- 2.4 The indemnities in Paragraph 2.3 shall not apply to the extent that the Employee Liabilities arise or are attributable to an act or omission of the Replacement Supplier and/or any Replacement Sub-Contractor whether occurring or having its origin before, on or after the Service Transfer Date, including any Employee Liabilities:
 - 2.4.1 arising out of the resignation of any Transferring Supplier Employee before the Service Transfer Date on account of substantial detrimental changes to his/her working conditions proposed by the Replacement Supplier and/or any Replacement Sub-Contractor to occur in the period on or after the Service Transfer Date; or

2.7.3 the situation has not otherwise been resolved

the Replacement Supplier and/or Replacement Sub-Contractor, as appropriate may within five (5) Working Days give notice to terminate the employment or alleged employment of such person.

2.8 Subject to the Replacement Supplier and/or Replacement Sub-Contractor acting in accordance with the provisions of Paragraphs 2.5 to 2.7, and in accordance with all applicable proper employment procedures set out in applicable Law, the Supplier shall indemnify the Replacement Supplier and/or Replacement Sub-Contractor against all Employee Liabilities arising out of the termination of employment pursuant to the provisions of Paragraph 2.7 provided that the Replacement Supplier takes, or shall procure that the Replacement Sub-Contractor takes, all reasonable steps to minimise any such Employee Liabilities.

 - 2.13.7 a failure of the Replacement Supplier or Replacement Sub-Contractor to discharge or procure the discharge of all wages, salaries and all other benefits and all PAYE tax deductions and national insurance contributions relating to the Transferring Supplier Employees identified in the Supplier's Final Supplier Personnel List in respect of the period from (and including) the Service Transfer Date; and

SCHEDULE 3: INSURANCE REQUIREMENTS

1.OBLIGATION TO MAINTAIN INSURANCES

The Supplier shall ensure that each of the Insurances is effective no later than the Commencement Date.
- 1.2 The Insurances shall be maintained in accordance with Good Industry Practice and (so far as is reasonably practicable) on terms no less favourable than those generally available to a prudent Contractor in respect of risks insured in the international insurance market from time to time.
- 1.3 The Insurances shall be taken out and maintained with insurers who are of good financial standing and of good repute in the international insurance market.
- 1.4 The Supplier shall ensure that the public and products liability policy shall contain an indemnity to principals clause under which DFID shall be indemnified in respect of claims made against DFID in respect of death or bodily injury or third party property damage arising out of or in connection with the Services and for which the Supplier is legally liable.

2.GENERAL OBLIGATIONS

- 2.1 Without limiting the other provisions of this Contract, the Supplier shall:
 - 2.1.1 take or procure the taking of all reasonable risk management and risk control measures in relation to the Services as it would be reasonable to expect of a prudent Contractor acting in accordance with Good Industry Practice, including the investigation and reports of relevant claims to insurers;
 - 2.1.2 promptly notify the insurers in writing of any relevant material fact under any Insurances of which the Supplier is or becomes aware; and
 - 2.1.3 hold all policies in respect of the Insurances and cause any insurance broker effecting the Insurances to hold any insurance slips and other evidence of placing cover representing any of the Insurances to which it is a party.

3.FAILURE TO INSURE

- 3.1 The Supplier shall not take any action or fail to take any action or (insofar as is reasonably within its power) permit anything to occur in relation to it which would entitle any insurer to refuse to pay any claim under any of the Insurances.
- 3.2 Where the Supplier has failed to purchase any of the Insurances or maintain any of the Insurances in full force and effect, DFID may elect (but shall not be obliged) following written notice to the Supplier to purchase the relevant Insurances, and DFID shall be entitled to recover the reasonable premium and other reasonable costs incurred in connection therewith as a debt due from the Supplier.

4.EVIDENCE OF POLICIES

- 4.1 The Supplier shall upon the Commencement Date and within 15 Working Days after the renewal of each of the Insurances, provide evidence, in a form satisfactory to DFID, that the Insurances are in force and effect and meet in full the requirements of this Framework Schedule 2. Receipt of such evidence by DFID shall not in itself constitute acceptance by DFID or relieve the Supplier of any of its liabilities and obligations under this Agreement.

