

SEEDING

GENERAL PURPOSE amenity grass seed (2160 sq. Metres, including roadway) containing 40% Dwarf Perennial Ryegrass, 35% Creeping Red Fescue, 25% Chewings Fescue (or product of equal quality)

In calm conditions apply pre-approved seed at a rate of 35-50g per m². The calculated seed quantity should be split in two and applied at right angles to each other to ensure an even coverage. Lightly rake in to cover the seed and leave a finished level surface.

WILDFLOWER/MEADOW mix (2240Sq. Metres) shall be Emorsgate EM2 standard general purpose meadow mixture applied at a rate of 4gm/sq.m. Sow seed in calm weather during Autumn or Spring, selecting a time when the soil is moist and can be worked. Spread seed evenly at the specified rates. Seed should be mixed thoroughly and bulked up with dry sand to a proportion of 4gm per 1kg of sand. Roll after seeding using a lightweight roller. Do not rake.
