The Contractor shall not in any circumstances have a lien or any other interest on the Property and the Contractor shall at all times possess the Property as fiduciary agent and bailee of the Authority. The Contractor shall take all reasonable steps to ensure that the title of the Authority to the Property and the exclusion of any such lien or other interest are brought to the notice of all Sub-Contractors and other appropriate persons and shall, at the Authority's request, store the Property separately and ensure that it is clearly identifiable as belonging to the Authority.

B15.2 The Property shall be deemed to be in good condition when received by or on behalf of the Contractor unless the Contractor notifies the Authority otherwise within 5 Working Days of receipt.

B16.3 The Contractor shall identify any requirements of the Conventions (including, without limitation, benefit-sharing requirements arising from use of Biological Materials) which may apply in connection with the Services. The Contractor shall comply with any such requirements and inform the Authority of the same. This clause B16.3 shall be without prejudice to the generality of clause B10.1.

B16.4 Failure to comply with any obligation in clause B16 shall amount to a Material Breach for the purpose of clause H2 (Termination on Default). For the avoidance of doubt, where no Biological Materials are, or are to be, collected by or on behalf of the Contractor in the course of performance of the Contract all references to Biological Materials in this clause B16 or elsewhere in the Contract shall have no effect.

B18.2 At intervals determined by the Authority (which shall not be more frequent than once every 30 days) the Contractor shall give the Authority updated TUPE Information.

B18.3 Each time the Contractor supplies TUPE Information to the Authority it shall warrant its completeness and accuracy and the Authority may assign the benefit of this warranty to any Replacement Contractor.

B18.4 The Authority may use TUPE Information it receives from the Contractor for the purposes of TUPE and/or any retendering process in order to ensure an effective handover of all work in progress at the end of the Contract Period. The Contractor shall provide the Replacement Contractor with such assistance as it shall reasonably request.

B18.5 If TUPE applies to the transfer of the Services on termination of the Contract, the Contractor shall indemnify and keep indemnified the Authority, the Crown and any Replacement Contractor against all actions, suits, claims, demands, losses, charges, damages, costs and expenses and other liabilities which the Authority or the Crown or any Replacement Contractor may suffer or incur as a result of or in connection with:

- (e) any claim by any person who is transferred by the Contractor to the Authority and/or a Replacement Contractor whose name is not included in the list of Returning Employees.

B18.6 If the Contractor becomes aware that TUPE Information it provided has become inaccurate or misleading, it shall notify the Authority and provide the Authority with up to date TUPE Information.

B18.7 This clause B18 applies during the Contract Period and indefinitely thereafter.

B18.8 The Contractor undertakes to the Authority that, during the 12 Months prior to the end of the Contract Period the Contractor shall not (and shall procure that any Sub-

Contractor shall not) without Approval (such Approval not to be unreasonably withheld or delayed):

- (a) amend or vary (or purport to amend or vary) the terms and conditions of employment or engagement (including, for the avoidance of doubt, pay) of any Staff (other than where such amendment or variation has previously been agreed between the Contractor and the Staff in the normal course of business and where any such amendment or variation is not in any way related to the transfer of the Services);

- (f) maximise the use of recovered materials and, if recycled materials are not suitable or not readily available, to maximise the use of materials taken from renewable sources; and
- (g) promote the design of products that are capable of reuse or remanufacture or easily separable into recyclable parts consisting of one material (e.g. steel, plastic, textile).

D5.2 The Contractor shall ensure that any equipment and materials used in the provision of the Services do not contain:

- (a) ozone depleting substances such as hydrochlorofluorocarbons (HCFCs), halons, carbon tetrachloride, 111 trichloroethane, bromochloromethane or any other damaging substances; and/or
- (b) HFCs and other gaseous and non-gaseous substances with a high global warming potential;

unless given written permission by the Authority to do so.

D5.3 The Contractor shall conserve energy and water; reduce carbon emissions and other greenhouse gases; minimise the use of substances damaging or hazardous to health and the environment and reduce waste by, for example, using resources more efficiently and reusing, recycling and composting and respecting biodiversity.

D5.4 If required by the Authority the Contractor shall provide the Authority with information about its compliance with its obligations under clause D5.3.

D5.5 The Contractor shall ensure that its Staff are aware of the Authority's Environmental Policies.

D5.6 The Contractor shall comply with the minimum environmental mandatory standards in the "Government Buying Standards" and in addition where required by the Authority, comply with any relevant "Best Practice" and "Class Leader" standards in relation to any goods on that list which are supplied to the Authority by or on behalf of the Contractor under the Contract.

D5.7 The Contractor shall:

- (a) identify any risks from climate change and variable weather such as higher temperatures, droughts, flooding, sea and river level rises, coastal and riparian erosion, water scarcity, and loss of water quality which may disrupt and/or affect the supply of the Services; and
- (b) if such risks have been identified, enhance the resilience of its organisation to enable it to adapt and deal with the effects of such extreme events, including by having the necessary awareness-raising, evaluation, preventive, preparatory, recovery measures and support systems in place in order to minimise any disruption to the supply of the Services.

D6 Timber and Wood Derived Products

D6.1 For the purposes of clauses D6.1 to D6.8 the following terms shall have the following meanings:

- (a) "Timber" means any product that contains wood or wood fibre, with the exception of "recycled" materials (see below). Such products range from solid wood to those where the manufacturing processes obscure the wood element, for example, paper. Timber and wood-derived products supplied or used in performance of the Services that have been recycled or reclaimed are referred to as "recycled" timber, which is defined below. Timber and wood-derived products supplied or used in performance of the Services that are not recycled are referred to as "virgin" timber when the distinction needs to be made for clarity. Short-rotation coppice is exempt from the requirements for timber and wood-derived products and falls under agricultural regulation and supervision rather than forestry;
- (b) "Legal and Sustainable" means production and process methods, also referred to as timber production standards, and in the context of social criteria, contract performance conditions (only), as defined by the document titled "UK Government timber procurement policy: Definition of Legal and Sustainable for timber procurement" (available at www.gov.uk/government/publications/timber-definition-of-legal-and-sustainable or CPET). The edition current on the day the Contract is awarded shall apply;
- (c) "FLEGT" means Forest Law Enforcement, Governance and Trade, and is a reference to the EU scheme to address the problem of illegally logged timber;
- (d) "FLEGT-licensed" means production and process methods, also referred to as timber production standards, and in the context of social criteria, contract performance conditions only, as defined by a bilateral Voluntary Partnership Agreement ("VPA") between the European Union and a timber-producing country under the FLEGT scheme, where both Parties have agreed to establish a system under which timber that has been produced in accordance with the relevant laws of the producing country, and other criteria stipulated by the VPA, are licensed for export by the producing country government;
- (e) "Recycled" means recovered wood that prior to being supplied to the Authority had an end use as a standalone object or as part of a structure. The term "recycled" is used to cover the following categories: pre-consumer recycled wood and wood fibre or industrial by products but excluding sawmill co-products (sawmill co-products are deemed to fall within the category of virgin timber), post-consumer recycled wood and wood fibre, and drift wood. It also covers reclaimed timber which was abandoned or confiscated at least ten years previously. Documentary evidence and independent verification also apply to recycled materials, but will focus on the use to which the timber was previously put rather than the forest source;
- (f) "Short-rotation coppice" means a specific management regime whereby the poles of trees are cut every one to two years and which is aimed at producing biomass for energy. It is exempt from the UK government timber procurement policy requirements and falls

under agricultural regulation and supervision rather than forestry. The exemption only refers to short-rotation coppice, and not 'conventional' coppice which is forest management and therefore subject to the timber policy; and

(g) "CPET" means the UK Government's Central Point of Expertise on Timber.

