21.1 The Supplier must provide an exit plan in its Application which ensures continuity of service and the Supplier will follow it.

21.2 When requested, the Supplier will help the Buyer to migrate the Services to a replacement supplier in line with the exit plan. This will be at the Supplier's own expense if the Call-Off Contract Ended before the Expiry Date due to Supplier cause.

21.3 If the Buyer has reserved the right in the Order Form to extend the Call-Off Contract Term beyond 36 months the Supplier must provide the Buyer with an additional exit plan for approval by the Buyer at least 8 weeks before the 30 month anniversary of the Start date.

21.4 The Supplier must ensure that the additional exit plan clearly sets out the Supplier's methodology for achieving an orderly transition of the Services from the Supplier to the Buyer or its replacement Supplier at the expiry of the proposed extension period or if the contract Ends during that period.

21.5 Before submitting the additional exit plan to the Buyer for approval, the Supplier will work with the Buyer to ensure that the additional exit plan is aligned with the Buyer's own exit plan and strategy.

21.6 The Supplier acknowledges that the Buyer's right to take the Term beyond 36 months is subject to the Buyer's own governance process. Where the Buyer is a central government department, this includes the need to obtain approval from CDDO under the Spend Controls process. The approval to extend will only be given if the Buyer can clearly demonstrate that the Supplier's additional exit plan ensures that:

22.2 On reasonable notice at any point during the Term, the Supplier will provide any information and data about the G-Cloud Services reasonably requested by the Buyer (including information on volumes, usage, technical aspects, service performance and staffing). This will help the Buyer understand how the Services have been provided and to run a fair competition for a new supplier.

22.3 This information must be accurate and complete in all material respects and the level of detail must be sufficient to reasonably enable a third party to prepare an informed offer for replacement services and not be unfairly disadvantaged compared to the Supplier in the buying process.

23. Force majeure

23.1 Neither Party will be liable to the other Party for any delay in performing, or failure to perform, its obligations under this Call-Off Contract (other than a payment of money) to the extent that such delay or failure is a result of a Force Majeure event.

23.3 Each Party will use all reasonable endeavours to continue to perform its obligations under the Call-Off Contract and to mitigate the effects of Force Majeure. Schedule 1: Services

1. PURPOSE

1.1 The Cabinet Office (the Authority) is looking to establish a single Supplier Contract for the purchase of a Case Management Tool through the G-Cloud 14 Framework. The duration of the Contract will be one (1) year with an option to extend for a further period of two twelve months (1) + (1) year subject to budgetary approval granted on an annual basis. The Contract shall be managed by the Government Cyber Coordination Centre (GC3) within the Cabinet Office.

1.2 GC3 requires a case management tool for managing security events across government. The case management system will enable the GC3 to track, store and report information in a centralised system. It will consolidate all tickets into a central repository to provide a single source of up-to-date information on ongoing cases. Within the case management system, the GC3 operations team will need to log tickets for incidents, threats and vulnerabilities. Once logged the ticket should flow into a triage system to determine the correct course of action needed for ticket resolution.

1.3 The tool should have the ability to send out cross government messages to allow the GC3 to communicate with its customers

1.4 It will need to integrate with external services including a third party OIDC authentication service so that anyone across government can access, including agents.

1.5 Ticket management will be agnostic of organisation and underlying technology. NCSC / GSG / CDDO or others (e.g. Cyber GSeC) could be agents helping to manage tickets but all under the "GC3" brand.

1.6 The tool will need to have the appropriate information handling protocols to be able to store up to and including OFFICIAL Level information.

2. BACKGROUND TO THE CONTRACTING AUTHORITY

2.1 The GC3 is a joint venture between the Government Security Group (GSG), the Central Digital and Data Office (CDDO) and the National Cyber Security Centre (NCSC).

2.2 The GC3 was established as part of the Government Cyber Strategy and aims to enhance Britain's defence and resilience against cyber threats. Through the rapid identification, investigation and coordination of responses to attacks on public sector systems, the GC3 plays a pivotal role in safeguarding critical services and data.

3. BACKGROUND TO THE REQUIREMENT/OVERVIEW OF REQUIREMENT

3.1 The GC3 previously procured and implemented Zendesk software as a case management tool. Since using the tool, the GC3 team identified several discrepancies between what the tool can offer and their core requirements.

3.2 The operations and delivery team have collaborated to elicit, document, and prioritise the key requirements for the new tool, ensuring that we have a comprehensive understanding of our needs.

3.3 Conversations have also been held across government departments to gain further understanding on what similar tools are used within government for both requirement gathering and commercial procurement purposes.

3.4 To achieve their aims of enhancing Britain's cyber resilience, the GC3 requires an effective case management solution in order to document, manage and resolve ongoing cyber threats.

4. DEFINITIONS

Expression or Acronym	Definition
GC3	Government Cyber Coordination Centre
GSG	Government Security Group
CDDO	Central Digital and Data Office
NCSC	National Cyber Security Centre
Cyber GSeC	Government Security Centre for Cyber
OIDC	Open ID Connect; Identity authentication protocol that verifies a user's identity when a user tries to access a protected endpoint.
