- 1.11. The Supplier shall ensure that any device which is used to process Buyer's Data meets all of the security requirements set out in the NCSC End User Devices Platform Security Guidance, a copy of which can be found at: <https://www.ncsc.gov.uk/guidance/end-user-device-security> and <https://www.ncsc.gov.uk/collection/end-user-device-security/eud-overview/eud-security-principles>.

The findings of the ITHC relevant to the Services being provided are to be shared with the Buyer in full without modification or redaction and all necessary remedial work carried out. In the event of significant security issues being identified, a follow up remediation test may be required, to be determined by the Buyer upon review of the ITHC findings.
- 1.21. The Supplier or sub-contractors providing the Services will provide the Buyer with full details of any actual or future intent to develop, manage, support, process or store Buyer's Data outside of the UK mainland. The Supplier or sub-contractor shall not go ahead with any such proposal without the prior written agreement from the Buyer.

- 1.23. The Supplier and sub-contractors shall undergo appropriate security assurance activities and shall provide appropriate evidence including the production of the necessary security documentation as determined by the Buyer. This will include obtaining any necessary professional security resources required to support the Supplier's and sub-contractor's security assurance activities such as: a Security and Information Risk Advisor (SIRA) certified to NCSC Certified Cyber Security Consultancy (CCSC) or NCSC Certified Cyber Professional (CCP) schemes.

Additional information and evidence to that listed above may be required to ensure compliance with DfE security requirements as part of the DfE security assurance process. Where a request for evidence or information is made by the Buyer, the Supplier will acknowledge the request within 5 working days and either provide the information within that timeframe, or, if that is not possible, provide a date when the information will be provided to the Buyer. In any case, the Supplier must respond to information requests from the Buyer needed to support the security assurance process promptly and without undue delay.

- 1.25. The Supplier shall contractually enforce all these Departmental Security Requirements onto any third-party suppliers, sub-contractors or partners who could potentially access Buyer's Data in the course of providing the Services.
- 1.26. The Supplier shall comply with the [NCSC's social media guidance: how to use social media safely](#) for any web and social media-based communications. The Supplier shall implement the necessary controls and mitigations within the plan and regularly review and update the risk assessment throughout the contract period. The Buyer shall have the right to review the risks within the plan and approve the controls and mitigations to be implemented, including requiring the Supplier to implement any additional reasonable controls to ensure risks are managed within the Buyer's risk appetite.

 - 28.5.2 demonstrates to the Buyer's reasonable satisfaction that the Variation is technically impossible to implement and that neither the Tender nor the Specification state that the Supplier has the required technical capacity or flexibility to implement the Variation.

Schedule 2 (Specification)

Specification of the requirement: Case Management Systems improvement

Introduction

1. There is opportunity to enhance the development and use of case management systems in children's social care to enable social workers to spend more time with families. Recent reviews of children's social care recognise that CSC case management systems should interface seamlessly with other systems to share data, improve user experience by reducing duplicative recording of information, and to offer better tools for retrieval and analysis of data.
2. Departmental research concluded that technology used by social workers to record their work with children, support social workers in their day-to-day work, and collect statutory and local data – case management systems (CMS) – could be improved or standardised.
3. Whilst local authorities are responsible for funding and managing their digital estate, the department made a commitment in the recent Stable Homes, Built on Love strategy to improve case management systems to enable social workers to spend more time directly with children and families.
4. To deliver this work, it is recognised that the successful bidder will need to work closely with the department, local authorities, other agencies involved in safeguarding, sector experts and membership bodies as well as current providers of case management systems to build consensus about the role, ambitions and vision for the role of case management systems in children's social care delivery.

Purpose

Overarching summary

1. The department requires a single contract for work to:
 - a. facilitate LAs to agree and articulate the minimum core functionalities (MCF) that a Children's Social Care CMS should have, based on multiple user needs and user personae.
 - b. map existing market products against the minimum core functionalities as well as survey the wider landscape of digital systems and products that consume and use children's social care data or interact with children's social care case management products, as well as the stakeholders who either have a role to play in shaping, or are impacted by, the development of children's social care systems and standards.
 - c. appraise options for how open data and technical standards for Children's Social Care could support the movement of information across systems and agencies (in the mapped ecosystem) could be developed, governed, implemented and maintained.
 - d. develop and trial a set of 3-4 interoperability-oriented data and technical open standards for interoperability-oriented use cases prioritised by the user community – and located within the mapped ecosystem, and review the

applicability of existing standards initiatives to CSC CMS.

