## Commercial Summary

### Resource Profile

The following shows a breakdown of the suggested team for the financial year (FY) 19/20. The feature catalogue section details the suggested outcomes for this investment. The supplier is required to work to agile principles using a Time & Materials (T&M) arrangement, because of this HE can choose to invest as much or as little as they wish, and the delivery team will work to those parameters. The number of working days reflects typical leave during the period.

## CARS Maintenance

The CARS application is now running as a business-as-usual (BAU) service. Maintenance includes bug fixing and improvements as well as ensuring that CARS remains reliable, secure and stable within the operating environment, and that it stays fit for purpose as the user base expands. TSES Engineers maintain a backlog of system modifications and enhancements required for security, stability and availability. Likewise, users that have been on-boarded to the system have contributed feature requests and this backlog is prioritised by the Highways England product owner. Many of these features, modifications and enhancements have been elaborated and prioritised ready for full expansion. These features include:

## Service Management

The supplier's service management offering will be a standard working week, working hours arrangement to cover TSES components when they have been deployed into HE's production environment; from the 01/04/2019 these will include CARS and DAS. The detailed service definition for these applications can be found in their respective Service Support Definitions, which are part of the document set provided for Service Readiness Review (SRR). A summary of the service levels agreed at the last Service Acceptance is provided below, however future enhancements to the TSES and its applications will also go through SRR. Any changes to the required service management as new applications are deployed will need to be agreed by both parties at the time of deployment.

### Definitions

- **2<sup>nd</sup> and 3<sup>rd</sup> Line (CACI IIG) Support Incident classification;**
  - **BLOCKING:** TSES service is not available or user is unable to use TSES functionality that is critical to the business
  - **MAJOR:** There is a fault in TSES functionality that is critical to the business but a workaround that achieves the same outcome is available within the application
  - **MINOR:** There is a fault in TSES functionality that is not critical to the business and no workaround is available within the application
  - **TRIVIAL:** There is a fault with in TSES functionality that is not critical to the business but a workaround that achieves the same outcome is available within the application
  - **SUGGESTION:** A non-fault observation (usability, misspellings, capability request, etc)
- **Critical to the business functionality:** The TSES applications are NOT time critical and no direct financial penalties are accrued for CARS or DAS business processes that take longer than the agreed business process milestones. As such, "critical to the business" in this case refers to any TSES functionality that is integral to progressing a departure (for DAS) or document (for CARS) to the next stage of the process workflow by the next working day or **a period judged acceptable by The HE Service Manager.**
- **CACI IIG Office hours:** 09:00 – 17:00 on UK working days
- **HE TSES Service Manager:** the HE TSES project representative with responsibility for TSES services availability (currently S Sattar)
- **HE TSES Product Owner:** the HE user representative with responsibility for TSES application functionality (currently S Sattar)

- **HE Departures Administration team:** HE team with responsibility for managing and administering the departures process
- **Support provision;**
  - **Internal 1<sup>st</sup> line support:** the support provision for triaging support incidents raised by HE employees (provided by DaisyDesk)
  - **External 1<sup>st</sup> line support:** the support provision for handling support incidents raised by non-HE employees (provided by CACI IIG through e-mail and in-application support form)
  - **2<sup>nd</sup> line support:** the support provision for addressing support incidents relating primarily to infrastructure and application configuration / administration faults (provided by CACI IIG through e-mail and in-application support form)
  - **3<sup>rd</sup> line support:** the support provision for addressing support incidents that cannot be resolved by 2<sup>nd</sup> line and require deep technical understanding and/or changes to the application code. (provided by CACI IIG)
  - **HE Azure Tower support:** the support provision for addressing subscription-level issues within HE Azure
- **Support triage process:** The 1<sup>st</sup> line support triage process for the given applications as described below.