5.AGGREGATE LIMIT OF INDEMNITY

- 5.1 Where the minimum limit of indemnity required in relation to any of the Insurances is specified as being "in the aggregate":
 - 5.1.1 if a claim or claims which do not relate to this Contract are notified to the insurers which, given the nature of the allegations and/or the quantum claimed by the third party(ies), is likely to result in a claim or claims being paid by the insurers which could reduce the level of cover available below that minimum, the Supplier shall immediately submit to DFID:
 - (a) details of the policy concerned; and

- (b) its proposed solution for maintaining the minimum limit of indemnity specified; and
- 5.1.2 if and to the extent that the level of insurance cover available falls below that minimum because a claim or claims which do not relate to this Contract are paid by insurers, the Supplier shall:
 - (a) ensure that the insurance cover is reinstated to maintain at all times the minimum limit of indemnity specified for claims relating to this Contract; or
 - (b) if the Supplier is or has reason to believe that it will be unable to ensure that insurance cover is reinstated to maintain at all times the minimum limit of indemnity specified, immediately submit to DFID full details of the policy concerned and its proposed solution for maintaining the minimum limit of indemnity specified.

6. CANCELLATION

- 6.1 The Supplier shall notify DFID in writing at least five (5) Working Days prior to the cancellation, suspension, termination or non-renewal of any of the Insurances.

- 7.2 Except where DFID is the claimant party, the Supplier shall give DFID notice within twenty (20) Working Days after any insurance claim in excess of [REDACTED] relating to or arising out of the provision of the Services or this Contract on any of the Insurances or which, but for the application of the applicable policy excess, would be made on any of the Insurances and (if required by DFID) full details of the incident giving rise to the claim.

- 7.4 Where any Insurance is subject to an excess or deductible below which the indemnity from insurers is excluded, the Supplier shall be liable for such excess or deductible. DFID Supply Partner Code of Conduct

Principles

DFID aims to create an inclusive culture of best practice with the delivery partners with whom it engages and which receive UK taxpayers' funds. All Supply Partners should adhere to the overarching principles of the Supply Partner Code of Conduct (hereafter "the Code").

Overarching Principles for Supply Partners

- ✓ **Act responsibly and with integrity**
- ✓ **Be transparent and accountable**
- ✓ **Seek to improve value for money**
- ✓ **Demonstrate commitment to poverty reduction and DFID priorities¹**
- ✓ **Demonstrate commitment to wider HMG priorities²**

DFID Supply Partner responsibilities

Supply Partners and their subcontractors (delivery chain partners) should ensure they have read and understood the Code and their required compliance level and seek clarification from DFID where necessary. In particular, it is important that the Supply Partners and their subcontractors (delivery chain partners) understand any risks and have systems in place to manage them. The 3 compliance levels are:

Compliance Level 1 - Supply Partners with an individual contract value of £1m or above, or two or more contracts/grants with DFID with a combined value of £5m or above;

Compliance Level 2 - Supply Partners with an individual contract value below £1m, or two or more contracts /grants with DFID with a value of less than £5m;

Compliance Level 3 - Supply Partners with an individual Contract value, or component of a Contract/Grant, with a value below the EU contracting threshold. At this level Supply Partners are required to adhere to the overarching Code principles and recognise, mitigate and manage risks. These Supply Partners will not be monitored against the contractual KPIs.

Scope

This Code forms part of DFID's standard contractual terms and conditions and full compliance and annual verification via a signed declaration, to be found at Annex 1b, is mandatory for contracted Supply Partners.

¹ <https://www.gov.uk/government/organisations/department-for-international-development/about#priorities>

² <https://www.gov.uk/government/organisations/hm-treasury/about#priorities>

Adherence to the Code at the appropriate level is also a requirement for DFID direct and delivery chain Supply Partners in receipt of funding. DFID will monitor Supply Partners in six priority areas as set out below using a set of Key Performance Indicators (KPIs) as referenced in Annex 1a and 1b.

1. Value for Money and Governance

Key Performance Indicators KPI 1 a - c

Value for Money and financial transparency is an essential requirement of all DFID commissioned work. All Supply Partners must seek to maximise development results, whilst driving cost efficiency, throughout the life of commissioned programmes. This includes budgeting and pricing realistically and appropriately to reflect delivery requirements and levels of risk over the life of the programme. It also includes managing uncertainty and change to protect value in the often challenging environments that we work in.