2. We would like to give the successful bidder the opportunity to use their expertise to design and develop the project, but propose the project will involve, as a minimum, outcomes defined in the paragraph above. We expect you to set out the approach you would use to deliver the outcomes as part of your response to the ITT, and require you to set out how you will apply and use the Agile methodology to deliver this contract.
3. The department acknowledges that this work consists of discovery phase work alongside development and testing of early solutions to address the policy objective and develop CMS data and technical standards. Should any future work result from the recommendations delivered by the supplier, the implementations of these recommendations is not in the scope of this contract.

Output and objectives

For the avoidance of doubt, should the amount offered by the Broadly Comparable pension scheme be less than the amount required by the Replacement Supplier's Broadly Comparable pension scheme (or the relevant Statutory Scheme if applicable) to fund the required credits ("**the Shortfall**"), the Supplier or the Subcontractor (as agreed between them) must pay the Replacement Supplier's Broadly Comparable pension scheme (or relevant Statutory Scheme if applicable) the Shortfall as required, provided that in the absence of any agreement between the Supplier and any Subcontractor, the Shortfall shall be paid by the Supplier. "Velocity Measure" means the rate of productivity measured over time taking account of the complexity of the Deliverables being provided.

2. Agile development

2.1 Overall Approach

- 2.1.1 The Supplier will manage those parts of the Deliverables which are identified as Agile development projects ("**Agile Development Projects**") in accordance with a recognised Agile project management methodology (such as DSDM Atern) approved by the Buyer in writing in advance and deliver them in accordance with this Paragraph 2.
- 2.1.2 For each Agile Development Project, the Supplier will document and agree with the Buyer in writing:
- a) the team to perform the services ("**Project Team**") including their names, roles, experience and relative seniority, on the basis that the size and/or composition of the Project Team may be subject to amendment by written agreement of the Parties; and
 - b) the overarching aims and objectives of the project ("**Project Vision**") having regard always to the Buyer's requirements.

2.2 Sprints

Each Agile Development Project will be divided into a number of Sprints, to be agreed in writing.

2.3 Release Planning: High-level User Stories and Sub-Stories

- 2.3.1 The Supplier will use the Buyer's requirements and the Project Vision to:
- a) identify and agree User Stories defining the scope of the relevant Deliverables;
 - b) identify any Buyer dependencies relevant to a particular User Story and the point within such User Story when that dependency is required,
- and present such User Stories and dependencies to the Buyer for its Approval.
- 2.3.2 The Supplier will, at the start of the Agile Development Project in consultation with the Buyer, propose acceptance criteria and acceptance tests relating to the relevant Deliverables in compliance with Schedule 8 (Implementation Plan and Testing) for the Buyer's Approval.

2.3.3 The Supplier will, at the start of each Sprint, propose acceptance tests for each User Story based on the acceptance criteria in Paragraph 2.3.2 and any additional criteria applicable to a Release for Approval by the Buyer.

2.3.4 During the Agile Development Project, the Supplier will be responsible for preparing and drafting and updating User Stories, dependencies and acceptance criteria and tests for Approval by the Buyer.

2.4 Release Planning: Initial Story Mapping

The Supplier will promptly and on a continuous basis in consultation with the Buyer:

2.4.1 categorise and group User Stories by function (user activity category);

2.4.2 allocate User Stories to a Release and validate the inclusion of User Stories in that Release; and

2.4.3 assign an indicative priority for each User Story within a particular Release using agreed indicative categories such as "must have" or "good to have",

for Approval by the Buyer.

2.5 Release Planning: Point and Velocity Estimation

2.5.1 The Supplier will promptly and on a continuous basis:

- a) estimate feature complexity for each requirement/User Story allocated to a Release;
- b) estimate the Velocity Measure of the Project Team in delivering a Release and the time required by the Project Team to complete such Release; and
- c) upload each requirement/User Story and each of the estimates referred to in paragraphs a) and b) above into Requirement Tracking Tool.

2.5.2 In doing so, the Supplier will have regard to any potential input from the Buyer or third party resources located in other time zones and the impact that this may have on the timely completion of a Release's delivery.

