Commercial Directorate Accessibility Questionnaire

Background

HMRC recognises the need to ensure that its ICT products and services can be used by everyone, whether internal staff or external customers, from a population with the widest range of characteristics and capabilities. This may need to be achieved through the use of hardware and/or software added to or connected to a system that increases accessibility for an individual.

In order to achieve this, HMRC has adopted the European Standard 'EN 301 549 Accessibility requirements suitable for public procurement of ICT products and services in Europe' (which includes extending the Web Content Accessibility Guidelines 2.0, success criterion AA (WCAG v2 AA) to non-web systems) as our minimum accessibility standard.

Without overriding the need for the EN301 549 standard to be met, the key accessibility elements of the standard are listed in section 3 below, and by answering the associated questions, it will assist HMRC in evaluating the readiness of your ICT product and/or service to meet the standard.
