2. How to manage the insurance

- 2.1 Without limiting the other provisions of this Contract, the Supplier shall:

2. Supplier's Obligations

- 2.1 The Supplier must, throughout the Contract Period, identify new or potential improvements to the provision of the Deliverables with a view to reducing the Buyer's costs (including the Charges) and/or improving the quality and efficiency of the Deliverables and their supply to the Buyer.
- 2.2 The Supplier must adopt a policy of continuous improvement in relation to the Deliverables, which must include regular reviews with the Buyer of the Deliverables and the way it provides them, with a view to reducing the Buyer's costs (including the Charges) and/or improving the quality and efficiency of the Deliverables. The Supplier and the Buyer must provide each other with any information relevant to meeting this objective.
- 2.3 In addition to Paragraph 2.1, the Supplier shall produce at the start of each Contract Year a plan for improving the provision of Deliverables and/or reducing the Charges (without adversely affecting the performance of this Contract) during that Contract Year ("**Continuous Improvement Plan**") for the Buyer's Approval. The Continuous Improvement Plan must include, as a minimum, proposals:
- 2.3.1 identifying the emergence of relevant new and evolving technologies;
 - 2.3.2 changes in business processes of the Supplier or the Buyer and ways of working that would provide cost savings and/or enhanced benefits to the Buyer (such as methods of interaction, supply chain efficiencies, reduction in energy consumption and methods of sale);

- 2.4 The initial Continuous Improvement Plan for the first (1st) Contract Year shall be submitted by the Supplier to the Buyer for Approval within one hundred (100) Working Days of the first Order or six (6) Months following the Start Date, whichever is earlier.

- 2.5 The Buyer shall notify the Supplier of its Approval or rejection of the proposed Continuous Improvement Plan or any updates to it within twenty (20) Working Days of receipt. If it is rejected then the Supplier shall, within ten (10) Working Days of receipt of notice of rejection, submit a revised Continuous Improvement Plan reflecting the changes required. Once Approved, it becomes the Continuous Improvement Plan for the purposes of this Contract.
- 2.6 The Supplier must provide sufficient information with each suggested improvement to enable a decision on whether to implement it. The Supplier shall provide any further information as requested.
- 2.7 If the Buyer wishes to incorporate any improvement into this Contract, it must request a Variation in accordance with the Variation Procedure and the Supplier must implement such Variation at no additional cost to the Buyer or CCS.
- 2.8 Once the first Continuous Improvement Plan has been Approved in accordance with Paragraph 2.5:
- 2.8.1 the Supplier shall use all reasonable endeavours to implement any agreed deliverables in accordance with the Continuous Improvement Plan; and
 - 2.8.2 the Parties agree to meet as soon as reasonably possible following the start of each quarter (or as otherwise agreed between the Parties) to review the Supplier's progress against the Continuous Improvement Plan.
- 2.9 The Supplier shall update the Continuous Improvement Plan as and when required but at least once every Contract Year (after the first (1st) Contract Year) in accordance with the procedure and timescales set out in Paragraph 2.3.
- 2.10 All costs relating to the compilation or updating of the Continuous Improvement Plan and the costs arising from any improvement made pursuant to it and the costs of implementing any improvement, shall have no effect on and are included in the Charges.
- 2.11 Should the Supplier's costs in providing the Deliverables to the Buyer be reduced as a result of any changes implemented, all of the cost savings shall be passed on to the Buyer by way of a consequential and immediate reduction in the Charges for the Deliverables.
- 2.12 At any time during the Contract Period of the Call-Off Contract, the Supplier may make a proposal for gainshare. If the Buyer deems gainshare to be applicable then the Supplier shall update the Continuous Improvement Plan so as to include details of the way in which the proposal shall be implemented in accordance with an agreed gainshare ratio.

Call-Off Schedule 20 (Call-Off Specification)

This Schedule sets out the characteristics of the Deliverables that the Supplier will be required to make to the Buyers under this Call-Off Contract.

1. Introduction and Background

BEIS is seeking to appoint financial advisors to support the Carbon, Capture, Usage and Storage (CCUS) programme.

The successful Tenderer will:

- Support the design of work within the CCUS programme to enable deployment of 'clusters' between the mid-2020s and 2030 (further detail below);
- Provide advisory support on commercial and financial considerations for CCUS business models and implications for associated policy development;
- Provide advisory support on potential commercial engagement with CCUS projects and developers.

