Order Schedule 20 (Order Specification)

1. Background

The Biomass Feedstocks Innovation Programme sits within the BioEnergy & Carbon Removals Theme in the Net Zero Innovation Portfolio (NZIP), a £1billion fund to accelerate the commercialisation of low-carbon technologies, systems and business models in power, buildings, and industry. The Portfolio aims to decrease the costs of decarbonisation and minimise barriers in the sector.

The programme aims to increase the production of sustainable domestic biomass by funding innovative ideas that address barriers to biomass feedstock production. It will support those who are seeking to improve productivity, through breeding, planting, cultivating and harvesting. Biomass feedstocks production refers to the inputs, outputs and impacts associated with creating and harvesting a crop or collecting a residue.

The Biomass Feedstocks Innovation Programme has four main objectives:

1. Identify and investigate the technical feasibility of biomass feedstocks TRL 4-7¹ technologies.
2. Demonstrate the technical feasibility of biomass feedstock innovations in a real-world environment.
3. Demonstrate the commercial feasibility of biomass feedstock innovation.
4. Demonstrate that the biomass feedstock innovations can technically work together, across several UK geographies.

A wide variety of internal and external evidence demonstrates that biomass will play a crucial role in enabling us to meet our net zero commitment and to meet it cost effectively. Biomass can provide crucial negative emissions in the power sector via Bioenergy with Carbon Capture & Storage (BECCS; when used with low carbon, sustainably produced feedstocks) and can assist in the decarbonisation of heat, transport and industry. Innovation is needed to drive down the costs and scale up the production of domestic biomass in order to meet our Net Zero ambition.

The programme is resourced with a £36 million budget divided into £3.95m for Phase 1, and £32 million for Phase 2. The project design phase of the Programme, Phase 1, concluded in February 2022, with the redacted reports published on gov.uk². The demonstration phase (Phase 2) commenced in June 2022 and runs until March 2025.

25 innovative projects were funded in Phase 1 of the programme, which were mainly feasibility studies. 12 projects were awarded funding for Phase 2 and are focusing on research development and demonstration.

Phase 2 was split into 2 lots: Lot 1 funded demonstrations of innovation projects (with up to £4 million available per project). Lot 2 funded a single multi-site demonstrator platform, which acted as a showcase for Lot 1 innovations, demonstrating them working in tandem and in different locations across the UK.

The budget for Phase 2 of the Programme was increased by £4 million due to the strength of the applications received, reflecting market need and capacity to deliver. All successfully funded Phase 2 projects participated in Phase 1 of the Programme.

Evaluation

¹ Technology Readiness Level (TRL) is a measurement system that helps assess the maturity of a technology and enables consistent comparison across different types of technologies. The measurement system has 9 levels with TRL 1 being the lowest (basic principles observed) and TRL 9 the highest (actual system proven in operational environment).

² <https://www.gov.uk/government/publications/apply-for-the-biomass-feedstocks-innovation-programme>

The evaluation will start as soon as a supplier is in place and should therefore run from 2023-2026. It should cover both Phase 1 (project plans) and Phase 2 (demonstrators) of the programme.

The main focus of the evaluation is to understand whether the programme achieved its objectives of demonstrating the technical and commercial viability of innovations within biomass feedstocks and assess the market response to the process of engaging with NZIP.

The evaluation will feed into ongoing and future programmes and policy designs on biomass and establish the impact and value for money of the programme ex-post.

2. Aims and Objectives of the Project

The evaluation should consist of an interim evaluation and a final (post-closure impact) evaluation. The interim evaluation will start when the contract is awarded and continue to April 2024. The interim evaluation will include a process and early impact evaluation. The final evaluation will run from July 2026–September 2027 after the programme has concluded. This will develop on the interim evaluation and include an economic and impact evaluation. There will be a contract break clause in between these two phases (at the end of April 2024).

The three overarching aims of the evaluation are to:

1. Learn lessons about the programme's design and delivery to support improvements to the delivery of this programme, similar NZIP programmes, and future programmes.
2. Determine and understand the outcomes of the programme, how this compares with expected outcomes, and what barriers were encountered (including policy, innovation, markets).
3. Assess and understand the programme's value for money.