Supply Partners must demonstrate that they are pursuing continuous improvement and applying stringent financial management and governance to reduce waste and improve efficiency in their internal operations and within the delivery chain. DFID expects Supply Partners to demonstrate openness and honesty and to be realistic about capacity and capability at all times, accepting accountability and responsibility for performance along the full delivery chain, in both every-day and exceptional circumstances.

Specific requirements include:

- ✓ Provision of relevant VfM and governance policies and a description of how these are put into practice to meet DFID requirements (e.g. Codes on fraud and corruption, due diligence);
- ✓ A transparent, open book approach, which enables scrutiny of value for money;
- ✓ Strict adherence to all UK and in-country government tax requirements;
- ✓ Processes for timely identification and resolution of issues and for sharing lessons learned which might be requested by DFID at any time.

2. Ethical Behaviour

Key Performance Indicators KPI 2 a- f

DFID Supply Partners and their delivery chain partners act on behalf of the UK government and interact globally with country governments, other aid donors and their delivery partners, many stakeholders including citizens and directly and indirectly with aid beneficiaries. These interactions must therefore meet the highest standards of ethical and professional behaviour in order to uphold the reputation of the UK government.

Arrangements and relationships entered into, whether with or on behalf of DFID, must be free from bias, conflict of interest or the undue influence of others. Particular care must be taken by Supply Partner and delivery chain staff who:

- a) are directly involved in the management of a programme or procurement of services; or
- b) who engage with i) frontline DFID staff ii) other deliverers of aid iii) beneficiaries (of aid)

Where those in a) and b) could be susceptible to undue negative or detrimental influence.

Supply Partners and their delivery chain partners must declare to DFID where there may be instances or allegations of previous unethical behaviour by an existing or potential staff member or where there is a known or suspected conflict of interest. Where a potential or existing staff member has been employed by DFID or the Crown in the preceding two years Supply Partners and their delivery chain partner must provide proof of compliance with the HMG approval requirements under the Business Appointment Rules.

Supply Partners and their delivery chain partners must have the following policies and procedures in place:

- ✓ Development and proof of application and embedding of a Staff Recruitment, Management and Retention policy (which must address circumstances where there may be potential or actual conflict of interest and embedding of a Whistleblowing Policy)
- ✓ Ongoing monitoring of potential or existing personal, business or professional conflict of interest and their mitigation and management
- ✓ Ethical training for every staff member and staff updates in ethical working practices suitable to the development sector (e.g. UN Global Compact principles) including awareness of modern day slavery and human rights abuses
- ✓ Procedures setting out how, staff involved in DFID funded business, can immediately report all suspicions or allegations of aid diversion, fraud, money laundering or counter terrorism finance to the DFID Counter Fraud and Whistleblowing Unit (CFWU) at reportingconcerns@dfid.gov.uk or on +44(0)1355 843747.

3. Transparency and Delivery Chain Management

Key Performance Indicators KPI 3 a – f

DFID requires full delivery chain transparency from all Supply Partners. All direct Supply Partners and their delivery chain partners must adhere to wider HMG policy initiatives including the support and capacity building of micro, small and medium sized enterprises (MSMEs), prompt payment, adherence to human rights and modern slavery policies and support for economic growth in developing countries.

DFID recognises the critical value that downstream delivery partners contribute. Direct Supply Partners must engage their delivery chain partners in a manner that is consistent with DFID's treatment of its direct Supply Partners. This includes, but is not limited to: appropriate pricing of services; fiduciary and financial risk management processes; applying transparent and responsive measures where delivery chain partners underperform against the KPI areas; taking a zero tolerance approach to tax evasion, corruption, bribery and fraud in subsequent service delivery or in partnership agreements. Direct Supply Partners must cascade the principles of the Code throughout their delivery chain to ensure DFID ethical behaviour standards are embedded and maintained.

