

The Sewing Studio – Specification Clarifications 01/09/2022

1. Is Shopify Plus Partner status is mandatory for this project?

Yes it is

2. We are keen to find out what elements most attract you to using the Shopify Plus platform for your new site, and whether you would be open to other options such as WooCommerce, using an enterprise solution.

We are currently only looking for companies that have Shopify Plus Partnership status.

3. Would our company be immediately ruled out without having official Shopify Plus Partnership status?

We are currently only looking for Shopify Plus Partners.

4. The redesign brief states the current website should be 'closely replicated': Does this refer to the structure of the site or the look and feel or both?

We are looking for both the structure and the look and feel for the site to be replicated.

5. Written content: Is there a requirement to re-write / adapt existing product content or just use existing content as is and migrate this over?

Existing content to be used where our current website allows. And there will be new opportunities to write new content where the new platform allows.