Therefore, the evaluation should focus on the key themes:

- **Relevance:** the extent to which the programmes' objectives and design responded to beneficiaries and stakeholder needs, as well as policies and priorities.
- **Effectiveness:** the extent to which the programme has achieved outcomes through its duration.
- **Added value:** the extent to which the intervention has provided additional value over.
- **Impact:** the extent to which the intervention has contributed to the achievement of, or progress towards, medium- or longer-term benefits
- **Efficiency:** the extent to which DESNZ and the individual projects have used the resources/ inputs available to produce outputs in a timely and cost-effective manner.
 - For example, whether there was sufficient support available from DESNZ (e.g., funding, time, monitoring officers) to support the different projects, whether the number of projects funded was optimum etc.
- **Process:** the extent to which the intervention was operating as intended to achieve the stated objectives.
- **Coherence:** the extent to which the intervention is compatible with the wider landscape (e.g. Defra policy, Biomass Strategy, CCUS, Power BECCS and GGR Strategies, and other cross Whitehall policies and regulations, such as any sustainable aviation fuel regulations; external coherence) and the extent to which projects within the programme are aligned (internal coherence).
- **Sustainability:** the extent to which the benefits will continue beyond the programme lifetime and what would be needed to ensure benefits continue.

Research questions

Bidders should note that the following research questions are subject to change and DESNZ will work with the supplier to refine these research questions at the initiation of the contract.

The evaluation should seek to answer the following research questions. The bullet points underneath each are suggested areas the higher-level research question could focus on.

3. Suggested Methodology

Total number of Interviews (qualitative)	~77
Total number of Case Studies	5-7
Any other specific Requirements	Consideration of seasonal peaks in wider agricultural work when setting timeframes for the evaluation – avoiding peak planting and harvesting season is essential for any interviews

The following sections set out our suggested approach to carrying out the required work.

Opportunity for bidders to submit creative bid:

Applicants are encouraged to propose alternative approaches and methodologies, where they believe these would better achieve our aims and objectives as set out above, or be more cost effective. Alternative suggestions should be justified sufficiently to allow assessment in regard to reliability and validity of the approach, and the costs relative to the proposed approach. Each bidder must only submit one final methodology, and must not submit a number of options. All bids must fit within our budget, timeline and output criteria, regardless of methodology proposed.

A single evaluation comprising four phases is recommended – an impact, process, and economic evaluation, along with case studies.

- **Impact evaluation** – using Contribution Analysis (CA) to assess the extent to which the programme has produced the outputs and outcomes predicted.
- **Process evaluation** – to determine whether the design and delivery of the programme was effective and what can be done to improve the delivery process.
- **Economic evaluation** – to determine the cost effectiveness of the programme. This should include a Value-for-Money assessment based on the 4Es approach³.
- **Case studies** – that draw on both primary and secondary evidence collected for the evaluation to answer the research questions. There should be 1-2 thematic case studies at interim stage and 2-3 project-based case studies at final stage.

It is recommended that a **theory-based approach** is used, drawing on case studies and Contribution Analysis (CA), to evaluate the impact and effectiveness of the programme. The CA should be accompanied by evidence statements at the outset that clarify what evidence is expected if the outcomes was observed/partially observed/not observed.

The economic evaluation of each programme should take a “**4E**” approach (evaluating Efficiency, Economy, Effectiveness, and Equity), and a **Value-for-Money assessment** is suggested. More information on this can be found in the Methods section below.

Case studies should be included at both interim and final stages. There are two types of case studies that are required. Firstly, **project-based case studies** to assess individual projects in more detail – exploring their particular experiences and achievements and providing further

³ National Audit Office (NAO), (2013). [Assessingvalueformoney](#) (webpage).

insight into how / why outcomes are achieved, the obstacles faced (or anticipated) and key lessons learned. Secondly, **thematic case studies** will focus on a particular evaluation question or area of programme theory, to further explore and better understand the experiences and results of the programme (what was achieved and how, how this varied and why?). It is suggested that there be 4-5 project-base case studies and 1-2 thematic case studies for each stage of the evaluation (interim and final). Potential thematic case studies that are of interest are the learnings from working with farmers/growers and the factors influencing the tendency of growers to innovate.

The methods outlined in this ITT are one suggested way of answering the research questions outlined above. Bidders are welcome, however, to propose suitable alternative approaches, including other theory-based or quasi-experimental methods.

In line with the above, the following stages of delivery of the evaluation is recommended.

Stage 1: Evaluation planning

1.1: Rapid evidence review and evaluation framework

This stage involves the supplier familiarising themselves with the programme by reviewing programme documentation. The **rapid evidence review** will consist of reviewing relevant external literature and internal DESNZ documents such as programme reports and data including the existing Theory of Change (please see the “Data Sources” section for more information).