2.6 Release Planning: Determine Release Date and Re-prioritise

2.6.1 The Supplier will review and revalidate the indicative User Story priorities set out at Paragraph 2.4.3 above on a continuous basis. If, as a result of such review, the Supplier believes that the Release will not be achieved within its defined time frame as set out at paragraph 2.5 above:

- a) if this is caused by a change made by the Buyer and the Buyer accepts this, the Supplier will request a Variation;

- b) if this is due to an underestimation of the effort required or because the Supplier has failed to achieve the anticipated Velocity Measure, the Supplier will provide, at its cost, such additional resources as may be required to ensure that the Release achieves its defined timeframe; or
- c) if this is caused partly by a change made by the Buyer and partly by an underestimate of the effort required or because the Supplier has failed to achieve the anticipated Velocity Measure, the Supplier will request a Variation in respect of that proportion of the delay caused by the change made by the Buyer and the Supplier will provide, at its cost, additional resources as may be required in respect of the proportion of the delay caused by the Supplier.

2.6.2 Alternatively, the Parties may agree in writing such changes to any User Story or User Story priorities (including reprioritising, amending, modifying or removing any User Stories prior to the commencement of a Release) as are reasonably required and such amended details will be recorded in the Requirement Tracking Tool.

2.7 Release Planning: General

- 2.7.1 The Supplier will promptly inform the Buyer if it believes that any User Stories are not suitable for development using an Agile project methodology.
- 2.7.2 The Supplier will regularly update the Requirement Tracking Tool to provide a close to real time overview of status of the Agile Development Project, Sprint status, Sprint backlog, and the progress/status of individual User Stories.

2.8 Sprint Planning

- 2.8.1 Each Sprint will last for between 2 and 4 weeks unless otherwise agreed in writing between the Parties.
- 2.8.2 At the start of each Sprint, the Supplier will re-estimate the feature story complexity value of each User Story and notify the Buyer if there are any significant increases or decreases in the complexity of the Sprint and agree in writing which User Stories should be removed from the Sprint.
- 2.8.3 If the Buyer agrees, the Parties may add or remove User Stories from a particular Release to take account of any changes in estimated complexity, or amend the scheduled Release date. If the Buyer does not agree, no such changes will be made.
- 2.8.4 During the course of each Sprint, the Supplier will:
 - a) develop the selected User Stories using the agreed test-driven development methodology;
 - b) once developed, make any Deliverables related to that User Story available to the Buyer in an agreed test area and mark

the User Story as completed in the Requirement Tracking Tool;

- c) test all developed User Stories, including carrying out robust regression and component testing as agreed in writing between the parties or set out in any agreed requirements, to ensure that they function correctly and fulfil the relevant acceptance criteria; and
- d) submit completed User Stories to the Buyer for final review and Approval,

in each case taking all reasonable steps to successfully develop and complete all User Stories allocated to a Release by the completion of the relevant Release.

2.8.5 The Supplier will promptly notify the Buyer if it believes any amendments to the scope or content of a Sprint are required to achieve the Release, including adding, removing and amending User Stories within a Sprint.

2.8.6 If the Parties agree in writing to remove a User Story from a Sprint after the Sprint has commenced:

- a) and the request is made by the Buyer, then the Velocity Measure for that Sprint will be adjusted as though the Supplier had developed such User Stories in the course of that Sprint; and
- b) and the request is made by the Supplier and agreed to by the Buyer, then the Velocity Measure for that Sprint will be adjusted to take account of the fact that the Supplier has failed to develop such User Stories in the course of that Sprint.

2.8.7 For the purposes of Paragraphs 2.8.1 to 2.8.6, any changes to Releases or Sprints will be subject to written agreement and will be recorded in the Requirement Tracking Tool.

2.9 Release completion and acceptance testing for Sprints

2.9.1 Following the completion of the development stage of each Sprint where there will be a Release, the Buyer will, in accordance with Schedule 8 (Implementation Plan and Testing):

- a) perform the acceptance tests in order to validate the content of the Release against the Project Vision and the acceptance criteria; and
- b) identify any errors, bugs, unexpected behaviours or other failure of the Release to comply with the functional requirements or specifications of the acceptance criteria or the Project Vision.

2.9.2 As part of the Sprint planning process, the Supplier will propose for the Buyer's Approval a reasonable period of time within each Sprint for the Supplier to correct any Defects and to rectify any issues

identified in the acceptance testing process set out in Paragraph 2.9.1 above or otherwise identified by Buyer in its review of the Release.

- 2.9.3 Notwithstanding Paragraph 2.3.2, the Buyer may specify in writing additional acceptance tests or testing criteria required to be performed and used by the Supplier in respect of any iteration or Sprint, as part of the Agile project methodology.