### First line support provision

The current HE support provider (DaisyDesk) will provide 1st line triage for the CARS and DAS applications according to their existing SLAs (7x5x5) for Internal Highways England users and will redirect any support requests to the HE Departure administration team or CACI by e-mail (as described in the triage process below). External (Supply Chain) 1st line support (and HE support requests not raised with DaisyDesk) will be provided through the CACI support inbox and direct in-app feedback mechanism. The CACI support inbox and feedback mechanism will be monitored (through an e-mail alerting system) during office hours with a target initial response time of 3 business hours.

The CARS and DAS 3.0 systems are not time critical applications and therefore a 1st line response time of 3 business hours for external users is considered acceptable by the business.

### CACI 2<sup>nd</sup> and 3<sup>rd</sup> Line Support Provision

This section outlines the key activities in scope for the 2<sup>nd</sup> and 3<sup>rd</sup> line support provision from CACI IIG:

- Responsibility for managing, reviewing and reporting on 2<sup>nd</sup> and 3<sup>rd</sup> line incidents will be with CACI IIG
- Respond to queries for assistance from users on defects with the system where these cannot be resolved through 1<sup>st</sup> line triage process (see above).
- Pass issues identified with HE Azure subscription to the HE Azure Support Tower
- Azure PAAS resource and availability management.
- CARS and DAS 3.0 application performance and availability management.
- Update and maintain the training material based on support feedback.
- Service management cycle activities;
  - Service management information reporting (if required).
  - Service reviews between HE service owner and CACI IIG management representative (6 monthly if required).
  - Review of technology dependencies' upgrade availability with HE service and product owners. (6 monthly if required).
- CARS and DAS 3.0 release and maintenance will go through the HE IT Change Approval process.
- Adherence to HE operational change management procedures and workflows

Figure 1 - TSES Support Escalation Flowchart

Figure 2 - DAS Support Triage Flow

Figure 3 - CARS Support Triage Flow

Service management as described above will be delivered by a full-time support engineer and supported by the service delivery element of the programme manager's role and the communications responsibilities provided by the Business Change team. By providing service management in this format, should there be periods of time where less support is needed, the support engineer can contribute to feature deployment, maximising value-for-money.

Table 3. Cost of service management per month.

| Service Management | Rate (£/month) | No. of months | Cost plus VAT (£) |

21.3 If the Buyer has reserved the right in the Order Form to extend the Call-Off Contract Term beyond 24 months the Supplier must provide the Buyer with an additional exit plan for approval by the Buyer at least 8 weeks before the 18 month anniversary of the Start Date.

21.4 The Supplier must ensure that the additional exit plan clearly sets out the Supplier's methodology for achieving an orderly transition of the Services from the Supplier to the Buyer or its replacement Supplier at the expiry of the proposed extension period or if the contract Ends during that period.

21.5 Before submitting the additional exit plan to the Buyer for approval, the Supplier will work with the Buyer to ensure that the additional exit plan is aligned with the Buyer's own exit plan and strategy.

21.6 The Supplier acknowledges that the Buyer's right to extend the Term beyond 24 months is subject to the Buyer's own governance process. Where the Buyer is a central government department, this includes the need to obtain approval from GDS under the Spend Controls process. The approval to extend will only be given if the Buyer can clearly demonstrate that the Supplier's additional exit plan ensures that:

- the Buyer will be able to transfer the Services to a replacement supplier before the expiry or Ending of the extension period on terms that are commercially reasonable and acceptable to the Buyer
- there will be no adverse impact on service continuity
- there is no vendor lock-in to the Supplier's Service at exit

22.2 On reasonable notice at any point during the Term, the Supplier will provide any information and data about the G-Cloud Services reasonably requested by the Buyer (including information on volumes, usage, technical aspects, service performance and staffing). This will help the Buyer understand how the Services have been provided and to run a fair competition for a new supplier.

22.3 This information must be accurate and complete in all material respects and the level of detail must be sufficient to reasonably enable a third party to prepare an informed offer for replacement services and not be unfairly disadvantaged compared to the Supplier in the buying process.

## **23. Force majeure**

- 29.6 The Supplier will indemnify the Buyer or any Replacement Supplier for all Loss arising from both:
