As a separate and independent obligation and liability, the Guarantor irrevocably and unconditionally undertakes to compensate and keep the Buyer compensated on demand against all losses and expenses of whatever nature, whether arising under statute, contract or at common Law, if any obligation guaranteed by the guarantor is or becomes unenforceable, invalid or illegal as if the obligation guaranteed had not become unenforceable, invalid or illegal provided that the guarantor's liability will be no greater than the Supplier's liability would have been if the obligation guaranteed had not become unenforceable, invalid or illegal.

Beneficiary's protections

The Guarantor will not be discharged or released from this Deed of Guarantee by:

- any arrangement made between the Supplier and the Buyer (whether or not such arrangement is made with the assent of the Guarantor)

- any forbearance or indulgence as to payment, time, performance or otherwise granted by the Buyer (whether or not such amendment, termination, forbearance or indulgence is made with the assent of the Guarantor)
- the Buyer doing (or omitting to do) anything which, but for this provision, might exonerate the Guarantor

This Deed of Guarantee will be a continuing security for the Guaranteed Obligations and accordingly:

The Buyer will be entitled to exercise its rights and to make demands on the Guarantor under this Deed of Guarantee as often as it wishes. The making of a demand (whether effective, partial or defective) relating to the breach or non-performance by the Supplier of any Guaranteed Obligation will not preclude the Buyer from making a further demand relating to the same or some other Default regarding the same Guaranteed Obligation.

The Buyer will not be obliged before taking steps to enforce this Deed of Guarantee against the Guarantor to:

- obtain judgment against the Supplier or the Guarantor or any third party in any court
- make or file any claim in a bankruptcy or liquidation of the Supplier or any third party

Any waiver by the Buyer of any terms of this Deed of Guarantee, or of any Guaranteed Obligations, will only be effective if given in writing and then only for the purpose and upon the terms and conditions on which it is given.

Any release, discharge or settlement between the Guarantor and the Buyer will be conditional upon no security, disposition or payment to the Buyer by the Guarantor or any other person being void, set aside or ordered to be refunded following any enactment or Law relating to liquidation, administration or insolvency or for any other reason. If such condition will not be fulfilled, the Buyer will be entitled to enforce this Deed of Guarantee subsequently as if such release, discharge or settlement had not occurred and any such payment had not been made. The Buyer will be entitled to retain this security before and after the payment, discharge or satisfaction of all monies, obligations and liabilities that

are or may become due owing or incurred to the Buyer from the Guarantor for such period as the Buyer may determine.

2. Purpose

ARES have been engaged with the UK Environment Agency (EA) in the exploration of the functionality required to deliver an integrated Cost and Carbon Estimation Tool (CCT) that builds upon and exploits the current state of practise, datasets and knowhow utilised within the EA to deliver Cost and Carbon estimates for the full life of an asset.

A proof of concept (POC) has been undertaken by the EA, ARES and AECOM, the EA technical advisory partner (TAP) for CCT, to confirm the ambition that a single solution was able to generate the wide and varied outcomes needed to support the current and future assets under the control of the EA.

This proposal reflects the matured understanding of the EA requirements and is based on the guidance provided by Martin Overton in his e-mail dated 13th May 2020.

Licenses pricing is for annual leased pricing, ARES has provided both Named User and, where available, concurrent user pricing. Concurrent user license counts are based on a 3 to 1 ratio with named licenses, EA may wish to alter this ratio depending on the usage of differing user communities within the EA.

From the experience of the POC it has been agreed that the work packages needed to deliver a fully functional CCT will be split between the TAP and ARES and a joint activity schedule has been developed between the three parties.

This proposal addresses the activities that ARES will deliver based on our standard commercial solutions with configuration to localise the capability and is to be used as a basis for a formal GCloud contract, mutually created, to deliver software licenses, services and hosting.

All costs shown exclude VAT which will be added at the rate in force at the time of invoicing

3. CCT outline design

The CCT will become the hub of all estimation within the EA for cost and carbon across the asset life cycle. The fidelity of the estimates originated within the CCT will be dependent on the quality of the underlying dataset for resources, productivity and coding structures applied within the estimates. It has been acknowledged that the current data requires improving over time by the collection, contextualisation, normalisation and comparison of data streams from the supply chain, commonly known as benchmarking. This data will come into the EA via the current contractor management solution and be provided to CCT via the CCT data repository.

The following schematic shows our recommended “to be” high level system configuration. This proposed solution needs to be approved by the EA solution design authority to ensure it complies with all aspects of the CCT requirement and the wider EA IT approved architecture and processes. In generating our recommended solution ARES also recognise that a pragmatic approach to delivering CCT may require compromise to comply with the EA expectations around the processes and deployed modules.