CCUS is one of many technologies being implemented to meet the UK's commitment to the 2050 Net Zero emissions target. The UK aims to be a global leader in CCUS and create opportunities for UK businesses both domestically and globally.

CCUS will help to decarbonise industry, generate low carbon power, and enable the production of low carbon hydrogen at scale, which can enable decarbonisation across the energy system. CCUS also has the potential to extend the development of Bioenergy with Carbon Capture and Storage (BECCS), Direct Air Carbon Capture and Storage (DACCS) as well as other key negative emission technologies (NETs).

The aim of the CCUS programme is to facilitate the low carbon transformation of the UK's industrial base via the creation of 'clusters' of industrial, power and hydrogen projects around transport and storage (T&S) infrastructure. The Prime Minister's Ten Point Plan commits to facilitating the deployment of two clusters by the mid-2020s and a further two clusters by 2030. At present, industry currently accounts for approximately one quarter of UK emissions, with more than two thirds of industrial emissions arising from a small number of energy intensive industries.

The government's commitment to enabling the first CCUS clusters to be commissioned from the mid-2020s has resulted in the establishment of separate commercial business models for: (1) Power CCUS; (2) Industrial CCUS; (3) Transport & Storage; (4) Hydrogen.

Cluster Sequencing, Funding & Business Models

Carbon capture, usage, and storage (CCUS) is essential for meeting the UK's Net Zero targets. BEIS analysis suggests that between 80 and 160 MtCO₂/year of CO₂ will need to be stored annually by 2050. To put the UK on the pathway to achieving this, the Ten Point Plan commits to facilitating the deployment of CCUS in two industrial clusters by the mid-2020s and a further two clusters by 2030, with a targeted total storage of 10MtCO₂/year. The Government has also committed to enabling the deployment of a CCUS power station to be operational by 2030, supported by consumer subsidies, as well as enabling up to 5GW of hydrogen production, to be supported by the £240m Net Zero Hydrogen Fund (NZHF).

A cluster sequencing process began in 2021 which will seek to sequence the deployment of clusters in a way that is consistent with the 10 Point Plan. The cluster sequencing process will allocate a package of support to projects within the clusters that are sequenced for deployment in mid 2020s, made up of:

- A proportion of the CCS Infrastructure Fund (CIF) of c.£1bn which will provide capital funding for both Transport & Storage (T&S) and Industrial Carbon Capture (ICC);
- A proportion of NZHF, which will support a twin-track approach of supporting both CCUS-enabled 'blue' and electrolytic 'green' hydrogen production facilities;
- CCUS business models for T&S, ICC, and power as well as business models for low carbon hydrogen. Work on the detail of these models continues to progress in collaboration with the sector. Updates to these business models are available here:
<https://www.gov.uk/government/publications/carbon-capture-usage-and-storage-ccus-business-models>
- The Industrial Decarbonisation and Hydrogen Revenue Support scheme (IDHRS) mechanism, which will provide operational expenditure/funding support to ICC and blue hydrogen projects.

Phase 1 of the cluster sequencing process was launched in May. Through this process government aimed to identify at least two CCUS clusters whose readiness suggests they are most naturally suited to deployment in the mid-2020s, as part of our efforts to identify and support a logical sequence of deployment for CCUS projects in the UK. We refer to these initial clusters as 'Track-1'.

During October 2021, BEIS announced that HyNet and East Coast Clusters have been confirmed as Track-1 clusters for the mid-2020s and will be taken forward into Track-1 negotiations.¹ If the clusters represent value for money for the consumer and

the taxpayer then subject to final decisions of Ministers, they will receive support under the government's CCUS Programme.

BEIS also announced the Scottish Cluster as a reserve cluster if a back-up is needed. A reserve cluster is one which met the eligibility criteria and performed to a good standard against the evaluation criteria. As such, we will continue to engage with the Scottish Cluster throughout Phase-2 of the sequencing process, to ensure it can continue its development and planning. This means that if government chooses to discontinue engagement with a cluster in Track-1, we can engage with this reserve cluster instead.

In Phase 2, government will select projects, within provisionally sequenced clusters, that it will support. The project selection process will commence shortly after Phase 1 cluster selection process. Potential capture projects across power, industrial and hydrogen CCUS will be asked to submit funding proposals to connect to the T&S networks of clusters provisionally sequenced onto Track 1. The actual funding allocated to each cluster and project will be decided through a series of negotiations between BEIS and developers. Phase 2 launched on 8 November 2021.