Specific requirements for direct Supply Partners include:

- ✓ Provide assurance to DFID that the policies and practices of their delivery chain Supply Partners and affiliates comply with the Code;
- ✓ Maintaining and sharing with DFID up-to-date and accurate records of all downstream partners in receipt of DFID funds and/or DFID funded inventory or assets. This should map how funds flow from them to end beneficiaries and identify risks and potential risks along the delivery chain;
- ✓ Ensuring delivery chain partner employees are expressly notified of the DFID 'reporting concerns' mail box³ found on DFID's external website and of the circumstances in which this should be used;
- ✓ Publication of DFID funding data in accordance with the International Aid Transparency Initiative (IATI)⁴
- ✓ Supply Partners shall adhere to HMG prompt payment policy and not use restrictive exclusivity agreements with sub-partners.

³ <https://www.gov.uk/government/organisations/departments-for-international-development/about#reporting-fraud>

⁴ <http://www.aidtransparency.net/>

4. Environmental issues

Key Performance Indicators KPI 4 a – b

DFID Supply Partners must be committed to high environmental standards, recognising that DFID's activities may change the way people use and rely on the environment, or may affect or be affected by environmental conditions. Supply Partners must demonstrate they have taken sufficient steps to protect the local environment and community they work in, and to identify environmental risks that are imminent, significant or could cause harm or reputational damage to DFID.

Commitment to environmental sustainability may be demonstrated by:

- ✓ Formal environmental safeguard policies in place;
- ✓ Publication of environmental performance reports on a regular basis
- ✓ Membership or signature of relevant environmental Codes, both directly and within the delivery chain such as conventions, standards or certification bodies (e.g. the Extractive Industries Transparency Initiative⁵).

5. Terrorism and Security

Key Performance Indicators KPI 5 a – d

DFID Supply Partners must implement due diligence processes to provide assurance that UK Government funding is not used in any way that contravenes the provisions of the Terrorism Act 2000, and any subsequent regulations pursuant to this Act.

DFID Supply Partners must maintain high levels of data security in accordance with the Data Protection Act 1998 and any subsequent regulations pursuant to this Act, or new Act and with the General Data Protection Regulation (Directive 95/46/EC).

Specific requirements:

- ✓ Development and proof of application and embedding of a comprehensive Terrorism and Security Policy
- ✓ Development and proof of application and embedding of personal data processing processes within a Data Protection Policy
- ✓ DFID Supply Partners must safeguard the integrity and security of their IT and mobile communications systems in line with the HMG Cyber Essentials Scheme⁶. Award of the Cyber Essentials or Cyber Essential Plus badges would provide organisational evidence of meeting the UK Government-endorsed standard;
- ✓ All DFID Supply Partners who manage aid programmes with a digital element must adhere to the global Principles for Digital Development⁷, which sets out best practice in technology-enabled programmes
- ✓ Ensure that DFID funding is not linked to terrorist offences, terrorist activities or financing.

6. Safeguarding, Social Responsibility and Human Rights

Key Performance Indicators: KPI 6 a – d

Safeguarding, social responsibility and respect for human rights are central to DFID's expectations of its Supply Partners. Supply Partners must ensure that robust procedures are adopted and maintained to eliminate the risk of poor human rights practices within complex delivery chain environments funded by DFID. These practices include

⁵ <https://eiti.org/>

⁶ <https://www.gov.uk/government/publications/cyber-essentials-scheme-overview>

⁷ <http://digitalprinciples.org/>

sexual exploitation, abuse and harassment; all forms of child abuse and inequality or discrimination on the basis of race, gender, age, religion, sexuality, culture or disability. Supply Partners must place an emphasis on the control of these and further unethical and illegal employment practices, such as modern day slavery, forced and child labour and other forms of exploitative and unethical treatment of workers and aid recipients. DFID will expect a particular emphasis on the management of these issues in high risk fragile and conflict affected states (FCAS), with a focus on ensuring remedy and redress if things go wrong.

Specific requirements:

- ✓ Development and proof of application and embedding of a Safeguarding Policy;
- ✓ Delivery of Social Responsibility, Human Rights and Safeguarding training throughout the delivery chain;
- ✓ Compliance level 1 Supply Partners must be fully signed up to the UN Global Compact⁸;
- ✓ Practices in line with the International Labour Organisation (ILO) 138⁹ and the Ethical Trading Initiative (ETI) Base Code¹⁰ are to be encouraged throughout the delivery chain;
- ✓ Policies to embed good practice in line with the UN Global Compact Guiding Principles 1 & 2 on business and human rights throughout the delivery chain are required, as detailed in Annex 2;
- ✓ Compliance level 1 Supply Partners to submit a Statement of Compliance outlining how the organisation's business activities help to develop local markets and institutions and further how they contribute to social and environmental sustainability, whilst complying with international principles on Safeguarding and Human Rights labour and ethical employment, social inclusion and environmental protection;
- ✓ Overarching consideration given to building local capacity and promoting the involvement of people whose lives are affected by business decisions.

