## Schedule 1: Services

So far, an Alpha phase has been carried out by Opencast where user needs were identified and ideation held with the policy and wider service community to establish a proposal for investigating the use case of directed guidance to support SME organisations manage health and disability in the workplace. During Alpha, the riskiest assumptions have been prototyped and usability testing has been carried out with employers to validate and inform the service being proposed for Beta. Now looking to move into beta where the prototype will be industrialised and the content extensively expanded upon.

This proposal covers the Beta phase and developing a working product against the outcomes below that can be piloted. At the time of writing this proposal, specifics of the functionality to be included in this pilot are still being determined as part of the ongoing Alpha phase.

Our approach will continue to be led by user research and content design.

We recommend, at a high-level, an Opencast team will:

1. Deliver a directed guidance service to provide SME employers with advice and support on employee health and disability in the workplace
2. Deliver a managed private Beta whereby real users are invited to use the service to validate it meets user needs, iterating and adding as required based on user needs
3. Reach a point where a decision can be made at end of private beta phases about progression of the service to a public beta stage

**Anticipated Tasks:**

- Technical build
- More user research
- More content analysis
- Identify content improvements

## Working with Opencast

### Culture

We need to ensure that the new engagement has its own DWP community feel and that our delivery team also remains part of the Opencast family. Therefore, localised culture and connection with DWP and Opencast are intrinsic to success.

### Induction

We would ideally like to suggest bringing the team to meet the key DWP teams plus any other key stakeholders - policy permitting - so the team gain a feel for DWP's values and ways of working. We will work with internal teams closely to stay within guidelines and to ensure everyone is comfortable with this approach. Clearly, this may not be feasible, so if not possible, we would undertake everything online via Teams.

### Ongoing

Initial inductions wear off quickly once the day job starts, and we will work to ensure Opencast and DWP culture is retained.

We would suggest we plan in some small-scale virtual events to encourage socialising outside of the work environment and we would ensure that we have a broad selection of Opencast people attending.

Connection to the wider Opencast 'mothership' should be retained by encouraging Opencast management check-ins, to have company catch-ups similar to those we use currently (virtual now rather than on client sites).

Maintaining culture is part of our Head of Culture and Learning's remit and we take this seriously to help motivate our people, ensure diversity and inclusion, opportunities for continuously up- and cross-skilling by taking scheduled time to attend seminars, conferences (we have our own Build IT Right (BITR) coming up in November) and learning forums, such as monthly Best Practice TDD forum open to all our consultants. Of course, we connect this up with the social side, with everything from chocolate care packages, late afternoon quizzes, meditation, dine out to help out with colleagues.

We will set up an area on Teams for the discovery team, but we will also ensure everyone has access to the wider opencast Team's ecosystem for them to keep track of company updates.

## Client Relationship

We aren't just about great delivery at Opencast. We also believe in ensuring that we're clear about expectations on both sides with our clients. This involves not just the day-to-day, but acting as a point of contact for commercial discussions and point of escalation for any issues.

Part of this relationship is weekly or bi-weekly Client Relationship check-ins, via Teams, ensuring DWP client contacts and Opencast staff are happy and addressing any teething issues.

You currently work with Ben Mincher, Client Relationship Director and Rich Handley, Client Relationship Director and we see this continuing for this engagement.

## Scope, Assumptions, Deliverables & Risks

### 1. In Scope

In response to the requirements summarised in [Section 1: Summary](#), we propose a multi-disciplinary team to commence build out of solution selected in Alpha i.e.

- Focus of initial service will be around the 3 points of the user journey - Managing health condition, employee goes off sick and employee returns to work
- Expectation that Making adjustments and understanding legal obligations will feed into these phases of the user journey
- Alpha style research will be done to validate if the same service can be expanded to include the other parts of the user journey (inclusive recruitment, onboarding and letting go of staff).
- Multiple rounds of usability testing will be done during the development phase of the private beta to iterate the service and ensure the user needs are being met
- Feedback from the private Beta will be captured and help to drive the improvements and expansion of the service ahead of any move to a public beta stage

- Downloads to be built into the service; if user needs throughout Beta underpin this need
- A business performance matrix dashboard will be built to enable data driven development and management of the service going forward

**Above reflects the assumed scope for the workstream rather than specific deliverables of this phase. The project will run to Agile principles and as thus, as user needs and feedback become more established during the delivery, future work will be reprioritised as required.**

## 2. **Out of Scope**

By definition anything not listed in the proposal, as explicitly in scope is deemed out of scope, however the following are also noted for avoidance of doubt.

