1. Overall Objective

DEFRA has a requirement for a contract to provide standard and bespoke signage (mainly Health and Safety) as the current provision expires on the 31st March 2021

We are required to provide a wide range of signs that help to fulfil corporate objectives. Our requirements range from health and safety stock signs to bespoke signs and construction notice boards.

Signage is an important part of our brand. It tells people what kind of organisation we are and what we do. It is highly valued so it is important we get it right, we need to make sure signs are in the right place for the right reasons whilst presenting information consistently.

DEFRA are committed to reducing their sustainability impact in all their operations both directly and indirectly through their supply chain. We recognise that the majority of our impacts lie within our supply chain and we work with our suppliers to minimise this impact and look to make beneficial improvements in these areas where possible.

We will need to ensure that services are available for other DEFRA organisations to use where the DEFRA organisation has signed an ESPO Customer Access Agreement and they have committed to the terms of the DEFRA contract.

2. Scope of contract

This document sets out how we expect you to work with us to meet our signage requirements. We will work with you to provide a high standard of service to our clients within an agreed budget and timescale.

- We will need you to respond to requests that are not part of our brand and corporate identity but where we occupy a building with other government organisations.(Appendix 3)
- The service will include the disposal of old signs during replacement in accordance with the waste hierarchy
- We will need all permanent signage and components to have a lifespan of at least 10 years. These must be able to withstand graffiti, bright sunlight, exposure to the elements, and moisture (near to watercourses) and be anti-theft.

A list of assessed certification schemes that currently meet the government's requirements can be found on the [CPET website \(http://www.cpet.org.uk/uk-government-timber-procurement-policy/evidence-of-compliance/category-a-evidence/approved-schemes\)](http://www.cpet.org.uk/uk-government-timber-procurement-policy/evidence-of-compliance/category-a-evidence/approved-schemes). Acceptable schemes must ensure that at least 70% (by volume or weight) is from a Legal and Sustainable source with the balance from a legal source.

Category B evidence: Documentary evidence, other than Category A evidence and Forest Law Enforcement, Governance and Trade (FLEGT) (or equivalent) evidence, that provides assurance that the source meets the criteria set out in the document entitled 'UK Government Timber Procurement Policy: Framework for Evaluating Category B Evidence' (available from the Contracting Authority on request and on the CPET website, which reflects the criteria for Legal and Sustainable set out in 'UK Government Timber Procurement Policy, Definition of Legal and Sustainable for Timber Procurement'. The edition current on the day the contract is awarded shall apply. Such Category B evidence may include, for example, independent audits and declarations by the Contractor or his suppliers.

Where Category B evidence is to be relied on, the contractor is required to notify the contracting authority of the source or sources of all virgin timber and wood-derived products supplied. Source in this context means the forest or plantation where the trees were grown and all subsequent places of delivery through the supply chain prior to receipt of the timber or wood-derived product by the contracting authority. The contractor shall separately identify virgin timber and wood-derived products supplied from forests and plantations that are claimed to be subject to sustainable timber production and shall submit to the contracting authority documentation in respect of such wood to confirm that the criteria for sustainable timber production set out in this specification have been met. If mixing is unavoidable within the supply chain then sources can still be accepted provided that there are adequate controls in place and at least 70% (by volume or weight) is from a Legal and Sustainable source with the balance from a legal source.

FLEGT evidence, from either or both of the following categories:

Evidence of timber and wood-derived products being exported from a timber-producing country that has signed a bilateral Forest Law Enforcement, Governance and Trade (FLEGT) Voluntary Partnership Agreement (VPA) with the European Union and which have been licensed for export by the producing country's government. Evidence of equivalence to FLEGT-licensed (for the purposes of the definition of Sustainable) may include timber and wood-derived products that have been independently verified as meeting all the producing country's requirements for a FLEGT licence (in due course), where a VPA has been entered into but the FLEGT licensing system is not fully operational, or

Evidence from a country that has not entered into a VPA which demonstrates that all of the requirements equivalent to FLEGT-licensed timber have been met.

FLEGT-licensed timber and wood-derived products which have been processed in a third country may also be acceptable, provided that they demonstrate compliance with the TPP definition of Legal and Sustainable (where equivalent to FLEGT-licensed can be evidence of meeting the definition of Sustainable).

In relation to recycled and reclaimed timber, the need for documentary evidence and independent verification also applies but will focus on the use to which the timber was previously put rather than the forest source and chain of custody.

Annex A: Glossary of Terms

The terms defined in Annex A are for use in this note and, where appropriate, they should accompany the model specification and contract conditions.

Timber and wood-derived products: means any product that contains wood or wood fibre, with the exception of "recycled" materials (see below). Such products range from solid wood to those where the manufacturing processes obscure the wood element (e.g. paper).

Timber and wood-derived products supplied or used in performance of the contract that have been recycled or reclaimed are referred to as "recycled" timber, which is defined below.

Timber and wood-derived products supplied or used in performance of the contract that are not recycled are referred to as "virgin" timber when the distinction needs to be made for clarity.

Short-rotation coppice is exempt from the requirements for timber and wood-derived products and falls under agricultural regulation and supervision rather than forestry.

Legal and Sustainable: means production and process methods, also referred to as timber production standards, and in the context of social criteria, contract performance conditions (only), as defined by the document titled "UK Government timber procurement policy: Definition of Legal and Sustainable for timber procurement" (available from the Contracting Authority on request and from the CPET website). The edition current on the day the contract is awarded shall apply.

FLEGT: means Forest Law Enforcement, Governance and Trade, and is a reference to the EU FLEGT Action Plan, which aims to help tackle the urgent issue of illegal logging and associated trade.

FLEGT-licensed: means production and process methods, also referred to as timber production standards, and in the context of social criteria, contract performance conditions (only), as defined by a bilateral Voluntary Partnership Agreement (VPA) between the European Union and a timber-producing country under the FLEGT scheme, where both parties have agreed to establish a system under which timber that has been produced in accordance with the relevant laws of the producing country, and other criteria stipulated by the VPA, are licensed for export by the producing country government.

Recycled: means recovered wood that prior to being supplied to the contracting authority had an end use as a standalone object or as part of a structure and which has completed its lifecycle and would otherwise be disposed of as waste. The term "recycled" is used to cover the following categories: pre-consumer recycled wood and wood fibre or industrial by products but excluding sawmill co-products (sawmill co-products are deemed to fall within the category of virgin timber), post-consumer recycled wood and wood fibre, and drift wood. It also covers reclaimed timber which was abandoned or confiscated at least ten years previously. Documentary evidence and independent verification also apply to recycled materials, but will focus on the use to which the timber was previously put rather than the forest source and chain of custody details.

Short-rotation coppice: means a specific management regime whereby the poles of trees are cut every one to two years and which is aimed at producing biomass for energy. It is exempt from the UK government timber procurement policy requirements and falls under agricultural regulation and supervision rather than forestry. The exemption only refers to short-rotation coppice, and not 'conventional' coppice which is forest management and therefore subject to the timber policy.

CPET: means the UK government's Central Point of Expertise on Timber, which provides a free telephone helpline and website to support implementation of the UK government Timber Procurement Policy.
