- 6.4 The Contractor shall as soon as reasonably practicable provide to the Authority full details (using such reporting mechanism as may be specified by the Authority from time to time) of such actual, potential or attempted breach and of the steps taken in respect thereof.