D6.2 All Timber supplied or used by the Contractor in providing the Services (including all Timber supplied or used by Sub-Contractors) shall comply with Schedule 1 and shall originate from a forest source where management of the forest has full regard for:

- (a) identification, documentation and respect of legal, customary and traditional tenure and use rights related to the forest;
- (b) mechanisms for resolving grievances and disputes including those relating to tenure and use rights, to forest management practices and to work conditions; and
- (c) safeguarding the basic labour rights and health and safety of forest workers (the "Social Criteria").

D6.3 If requested by the Authority and not already provided in its Tender, the Contractor shall give the Authority evidence that the Timber supplied or used in providing the Services complies with the requirements of Schedule 1 and with the requirements of the Social Criteria.

D6.4 The Authority may at any time during the Contract Period and for 6 years after final delivery under the Contract require the Contractor to produce the evidence required for the Authority's inspection within 14 days of the Authority's written request.

D6.5 The Contractor shall maintain records of all Timber delivered to and accepted by the Authority for 6 years from final delivery under the Contract.

D6.6 The Authority shall decide whether the evidence submitted to it demonstrates legality and sustainability, or FLEGT-licence or equivalent, and is adequate to satisfy the Authority that the Timber complies with Schedule 1 and complies with the requirements of the Social Criteria. If the Authority is not satisfied, the Contractor shall commission and meet the costs of an "independent verification" and resulting report that will: (a) verify the forest source of the timber or wood; and (b) assess whether the source meets the relevant criteria.

D6.7 In the Contract "Independent Verification" means that an evaluation is undertaken and reported by an individual or body whose organisation, systems and procedures conform to ISO Guide 65:1996 (EN 45011:1998) General requirements for bodies operating product certification systems (as amended from time to time) or equivalent, and who is accredited to audit against forest management standards by a body whose organisation, systems and procedures conform to ISO 17011: 2004 General Requirements

for Providing Assessment and Accreditation of Conformity Assessment Bodies (as amended from time to time) or equivalent.

D6.8 The Authority may reject Timber that does not comply with Schedule 1 or with the Social Criteria. If the Authority rejects any Timber the Contractor shall supply alternative Timber which does comply at no additional cost to the Authority and without causing delay to delivery of the Services.

- (c) any other reasonable cost or expenditure which may be agreed from time to time by the Authority and the Contractor; and
- (d) subject to Approval, any reasonable marketing, packaging and/or distribution costs, and any relevant experimental development costs including costs of field trials and/or demonstration projects incurred at the Contractor's expense.

E9.8 The Contractor shall have sole responsibility for making any payments due to Staff under any rewards or incentive schemes, whether contractual, ex gratia, or statutory, in relation to the Results, and any such payments shall not be a cost or expenditure liable to be subtracted from any Income pursuant to clause E9.5. Any payments in respect of a share of Income to be made to the Authority and/or the Co-funders by the Contractor shall be made promptly, in such format as the Authority may direct and accompanied by sufficient information to enable the Authority to identify: i) the contract to which such payments relate; and ii) the means (including a full breakdown of allowable costs) by which such payments have been calculated.

E9.9 If the Contractor does not intend to protect or exploit any Results then the Authority shall be entitled to obtain protection at its own cost and (if clause E8.1 has been amended or varied so that ownership of the Results vests in the Contractor) to have assigned to it at no charge all rights in the relevant Results. The Contractor will not be entitled to any share of the Income generated as the result of the protection or exploitation of the relevant Results obtained by the Authority.

E9.10 For the avoidance of doubt, clauses E9.5 to E9.9 do not apply to and do not affect any Intellectual Property Rights in existence before the commencement of the Services.

E10 Audit

E10.1 The Contractor shall keep and maintain until 6 years after the end of the Contract Period, or as long a period as may be agreed between the Parties, full and accurate records of the Contract including the Services supplied under it, all expenditure reimbursed by the Authority, and all payments made by the Authority. The Contractor shall on request afford the Authority or the Authority's representatives such access to those records and processes as may be requested by the Authority in connection with the Contract.

E10.2 The Contractor agrees to make available to the Authority, free of charge, whenever requested, copies of audit reports obtained by the Contractor in relation to the Services.

E10.3 The Contractor shall permit duly authorised representatives of the Authority and/or the National Audit Office to examine the Contractor's records and documents relating to the Contract and to provide such copies and oral or written explanations as may reasonably be required.

E10.4 The Contractor (and its agents) shall permit the Comptroller and Auditor General (and his appointed representatives) access free of charge during normal business hours on reasonable notice to all such documents (including computerised documents and data) and other information as the Comptroller and Auditor General may reasonably require for the purposes of his financial audit of the Authority and for carrying out examinations into the economy, efficiency and effectiveness with which the Authority has used its resources. The Contractor shall provide such explanations as are reasonably required for these purposes.

E11 Tax Compliance

E11.1 If, during the Contract Period, an Occasion of Tax Non-Compliance occurs, the Contractor shall:

- (a) notify the Authority in writing of such fact within 5 Working Days of its occurrence; and
- (b) promptly give the Authority:

- i) details of the steps it is taking to address the Occasion of Tax Non-Compliance and to prevent the same from recurring, together with any mitigating factors it considers relevant; and
- ii) such other information in relation to the Occasion of Tax Non-Compliance as the Authority may reasonably require.

E11.2 If the Contractor or any Staff are liable to be taxed in the UK or to pay NICs in respect of consideration received under the Contract, the Contractor shall:

- (a) at all times comply with ITEPA and all other statutes and regulations relating to income tax, and SSCBA and all other statutes and regulations relating to NICs, in respect of that consideration; and
- (b) indemnify the Authority against any income tax, NICs and social security contributions and any other liability, deduction, contribution, assessment or claim arising from or made in connection with the provision of the Services by the Contractor or any Staff.

F. CONTROL OF THE CONTRACT

F1 Failure to meet Requirements

F1.1 If the Authority informs the Contractor in writing that the Authority reasonably believes that any part of the Services do not meet the requirements of the Contract or differs in any way from those requirements, and this is not as a result of a default by the Authority, the Contractor shall at its own expense re-schedule and carry out the Services in accordance with the requirements of the Contract within such reasonable time as may be specified by the Authority.

F1.2 The Authority may by notice to the Contractor reject any of the Goods which fail to conform to the approved sample or fail to meet the Specification. Such notice shall be given within a reasonable time after delivery to the Authority of such Goods. If the Authority rejects any of the Goods pursuant to this clause the Authority may (without prejudice to its other rights and remedies) either:

- (a) have such Goods promptly, free of charge and in any event within 5 Working Days, either repaired by the Contractor or replaced by the Contractor with Goods which conform in all respects with the approved sample or with the Specification and due delivery shall not be deemed to have taken place until such repair or replacement has occurred; or
- (b) treat the Contract as discharged by the Contractor's breach and obtain a refund (if payment for the Goods has already been made) from the Contractor in respect of the Goods concerned together with payment of any additional expenditure reasonably incurred by the Authority in obtaining other goods in replacement.

F1.3 The Authority will be deemed to have accepted the Goods if it expressly states the same in writing or fails to reject the Goods in accordance with clause F1.2.

F1.4 The issue by the Authority of a receipt note for delivery of the Goods shall not constitute any acknowledgement of the condition, quantity or nature of those Goods, or the Authority's acceptance of them.

F1.5 The Contractor hereby guarantees the Goods against faulty materials or workmanship for such period as may be specified in the Specification or, if no period is specified, for a period of 18 months from the date of delivery. If the Authority shall within such period or within 25 Working Days thereafter give notice to the Contractor of any defect in any of the Goods as may have arisen during such period under proper and normal use, the Contractor shall (without prejudice to any other rights and remedies which the Authority may have) promptly remedy such defects (whether by repair or replacement as the Authority shall elect) free of charge.

F1.6 Any Goods rejected or returned by the Authority as described in clause F1.2 shall be returned to the Contractor at the Contractor's risk and expense.

F2 Monitoring of Contract Performance

F2.1 The Contractor shall immediately inform the Authority if any of the Services are not being or are unable to be performed, the reasons for non-performance, any corrective action and the date by which that action will be completed.

F2.2 At or around 6 Months from the Commencement Date and each anniversary of the Commencement Date thereafter (each being a "Review Date"), the Authority shall carry out a review of the performance of the Contractor ("Checkpoint Review"). Without prejudice to the generality of the foregoing, the Authority may in respect of the period under review consider such items as (but not limited to): the Contractor's delivery of the Services; the Contractor's contribution to innovation in the Authority; whether the Services provide the Authority with best value for money; consideration of any changes which may need to be made to the Services; a review of future requirements in relation to the Services and progress against key milestones.

F2.3 The Contractor shall provide at its own cost any assistance reasonably required by the Authority to perform such Checkpoint Review including the provision of data and information.

F2.4 The Authority may produce a report (a "Checkpoint Review Report") of the results of each Checkpoint Review stating any areas of exceptional performance and areas for improvement in the provision of the Services and where there is any shortfall in any aspect of performance reviewed as against the Authority's expectations and the Contractor's obligations under this Contract.

F2.5 The Authority shall give the Contractor a copy of the Checkpoint Review Report (if applicable). The Authority shall consider any Contractor comments and may produce a revised Checkpoint Review Report.

F2.6 The Contractor shall, within 10 Working Days of receipt of the Checkpoint Review Report (revised as appropriate) provide the Authority with a plan to address resolution of any shortcomings and implementation of improvements identified by the Checkpoint Review Report.

F2.7 Actions required to resolve shortcomings and implement improvements (either as a consequence of the Contractor's failure to meet its obligations under this Contract identified by the Checkpoint Review Report, or those which result from the Contractor's failure to meet the Authority's expectations notified to the Contractor or of which the Contractor ought reasonably to have been aware) shall be implemented at no extra charge to the Authority.

F3 Reporting

F3.1 Unless otherwise authorised in writing by the Authority, the Contractor shall submit an annual report (the "Annual Report") for each Project Year to the Authority in accordance with this clause F3.

F3.2 The Contractor shall provide one hard copy of the Annual Report and one copy on either computer readable disk or e-mail in the format specified by or agreed with the Authority, no later than 4 weeks after the end of each Project Year, or, for work lasting one year or less, no later than 4 weeks after completion of the Services.

F3.3 The Annual Report shall:

- (a) list the scientific objectives set out in the Specification, indicating where amendments have been agreed;
- (b) indicate in non-scientific terms the scientific progress achieved since the Commencement Date or since the last Annual Report; how this relates to the policy objectives as set out in the relevant current statement of policy rationale and programme objectives relating to research and development issued by the Authority in accordance with the Specification, plus any findings of particular interest;
- (c) indicate whether the scientific objectives in the Specification are appropriate for the remainder of the Contract Period, giving reasons for any changes, together with financial, Staff and time implications;
- (d) list the milestones for the relevant Project Year as set out in the Specification, indicating which milestones have been met and whether the remaining milestones appear realistic (subject to clause F4);

- (e) list any outputs, for example, published papers or presentations and identify any opportunities for exploiting any Intellectual Property Rights or technology transfer arising out of the Services and any action taken to protect and exploit such Intellectual Property Rights; and
- (f) comment briefly on any new scientific opportunities which may arise from the Services.

F3.4 Unless Approved, the Contractor shall submit by the completion date of the Services a final report (the “Final Report”) consisting of 2 hard copies and one electronic copy on either computer readable disk or by e-mail in a format specified by the Authority. The Final Report shall include the following:

- (a) the Services’ code and title as set out in the Specification; the name of the Contractor; the total costs; and the Commencement Date and date of completion of the Services;
- (b) an executive summary of not more than 2 sides of A4 written in a style understandable to the intelligent non-scientist. This should include the main objectives of the Services; the methods and findings of the research; and any other significant events and options for new work; and
- (c) a scientific report.

F3.5 The scientific report referred to in clause F3.4(c) above shall contain:

- (a) the scientific objectives as set out in the Specification;
- (b) the extent to which the objectives set out in the Specification have been met;
- (c) details of methods used and the Results obtained, including statistical analysis where appropriate;
- (d) a discussion of the Results and their reliability;
- (e) the main implications of the findings;
- (f) possible future work; and
- (g) any action resulting from the research, for example, protection of Intellectual Property Rights and knowledge transfer.

F3.6 Notwithstanding clause E6 (Publicity, Media and Official Enquiries), the Authority may publish the Final Report on a website. When submitting the Final Report to the Authority the Contractor shall indicate any information contained in the Final Report which it considers to be commercially sensitive or which might otherwise merit non-publication and the Authority shall not disclose such information without first having consulted the

Contractor (without prejudice to the Authority's discretion as to whether to publish following such consultation).

F3.7 The Authority reserves the right to reject any Annual Report or Final Report submitted by the Contractor which is not, in the reasonable opinion of the Authority, satisfactory, either in form or content, having regard to the provisions of this Schedule. If an Annual Report or Final Report is rejected by the Authority, the Contractor shall remedy any deficiencies identified by the Authority and submit a revised version at no additional cost to the Authority or the Co-funders.

F3.8 The Contractor shall supply any additional reports, including financial reports, in respect of the Services, at such time or times, and in such form, as the Authority may reasonably require. Without prejudice to the generality of the foregoing, the Contractor shall provide to the Authority such information as the Authority may reasonably require regarding commercial exploitation of the Results, including details of any licences granted to third parties in respect of any Intellectual Property Rights in the same. The Contractor shall further keep at its normal place of business detailed accurate and up to date records and accounts showing details of its commercial exploitation of the Results including the sale of products or services which incorporate the Results, Income received, allowable costs deducted and the amount of licensing revenues received by it in respect of the Results in a format sufficient to ascertain that revenue sharing pursuant to the Contract has been properly accounted for and apportioned in accordance with the Contract.

F3.9 The Contractor shall, subject to reasonable notice, attend all meetings specified in the Contract or otherwise arranged by the Authority for the purpose of discussion of the Services.

F4 Remedies for inadequate performance

F4.1 If the Authority reasonably believes the Contractor has committed a Material Breach it may, without prejudice to its rights under clause H2 (Termination on Default), do any of the following:

- (a) without terminating the Contract, itself supply or procure the supply of all or part of the Services until such time as the Contractor has demonstrated to the Authority's reasonable satisfaction that the Contractor will be able to supply the Services in accordance with the Specification;
- (b) without terminating the whole of the Contract, terminate the Contract in respect of part of the Services only (whereupon a corresponding reduction in the Price shall be made) and thereafter itself supply or procure a third party to supply such part of the Services;
- (c) withhold or reduce payments to the Contractor in such amount as the Authority reasonably deems appropriate in each particular case; and/or

(d) terminate the Contract in accordance with clause H2.

F4.2 Without prejudice to its right under clause C3 (Recovery of Sums Due), the Authority may charge the Contractor for any costs reasonably incurred and any reasonable administration costs in respect of the supply of any part of the Services by the Authority or a third party to the extent that such costs exceed the payment which would otherwise have been payable to the Contractor for such part of the Services.

F4.3 If the Authority reasonably believes the Contractor has failed to supply all or any part of the Services in accordance with the Contract, professional or industry practice which could reasonably be expected of a competent and suitably qualified person, or any legislative or regulatory requirement, the Authority may give the Contractor notice specifying the way in which its performance falls short of the requirements of the Contract or is otherwise unsatisfactory.