It is vital that the project team can work well with the technical/engineering and legal advisors on CCUS, who are contracted separately. The advisors appointed under this procurement will be responsible for coordinating work with the other advisory functions when required. It is not anticipated that this will be a frequent occurrence.

3. Contract Structure & Dual Sourcing

The Authority will appoint a Primary Supplier for this requirement, and also an additional Secondary Supplier. The appointment of these suppliers will be according to the ranking of the scores they achieve during tender evaluation. That is to say the supplier with highest score will be appointed as the Primary Supplier, and the supplier with the second highest score will be appointed as the Secondary Supplier.

All work that is required by the Authority under this requirement will be offered first to the Primary Supplier. If the Primary Supplier is unable to fulfil the requirement because it:

1. Has a conflict of interest that cannot be sufficiently mitigated;
2. Is unable to provide personnel with the required skills and experience to meet the specific requirements of the work;
3. Is unable to provide resources within a reasonable timeframe (to be agreed on an individual project basis); or
4. Is otherwise constrained in terms of capacity;

the Authority will reserve the right to commission work via the Secondary Supplier.

In the case of the four criteria identified above, the decision as to whether these are applicable to a particular work order will be at the discretion of the Authority.

Work Order Commissioning Process

Work under the contracts will be commissioned through work orders.

Work orders will be commissioned on an ad-hoc basis by the Authority, based on the services in Part 2 of Section 2 of this ITT, and according to the following process, which is described in visual form within Annex E:

1. A template for commissioning work order will be provided following contract commencement. In order to commission work, the Authority's staff will complete this template and provide the completed version to the Primary Supplier.
2. The Primary Supplier will respond to the template with a resourcing proposal.
3. The Authority will then consider the resourcing proposal for the work order and if in the Authority's view, none of the criteria identified above apply, then the work will be allocated and carried out by the Primary Supplier. If, however, the Authority determines that one or more of the criteria are present and apply to the work order resourcing proposal received from the Primary Supplier, the Authority, at its sole discretion, will determine whether to award the work to the Secondary Supplier based on the criteria in the above section. If work is awarded to the Secondary Supplier, the Authority will issue the template to the Secondary Supplier, which will respond with its own resourcing proposal.
4. Resourcing for the work order will then be agreed between the relevant supplier and the Authority based on the requested services and supplier proposal. The cost of work orders will be calculated by applying the Schedule of Rates (submitted by the supplier(s) as part of their tender response) to the resourcing agreed in the work order.
5. Work orders may use a fixed-price structure, or, where appropriate, other payment approaches may be used, including (but not limited to) time & materials, call-off arrangements, and firm-pricing.

At contract commencement, a nominated individual within BEIS will be identified by the Authority; they will be responsible for approving the commission of all work orders ("the Project Manager").

If any part of a Contract is prohibited by Law or judged by a court to be unlawful, void or unenforceable, it must be read as if it was removed from that Contract as much as required and rendered ineffective as far as possible without affecting the rest of the Contract, whether it is valid or enforceable.

18. No other terms apply

The provisions incorporated into each Contract are the entire agreement between the Parties. The Contract replaces all previous statements, agreements and any course of dealings made between the Parties, whether written or oral, in relation to its subject matter. No other provisions apply.

19. Other people's rights in a contract

No third parties may use the Contracts (Rights of Third Parties) Act 1999 (CRTPA) to enforce any term of the Contract unless stated (referring to CRTPA) in the Contract. This does not affect third party rights and remedies that exist independently from CRTPA.

They must also say if they think any Variation is needed either to the Deliverables, Framework Prices or a Contract and provide evidence:

- (a) that the Supplier has kept costs as low as possible, including in Subcontractor costs; and
- (b) of how it has affected the Supplier's costs.

24.7 Any change in the Framework Prices or relief from the Supplier's obligations because of a Specific Change in Law must be implemented using Clauses 24.1 to 24.4.

A02 Knowledge Transfer

EY is a trusted delivery partner across government, committed to building the capabilities of civil servants. We put knowledge transfer and developing trusting, collaborative relationships with our clients at the heart of

all engagements; this generates substantive capability at our clients and leaves a positive legacy.

