SCHEDULE ONE**1 BACKGROUND**

Apprenticeships are a priority policy for Government in England. The Department for Education leads on apprenticeships in partnership with other Government departments (e.g. BEIS) and bodies (e.g. Institute for Apprenticeships and Education, Skills, Funding Agency). The Apprenticeship Evaluation Surveys (AEvS) have been conducted since 2012, and are an integral part of the evaluation strategy for the Apprenticeships programme in England. There is an ongoing need to understand the programme from the point of view of **current and recent apprentices and apprentice employers** in order to monitor quality, customer satisfaction and likely social and economic impacts.

AEvS comprises separate surveys of:

- Employers of recent apprentices;
- Current and recent apprentices.

In 2018, DfE will be merging the BEIS Apprenticeship Pay Survey (APS) into the Learner Survey of the AEvS. The APS is the responsibility of the Department for Business, Energy and Industrial Strategy (BEIS) and provides important information for monitoring apprenticeship pay trends and compliance with the apprentice national minimum wage.

2 AIM

This contract covers the design and delivery of all aspects of the 2018 surveys, including the necessary steps to undertake the merger of the learner surveys with minimal disruption to the time series data.

The Contractor shall use all reasonable endeavours to continue monitoring key indicators across the apprenticeship programme in a consistent way in order to:

- Maintain time series data from the previous evaluation and pay surveys that were previously commissioned by DfE and BEIS respectively.
- Provide intelligence that will continue to develop our understanding of the apprenticeship programme, the value it provides for employers, individuals and the economy and how the constituent parts feed into this.
- Continue gathering important information for monitoring and developing the apprenticeship minimum wage.

3 OBJECTIVES

The Contractor shall use all reasonable endeavours to achieve the following objectives:

- A pilot with 50 current apprentices; 15 employers and 15 recent apprentices.
- A target of 2,500 APS interviews with current learners in Wales;
- A target of 2,500 APS interviews with current learners in Scotland;
- A target of 6,000 APS interviews with current learners in England;
- A target of 5,000 AEvS interviews with learners in England (comprising a 50:50 split between current and recent apprentices);
- A target of 4,000 AEvS interviews with apprentice employers in England;
- A standalone online trial with 6,000 learners and employers to test the feasibility of an online approach;
- Sample boosts as follows:

- 100 AEvS Employer interviews with employers that have a recent starter at Level 6/7;
- 400 AEvS Learner interviews with current apprentices at Levels 6 and 7;
- 400 AEvS Learner interviews with current and recent completers at Levels 4 and 5.
- All interviews and contact with the public are to be conducted with utmost courtesy and professionalism;
- All interviews, coding and data cleaning are to be conducted without errors.

5 METHODOLOGY

SAMPLING:

The Employer survey will replicate as closely as possible the 2017 study (quota design); drawing the sample using records from the ILR, matched to contact details held on the Employer Data Registration Service managed by Blue Sheep. The sample will comprise employers with apprentice completers in an agreed sampling window February to September 2017. The sample will be stratified by:

- Sector Subject Area (SSA Tier 1) within Level, using the same 11 SSAs used in 2017.
- The number of apprentices completing in the reference period (1, 2, 3-5, 6-9, 10+).

The final sample should ensure coverage of key subgroups: employers with completers on Standards, those with higher and degree level apprentices, smaller SSA categories and employers paying the levy, therefore oversampling of some categories will be required.

The sample source for the learner survey will continue to be the Individualised Learner Record (ILR) in England, the Corporate Training in System (CTS) in Scotland, and the Lifelong Learning Wales Record (LLWR). The design of the merged survey will be stratified random and the merger will require mapping between the 11 broad sector (SSA Tier 1) classifications used in AEvS and the 17 framework-driven categories for L2/L3 learners used in APS. This will involve using the 17 categories to structure the initial sample so that categories can be collapsed at the analysis stage to meet the different APS and AEvS reporting requirements.

In 2018, DfE also require a standalone boost sample of current Level 6/7 apprentices and employers with a recent L6/7 apprentice starter. A boost of current and recent higher apprentices is also required. Sample sizes will be 800 additional interviews with learners (400 degree apprentices, 400 higher) and 100 additional interviews with employers.

QUESTIONNAIRE:

DfE and BEIS will work closely with the Contractor to agree the content of questionnaires. While the content of the APS questions is unlikely to change for 2018, updated questions on the AEvS content are required to reflect current policy interests in post-levy awareness and behaviours; the impact of quality reforms; the growth of Standards versus Frameworks and the growth of Degree Apprenticeships.

METHOD:

The Contractor will conduct computer-assisted telephone interviews with 11,000 current apprentices across England, Wales and Scotland; 2,500 recent apprentices and 4,000 apprentice employers (plus boosts as specified above).