F4.4 If the Contractor has been notified of a failure in accordance with clause F4.3 the Authority may:

(a) direct the Contractor to identify and remedy the failure within such time as may be specified by the Authority and to apply all such additional resources as are necessary to remedy that failure at no additional charge to the Authority within the specified timescale; and/or

(b) withhold or reduce payments to the Contractor in such amount as the Authority deems appropriate in each particular case until such failure has been remedied to the satisfaction of the Authority.

F4.5 If the Contractor has been notified of a failure in accordance with clause F4.3, it shall:

(a) use all reasonable endeavours to immediately minimise the impact of such failure to the Authority and to prevent such failure from recurring; and

(b) immediately give the Authority such information as the Authority may request regarding what measures are being taken to comply with the obligations in this clause F4.5 and the progress of those measures until resolved to the satisfaction of the Authority.

F4.6 If, having been notified of any failure, the Contractor fails to remedy it in accordance with clause F4.5 within the time specified by the Authority, the Authority may treat the continuing failure as a Material Breach and may terminate the Contract immediately on notice to the Contractor.

F5 Transfer and Sub-Contracting

F5.1 Except where clauses F5.5 and F5.6 both apply, the Contractor shall not transfer, charge, assign, sub-contract or in any other way dispose of the Contract or any part of it without Approval. All such documents shall be evidenced in writing and shown to the

Authority on request. Sub-contracting any part of the Contract shall not relieve the Contractor of any of its obligations or duties under the Contract.

F5.2 The Contractor is responsible for the acts and/or omissions of its Sub-Contractors as though they are its own. If it is appropriate, the Contractor shall provide each Sub-Contractor with a copy of the Contract and obtain written confirmation from them that they will provide the Services fully in accordance with the Contract.

F5.3 The Contractor shall ensure that its Sub-Contractors and suppliers retain all records relating to the Services for at least 6 years from the date of their creation and make them available to the Authority on request in accordance with the provisions of clause E10 (Audit). If any Sub-Contractor or supplier does not allow the Authority access to the records then the Authority shall have no obligation to pay any claim or invoice made by the Contractor on the basis of such documents or work carried out by the Sub-Contractor or supplier.

F5.4 If the Authority has consented to the award of a Sub-Contract the Contractor shall ensure that:

- (a) the Sub-Contract contains a right for the Contractor to terminate the Sub-Contract if the relevant Sub-Contractor does not comply in the performance of its contract with legal obligations in environmental, social or labour law;
- (b) the Sub-Contractor includes a provision having the same effect as set out in clause F5.4 (a) in any Sub-Contract which it awards; and
- (c) copies of each Sub-Contract shall, at the request of the Authority, be sent by the Contractor to the Authority immediately.

F5.5 If the Authority believes there are:

- (a) compulsory grounds for excluding a Sub-Contractor pursuant to regulation 57 of the Regulations, the Contractor shall replace or not appoint the Sub-Contractor; or
- (b) non-compulsory grounds for excluding a Sub-Contractor pursuant to regulation 57 of the Regulations, the Authority may require the Contractor to replace or not appoint the Sub-Contractor and the Contractor shall comply with such requirement.

F5.6 Notwithstanding clause F5.1, the Contractor may assign to a third party (the "Assignee") the right to receive payment of the Price or any part thereof due to the Contractor (including any interest which the Authority incurs under clause C2 (Payment and VAT)). Any assignment under this clause F5.6 shall be subject to:

- (a) reduction of any sums in respect of which the Authority exercises its right of recovery under clause C3 (Recovery of Sums Due);

(b) all related rights of the Authority under the Contract in relation to the recovery of sums due but unpaid; and

(c) the Authority receiving notification under both clauses F5.7 and F5.8.

F5.7 If the Contractor assigns the right to receive the Price under clause F5.6, the Contractor or the Assignee shall notify the Authority in writing of the assignment and the date upon which the assignment becomes effective.

F5.8 The Contractor shall ensure that the Assignee notifies the Authority of the Assignee's contact information and bank account details to which the Authority shall make payment.

F5.9 The provisions of clause C2 shall continue to apply in all other respects after the assignment and shall not be amended without Approval.

F5.10 Subject to clause F5.11, the Authority may assign, novate or otherwise dispose of its rights and obligations under the Contract or any part thereof to:

(a) any Contracting Authority;

(b) any other body established or authorised by the Crown or under statute in order substantially to perform any of the functions that had previously been performed by the Authority; or

(c) any private sector body which substantially performs the functions of the Authority

provided that any such assignment, novation or other disposal shall not increase the burden of the Contractor's obligations under the Contract.

F5.11 Any change in the legal status of the Authority such that it ceases to be a Contracting Authority shall not, subject to clause F5.12, affect the validity of the Contract and the Contract shall bind and inure to the benefit of any successor body to the Authority.

F5.12 If the rights and obligations under the Contract are assigned, novated or otherwise disposed of pursuant to clause F5.10 to a body which is not a Contracting Authority or if there is a change in the legal status of the Authority such that it ceases to be a Contracting Authority (in the remainder of this clause F5 both such bodies being referred to as the "Transferee"):

(a) the rights of termination of the Authority in clauses H1 and H2 shall be available to the Contractor in respect of the Transferee; and

(b) the Transferee shall only be able to assign, novate or otherwise dispose of its rights and obligations under the Contract or any part thereof with the prior consent in writing of the Contractor.

F5.13 The Authority may disclose to any Transferee any Confidential Information of the Contractor which relates to the performance of the Contractor's obligations under the Contract. In such circumstances the Authority shall authorise the Transferee to use such Confidential Information only for purposes relating to the performance of the Contractor's obligations under the Contract and for no other purpose and shall take all reasonable steps to ensure that the Transferee gives a confidentiality undertaking in relation to such Confidential Information.

F5.14 Each Party shall at its own cost and expense carry out, or use all reasonable endeavours to ensure the carrying out of, whatever further actions (including the execution of further documents) the other Party reasonably requires from time to time for the purpose of giving that other Party the full benefit of the provisions of the Contract.

F6 Waiver

F6.1 The failure of either Party to insist upon strict performance of any provision of the Contract, or the failure of either Party to exercise, or any delay in exercising, any right or remedy shall not constitute a waiver of that right or remedy and shall not cause a diminution of the obligations established by the Contract.

F6.2 No waiver shall be effective unless it is expressly stated to be a waiver and communicated to the other Party in writing in accordance with clause A4.2 (Notices).

F6.3 A waiver of any right or remedy arising from a breach of the Contract shall not constitute a waiver of any right or remedy arising from any other or subsequent breach of the Contract.

F7 Variation

F7.1 If, after the Commencement Date, the Authority's requirements change, the Authority may request a Variation subject to the terms of this clause 7.

F7.2 The Authority may request a Variation by notifying the Contractor in writing of the Variation and giving the Contractor sufficient information to assess the extent of the Variation and consider whether any change to the Price is required in order to implement the Variation within a reasonable time limit specified by the Authority. If the Contractor accepts the Variation it shall confirm it in writing.

F7.3 If the Contractor is unable to accept the Variation or where the Parties are unable to agree a change to the Price, the Authority may:

- (a) allow the Contractor to fulfil its obligations under the Contract without the Variation to the Specification; or
- (b) terminate the Contract immediately except where the Contractor has already delivered all or part of the Services or where the Contractor can show evidence of substantial work being carried out to fulfil the requirements of the Specification; and in

such case the Parties shall attempt to agree upon a resolution to the matter. If a resolution cannot be reached, the matter shall be dealt with under the Dispute Resolution procedure detailed in clause I2 (Dispute Resolution).

F7.4 No Variation will take effect unless and until recorded in a validly executed CCN. Execution of a CCN shall be made via electronic signature as described in clause 1.2 of Section 1 of the Contract.

F7.5 A CCN takes effect on the date both Parties communicate acceptance of the CCN via Bravo and, on the date it communicates its acceptance of the CCN in this way, the Contractor is deemed to warrant and represent that the CCN has been executed by a duly authorised representative of the Contractor in addition to the warranties and representations set out in clause G2.

F7.6 The provisions of clauses F7.4 and F7.5 may be varied in an emergency if it is not practicable to obtain the Authorised Representative's approval within the time necessary to make the Variation in order to address the emergency. In an emergency, Variations may be approved by a different representative of the Authority. However, the Authorised Representative shall have the right to review such a Variation and require a CCN to be entered into on a retrospective basis which may itself vary the emergency Variation.

F8 Severability

F8.1 If any provision of the Contract which is not of a fundamental nature is held invalid, illegal or unenforceable for any reason by any court of competent jurisdiction, such provision shall be severed and the remainder of the provisions of the Contract shall continue in full force and effect as if the Contract had been executed with the invalid, illegal or unenforceable provision eliminated.

F9 Remedies Cumulative

F9.1 Except as expressly provided in the Contract all remedies available to either Party for breach of the Contract are cumulative and may be exercised concurrently or separately, and the exercise of any one remedy shall not be deemed an election of such remedy to the exclusion of other remedies.

F10 Entire Agreement

F10.1 The Contract constitutes the entire agreement between the Parties in respect of the matters dealt with therein. The Contract supersedes all prior negotiations between the Parties and all representations and undertakings made by one Party to the other, whether written or oral, except that this clause shall not exclude liability in respect of any fraudulent misrepresentation.

F11 Counterparts

F11.1 The Contract may be executed in counterparts, each of which when executed and delivered shall constitute an original but all counterparts together shall constitute one and the same instrument.

G LIABILITIES

G1 Liability, Indemnity and Insurance

G1.1 Neither Party limits its liability for:

- (a) death or personal injury caused by its negligence;
- (b) fraud or fraudulent misrepresentation;
- (c) any breach of any obligations implied by section 12 of the Sale of Goods Act 1979 or section 2 of the Supply of Goods and Services Act 1982;
- (d) any breach of clauses D1, E1, E2 or E4 or any breach of Schedule 8; or
- (e) any liability to the extent it cannot be limited or excluded by Law.

G1.2 Subject to clauses G1.3 and G1.4, the Contractor shall indemnify the Authority and keep the Authority indemnified fully against all claims, proceedings, demands, charges, actions, damages, costs, breach of statutory duty, expenses and any other liabilities which may arise out of the supply, or the late or purported supply, of the Services or the performance or non-performance by the Contractor of its obligations under the Contract or the presence of the Contractor or any Staff on the Premises, including in respect of any death or personal injury, loss of or damage to property, financial loss arising from any advice given or omitted to be given by the Contractor, or any other loss which is caused directly by any act or omission of the Contractor.

G1.3 Subject to clause G1.1 the Contractor's aggregate liability in respect of the Contract shall not exceed £715,125 (which is equal to five times the contract value).

G1.4 The Contractor shall not be responsible for any injury, loss, damage, cost or expense if and to the extent that it is caused by the negligence or wilful misconduct of the Authority or by breach by the Authority of its obligations under the Contract.

G1.5 The Authority may recover from the Contractor the following losses incurred by the Authority to the extent they arise as a result of a Default by the Contractor:

- (a) any additional operational and/or administrative costs and expenses incurred by the Authority, including costs relating to time spent by or on behalf of the Authority in dealing with the consequences of the Default;
- (b) any wasted expenditure or charges;

(c) the additional costs of procuring a Replacement Contractor for the remainder of the Contract Period and or replacement deliverables which shall include any incremental costs associated with the Replacement Contractor and/or replacement deliverables above those which would have been payable under the Contract;

(d) any compensation or interest paid to a third party by the Authority; and

(e) any fine or penalty incurred by the Authority pursuant to Law and any costs incurred by the Authority in defending any proceedings which result in such fine or penalty.

G1.6 Subject to clauses G1.1 and G1.5, neither Party shall be liable to the other for any:

(a) loss of profits, turnover, business opportunities or damage to goodwill (in each case whether direct or indirect); or

(b) indirect, special or consequential loss.

G1.7 Unless otherwise specified by the Authority, the Contractor shall, with effect from the Commencement Date for such period as necessary to enable the Contractor to comply with its obligations herein, take out and maintain with a reputable insurance company a policy or policies of insurance providing an adequate level of cover in respect of all risks which may be incurred by the Contractor, arising out of the Contractor's performance of its obligations under the Contract, including death or personal injury, loss of or damage to property or any other loss. Such policies shall include cover in respect of any financial loss arising from any advice given or omitted to be given by the Contractor. Such insurance shall be maintained for the duration of the Contract Period and for a minimum of 6 years following the end of the Contract.

G1.8 The Contractor shall hold employer's liability insurance in respect of Staff and such insurance shall be in accordance with any legal requirement from time to time in force.

G1.9 The Contractor shall give the Authority, on request, copies of all insurance policies referred to in this clause or a broker's verification of insurance to demonstrate that the appropriate cover is in place, together with receipts or other evidence of payment of the latest premiums due under those policies.

G1.10 If the Contractor does not give effect to and maintain the insurances required by the provisions of the Contract, the Authority may make alternative arrangements to protect its interests and may recover the costs of such arrangements from the Contractor.

G1.11 The provisions of any insurance or the amount of cover shall not relieve the Contractor of any liabilities under the Contract.

G1.12 The Contractor shall not take any action or fail to take any reasonable action, or (to the extent that it is reasonably within its power) permit anything to occur in relation to the

Contractor, which would entitle any insurer to refuse to pay any claim under any insurance policy in which the Contractor is an insured, a co-insured or additional insured person.

G2 Warranties and Representations

G2.1 The Contractor warrants and represents on the Commencement Date and for the Contract Period that:

- (a) it has full capacity and authority and all necessary consents to enter into and perform the Contract and that the Contract is executed by a duly authorised representative of the Contractor;
- (b) in entering the Contract it has not committed any fraud;
- (c) as at the Commencement Date, all information contained in the Tender or other offer made by the Contractor to the Authority remains true, accurate and not misleading, save as may have been specifically disclosed in writing to the Authority prior to execution of the Contract and in addition, that it will advise the Authority of any fact, matter or circumstance of which it may become aware which would render such information to be false or misleading;
- (d) no claim is being asserted and no litigation, arbitration or administrative proceeding is presently in progress or, to the best of its knowledge and belief, pending or threatened against it or any of its assets which will or might have an adverse effect on its ability to perform its obligations under the Contract;
- (e) it is not subject to any contractual obligation, compliance with which is likely to have a material adverse effect on its ability to perform its obligations under the Contract;
- (f) no proceedings or other steps have been taken and not discharged (nor, to the best of its knowledge, are threatened) for the winding up of the Contractor or for its dissolution or for the appointment of a receiver, administrative receiver, liquidator, manager, administrator or similar officer in relation to any of the Contractor's assets or revenue;
- (g) it owns, or has obtained or is able to obtain valid licences for, all Intellectual Property Rights that are necessary for the performance of its obligations under the Contract;
- (h) any person engaged by the Contractor shall be engaged on terms which do not entitle them to any Intellectual Property Right in any IP Materials;
- (i) in the 3 years (or period of existence where the Contractor has not been in existence for 3 years) prior to the date of the Contract:
- (i) it has conducted all financial accounting and reporting activities in compliance in all material respects with the generally accepted accounting principles that apply to it in any country where it files accounts;

- (ii) it has been in full compliance with all applicable securities and tax laws and regulations in the jurisdiction in which it is established; and
- (iii) it has not done or omitted to do anything which could have a material adverse effect on its assets, financial condition or position as an ongoing business concern or its ability to fulfil its obligations under the Contract;
- (j) it has and will continue to hold all necessary (if any) regulatory approvals from the Regulatory Bodies necessary to perform its obligations under the Contract; and
- (k) it has notified the Authority in writing of any Occasions of Tax Non-Compliance and any litigation in which it is involved that is in connection with any Occasion of Tax Non-Compliance.