It is estimated that this review takes no more than four weeks and should commence as soon as the contract has been awarded. To further validate the existing theory of change, the evaluators should use this phase to ensure that they have a clear hypothesis about how the programme will have the intended impacts. This includes:

- The evidence that we should expect to see to validate or refute the credibility of the hypothesis.
 - The related data and data sources.
 - These evidence and data requirements should be clearly mapped onto the theory of change.

After the review, it is suggested that the supplier writes an **evaluation framework** to synthesise findings from this review process and recommend any changes to the evaluation approach.

The evaluation framework will provide a comprehensive guide to the evaluation. Bidders should explain their proposed methodology fully along with their rationale and any alternative methods not suggested in the section below. The Evaluation Framework should include:

- An updated theory of change for the programme that links back to the research questions.
- A set of evaluation questions based on the assessment of existing evidence and its ability to provide a robust contribution narrative.
- A clear data collection plan to systematically demonstrate how the evaluation questions will be assessed through the evidence and related data sources.
- Based on the evidence review, an assessment of existing data sources that can be used and gaps in the evidence that require further data collection.

1.2 Value-for-Money scoping study

As part of the evaluation planning phase, the supplier should scope out the feasibility for conducting a **value-for-money (VfM) assessment** based on

- a) the programme documentation reviewed at step 1.1, and
- b) beyond existing and proposed data availability, the potential for a larger-scale value-for-money study with.

In response to the ITT, bidders are invited to propose different methods for carrying out a VfM assessment based on a maximum budget of £30,000. This budget is for the VfM assessment only and includes dissemination materials such as a written report.

Stage 2: Interim Evaluation – process and early impact evaluation

The interim evaluation will provide insights into the design and delivery of the Biomass Feedstocks Innovation programme. This includes establishing what went well, what went less well, why, and in what circumstances. In turn the evaluation should provide a guide to how similar Biomass, and other innovation programmes can be modified to optimise benefits and efficiency in future.

This stage should take place between January 2024–April 2024 with data collection occurring between February 2024–March 2024. This is timed specifically to provide outputs to feed into the Spending Review 2024/25 and so any planning for an NZIP follow-up.

Later in this stage (May 2024), suppliers will be able to explore any early impacts from the programme. This should focus on assessing the outputs and outcomes of the Biomass Feedstocks Phase 1 projects, as well as the early impacts of the overall programme.

The scope and methods for this phase are as follows:

- **Process evaluation** – assessment of the effectiveness of the programme's design, application and early delivery. Primary and secondary research is required for this such as reviewing programme data and conducting stakeholder interviews.
- **Early impact evaluation** – assessment of outputs, outcomes, and early impacts. Part of the interviews for the process evaluation can be used to explore this.

Having analysed the evidence collected at Interim evaluation stage, the supplier should assess whether it is necessary to revise and strengthen the theory of change.

There will be no evaluation activity between April 2024 and July 2026, but the supplier should plan to meet with DESNZ (regularly but infrequently; once every 6 months) for DESNZ to update them on the programmes' progress.

Stage 3: Final Evaluation – economic and impact evaluation

The final evaluation should take place between July 2026–September 2027 and should primarily focus on the impacts of the programme. This will begin a year after the programme has ended to allow outcomes to become more apparent and measurable. As per the theory of change, it is unlikely to be possible to evaluate the full impacts of the programme, even a year after closure, and therefore the focus will be on later stage outcomes such as:

- IP
- Commercialisation
- Biomass production rates
- Jobs created

- Market growth
- Wider spillover impacts

This stage should consist of:

- **Impact evaluation** – assessment of the outcomes and impacts of the programme. Primary and secondary data will be used to inform this evaluation (see methods further on in the document).
- **Economic evaluation** – assessment of Value-for-Money covering the 4E's framework and building on the finding of the impact evaluation. Suppliers should be clear on how they intend to apply the 4E's approach to evaluate the programme. The approach will involve answering four questions:
 - Economy: Are the inputs procured at the right price?
 - Efficiency: How well does the programme convert inputs to outputs?
 - Effectiveness: How well are the outputs from an intervention achieving the desired outcomes and impacts in the energy system and wider society?
 - Equity: How does the intervention impact different segments of society, and how are any costs and benefits distributed?

A **cost-benefit analysis (CBA)** should be included in the VfM assessment and follow the best practice of the HM Treasury Green Book⁴ and Magenta Book⁵. It is expected that the analysis should consider the impact of the programme on outcomes such as the eco-system, air quality and carbon sequestration. The CBA will complement the 4E's approach by contributing to the economy and effectiveness aspects of the assessment.

Bidders should consider how best to assess the carbon and environment impact of the programme in their analysis. In addition, of key interest will be whether the innovations improve the private Net Present Value (NPV) of biomass feedstocks.

DESNZ can provide the successful supplier with guidance regarding data that could be used to measure the impacts and Value for Money of the relevant biomass feedstocks. This data cannot be shared until the contract has been awarded as the data is not in the public domain. The data may be used to support the CBA where relevant and would serve as a guide only. The analysis may have to rely on secondary data sources.

Methods

- **Case studies** – drawing on both primary (the semi-structured interviews) and secondary (project information) evidence, case studies should be created. The case studies will be roughly 4 pages in length each, including pictures (to be provided by DESNZ). DESNZ will support the evaluation supplier in the selection of case study companies.
- **Desk-based Data review** – Analysis of secondary data will feed into each evaluation stage e.g., process mapping. The desk-based review should include the following:
 - A review of competition and project documentation, with the aim of understanding competition processes.
 - A review of secondary/monitoring data, including management information and NZIP Key Performance Indicators (details of available data sources are given below).
 - A review and ongoing development of the Theory of Change for the evaluation.
- **Semi-structured interviews** – Interviews with groups of stakeholders should be undertaken to support all strands of the evaluation and be a key source of qualitative data. Please see the interview plan in the “Data Sources” section.
- **Value for Money** – Assessment using the “4Es” approach described previously.
 - Cost Benefit Analysis: Comparison of the monetary value of the outcomes and the impacts of a programme with the cost of delivering the programme.

Datasources

- **Internal programme data and information** - The supplier will be given access to a wide range of internal programme documents and data to assist with the evaluation. This data will include:
 - Programme business cases (both phase 1 and phase 2)
 - Phase 1 Project progress reports (25 phase 1 reports, each of 12 pages in length (excluding annexes))
 - Phase 1 Project final reports (25 reports, total 788 pages)
 - Stage Gate Reports (12 Phase 2, 48 pages)
 - Phase 2 Project final reports (12 reports, TBD)
 - Funding applications (25 phase 2 applications, each of approximately 26 pages)
 - DESNZ Net Zero Innovation Portfolio KPIs⁶ which are applicable to the programme (25 for phase 1 projects, 12 for phase 2 projects).

External secondary data - The supplier will be expected to use a wide range of secondary sources to support the evaluations. This includes competition and project documentation such as:

- Project progress reports
- Project application forms
- Technical and commercial assessment scores
- Commercial progress tracker
- Management reports for each project
- Annual evaluation reports

- **Existing publication:** This includes any relevant academic literature relating to energy security, biomass and land use, carbon emissions and energy efficiency; and industry, think tank and policy literature that the cover area related to the evaluation. This can include international comparisons to understand the extent to which the innovations being supported are unique or not to the UK.
- **Primary data collection** - Primary data will be collected through semi-structured interviews.
 - **Interviews** – The supplier should design a programme of interviews which should be undertaken at both the interim and final stages of the evaluation. These interviews should gather the knowledge and thoughts from DESNZ stakeholders, international and wider industry stakeholders, and successful and unsuccessful project leads and partners. DESNZ will provide contact details to potential interviewees.
 - Around 60 interviews are required across the stages of the evaluation, based on the below:

Interview Plan		
	Number of interviews	
	Interim stage	Final stage
DESNZ Programme Leads	2	2
DESNZ Biomass experts	1-2	1-2
DESNZ Policy leads	4-6	8-10
Other government departments e.g., Defra, Forestry Commission	3	3
Project leads	18	12
Unsuccessful applicants	6	6
Wider industry i.e., supply chain, sector bodies	4	4
Total number of interviews		
	Interim	Final
	~38	~39

Please note that this is a suggested interview profile only; bidders are welcome to propose alternatives.

4. Deliverables

Main outputs

The evaluation is expected to produce outputs at two main points.

- At the interim stage, reporting in June 2024; and
- At the final stage, following a two-year follow-up, reporting in September 2027.

Outputs at interim stage (Phase 1)

- Interim report – covering findings from the process evaluation and emerging findings on outputs, outcomes and impacts, for internal use only. The report should be approximately 30 pages and include case studies (which can be an annex).
- Presentation of findings to DESNZ –including a slide deck.

Outputs at final stage (Phase 2)

- Final report – covering the process, impact and economic evaluation findings, including write-ups of the case studies. The report should be approximately 80 pages.
- Presentation of findings to DESNZ – including a slide deck.

Other reporting requirements or deliverables:

Where relevant, outputs should include suitable technical annexes and datasets. Outputs should include anonymised interview data and 3-4 transcripts/detailed notes of qualitative interviews, for the purposes of QA and further analysis.

We would welcome suggestions as to any further outputs and would expect to agree a final set of deliverables at the inception stage.

Redacted versions of both the Final and Technical reports in Lot 1 of the programme will be published to ensure a transparent evidence base is available to support ongoing policy making decisions. As there is only 1 project in Lot 2 of the programme, it is likely that the report will be shared within the department only. Three rounds of drafting is expected to take place for all published reports.

For the Lot 2 multi-site demonstrator project, bidders should address how they will keep data anonymous.

Quality Assurance

Bidders must set out their approach to quality assurance (QA) in their response to this ITT with a QA plan. We are keen on bidders who can bring onboard relevant expertise on Biomass, land use, and farming landscape.

Sign-off for quality assurance must be conducted by someone of sufficient seniority within the supplier organisation to be able to take responsibility for the work done. Acceptance of the work by DESNZ will take this into consideration. DESNZ reserves the right to refuse to sign off outputs which do not meet the required standard specified in this invitation to tender and/or the suppliers' QA plan. QA should cover all aspects of the project undertaken by the suppliers, including data collection, data analysis and reporting.

To demonstrate an effective process to produce high quality reporting, the contactor(s) must ensure that quality assurance is done by individuals who were not directly involved in that research or analysis.

Bidders should note that DESNZ may appoint its own peer reviewer(s) to QA publishable outputs. Consideration should be given to how the external peer reviewer(s) will be included in the QA process.

Where complex or innovative methods are proposed, bidders should specify how additional quality assurance will be provided. Where necessary, this should include the use of external experts. A DESNZ

appointed peer reviewer will not be expected to provide detailed quality assurance; their role will be focused on higher level peer review.

Outputs will be subject to DESNZ internal approvals, the more substantive the output the longer the approval time required. Published reports will require three rounds of comments, which should be factored into the timelines.

The successful bidder will be responsible for any work supplied by sub-suppliers. For primary research, suppliers should be willing to facilitate DESNZ research staff to attend interviews or listen in to telephone interviews as part of the quality assurance process.

Other useful sources of guidance and advice that will help bids and the resulting work be of the highest quality include:

- The [Government Social Research Code](#), in particular those that relate to GSR Products:
- [UK Statistics Authority Code of Practice](#) or an equivalent standard.
- Supplementary Guidance on the Quality in Policy Impact Research
- [Quality in Qualitative Research: A Framework for assessing research evidence](#) provides a framework for appraising the quality of qualitative research.

Working Arrangements

The successful supplier will be expected to identify one named point of contact through whom all enquiries can be filtered. A DESNZ project manager will be assigned to the project and will be the central point of contact. Where a consortium or sub-contractors are in place, DESNZ expect that they are included in relevant meetings, workshops, and review points to ensure their full engagement in the project. All suppliers and sub-contractors are responsible for the delivery of outputs to the appropriate time and quality. It is expected that the lead supplier takes an active role in oversight of all workstreams and bears the overall responsibility for the delivery of the evaluation activities and outputs.

Bidders should assume that DESNZ take an active role in review and quality assurance of research materials, analysis, and outputs, beyond external peer review. It should be expected that research materials and outputs go through at least four iterations (i.e., three rounds of comments from DESNZ), dependent on the complexity of the product. It is expected that all outputs are drafted to a very high standard, including early versions. Additional amendments may be required for published outputs.

We envisage the need for close interaction between the DESNZ Project Manager and supplier throughout the process, to ensure that emerging issues are dealt with promptly and that DESNZ fully understand the assumptions and approach taken. Bidders should assume that engagement with DESNZ will include weekly project management phone calls, weekly progress updates (including updates on interview recruitment), steering group meetings (frequency to be confirmed), and face to face meetings as required to design, and deliver the chosen methods. Throughout the research, DESNZ will be required to review and sign off all final data collection instruments, analytical approaches (including key assumptions) and outputs.

Challenges

There may be several challenges in conducting this research; some are given in the following section. Bidders must consider how these, and any other challenges will be addressed through the research design and delivery.

Impact Attribution, additionality of funding and identification of a counterfactual

It is the evaluation's task to disentangle what results can be attributed directly to the programme and what results it has contributed to (and to what extent), and whether it produced benefits over and above what would have happened anyway in its absence. Causal attribution can be tested

by estimating the counterfactual (what would have happened in the absence of the intervention, compared to the observed situation). This involves the identification of control and/or comparison groups, with similar characteristics to those that have participated in the competitions.

Delivering two distinct evaluations at the same time

We would expect the applicant to set out how they are able to deliver two separate, concurrent evaluations – both in terms of resource and what timeline they propose (i.e. where it makes sense to do tasks at the same time, or sequentially). The tender should also take into account the opportunities that this approach offers to generate efficiencies

Ethics

All suppliers will need to identify and propose arrangements for the initial scrutiny and on-going monitoring of ethical issues. The appropriate handling of ethical issues is part of the tender assessment exercise and proposals will be evaluated on this as part of the 'consideration of challenges' criterion.

We expect suppliers to adhere to the following Government Social Research (GSR) Principles:

- Clear and defined public benefit
- Sound application, conduct and interpretation
- Data protection regulations
- Specific and informed consent
- Enabling participation
- Minimising personal and social harm.

3.3 Services clauses

- 3.3.1 Late Delivery of the Services will be a Default of an Order Contract.

3.3.6 The Supplier must ensure all Services, and anything used to Deliver the Services, are of good quality and free from defects.

3.3.7 The Buyer is entitled to withhold payment for partially or undelivered Services, but doing so does not stop it from using its other rights under the Contract.

4. Pricing and payments

4.1 In exchange for the Deliverables, the Supplier must invoice the Buyer for the Charges in the Order Form.

4.2 CCS must invoice the Supplier for the Management Levy and the Supplier must pay it using the process in DPS Schedule 5 (Management Levy and Information).

Core Terms - DPS

the Supplier to replace its existing commercial terms with the more favourable terms offered for the relevant items.

- 4.10 If CCS or the Buyer uses Clause 4.9 then the DPS Pricing (and where applicable, the Charges) must be reduced by an agreed amount by using the Variation Procedure.
- 4.11 The Supplier has no right of set-off, counterclaim, discount or abatement unless they are ordered to do so by a court.

5. The buyer's obligations to the supplier

5.1 If Supplier Non-Performance arises from an Authority Cause:

- (a) neither CCS or the Buyer can terminate a Contract under Clause 10.4.1;
- (b) the Supplier is entitled to reasonable and proven additional expenses and to relief from liability and Deduction under this Contract;
- (c) the Supplier is entitled to additional time needed to make the Delivery; and (d) the Supplier cannot suspend the ongoing supply of Deliverables.

5.2 Clause 5.1 only applies if the Supplier:

- (a) gives notice to the Party responsible for the Authority Cause within 10 Working Days of becoming aware;
- (b) demonstrates that the Supplier Non-Performance would not have occurred but for the Authority Cause; and
- (c) mitigated the impact of the Authority Cause.

6. Record keeping and reporting

6.2 The Supplier must keep and maintain full and accurate records and accounts on everything to do with the Contract:

- (a) during the Contract Period;
- (b) for 7 years after the End Date; and (c) in accordance with UK GDPR, including but not limited to the records and accounts stated in the definition of Audit in Joint Schedule 1.

6.3 The Relevant Authority or an Auditor can Audit the Supplier.

Core Terms - DPS

6.4 During an Audit, the Supplier must:

- (a) allow the Relevant Authority or any Auditor access to their premises to verify all contract accounts and records of everything to do with the Contract and provide copies for an Audit; and
- (b) provide information to the Relevant Authority or to the Auditor and reasonable co-operation at their request.

6.5 Where the Audit of the Supplier is carried out by an Auditor, the Auditor shall be entitled to share any information obtained during the Audit with the Relevant Authority.**6.6 If the Supplier is not providing any of the Deliverables, or is unable to provide them, it must immediately:**

- (a) tell the Relevant Authority and give reasons;
- (b) propose corrective action; and
- (c) provide a deadline for completing the corrective action.

6.7 The Supplier must provide CCS with a Self Audit Certificate supported by an audit report at the end of each Contract Year. The report must contain:

- (a) the methodology of the review;
- (b) the sampling techniques applied; (c) details of any issues; and (d) any remedial action taken.

- (b) be vetted using Good Industry Practice and the Security Policy; and
- (c) comply with all conduct requirements when on the Buyer's Premises.

7.2 Where a Buyer decides one of the Supplier's Staff is not suitable to work on a contract, the Supplier must replace them with a suitably qualified alternative.**7.3 If requested, the Supplier must replace any person whose acts or omissions have caused the Supplier to breach Clause 27.**

- 7.4 The Supplier must provide a list of Supplier Staff needing to access the Buyer's Premises and say why access is required.

8.2 The warranties and representations in Clauses 2.10 and 8.1 are repeated each time the Supplier provides Deliverables under the Contract.

8.3 The Supplier indemnifies both CCS and every Buyer against each of the following:

- (a) wilful misconduct of the Supplier, Subcontractor and Supplier Staff that impacts the Contract; and (b) non-payment by the Supplier of any Tax or National Insurance.

8.4 All claims indemnified under this Contract must use Clause 26.

8.5 The description of any provision of this Contract as a warranty does not prevent CCS or a Buyer from exercising any termination right that it may have for breach of that clause by the Supplier.

8.6 If the Supplier becomes aware of a representation or warranty that becomes untrue or misleading, it must immediately notify CCS and every Buyer.

8.7 All third party warranties and indemnities covering the Deliverables must be assigned for the Buyer's benefit by the Supplier.

9. Intellectual Property Rights (IPRs)

- 9.1 Each Party keeps ownership of its own Existing IPRs. The Supplier gives the Buyer a non-exclusive, perpetual, royalty-free, irrevocable, transferable worldwide licence to use, change and sub-license the Supplier's Existing IPR to enable it to both:
- (a) receive and use the Deliverables; and

- 9.4 Neither Party has the right to use the other Party's IPRs, including any use of the other Party's names, logos or trademarks, except as provided in Clause 9 or otherwise agreed in writing.
- 9.5 If there is an IPR Claim, the Supplier indemnifies CCS and each Buyer against all losses, damages, costs or expenses (including professional fees and fines) incurred as a result.
- 9.6 If an IPR Claim is made or anticipated the Supplier must at its own expense and the Buyer's sole option, either:
- (a) obtain for CCS and the Buyer the rights in Clause 9.1 and 9.2 without infringing any third party IPR; or
 - (b) replace or modify the relevant item with substitutes that do not infringe IPR without adversely affecting the functionality or performance of the Deliverables.
- 9.7 In spite of any other provisions of a Contract and for the avoidance of doubt, award of a Contract by the Buyer and placement of any contract task under it does not constitute an authorisation by the Crown under Sections 55 and 56 of the Patents Act 1977 or Section 12 of the Registered Designs Act 1949. The Supplier acknowledges that any authorisation by the Buyer under its statutory powers must be expressly provided in writing, with reference to the acts authorised and the specific IPR involved.

10. Ending the contract or any subcontract

10.1 Contract Period

- 10.1.1 The Contract takes effect on the Start Date and ends on the End Date or earlier if required by Law.

10.1.2 The Relevant Authority can extend the Contract for the Extension Period by giving the Supplier no less than 3 Months' written notice before the Contract expires.

10.2 Ending the contract without a reason

10.2.1 CCS has the right to terminate the DPS Contract at any time without reason by giving the Supplier at least 30 days' notice.

10.2.2 Each Buyer has the right to terminate their Order Contract at any time without reason by giving the Supplier not less than 90 days' written notice.

10.3 Rectification plan process

10.3.1 If there is a Default, the Relevant Authority may, without limiting its other rights, request that the Supplier provide a Rectification Plan.

10.3.2 When the Relevant Authority receives a requested Rectification Plan it can either:

- (a) reject the Rectification Plan or revised Rectification Plan, giving reasons; or
- (b) accept the Rectification Plan or revised Rectification Plan (without limiting its rights) and the Supplier must immediately start work on the actions in the Rectification Plan at its own cost, unless agreed otherwise by the Parties.

10.3.3 Where the Rectification Plan or revised Rectification Plan is rejected, the Relevant Authority:

- (a) must give reasonable grounds for its decision; and
- (b) may request that the Supplier provides a revised Rectification Plan within 5 Working Days.

10.3.4 If the Relevant Authority rejects any Rectification Plan, including any revised Rectification Plan, the Relevant Authority does not have to request a revised Rectification Plan before exercising its right to terminate its Contract under Clause 10.4.3(a).