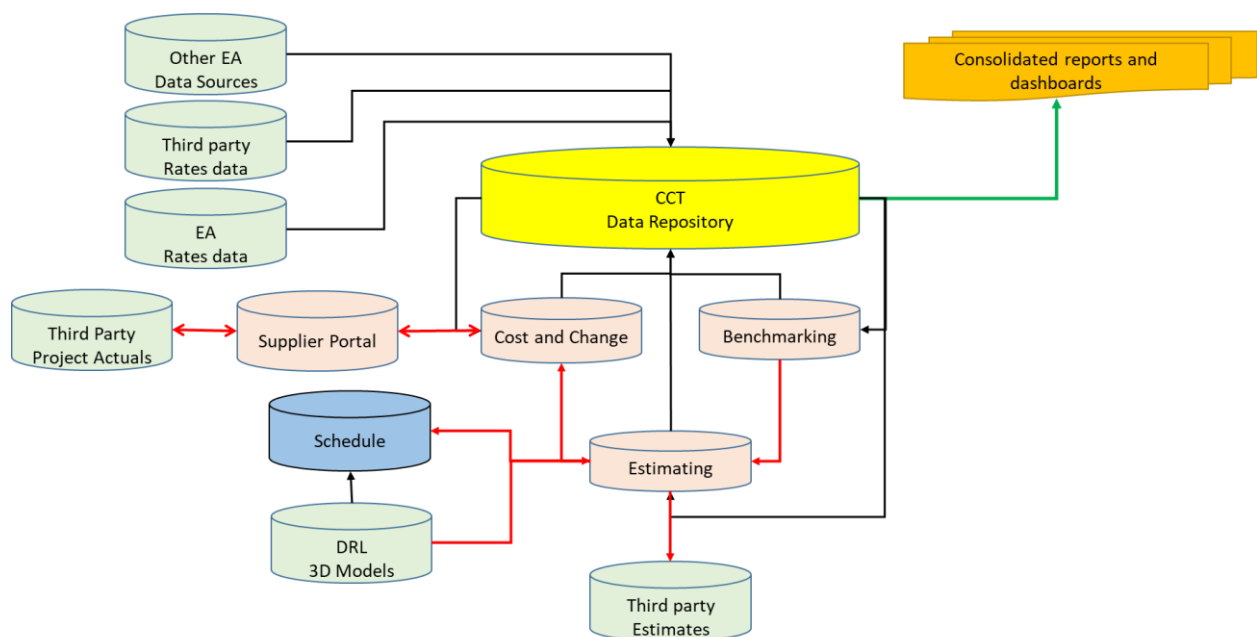

Figure 1 - High Level Schema for ARES CCT – ARES recommended option

The PRISM capability is fully modular to ensure that any investment in software provides value for money. From the learning that has taken place during the proof of concept, ARES have taken every care to include in this proposal only the modules we believe are required to deliver the functionality required to deliver CCT

ARES acknowledges that as the CCT deployment progresses decisions and learning will take place that alters the current understanding of the wider deliverable. The ARES team commits to providing advice at the earliest stage possible should a better value for money approach that can be taken emerges.

3.1. Deployment

Following the agreement of the full business case (FBC) CCT will be rolled out in three phases as follows

- Release 1 – January 31st 2021
- Release 2 – September 2021
- Release 3 – March 2022

There is also potentially an earlier phase of work that sits between the POC and the FBC, in this proposal it is specified in the POC extension section.

ARES understand that activities and their effort will be moved between Releases to ensure the deployment meets the functionality targets for each of the releases as defined the unified project plan.

4. POC Extension

To ensure that Release 1 delivery date can be achieved some activities that ARES need to deliver must be undertaken before the FBC is contracted.

5. Release 1

5.1. Overview

A simplified deployment of the total CCT ecosystem will be delivered in release 1. The wider systemic support for the data sets held within and externally to CCT to support continual process improvement will be delivered in future releases