G3 Force Majeure

G3.1 Subject to the remaining provisions of this clause G3, a Party may claim relief under this clause G3 from liability for failure to meet its obligations under the Contract for as long as and only to the extent that the performance of those obligations is directly affected by a Force Majeure Event. Any failure or delay by the Contractor in performing its obligations under the Contract which results from a failure or delay by an agent, Sub-Contractor or supplier shall be regarded as due to a Force Majeure Event only if that agent, Sub-Contractor or supplier is itself impeded by a Force Majeure Event from complying with an obligation to the Contractor.

G3.2 The Affected Party shall as soon as reasonably practicable issue a Force Majeure Notice, which shall include details of the Force Majeure Event, its effect on the obligations of the Affected Party and any action the Affected Party proposes to take to mitigate its effect.

G3.3 If the Contractor is the Affected Party, it shall not be entitled to claim relief under this clause G3 to the extent that consequences of the relevant Force Majeure Event:

- (a) are capable of being mitigated by any of the Services, but the Contractor has failed to do so; and/or
- (b) should have been foreseen and prevented or avoided by a prudent provider of services similar to the Services, operating to the standards required by the Contract.

G3.4 Subject to clause G3.5, as soon as practicable after the Affected Party issues the Force Majeure Notice, and at regular intervals thereafter, the Parties shall consult in good faith and use reasonable endeavours to agree any steps to be taken and an appropriate timetable in which those steps should be taken, to enable continued provision of the Services affected by the Force Majeure Event.

G3.5 The Parties shall at all times following the occurrence of a Force Majeure Event and during its subsistence use their respective reasonable endeavours to prevent and mitigate

G3.7 The Affected Party shall notify the other Party as soon as practicable after the Force Majeure Event ceases or no longer causes the Affected Party to be unable to comply with its obligations under the Contract.

G3.8 Relief from liability for the Affected Party under this clause G3 shall end as soon as the Force Majeure Event no longer causes the Affected Party to be unable to comply with its obligations under the Contract and shall not be dependent on the serving of notice under clause G3.7.

SCHEDULE 1 - SPECIFICATION

Specification for the design of an evaluation framework for the Nature Strategy 2021-2030

Summary of requirements

Defra seeks a supplier to develop an evaluation framework for the future evaluation of the next Nature Strategy committed to in the 25 Year Environment Plan and under Conservation of Biological Diversity. As the current biodiversity strategy for England (Biodiversity 2020: A strategy for England's wildlife and ecosystem services) comes to an end, the Government is drawing up a new strategy setting out England's approach to protecting biodiversity over the next decade. This will take into account new global commitments agreed under the post-2020 Convention of Biological Diversity (CBD) framework, of which the UK is a signatory. It will also set out how we will progress domestic commitments on nature that were introduced in the 25 Year Environment Plan. Our commitment to our ambitious biodiversity strategy will be cemented by legally binding biodiversity target(s) set under the Environment Bill framework, with secondary legislation due to be laid in parliament by October 2022.

In order to ensure that the Nature Strategy, the commitments and targets and the policies that help us to meet them are achieved, it is essential to assess the outcomes that we expect policies to achieve and how successful we have been in delivering these outcomes. This project will develop a framework to ensure we have a robust approach to evaluating the actions and progress towards outcomes outlined in the nature strategy, in line with evaluation best practice and Magenta book guidance.

The purpose of the evaluation framework is to enable Defra to evaluate how the Nature Strategy is being delivered and how much we are progressing towards our objectives. Defra wants to consider evaluation in advance to make sure we have considered the best ways to evaluate the Nature Strategy before it begins and to build a strong evaluation theme throughout the lifetime of the strategy. Defra also wants to better understand the benefits of delivering this strategy.

Protecting and improving biodiversity is a complex challenge, requiring efforts from and collaboration between a wide range of teams and organisations within and outside of government. This means the policy landscape is complex and it is difficult to get a comprehensive picture of the efforts and resources that contribute towards our biodiversity goals, and their individual effectiveness. Policy areas and bespoke interventions management such a Nature Recovery Network, Protected Sites, Environmental Land Management and Biodiversity Net Gain are examples of the wide range of contributing

policies (not exhaustive examples). Some of the contributing policy areas will have an individual monitoring and evaluation plan or programme but an overarching framework for assessment and reporting against the delivery of the Nature Strategy outcomes is required. This project is for the overarching Nature Strategy evaluation framework and Defra will provide information on each of the relevant policy areas as these become available. The framework will need to have flexibility to accommodate the developing policy landscape and any policy (or wider) changes over the lifetime of the strategy.

We are open to methods which meet the requirements set out in the specification, but we are interested in using complexity-appropriate approaches and methods such as the [Defra Complexity Evaluation Framework](#).

It is anticipated the contract will commence on **16th November**, running for 4.5 months with all project outputs to be completed no later than **31st March 2021**.

Policy Background

The [25 Year Environment Plan](#) was launched in January 2018 and sets the ambition towards “A green future: Our 25 Year Plan to improve the Environment”. Defra, and the Defra group, will predominantly deliver and assess the delivery of the 25 YEP goals.

Within Chapter 2 of the 25 YEP, Recovering Nature and enhancing the beauty of landscapes, there is a commitment to publish a strategy for nature. This strategy will build on successes and lessons learned of the previous strategy, [Biodiversity 2020](#), which was launched in 2011. The [Environment Bill](#), introduced on 30th January 2020, introduces new biodiversity targets (still being developed) which will build on those set in the 25 YEP.

The UK is part of the Convention of Biological Diversity (CBD). The UK is required by Article 26 of the Convention to submit national reports to the Conference of Parties on measures taken for the implementation of the Convention and their effectiveness in meeting the objectives of the Convention. The UK submitted their [6th National Report](#) in 2019. This report shows how the UK worked towards achieving the [20 Aichi Targets](#) in the Strategic Plan for Biodiversity 2011-2020 (Biodiversity 2020).

The Nature Strategy will set out how Government will meet the goals set out in the 25 YEP and deliver on international commitments set under CBD in England. The CBD targets for 2021-2030 are not yet confirmed so we will require the framework to be flexible to accommodate this. We currently understand that priorities will include (but not limited to):

- Protected sites
- Wider Habitats
- Species

[An evaluation of Biodiversity 2020 strategy was completed in 2019](#). The evaluation aimed to assess progress towards biodiversity outcomes, evaluate what worked well and why and

identified lessons and opportunity to improve delivery of the future nature strategy. This gave advice that an evaluation of a nature strategy would need to assess if goals/targets have been met and why, understanding the role of the underlying policies, and how a logic model setting out how policies fit in with goals would assist in this process. The Biodiversity 2020 evaluation highlighted areas for improvement, in delivering biodiversity outcomes and its evaluation, and set out what we want to be able to evaluate as effectively as possible and provided suggestions on how to do so.

Policy areas (some of which are underway) that will need to be considered for the Nature Strategy will include but not limited to:

- Nature Recovery Network
- Biodiversity Net Gain
- Environmental Land Management
- Local Nature Recovery Strategies
- Protected Sites

Current contracts that will be of interest to this work:

- Design of an Evaluation Framework for Biodiversity Net Gain in England – currently underway through external contract (let in September 2020)

Wherever possible Defra will ensure that relevant outputs from these contracts are available to the successful supplier to ensure that the scoping work and development of the evaluation framework is joined up with other relevant Nature Strategy work. We will also encourage contact and/or close working if necessary, with the Biodiversity Net Gain evaluation framework project.