UN Global Compact – Human Rights

Principle 1: businesses should support and respect the protection of internationally proclaimed Human Rights

Principle 2: businesses should ensure they are not complicit in Human Rights abuse

Organisations should do this by giving attention to vulnerable groups including women, children, people with disabilities, indigenous groups, migrant workers and older people.

Organisations should comply with all laws, honouring international standards and giving particular consideration to high risk areas with weak governance.

Examples of how suppliers and partners should do this are set out below:

In the workplace

- by providing safe and healthy working conditions
- by guaranteeing freedom of association
- by ensuring non-discrimination in personnel practices
- by ensuring that they do not use directly or indirectly forced labour or child labour
- by providing access to basic health, education and housing for the workers and their families, if these are not provided elsewhere
- by having an affirmative action programme to hire victims of domestic violence
- by making reasonable accommodations for all employees' religious observance and practices

In the community

- by preventing the forcible displacement of individuals groups or communities
- by working to protect the economic livelihood of local communities
- by contributing to the public debate. Companies interact with all levels of government in the countries where they operate. They therefore have the right and responsibility to express their views on matters that affect their operations, employees, customers and the communities of which they are a part
- through differential pricing or small product packages create new markets that also enable the poor to gain access to goods and services that they otherwise could not afford
- by fostering opportunities for girls to be educated to empower them and also helps a company to have a broader and more skilled pool of workers in the future, and
- perhaps most importantly, a successful business which provides decent work, produces quality goods or services that improve lives, especially for the poor or other vulnerable groups, is an important contribution to sustainable development, including human rights
- If companies use security services to protect their operations, they must ensure that existing international guidelines and standards for the use of force are respected

The first part of the paper discusses the importance of the research and the objectives of the study. It then moves on to a literature review, which examines the existing research on the topic. The next section describes the methodology used in the study, including the data sources and the statistical techniques employed. The results of the study are then presented, followed by a discussion of the findings and their implications. Finally, the paper concludes with a summary of the key points and suggestions for future research.

The research was conducted using a quantitative approach, with data collected from a large sample of participants. The results show a significant positive correlation between the variables studied, which is consistent with the findings of previous research. However, there are some limitations to the study, and further research is needed to explore the underlying mechanisms and to test the findings in different contexts.

In conclusion, the study provides valuable insights into the relationship between the variables and highlights the need for further research in this area. The findings have important implications for practice and policy, and the results suggest that the relationship is robust and generalizable.

The first part of the paper discusses the importance of the research and the objectives of the study. It then presents a literature review of the existing research on the topic. The second part of the paper describes the methodology used in the study, including the data collection and analysis techniques. The third part of the paper presents the results of the study, and the fourth part discusses the implications of the findings.

The study was conducted using a quantitative research design. Data was collected from a sample of 100 participants. The data was then analyzed using statistical software. The results of the study show that there is a significant relationship between the variables being studied.

The findings of the study have several implications. First, they suggest that the research is valid and reliable. Second, they suggest that the research can be used to inform policy and practice. Finally, they suggest that the research can be used to guide future research.

In conclusion, the study has shown that there is a significant relationship between the variables being studied. The findings of the study have several implications, including that the research is valid and reliable, that the research can be used to inform policy and practice, and that the research can be used to guide future research.

1. About DFID

- 1.1. DFID's mission is to help eradicate poverty in the world's poorest countries and this is underpinned by our set of values:
 - 1.1.1. Ambition and determination to eliminate poverty
 - 1.1.2. Ability to work effectively with others
 - 1.1.3. Desire to listen, learn and be creative
 - 1.1.4. Professionalism and knowledge
- 1.2. DFID is procuring the services of the Supplier, who embraces the above values, demonstrates competence in defined areas and shows Corporate Social Responsibility by taking account of economic, social and environmental factors. These practices, whether operated locally, regionally or internationally, also comply with International Labour Organisation (ILO) core standards on labour and social matters.

