There is a growing awareness of the need to address the health care needs of the elderly population. The Department of Health (1999) has identified the need to develop a 'new paradigm' of health care for the elderly, which is based on the principles of 'person-centred care'. This paradigm is based on the idea that the elderly person is a 'person' first, and a 'patient' second. It is based on the idea that the elderly person has a right to be treated as a 'person' and not as a 'patient'.