10.4 When CCS or the buyer can end a contract

10.4.1 If any of the following events happen, the Relevant Authority has the right to immediately terminate its Contract by issuing a Termination Notice to the Supplier:

- (a) there is a Supplier Insolvency Event;
- (b) there is a Default that is not corrected in line with an accepted Rectification Plan;
- (c) the Supplier does not provide a Rectification Plan within 10 days of the request;
- (d) there is any material Default of the Contract;
- (e) there is any material Default of any Joint Controller Agreement relating to any Contract;

Core Terms - DPS

- (f) there is a Default of Clauses 2.10, 9, 14, 15, 27, 32 or DPS Schedule 9 (Cyber Essentials) (where applicable) relating to any Contract;
- (g) there is a consistent repeated failure to meet the Performance Indicators in DPS Schedule 4 (DPS Management);
- (h) there is a Change of Control of the Supplier which is not pre-approved by the Relevant Authority in writing;
- (i) if the Relevant Authority discovers that the Supplier was in one of the situations in 57 (1) or 57(2) of the Regulations at the time the Contract was awarded; or
- (j) the Supplier or its Affiliates embarrass or bring CCS or the Buyer into disrepute or diminish the public trust in them.

10.4.2 CCS may terminate the DPS Contract if a Buyer terminates an Order Contract for any of the reasons listed in Clause 10.4.1.

10.4.3 If any of the following non-fault based events happen, the Relevant Authority has the right to immediately terminate its Contract by issuing a Termination Notice to the Supplier:

- (a) the Relevant Authority rejects a Rectification Plan;
- (b) there is a Variation which cannot be agreed using Clause 24 (Changing the contract) or resolved using Clause 34 (Resolving disputes);
- (c) if there is a declaration of ineffectiveness in respect of any Variation; or (d) any of the events in 73 (1) (a) or (c) of the Regulations happen.

10.5 When the supplier can end the contract

The Supplier can issue a Reminder Notice if the Buyer does not pay an undisputed invoice on time. The Supplier can terminate an Order Contract if the Buyer fails to pay an undisputed invoiced sum due and worth over 10% of the annual Contract Value within 30 days of the date of the Reminder Notice.

10.6 What happens if the contract ends

10.6.1 Where a Party terminates a Contract under any of Clauses 10.2.1, 10.2.2, 10.4.1, 10.4.2, 10.4.3, 10.5 or 20.2 or a Contract expires all of the following apply:

- (a) The Buyer's payment obligations under the terminated Contract stop immediately.
- (b) Accumulated rights of the Parties are not affected.
- (c) The Supplier must promptly repay to the Buyer any and all Charges the Buyer has paid in advance in respect of Deliverables not provided by the Supplier as at the End Date.
- (d) The Supplier must promptly delete or return the Government Data except where required to retain copies by Law.
- (e) The Supplier must promptly return any of CCS or the Buyer's property provided under the terminated Contract.

Core Terms - DPS

- (f) The Supplier must, at no cost to CCS or the Buyer, co-operate fully in the handover and reprocurement (including to a Replacement Supplier).

10.6.2 In addition to the consequences of termination listed in Clause 10.6.1, where the Relevant Authority terminates a Contract under Clause 10.4.1 the Supplier is also responsible for the Relevant Authority's reasonable costs of procuring Replacement Deliverables for the rest of the Contract Period.

10.6.3 In addition to the consequences of termination listed in Clause 10.6.1, if either the Relevant Authority terminates a Contract under Clause 10.2.1 or 10.2.2 or a Supplier terminates an Order Contract under Clause 10.5:

- (a) the Buyer must promptly pay all outstanding Charges incurred to the Supplier; and
- (b) the Buyer must pay the Supplier reasonable committed and unavoidable Losses as long as the Supplier provides a fully itemised and costed schedule with evidence - the maximum value of this payment is limited to the total sum payable to the Supplier if the Contract had not been terminated.

10.6.4 In addition to the consequences of termination listed in Clause 10.6.1, where a Party terminates under Clause 20.2 each Party must cover its own Losses.

10.6.5 The following Clauses survive the termination or expiry of each Contract: 3.2.10, 4.2, 6, 7.5, 9, 11, 12.2, 14, 15, 16, 17, 18, 31.3, 34, 35 and any Clauses and Schedules which are expressly or by implication intended to continue.

10.7 Partially ending and suspending the contract

10.7.1 Where CCS has the right to terminate the DPS Contract it can suspend the Supplier's ability to accept Orders (for any period) and the Supplier cannot enter into any new Order Contracts during this period. If this happens, the Supplier must still meet its obligations under any existing Order Contracts that have already been signed.

10.7.2 Where CCS has the right to terminate a DPS Contract it is entitled to terminate all or part of it.

- (a) that the Supplier has kept costs as low as possible, including in Subcontractor costs; and
- (b) of how it has affected the Supplier's costs.

24.7 Any change in the DPS Pricing or relief from the Supplier's obligations because of a Specific Change in Law must be implemented using Clauses 24.1 to 24.4.