Assessment of developer project submissions: We will leverage experience gained from Phase 1 Cluster Sequencing, where lessons learnt and reflections from the Phase 1 process were shared to inform the Phase 2, and a continuous improvement review identified what worked well (and what did not). From this, we have identified that we will focus on developing the team's capability surrounding:

Data management and extraction - The assessment process requires the review of large volumes of data within a compressed timeline. We will offer coaching on how to ensure consistency of content and presentation to enable efficient and quick extraction and sharing of information. We will walk through our Phase 1 databooks to ensure the BEIS team is familiar with their content and structure.

- ▶ *Data validation* - we will share EY best practice on the use of external research tools to validate credit ratings, check for relevant news articles and to validate future outlook.

Risk identification and management: Working alongside your team, we will co-produce a *training plan* to utilise EY's robust infrastructure risk method (summarised in the IPA's cost estimating guidance).

- ▶ We will offer *tailored coaching* to individuals in critical issues such as how to identify the top 10-15 risks across the lifecycle and assess impact, to enable early identification of areas of concern, develop a view of costs and dependencies.
 - ▶ We will take a *structured training* approach where deeper training is required, for instance in quantification techniques and how risk-based cost estimation and risk quantification play into negotiations.
-

A03 Case Study

Understanding of the requirements

As the UK moves towards Net Zero, the use of Bio Energy Feedstocks in the generation of power will increase. BECCS will have many benefits – that it is a source of renewable power, a source of negative emissions that can offset emissions that are hard to abate in other sectors (such as agriculture and aviation) and also that it is thought that the successful deployment of a FOAK power BECCS project will also facilitate the wider deployment of other GGR technologies, for instance in energy from waste. These benefits will need to be carefully evaluated as will the VFM case for fitting CCS technology, to deliver a viable business model in the short timescales.

The deployment of BECCS over the targeted timescale, i.e. by the mid-2020s, requires significant policy development and careful consideration to ensure that proposals developed:

- ▶ are investable from a developer perspective and enable timely investment;
- ▶ incentivise the right behaviours in the electricity and carbon markets, and mitigate against the risk of unintended consequences, and;
- ▶ sit within a clear value for money framework and adequate protection to tax-payers / energy consumers.

We will build upon the work that has been carried out to date as well as the lessons learnt from the power and industrial CCUS business models, to deliver a model that does each of these things.

Value to BEIS

- (Application of experience and expertise to deliver a model that balances risk and reward
- (Clear setting of VFM objective and able to deliver a business model and complex bilateral negotiation to achieve it
- (Stakeholder engagement to deliver a financeable, deliverable business model that has the full backing of Government
- (An understanding of risks and mitigations from the outset of the programme allowing early mitigation

C01 Social Value

EY is committed to building a better working world and our purpose is to ***drive sustainability, and social and economic impacts for EY teams and the communities we serve***. In this context, we strive to support SMEs within our communities, by utilising their capabilities in our client work. We recognise the economic contribution SMEs make and we support the Government's ambition for £1 in every £3 of spend to be with SMEs by 2022. We will seek opportunities to involve SMEs in the delivery of this contract, utilising their skills and expertise to enhance our offer and deliver greater value for money. Furthermore, in the negotiation phase, we will leverage our position to hold others (e.g. bidders) to account, such as challenging their procurement approaches to align with the Government's ambition.

1. Understanding of level of SME involvement in the delivery of requirements of this type

(i) What we will do

EY commits to identifying, understanding, and creating opportunities to partner with SMEs, to bring the breadth of expertise, insight and capability that this nascent area requires. We have already partnered with

- ▶ A periodic review, comparing actual SME involvement with pre-engagement forecast of SME involvement
- ▶ Engagement reporting statistics on actual vs budget regarding time and material costs.

2. Identification of ways to grow supply chain diversity and the involvement of SMEs in the contract supply chain

(i) What we will do

We are committed to Inclusive Procurement. Thus, EY will identify and provide opportunities for newer, smaller, suppliers to create a supplier mix that is innovative and resilient. We will actively encourage SMEs to become part of the new CCUS industry. Further, EY will continue to diversify our supply chain by expanding

(iii) We will monitor and measure our success by looking at

- ▶ For the lifetime of the programme (and beyond, on other engagements), we will regularly monitor the proportion of total spend with SMEs (including with diverse suppliers on higher skilled work with potential for higher economic value, as this is often dominated by larger suppliers), seeking to understand: *the number*

of bids to which SMEs have been invited; the number of SMEs that responds to our RFPs; and our proportion of spend categorised by geography (to ensure opportunities are distributed across the UK).