Timeframes are currently not fixed due to several areas of policy and legislation still under development. The Environment Bill was introduced on 30th January 2020 and it is anticipated that this bill will gain Royal Assent by the end of 2020, The Nature Strategy is due to be launched in late 2021 to replace the outgoing Biodiversity 2020 Strategy. Biodiversity 2020 Strategy is due to end 31/3/2021. This should be considered when developing timelines for evaluation activity.

Objectives

The objectives of the procurement are to provide the design of a robust yet proportionate evaluation framework in line with HMT Magenta Book guidance. The framework should include:

- a) the activities required to evaluate the Nature Strategy
- b) how we can build on the evaluation approach used for Biodiversity 2020 to ensure we have the foundations for a robust and effective evaluation of the new Nature Strategy, considering the complexity of the policy landscape

- c) what approaches should we take for robust and effective evaluation of the Nature Strategy
- d) timing of activity: which activities are required, and arrangements need to be in place at the launch of the strategy and which can be undertaken in later years.
- e) recommendations on review periods and type of review of the strategy evaluation approach and reporting over the strategy's lifetime.

We will initially require a Theory of Change setting out what drives progress, as this will help understand:

- What policies/activities/approaches we should be evaluating and commissioning evaluations for,
- How individual policies fit into the wider strategy and are expected to contribute, which will inform how we should evaluate those.
- What external activities we need an approach to try and keep track over the decade.
This should include how we should think about new policies/activities that come in later, in terms of slotting them into our logic model, updating our strategy, testing and reviewing things over time.

The purpose of the evaluation framework is to enable Defra to evaluate how the Nature Strategy is being delivered (process evaluation), assess the impact (environmental, social, and economic) of Nature Strategy policy (impact evaluation), including any unintended consequences and our progress towards delivering the strategy outcomes over its lifetime. More specifically the evaluation framework will enable Defra to:

- Evaluate the effectiveness of the Nature Strategy 2021-2030 in delivering outcomes relevant to the 25 YEP and CBD targets.
- Understand how Nature Strategy 2021-2030 is being delivered through other policy areas and specific actions, including how we can learn from this to inform and improve outcomes.
- Report on the progress and impact of the Nature Strategy (as set out under [Our requirements for an Evaluation Framework](#)).

Inform reporting arrangements by mobilising data generated via administrative process or IT systems to support the future evaluation of the Nature Strategy (see [Data requirements and sources](#)). The development of framework will be undertaken in parallel with work by the Defra policy team to design Nature Strategy delivery through the various policies.

The framework is initially aimed at the Nature Strategy but should have flexibility to improve evaluation across the strategy's components such as the Nature Recovery Network and Green Recovery Challenge Fund.

Our requirements for an Evaluation Framework

The evaluation framework should set out activities required to evaluate the Nature Strategy in order to:

- Meet government requirements for robust, proportionate evaluation to ensure programmes deliver for the public, in line with expectations in the Magenta Book 2020, 'all policies, programmes and projects should be subject to proportionate evaluation' (p. 8).
- Help secure stakeholder confidence and assurance in the effectiveness of the arrangements in meeting policy objectives for biodiversity in the short, medium and long term (the lifetime of the Nature Strategy and wider towards delivery of the 25 YEP.)
- Assess the contribution of the Nature Strategy to the [25YEP outcome indicator framework](#) (for example, indicator D1 - Quality, quality and connectivity of habitats). The framework should be designed with sufficient flexibility to inform or adapt to wider reporting and evaluation demands to support of the 25 Year Environment Plan and take into account the feeder policies such as Nature Recovery Network, Protected sites, species recovery, Net Gain, ELMs, Tree strategy, Peat strategy and Local Nature Recovery Strategies as required.
- Meet relevant reporting requirements in the Environment Bill when known.

We will require the contractor, working with contacts in Defra, to develop the evaluation design principles and develop the evaluation questions in discussion with policy leads and ALBs.

A post implementation review (PIR) after the launch of the Nature Strategy, and at mid-term and at full-term, will be carried out internally by the Defra Strategic Evaluation Team.

Methods

The approach to development of the evaluation framework should be informed by the [Magenta Book](#) 2020 including the key principles around the requirement for scoping and designing an evaluation. These include:

- Understanding the intervention and its evidence base
- Understanding the type of evaluation required
- Understanding the appropriateness of the evaluation methods
- Agreeing the most appropriate evaluation approach and identifying the most suitable evaluation methods.

The evaluation framework should take into account the latest thinking and guidance on complexity-appropriate methods and designs as set out in the Magenta Book 2020 supplementary guidance on handling complexity in Policy Evaluation and the Defra [Complexity Evaluation Framework](#) (CEF). The CEF is designed to inform the scoping, commissioning, management and delivery of complexity appropriate evaluations. In terms of evaluation, complexity can arise at different levels including the systems within which

the intervention takes place and the intervention itself. The Nature Strategy has a number of characteristics of complex systems, which present particular challenges for evaluation. This complexity will need to be taken into account when designing the framework, and in particular the approach to understanding impact and attribution of impacts of the Nature Strategy.

We require the evaluation framework to support in process and impact evaluation. The framework should ensure that these elements are well-designed and complement each other.

We would like tenderers to set out their thinking on how to design an evaluation framework for the Nature Strategy. This should be informed by the current nature policy landscape (and developing areas of policy where known), 25 YEP commitments and the CBD. As this is a developing policy area, we would like the tenderers to set out how they plan to work with Defra (and the Defra group) on developing the evaluation design principles and developing evaluation questions. Also, to advise on the most appropriate methods for delivering insight in a developing policy area. A project steering group should be involved in discussions to finalise the evaluation questions.

Tenderers should propose an approach to the development of the framework which meets the objectives and requirements set out in this specification. The approach that is proposed should be evidence-based and build on and complement existing evidence and policy development, rather than duplicating existing work.

We are not prescriptive in terms of the content of the Evaluation Framework, but we would envisage it may include the following elements:

- **Evidence Review on Nature Strategy/Offsetting approaches** – this would be a rapid review which will support the development of the intervention theory. Biodiversity 2020 Evaluation and various internal assessments on current biodiversity monitoring and evaluation will provide a large base for this review. This brief phase of work should highlight a) any key new evidence published subsequently and b) link up with other relevant work areas within the Defra group c) key issues identified in these sources which should be explored by evaluation of policy implementation.
- **Review of policy and technical documentation** – this includes relevant impact assessments, consultation documents, policy documentation, background and briefing papers. This review will be important to help map out and understand potential process and reporting data.
- **Lessons learnt from the evaluation of Biodiversity 2020** – An evaluation has already been completed for the previous nature strategy, Biodiversity 2020. How can we improve on the evaluation process and on the evaluation outputs for the next strategy? We envisage this as relatively light touch exercise as a Biodiversity 2020 Evaluation has already been carried out.
- **Development of programme theory** – working with key stakeholders and policy leads develop an initial theory of change for the evaluation of the Nature Strategy. In line with Magenta Book 2020 this would set out how the Nature Strategy is expected to work in practice, including any assumptions and an assessment of the wider social and economic and evolving policy context (across multiple policy delivery areas).
- **Review data requirements and sources** – this involves undertaking a data mapping exercise to understand data requirements to meet evidence needs and options for how

these can be met. More detail on data requirements is set out in [Data requirements and sources](#) below.

- **Stakeholder engagement** – this will be managed by the Nature Strategy team but mechanisms should be in place to enable the developing evaluation framework to be tested with stakeholders

Data requirements and sources

We expect that a range of environmental, social, economic data will be required to build learning on process and impact evaluation for the Nature Strategy. In this context the term 'data' should be used broadly to mean information used to inform the evaluation. It may be drawn from data generated or collected in the operation of any of the feeder policies (however, several of these are still in development), data from national monitoring or surveillance strategies, surveys commissioned specifically to inform the evaluation or other sources identified by the tenderer.

- As part of this contract: We require an assessment of the suitability of current data and requirements for new data collection set against the evaluation questions developed as part of this project.