2. Introduction

- 2.1. India is set to become the world's youngest country by 2020 with an average age of 29, with 28% of the world's workforce; however there is a huge skill gap with only one in twenty workers formally skilled as compared to seven out of ten in the UK and eight out of ten in Japan. An estimated ~ 400 million people in India need to be skilled by 2022; over 100 million youth joining the workforce and 300 million of the existing workforce.
- 2.2. 30% of the labour force in India is not literate, 25% is educated up to Primary, 18% up to Middle and another 12% up to Secondary level. Only about 2% of the workforce in India has any vocational training. While the government along with other agencies is in the process to incentivize students to enrol in higher education and vocational training, resilient employability solutions continue to be elusive.
- 2.3. The Indian Labour Market is largely informal: Formal workforce in organized sector constitutes only about 8% of Indian labour force (producing 40% of GDP), while the rest is largely unorganized (60% rural and rest about 32% urban).¹
- 2.4. Only one in three workers are women and this ratio is in decline, contrary to the trends in most developing countries. Having achieved gender parity in primary and secondary education, more girls are ready to join the workforce. There is access to new technology (mobiles & internet etc.) and better laws and programmes for women. Yet there is very low labour force participation (<30%), largely in low-end informal, high risk work. High levels of violence (home, work, public) negatively impact opportunities and decisions. Fewer girls born will further skew future labour markets.

- 2.5. Skills Gap: Less than 10% of India's workforce has any vocational training². Around 12 million people are expected to join the workforce every year over the next decade, yet India only has a total training capacity for around 4.3 million³ per year.
- 2.6. Moreover, evidence suggests a serious gap between the output of existing skill development institutions and industry requirements. For example, out of around 0.4 million engineering students graduating every year in India, only 20% are readily employable. As a result, by 2020 India is expected to face a shortage of 13 million medium-skilled workers, posing a big impediment to labour-intensive and other sectors⁴.
- 2.7. 67% of employers in India struggle to find workers that meet their requirements⁵. The National Skill Development Corporation (NSDC) projects an incremental requirement of 347 million personnel (skilled as well as unskilled) in 21 high growth sectors by 2022⁶. Tackling this skill shortage is vital not just for entrepreneurship and economic growth, but also for poverty reduction, particularly amongst women whose labour force participation is only 29%, compared with 80% for men⁷.
- 2.8. The Government of India has set a target of training 500 million people by 2022. Achieving this will require integrated delivery at State level, industry participation, establishing quality standards, developing a pool of trainers, integrating skills with education and the inclusion of women and the informal sector⁸.
- 2.9. Lack of Apprenticeships: Apprenticeship training is one of the most efficient ways to develop skilled manpower for formal sector industry by using training facilities available in the establishments without putting undue burden on exchequer to set up training infrastructure. India has a well-developed apprenticeship system supported by legislative & administrative arrangements. There is potential to provide training to about 7 million people through apprenticeships with central and state public sector undertakings and other micro, small and medium enterprises. However, the uptake as of now is about 300,000 only. The main reasons for low uptake is that the entire responsibility lies with the employer, there is lack of basic training facilities, lack of participation from state governments and difficulties of administration. The government has recently brought about sweeping reforms (e.g. introducing optional trades) and provided budgetary support to promote Apprenticeships (through the National Apprenticeship Promotion Scheme), but these have yet to be implemented in any depth.
- 2.10. At the same time, India also faces the challenge of job creation. Research by the Asian Development Bank suggests that in India: (i) very small establishments seem unable / incapable of expanding, i.e., the transition from a micro enterprise to a small enterprise seems difficult; and (ii) the transition from small- to medium-size also seems difficult. As a result the

Indian economy is characterised by a heavy preponderance of very small enterprises and a “missing middle” in comparison with other middle income countries in the Asia and Pacific region. This not only impedes growth, but also productivity, since a wide range of literature finds both average wages and labour productivity to be much lower in small firms compared to large firms⁹. Labour productivity in India is around \$3,000 per employee per year; in the United States it is around \$155,000¹⁰.