To maximise response rates the Contractor will carry out the following procedures:

- Advance letter sent to all learners prior to calling, encouraging them to have a payslip to hand;
- Each piece of sample will be called a minimum of 12 times across different times and days (including weekends for learners);
- Respondents will be asked for forwarding numbers or mobiles for those that have moved/cannot be contacted at the number on the sample;
- Unobtainable numbers will be redialled and telephone searches will be undertaken on unobtainable numbers;
- For interviews with deaf and hard of hearing Next Generation Text relay will be used;
- Interviewer performance will be monitored and any consistently performing below average will be monitored and potentially extra training given to increase their ability to achieve a high response rate;
- Interviewers will write detailed notes of the call so the next interviewer is not starting from cold;
- Sample to be held in reserve to issue in batches only if required.

To monitor and maximise quality the Contractor will carry out the following procedures:

- As a member of the Interviewer Quality Control Scheme (IQCS), the Contractor will comply with IQCS requirements on the training and quality control of interviewers requiring 5% of interviews to be quality controlled;
- All interviewers to be listened to in their first 3 days of interviewing by experienced supervisors and the research team;

- Interviewer performance statistics are monitored at least weekly, comparing number of calls made, interviews achieved, refusals etc;
- All outbound calls are recorded and stored through Storacall;
- Daily reports will be sent to the research team who also meet twice a week to analyse progress.

7 STEERING COMMITTEE

The Project Manager shall set up a Steering Committee for the Project, consisting of representatives from the Department, BEIS, the Contractor, and any other key organisations whom the project will impact on, to be agreed between the parties. The Committee shall meet at times and dates agreed by the parties, or in the absence of agreement, specified by the Department. The Contractor's representatives on the Steering Committee shall report their views on the progress of the Project to the Steering Committee in writing if requested by the Department. The Contractor's representatives on the Steering Committee shall attend all meetings of the Steering Committee unless otherwise agreed by the Department.

8. RISK MANAGEMENT

<u>Risk</u>	<u>Likelihood</u> <u>[Impact]</u>	<u>Mitigation</u>
Asking the 'wrong' policy questions	Low [Medium]	The questionnaires will be designed in close collaboration with DfE, and fieldwork will only begin once DfE have signed these off. The questionnaires will inevitably draw heavily on those from the previous surveys. New questions will be piloted to ensure they work as intended. Questionnaire design is most critical

		for APS since if constituent elements are not right we will not be able to accurately measure compliance. Our experience in undertaking the previous studies will be invaluable.
Errors in the CATI programming or in the data files	Low/ medium [Medium]	Programming will be undertaken by our highly experienced in-house team of six data programmers (they have worked at IFF for an average of over 10 years). These programmers worked on the previous two APS and AEvS, and this familiarity will greatly help the programming, as will the fact that the script/files will use the CATI/SPSS programming from the previous studies. CATI questionnaires and data files will each be thoroughly checked by 3 members of the team, with this done sequentially in increasing order of seniority. CATI checks include running dummy data through the script to check routing. As well as the SPSS being thoroughly checked, the weights applied to the data will be checked for their efficiency. We will use an independent expert statistician to verify this process.
Merged AEvS & APS questions affecting response	Low/ medium [Medium]	Combining the two surveys (for some current apprentices in England) could affect the response rate (with people unwilling to take part in a survey of this length) and hence lead to response biases, and could affect the nature of response (e.g. order effects, where people answer differently on views of their apprenticeship after having been asked questions on pay, or vice versa). This will be mitigated by careful piloting of the joint questionnaire to assess willingness to participate and the nature of people's answers.
Low response rate, and/or not achieving the desired target number of interviews	Low/ medium [Medium]	A number of steps will ensure response rates are high. These include using a team of highly experienced interviewers, familiar with work on this subject matter. They will receive a detailed briefing from the research team (to ensure they can reassure respondents about all aspects of the study), and their work will be closely monitored for quality and their ability to achieve high response level. Those on the employer work will be business-to-business specialists adapt (through experience of work on studies like the UK Employer Skills Survey managed by IFF) at persuading busy professionals to take part in research. The wording of introductory scripts will be engaging. A key aspect is the effort put in to calling respondents, both the number of times they are called but also ensuring these take place over different days and times. Respondents can complete the questionnaire in more than one session. We will ask for forwarding numbers or mobiles for those that have moved. We will undertake telephone number searches for any unobtainable numbers. We will hold some sample in reserve to use only if required: this will help balance achieving high response rates with achieving the desired interview targets. Knowledge of groups where response is typically lower (young men) will be used to alter the ratio of sample issued to interviews to ensure targets are met.

Unable to complete the fieldwork in time	Low/ medium [Medium]	Having undertaken the last two APS and AEvS surveys we are very familiar with the resourcing requirements for the research, including the number of interviewing hours required, and the pattern of response over the fieldwork period. This knowledge will be used to ensure appropriate resourcing. We monitor fieldwork daily and adjust resourcing plans accordingly. Current research projects scheduled for the same time as the proposed research account for only around 15% of our capacity, leaving plenty available. Resource for the apprenticeship work will be ring-fenced.
Errors in the report	Low [Medium]	There will be a full figure check of the reports with every figure in text, tables and charts literally ticked off by a researcher in the team that did not write that chapter. Any suggested amends will be double-checked before any amendment is made.
Staff leaving or long-term ill	Low [Low]	We have allocated a large, experienced team to the study, and the project would not be significantly affected by any individual member of staff leaving or being absent. We have a wider team of 25 researchers in our Learning & Skills team that we could draw on if required (from director level through to research executive roles).

9 DATA COLLECTION

The Department seeks to minimise the burdens on Schools, Children's Services and Local Authorities (LAs) taking part in surveys.

When assessing the relative merits of data collection methods the following issues should be considered;

- only data essential to the project shall be collected;
- data should be collected electronically where appropriate/preferred;
- questionnaires should be pre-populated wherever possible and appropriate;
- schools must be given at least four working weeks to respond to the exercise from the date they receive the request; and
- LAs should receive at least two weeks, unless they need to approach schools in which case they too should receive 4 weeks to respond;

The Contractor shall clear any data collection tools with the Department before engaging in field work.

The Contractor shall check with the Department whether any of the information that they are requesting can be provided centrally from information already held.

10. CONSENT ARRANGEMENTS

The Department and the contractor shall agree in advance of any survey activity taking place the consent arrangements that shall apply for each of the participant groups. All participants should be informed of the purpose of the research, that the Contractor is acting on behalf of the Department and that they have the option to refuse to participate (opt out). Contact details should be provided including a contact person at the Department. Children who are

16 or over will usually be able to give their own consent but even where this is so, the Contractor, in consultation with the Department, should consider whether it is also appropriate for parents, guardians or other appropriate gatekeepers (e.g. schools, Local Authorities) to be informed when a child has been invited to participate in research.

11. PROJECT COMMUNICATION PLAN

The Contractor shall work with the Project Manager and Steering Group to agree the content of the Project Communication Plan on the standard Department Communication Plan Template at the start of the Project, and to review and update at agreed key points in the Project and at the close of the Project. The Communication Plan shall set out the key audiences for the Project, all outputs intended for publication from the Project, the likely impact of each output, and dissemination plans to facilitate effective use by the key audiences.

End of Schedule One

End of Schedule Three

SCHEDULE FOUR**Schedule 4 Processing, Personal Data and Data Subjects**

The Contractor shall comply with any further written instructions with respect to processing by the Department.

Any such further instructions shall be incorporated into this Schedule.

Description	Details
Subject matter of the processing	<p>There are three separate elements to the research:</p> <ul style="list-style-type: none"> • A survey of current apprentices collecting pay data to establish current pay levels for apprentices, and how these differ by sector/framework and apprentice demographics (Apprenticeship Pay Survey) • A survey of current and former apprentices to assess motivations, behaviours, experience and satisfaction around doing an apprenticeship (AEVS Learner) • A survey of employers who have employed apprentices to assess their involvement in, and experiences of using apprentices and the impact it has had on their business (AEVS Employer Survey) <p>In addition, we will conduct a joint survey of current apprentices combining both of the first two elements above for a sample of current apprentices in England.</p> <p>The outcomes of the research will be used to assess the impact of Apprenticeships on employers, learners and the wider economy, providing evidence required for policy.</p> <p>We will also be testing the feasibility of carrying out some or all of the fieldwork online in future years. Respondents would not be contacted for both telephone and online research.</p>
Duration of the processing	<p>Fieldwork will take place from end November 2018 until early March 2019.</p> <p>Data will continue to be processed during the analysis phase over the remainder of winter 2019 but this will be on an anonymised basis (ie no individual names or contact details will be stored with the data being analysed).</p> <p>Permission is sought from respondents for follow-up research in the next two years. IFF will hold a file of those that give permission, the details of which are drawn as sample for any such follow-up surveys, until 31st March 2021. (The reason for this date is that respondents to the survey are asked if they consent to being re-contacted within the next 2 years,</p>

	<p>and the last interviews are conducted in March 2019).</p> <p>If permission is not provided for future follow-up research, personal data will be destroyed in September 2019.</p>
Nature and purposes of the processing	<p>Sample for current and former apprentices will be accessed via the Individualised Learner Record (ILR), the Lifelong Learner Wales Record (LLWR) and Corporate Training System (CTS). A separate, anonymised version of the ILR file will be used to match employers using Blue Sheep / EDRS data.</p> <p>Personal data is treated as restricted data and stored encrypted, in a restricted area of the Contractor's system and subject to access controls. A data controller (Research Manager) manages access rights based on the principle of least privilege, with access right grants and revokes on demand.</p> <p>The sample will be processed to make it compatible with IFF's interview system. Name, telephone numbers and key variables used to route survey questions or prompt respondents will be loaded into the telephone interviewing system. Access to the interviewing system at IFF Research is strictly controlled, and all confidential data will be removed from it once interviewing is complete.</p> <p>The output produced by the interviewing system would be processed and weighted to produce anonymised learner and employer SPSS datasets. We would then analyse these datasets (e.g. using frequencies, crosstabs and other statistics) to produce a research report, infographic and data tables for publication.</p> <ul style="list-style-type: none"> • Research reports and infographics scheduled to be published in mid-2019. These will be accessible to the general public. Any data contained in the report will be based upon the results of telephone interviewing. All data will be reported in aggregate form (e.g. frequencies, crosstabs and other statistics) and will not be presented in such a way as to make it possible to identify any individual learner or employer. • Sets of tables (i.e. of frequencies, crosstabs and other statistics), are scheduled to be published on the DfE and BEIS websites in mid-2019, accessible to the general public. All tables will be fully anonymised, and will not be presented in such a way as to make it possible to identify any individual learner or employer. Tables will be provided separately for the apprentice pay (BEIS) and apprenticeship evaluation (DfE) elements. <p>Results based on small base sizes will be redacted to</p>

	<p>ensure that it is not possible to process the tables to identify any individual.</p> <ul style="list-style-type: none"> • Several learner datasets in SPSS format containing anonymised data gathered from the telephone interviews with apprentices. Datasets will be produced separately for the apprentice pay (for BEIS) and apprenticeship evaluation (for DfE) elements. These will not be made available to the general public. • An employer dataset in SPSS format, containing anonymised data gathered from the telephone interviews with employers of apprentices. This will not be made available to the general public. <p>We will transfer datasets produced by the research between IFF Research and DfE using our Secure File Transfer (SFTP) facility. This service uses AES-256 encryption to ensure secure transfer of files. No datasets containing names or other disclosive fields (e.g. ESFA ID numbers, full postcodes of learners or employers) will be transferred from IFF Research to DfE or BEIS.</p>
Type of Personal Data	Name, telephone number, email, disability and learning difficulty status, ethnicity, sex
Categories of Data Subject	Current and former apprentices; employers of current and former apprentices
Plan for return and destruction of the data once the processing is complete UNLESS requirement under union or member state law to preserve that type of data	<p>How long the Contractor will keep data is separated into two categories.</p> <p>CONFIDENTIAL (stored in regular Job folders) and RESTRICTED (stored in Secure Files job folders) which includes any files containing personally identifiable information such as names and contact details. Data retention is governed by this classification.</p> <p>Confidential data is included as part of the Contractor's general Business Continuity procedures by way of daily incremental backups (backups are encrypted in transit and at rest). A backup period covers one calendar month after which a new backup set will be established. The previous backup sets will be retained for 12 months, for archival purposes and for potential data recovery requests which extend beyond a previous months archives. All data backups are fully indexed. Maintaining file, file contents search capability via backup application interface. Backups are accessible only by the Contractor's IT administrative staff, with access governed by the Associate Director of IT.</p>

	<p>Restricted data backups are handled separately to general Business Continuity procedures. Broadly speaking similar processes surround the backup processes. The backups are accessible only by the Associate Director of IT and data recovery procedures are subject to restricted data access controls (with data controller authority) as detailed below.</p> <p>Restricted data is stored encrypted, in a restricted area of the Contractor's system and subject to access controls. A data controller (Research Manager) manages access rights based on the principle of least privilege, with access right grants and revokes on demand. The entire process of restricted data access is in addition to controls, audited down to file level for who did what and when. Confidential data is accessible only via authorised logon accounts.</p> <p>Any survey data transferred to the Department / the Data Archive will be anonymised beforehand and transferred using our secure FTP site. We will check the data to ensure that there are no combinations of individual characteristics which might enable a student or institution to be identified, for example by removing any institutional identifiers and by only including ranges rather than specific values.</p> <p>When destroying data, we ensure it is deleted from networks and back-ups; and provide confirmation in writing to the client that this has been done. Anonymous datasets generated by the research will be retained indefinitely in case further analysis is required in future.</p> <p>Data destruction principals follow guidelines issued via DoD 5220.22-M. Depending on the task at hand (determined by the granularity of the data in question) two data sanitisation applications will be employed. Microsoft SDELETE (for file level deletion demands) and Active@ ZDelete for broader (folder\sub-folder or volume) deletion demands.</p>