- ▶ Number of hours of training sessions for internal teams and level of attendance at those sessions.
- ▶ Based on supplier feedback we will measure the effectiveness of the onboarding process for new SMEs.
- ▶ We will review and action our SME Champion periodic performance report.

3. Planned engagement activities to ensure that new suppliers (and especially SMEs) are aware of opportunities, including advertisement

(i) What we will do

We are committed to increasing the number of opportunities available for SMEs to bid for work directly and will seek to make information accessible and available early-on, providing clear tendering requirements to reduce burden and administration on SMEs. In our approach to engaging with new suppliers (especially SMEs and diverse businesses), we will focus on improving the visibility of opportunities through: *sharing EY's opportunity pipeline; identifying members of SME engagement programmes that could add value and deliver innovative solutions on EY engagements; and structuring work packages which encourage collaboration with small business to ensure more scope can be delivered through the SME route.*

(ii) How we will do this

To engage new suppliers and achieve the above, we will focus on our tendering process, to ensure we:

- ▶ Communicate opportunities through industry bodies and supply chain information platforms/forums.
- ▶ Utilise EY's online portal for small businesses, and diverse, ethnic minority owned suppliers (known as 'Supplier Link') to host current and future supplier opportunities ensuring accessibility for SMEs.
- ▶ Publish guidance for this engagement to help SMEs understand how to engage and work effectively with us, such as a guide to our Framework Contracts and a guide to Bidding.
- ▶ Host regular 'Meet the Buyer' events to allow potential suppliers to have sight of planned procurement activities. However, we will go further than that, actively reaching out to businesses and organisations who may not otherwise recognise the opportunity to support.

(iii) We will monitor and measure our success by looking at

- ▶ Number of visits to the sourcing portal (Supplier Link)
- ▶ Number of supplier events held per annum and the number of diverse suppliers that attend.
- ▶ Level of positive responses from supplier events participant feedback
- ▶ The number of new suppliers onboarded, following participation at supplier events
- ▶ Number of current and future opportunities advertised per period

4. Prompt payment to subcontractors, especially SMEs, and/or planned activity to improve this

(i) What we will do

We have a clear policy on prompt payment of invoices, and we will ensure that staff on this engagement are aware of this commitment. Based on our most recent payment records, 99% of EY invoices are paid within 60 days, exceeding the Government's 95% target. COVID has put additional pressure on SMEs cashflow, so we will reduce the time it takes to pay suppliers, particularly SMEs, to help relieve this pressure.

(ii) How we will do this

- ▶ EY is signed up to Payment Practice Reporting Scheme and we have full support at COO level to sign up to the prompt payment scheme. We have set up a portal dedicated to small and diverse suppliers to ensure they are not treated in the same way as larger corporates. We ensure that SMEs receive payment on more favourable terms than our standard process, with a target of 15 days from invoice received.
- ▶ Provide clear and easily accessible guidance on payment procedures and invoicing requirements at onboarding stage and on an ongoing basis and will ensure there is a well-publicised system for dealing with complaints and disputes (provides a contact-point for suppliers to obtain status updates).
- ▶ Advise suppliers promptly if there is a reason an invoice will not be paid to the agreed terms and will raise queries within 14 days of invoice receipt, to ensure issues are addressed in a timely manner.
- ▶ Leverage EY digital tools and explore other industry leading digital solutions that will facilitate information exchange and even prompt payments.
- ▶ Our SME Champion will conduct a periodic review of feedback from suppliers on payment performance (in accordance with agreed terms, process etc).

(iii) We will monitor and measure our success by looking at

- ▶ Proportion of valid and undisputed invoices paid within 15 days (for SMEs)
- ▶ The average payment time from the date of receipt of invoice, utilising Mercury – EY's reporting tool
- ▶ Outstanding invoices and payment times, including invoices paid later than agreed terms (if any)
- ▶ Level of positive responses from Supplier feedback on payment performance on engagement

We will evaluate the success of the initiatives to assess effective approaches. This will involve implementing a clear programme of feedback mechanisms, together with analysis of outcomes of initiatives undertaken.