- 2.11. Potential: India is poised to become the world’s youngest country by 2020, with an average age of 29 years, and account for around 28% of the world’s workforce¹¹. Overcoming the skills and productivity constraint will help unlock this demographic dividend and drive global growth and prosperity over the next decades.
- 2.12. Even international companies, including from the UK operating in India will benefit from the improved labour supply: 1 in 20 jobs in the formal Indian economy are created by UK companies, largely in higher skilled sectors¹². UK companies are also keen to put their CSR funds in the skills sector. They spend 4.4% of profits on Corporate Social Responsibility. The growth of India’s vocational education sector will also present commercial opportunities.
- 2.13. The **skills ecosystem** is rapidly evolving and scaling up in India in order to achieve the ambitious skilling targets.
 - 2.13.1. A separate Ministry for Skill Development and Entrepreneurship (MSDE) was established in 2014 at the centre in India to help roll out skilling initiatives at scale as well as to bring together and coordinate existing long term and short term skilling activities.
 - 2.13.2. The government announced the Prime Minister’s skill development scheme (Pradhan Mantri Kaushal Vikas Yojna) in 2016 with an aim to benefit 10 million youth over four years. A National Skill Development Agency (NSDA) has been set up as an autonomous body under MSDE. It anchors the National Skill Qualifications Framework and allied quality assurance mechanisms (including e.g. assessment and certification processes) for synergizing skill initiatives in the country).
 - 2.13.3. The National Skills Development Corporation (NSDC), tasked with training about 30% of the targeted 500m people through private sector training providers, now works as an autonomous institution under MSDE. NSDC with its 160 training partners and 1,722 training centres has so far trained around 3.5m persons across India.

- 2.13.4. 38 Sector Skills Councils have been put in place and are being supported by the ministry. They create Occupational Standards and Qualification bodies, develop competency framework, conduct Train the Trainer Programs, conduct skill gap studies and Assess and Certify trainees on the curriculum aligned to National Occupational Standards developed by them. The work of Sector Skills Councils is currently under review.
- 2.13.5. A National Skill Development Fund was set up in 2009 by the Government of India for raising funds both from Government and Non-Government sectors for skill development in the country. Till 31 March 2015, NSDF had released INR. 2333 crore to NSDC towards skill development programmes including National Skill Certification and Monetary Reward Scheme (STAR) and UDAAN Scheme.
- 2.13.6. Substantial work is also happening at state level e.g. state skill development missions have been set up to roll out skilling schemes (centre + state) in mission mode. In all this the role of the private sector is central.
- 2.14. India's National policy for Skill Development and Entrepreneurship 2015, seeks international collaborations for exchange programmes and capacity building to leverage best practices from across the world. It encourages foreign governments, corporate and agencies to set up skill centres and universities as well as participate in content creation, design of curricula and delivery of training. The role of the private sector is considered central - in setting up the skills system as well as in delivery. Policy steps taken so far include:
- 2.14.1. Alignment of all 40 Sector Skills Councils to SSC Transition 2.0 in 2016 focussing more on accountability, bringing in sectoral expertise from across the world;
- 2.14.2. Common Cost Norms for unified training costs across the country amended in 2016;
- 2.14.3. Flagship training programs like Pradhan Mantri Kaushal Vikas Yojana (PMKVY) launched;
- 2.14.4. Setting up of PM Kaushal Kendras (PM Skilling centres). Budget 2017 has proposed extension of these centres to 600 districts and setting up of 100 International Skilling centres.
- 2.15. In India ~ 0.02-0.03 million trade apprentices undergo apprenticeship training in about 30,000 establishments under the Apprentices Act, 1961 – which is only ~ 2-3% of the annual labour force. In light of this context, apprenticeship has emerged as one of the priority areas for the Ministry with focus reiterated through an amended policy in 2016 and implementation guidelines which are evolving.