Data requirements will be driven by the programme theory, focusing on key evidence gaps, and prioritised evaluation questions to be developed as part of this project. The focus is expected to be on the evaluation of the Nature Strategy outcomes.

In developing data requirements, proposals should be consistent with the strategic approach set out in Natural England's [Monitoring Strategy 2019](#) and Joint Nature Conservation Committee (JNCC) [Terrestrial Biodiversity Evidence Strategy 2019](#). Existing monitoring commitments in the 25 YEP should be taken into consideration and, where possible, those being set within policies and the Environment Bill are currently under development. We would like the contract to recommend the level and nature of data needed to effectively evaluate the success of the Nature Strategy and how to make best use of data already set by existing monitoring.

Key issues to consider in identifying and defining data sources apply to biodiversity, social and economic data:

- **Use of existing data** – As first preference making use of existing evidence, most notably existing data, surveys and surveillance schemes [e.g. Defra group sentinel surveillance programmes and/or similar third-party monitoring activity]. The quality, scale and availability of existing data sources will need to be taken into account in assessing suitability of data. Relevant data managed by Defra and Natural England, such as in-house evidence and data reviews, will be made available if required during the project.
- Opportunities to **better define the type and nature of data** that could, reasonably and proportionately, be collected going forward. This could be achieved by influencing existing surveys and surveillance schemes (sentinel programmes) to make changes, or by encouraging/requiring feeder policies and/or wider strategy interventions to collect, in a way that benefits wider evaluation and reporting (e.g. evaluating 25YEP and Nature Recovery Strategy success).

- Consider the cost benefit of undertaking **Census (all) or Sample** based (part) approach to the collection and/or onward storage and sharing of any new data, balancing the burden on participants and the benefits for Nature Strategy evaluation and reporting. If sample based, how you intend to sample? Such as geographical?
- **Timescales** - the long-term nature of some of the anticipated outcomes needs to be considered. Should models or proxy data be used to estimate outcomes, at least in the short term? In determining suitable proxy data issues such as high failure rate for some habitats will need to be taken into account.
- **Consistent standards, methods and approaches:** As a first preference, outcome measures from the suite of measures from the 25YEP should be considered. New data collection should use consistent standards, methods and approaches, which could be potentially shared with the evaluation of other major policy interventions that contribute to strategic conservation goals (such as the Nature Recovery Network and Environmental Land Management Scheme).
- **Administrative data:** will any administrative data generated by the Nature Strategy feeder policies (such as Nature Recovery Network, Local Nature Recovery Strategies, Environmental Land Management) be useful.
- **Biodiversity data:** Feeder policies that are already established such as Protected Sites monitoring could be utilised as could the data from new sources that are being proposed in the Natural Capital Ecosystem Assessment.

Deliverables and timetable

Tenderers were requested to submit a plan for the Project as part of their response to this Specification. This includes identification of appropriate dates for meetings with the Project's steering group and Defra's project manager and dates for delivery of draft and final versions of the Project's Outputs.

The table below sets out delivery of key outputs. The dates for the final project output are fixed and must be completed by 31st March 2021 but there is flexibility in the timing and sequencing of interim outputs which the contractor can set out in their proposed timetable for delivery. A pricing schedule alongside each deliverable needs to be presented by the contractor in the tender.

Project milestone	Detail
Project inception meeting and agreement of methodology	<p>Meeting to discuss the proposed approach to the project.</p> <p>The bidder should confirm that there will be availability to attend a project inception meeting</p>

	during this week
Deliverable 1 Project Plan	A project plan is required to be sent to the Defra Project Officer, following the Inception Meeting. This will set out in detail the refined methodology setting out key tasks, project timeline and project timeline. It should clarify any key decision points and when detailed input from project steering group is required.
Deliverable 2 Interim Presentation and review of progress	<p>An interim (ideally video conference) presentation of methods, findings from summary of evidence and lessons learned from previous nature strategies, progress and issues to date.</p> <p>Agreed design principles for the framework working with Defra policy teams and Strategic Evaluation Team (utilising the Magenta Book).</p>
Deliverable 3 Draft Evaluation Framework	<p>A draft evaluation framework which should include set out the proposed approach to the evaluation of Nature Strategy 2021-2030</p> <p>Deliver an online workshop/survey (or other methods) across policy teams and ALBs to develop and recommend evaluation questions for the Nature Strategy. Open to ideas from contractors on how to deliver this.</p>
Deliverable 4 Final Evaluation Framework	<p>The Final Evaluation Framework will incorporate comments relating to the draft framework. It will include the following:</p> <ul style="list-style-type: none"> • Final intervention theory – this would draw on existing evidence, policy documentation and be developed in conjunction with policy leads and other stakeholders. • Confirmed evaluation principles and questions - setting out what the evaluation is seeking to provide and the evidence that is required to address these. • Details on methods - in particular the approach to understanding the net impact of Nature Strategy (taking into account attribution of impacts, deadweight and

	<p>displacement).</p> <ul style="list-style-type: none"> • A suite proposed of data requirements and indicators - with a clear justification for any new measures, an understanding of how data will be delivered, when, and to what standard, as well as where in the evaluation this data will feed. Recommendations for IT infrastructure needed to meet reporting needs. • Timelines for key evaluation milestones - planned dates of outputs from the evaluation and which evaluation questions each output may feed into. • Proposals on resource requirements for implementation of evaluation: including minimum resource needed for proportionate evaluation and options for where additional resource inputs could add value • Detailed learning and feedback proposals - to ensure that stakeholder are engaged, that learning is taken on board and that evaluation remains responsive to the needs of stakeholders.
--	--

The project outputs are to be produced in a written final report in word format (and any accompanying visuals/graphics, spreadsheets/models etc.).

It is Defra policy to publish all final project reports according to the principles set out in the Government Social Research (GSR) publication protocol.

Following delivery of the final project outputs, Defra will arrange for these to be peer-reviewed in line with Defra's Quality Management Standard.

Survey Control

Any surveys conducted as part of the project will need to meet the requirements of Defra's Survey Control Liaison Unit. Defra will submit survey materials to the Unit, which typically takes up to four weeks to consider submissions. The Appointed Contractor will undertake revisions required by the Unit. Time for this process should be factored in to the Project's Plan

Covid-19 implications for the contract including fieldwork

The current situation regarding Covid-19 has implications for any research involving data collection. Definitive guidance has not been issued but should be considered on a case by case basis. The current advice is that all face to face data collection should not take place on the grounds of public safety. If current restrictions are relaxed the ethical implications of travel and face to face data collection should be carefully considered.

Tenderers should clearly set out in their proposals practical ways that these issues can be addressed through for example the use of telephone or online consultations and teleconferencing/videoconferencing as appropriate.

Project governance and contract management

The project is being overseen by Defra (National Biodiversity and Ivory division in the Natural Environment directorate. An evaluation delivery group will be set up and managed by Defra, which will include representatives from Natural England and other teams in Defra. The Project Officer for this contract is [REDACTED], **Senior Science Officer, National Biodiversity Evidence team in Natural Environment Directorate.**

We require two weekly progress reports from the supplier to ensure that the contract is being delivered to the quality required.

Defra will provide regular updates on progress on the project to the Defra Nature Strategy Board.

Suppliers will be expected to work closely with Defra throughout the lifetime of the project. Suppliers should factor in regular meetings with Defra set out in the project plan the timing of these meetings.

Sustainability

The successful contractor is expected to pursue sustainability in their operations, thereby ensuring Defra is not contracting with a supplier whose operational outputs run contrary to Defra's objectives. The successful contractor will need to approach the project with a focus on the entire life cycle of the project. The successful contractor is likely to be able to provide a copy of their environmental policy and any environmental accreditation schemes such as ISO 14001 or EMAS which they have been awarded or are working towards.