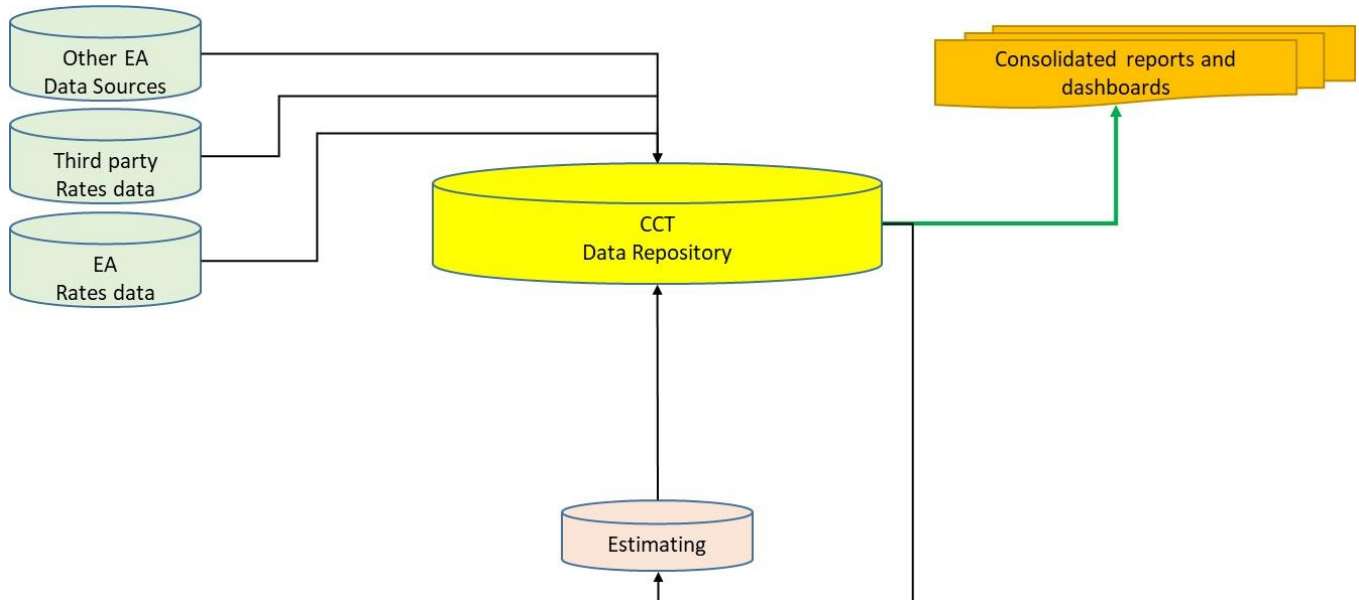

Figure 2 - High Level Schema for CCT – release 1

Release one will deliver a platform for the generation of capital cost and carbon estimates that are suitably matured for use as the basis of a negotiated cost and carbon value for the delivery of an asset.

The estimation maturity cycle will include an approved estimate for each of the main EA gates as well as the negotiated value jointly developed with the delivery partner (supply chain).

In the process of maturing an estimate for the next gate review the estimator will be able to hold multiple revisions of an estimate allowing the capture of all options explored in arriving at the final target setting estimate.

10. Helpdesk and service level agreement

ARES are the single point of contact for the support of the CCT environment and will manage all incidents and issues arising, communications with the ARES delivery partners and have responsibility to find suitable resolutions to each issue within the agreed service level agreement.

10.1.1. Reporting of incidents

During the implementation project, up to the conclusion of release 2 activities issues arising will be reported directly to the ARES delivery team and resolved as part of the implantation project under the direction of the ARES project manager and in conjunction with the EA project manager.

Once release 2 activities are completed CCT will be moved to business as usual (BAU) within the EA IT environment and all issues arising will be reported using the internal EA IT helpdesk. Once recorded and processed by the EA helpdesk any issues that require ARES to address will be emailed to ARES at our dedicated email address EMEASupport@aresprism.com .

10.1.2. Service level agreements

Below is the ARES standard SLA for ARES delivered solutions. ARES commit to reviewing these during release 1 with the EA project manager to ensure they meet the needs of EA once CCT transitions to BAU.

This Service Level Agreement (SLA) should be viewed as the time taken from the completion of a service request in the ARES support portal. For example, in the case of a severity 1 issue being raised the client will receive an initial response within 4 hours; this applies 24 hours per day 7 days per week.

This Service Level Agreement pertains solely to the software products created, maintained, sold, distributed, and supported by ARES. ARES will use all reasonable diligence to correct verifiable and reproducible errors when reported to ARES in accordance with the standard reporting procedures.

Severity Level	Condition	Initial Response	Target Resolution
----------------	-----------	------------------	-------------------

1	A critical component of the system is down or does not function at all, and there is no “work-around” for the problem; a significant number of users are affected, and the production environment is inoperable.	4 hours	1 business day
2	A component of the system is not performing, creating a significant operational impact.	8 hours	1 business day
3	A component of the system is not performing as documented; there are unexpected results; there is no “work-around”; there is moderate or minor operational impact.	24 hours*	1 business day
4	Questions pertaining to usage of the software or clarification of software documentation.	24 hours*	1 business day)
5	Customer offers suggestions or requests for new product features and enhancements.	72 hours*	Suggestion/Request considered for a future Release