## 3. **Assumptions**

The following assumptions have been made in regard of this proposal. If any of these assumptions are incorrect, then it could affect the overall delivery:

- DWP will provide timely and adequate access to their employees for interviews and feedback
- Opencast will have prompt access to a series of employers for interviews and feedback
- Opencast staff will have prompt access to any other DWP information required to complete the work
- Opencast staff will use DWP provided IT equipment to conduct the work. A suitable online storage area will be agreed for the deliverables
- Opencast is responsible for onboarding and management of all Opencast staff
- Additional budget may be required to pay for search and selection, plus incentives for research participants.
- Assumption that the service remains non-transactional through Beta and no requirement for GDS assessment

The activities that will be undertaken for the agreed opportunities are expected to be:

- Provide Product Management to facilitate day to day product direction and prioritisation during delivery of this contract.
- Lead on the day-to-day engagement with stakeholders and facilitating collaboration once DWP Delivery Manager and Product Manager ensure contact is established.
- Alpha style research to validate that the proposed service can be applied to the other stages of the user journey which have not been tested in Alpha. Delivery to be added to the service backlog if assumption holds, or additional work to be proposed in the wider landscape if required.
- User research-informed prototyping at appropriate fidelity to elaborate user needs and interaction design decisions.

- Produce high level stories that contain sufficient information to enable them to be refined at a future date.
- Produce 'As Is' and 'To Be' business process flow diagrams.
- Examine and visualise the potential impact of any proposed changes on the 'As Is' service blueprint.
- Draft a 'To Be' service blueprint focussed on the prioritised areas or themes being progressed to delivery.
- Analyse the current technical landscape and identify options for Technical Architecture which will enable meeting the validated user needs.

The expectation is to conduct 11, two-week sprints (6 build & 5 private) to deliver the agreed scope of Beta with Sprint planning session to agree priorities and goals for the sprint. Additionally, the team will carry out:

1. Full team daily stand ups to monitor progress and identify blockers / concerns
2. End of Sprint show and tells to wider Health Digital group
3. End of Sprint reviews with key stakeholders
4. End of Sprint Retrospectives

During the period of this contract, the team will:

- Adhere to the service design criteria set out by the Government Digital Service Standard.
- Adhere to the standards defined by DWP professions when undertaking work across service delivery professions, including but not limited to analysis, user research, UX design, service design and technical architecture.
- Adhere to DWP digital technology and business architecture strategies and standards.
- Provide regular sprint delivery reporting and milestone achievement certification.
- Work alongside a multi-disciplinary team made up of representatives from across DWP as the potential opportunities cut across all aspects of service delivery, not solely digital.

#### 4. Deliverables

Opencast will provide a service that encompasses research, design, business and technical capability to define and capture requirements and complete prototyping/software development activities as relevant to the deliverables below.

As part of the Beta (build & private), the Suppliers teams will work towards:

## 5. Risks

The following risks are noted at this stage:

- There is a risk that DWP and Opencast team availability & productivity could be impacted at short notice caused by the current COVID-19 pandemic resulting in unexpected delays to this work.
- The team will be a fixed set of people that may require supplemental resource, from Opencast, to accommodate any attrition throughout the lifecycle of the engagement. Opencast will manage overlap periods for personnel changes and DWP will not incur cost for this.

- Recruitment of employers – use a recruiter (cost)
- Working with DWP for hosting etc
- Getting sufficient traffic of people into private Beta
- Risk around promotion of the service – dependency on PR line in roadmap (not led by OC)
- Access to SMEs within policy and the wider Service community group
- The amount of content analysis and backlog items to be added to the service
