

UoS/DH/24/25/QTR2/ Motor bar installation

Motor bar installation in New Adelphi Theatre

The University of Salford requires the supply and installation of a motor bar from which to hang a large projector positioned at the rear of the auditorium in our main theatre space. This should include an electrically operated winch system with controller, a ladder bar with associated rigging assemblies, and a power isolator for the motor. The installation should be fully tested, commissioned and certified.

Site visits to survey the specific requirements can be arranged on the afternoon of Wednesday 15th January, please contact Laurence Boot with any questions and quotations, l.b.boot@salford.ac.uk.
