LEVEL 4 MRO FORECAST OF ACTIVITY

Forecast of Service: Annual load by platform (range of potential values and single figures of highest confidence)														
Warrior platforms will undergo a number of standard base overhauls between 2014 and 2018. Pre-CSP base overhauls will follow between 2017 and 2022, prior to CSP conversions conducted by Lockheed Martin. The nature of these base overhauls will be defined by Lockheed Martin, following the confirmation of the CSP specifications.														
Platforms with zero entries for the life of the SPC are within scope of the SPC but have no funded Level 4 MRO activity planned before Year 10.														
Single values of highest confidence are included in red. This does not represent any commitment to the single values for Years 3-10.

Forecast of Service: Annual load by sub-system type														
The table below contains items which undergo Level 4 repair activity. The sub-systems for Armoured Vehicles represent activity independent to that covered by the base overhaul or economic base repair of the vehicle structure. Line items with zero forecasts are within scope of the SPC but have no Level 4 repair activity planned at present for the duration of the SPC.