- 2.16. It is evident that Skills development has the potential to deliver strong poverty reduction as well as growth benefits. Success of a number of mission initiatives in the country such as ‘Make in India’ ‘Digital India’ ‘Smart Cities’ and ‘Start-up India is dependent on “Skill India Mission”
- 2.17. The emerging skills landscape in India provides wide opportunities for development cooperation that can herald joint prosperity. During her visit to India in November 2016, Prime Minister May announced a new commitment of up to £12 million to support India’s Skill India mission. Technology transfer from the UK will facilitate international training standards in up to 5 sectors including apprenticeships and certification.
- 2.18. DFID India’s “Skills for Jobs” project has been operational as a technical assistance project since 2014.
- 2.19. The project has helped, amongst other things, in:
- 2.19.1. Training over 30,000 youths through pilot trainings (of which over 30% women)
 - 2.19.2. Providing Recognition of Prior Learning (RPL) training, benefitting more than 10,000 construction workers in the unorganized sector
 - 2.19.3. Capacity building of M.P.(Madhya Pradesh) and Jharkhand State Skill Development Missions helping them design and launch state specific skilling schemes, enter into flexi MoUs with industries, establish an Entrepreneurship Development Cell, pilot digital initiatives and online examination of vocational training
 - 2.19.4. Capacity building of two sector skills councils (Foods and Handicrafts) helping them develop their business plans, train staff, set up operating policies and enter into international partnerships
 - 2.19.5. Implementation of Gol’s flagship schemes (such as the Din Dayal Upadhyaya Grameen Kaushal Yojna) by helping them develop/improve their partner selection processes, monitoring systems, labour demand MIS, draft standards and operations policies, training provider compliance audits
 - 2.19.6. Scaling up of National Apprenticeship Promotion Scheme (NAPS) along through communication and industry engagement support including UK businesses participation in the scheme.
 - 2.19.7. Galvanising the support of private sector for Skill Development, including through their CSR (Corporate Social Responsibility) initiatives

- 2.19.8. Undertaking a preliminary mapping exercise (currently underway) to help identify institutions for possible partnerships in support of this TA.
- 2.19.9. Organising pilots (e.g. pilot activities in the aerospace and aviation sector) and learning sessions on UK models of assessment in partnership with UK Sector Skills Council, for potential replication by India

3. Next Steps – the implementation of scale up phase of DFID India’s Skills for Jobs Programme

- 3.1. Building on the achievements of the current project and the results above, the UK is providing further Technical Assistance over the next four years (2019-2022) for a new skill development programme by supporting both public and private entities and building a skills ecosystem that sets standards and regulates quality.

8.1.1 Knowledge and documents transfer from the current supplier

8.1.2 Attending introductory meetings with current recipients of TA services

8.2 Inception Phase Deliverables

Building upon those proposed in tender, the deliverables for the **Inception Phase** will include the following:

8.2.1 **Management proposal** - sets out how the programme will be managed including proposed criteria for selection of activities; documentation required to secure approval of activities; coordination with DFID, etc.

8.2.2 **Performance management agreement** - details specific metrics and targets at impact, outcome & output levels along with key performance indicators.

8.2.3 **Monitoring and Evaluation Plan** - sets out how we will measure progress on the outputs/Impact/ Outcome outlined in a log-frame. The final six months of the fourth year of the project will be used to wind up and close the project. Due to the long duration of the programme, the contract will have adequate provision for variation to adapt to changes that occur during the life of the programme, keeping the original scope of works tendered intact.

8.4 **Reviewing Sustainability of TA outcomes**

8.4.1 This phase will begin after the end of the implementation phase and will be used to review whether the indicators of sustainable institutional capacity have been achieved. The activities required to be delivered to fulfil milestones 3-14 will be agreed in advance each year in the form of an annual workplan, with progress checked every quarter against the annual workplan. Milestones 16-35 are also part-defined. Milestones 16-35 have specified indicators which will form the basis of the various tests that will be required to be satisfied in order to consider these milestones fulfilled. During Inception, DFID and the Supplier will agree precise metrics with quantitative

and qualitative factors to be satisfied for milestones 16-35.

- 9.2 The Supplier should submit clear budget breakdowns and the make-up of the fees and expenses linked to deliverables as per the proforma cost template.

Indicators will be agreed with DFID at Inception, to help link payment to sustainable achievement of project outputs regarding sustainable capacity building including verification of indicators. These indicators will be recorded in the annual workplans
- 9.4 The Supplier will be responsible for financial administration of the allocated funds as per the contract.
- 9.5 The Supplier will use its own resources for the implementation of this contract; payments by DFID will be on reimbursement basis subject to satisfactory completion of deliverables. It should have adequate accounting and audit mechanisms in place and ensure the same down the chain.
