

Tree Survey No.	Species	Tree Stem Diameter @1.5m Height	Tree Root Protection Area Radius	Height (approx)			Spread (approx)		Age Class & Years Remaining		Structural Condition	Vigour	Notes/ Comments	Category	Status
				Overall	Clear Stem Ht.	NA	N	E	S	W					
SG 01	2 no. Shrubs: (i) <i>Prunus laurocerasus</i> (ii) <i>Aucuba sp.</i>	75mm Ø Est. / Avg.	0.90m	Height Overall	1.5 - 3.0m	N	1.5m	Semi Mature	40 + yrs	Good	Good	2 no ornamental shrubs to the north of the village hall building - both have a rounded form and are multi stem specimens. SG 01(i) to be removed to accommodate the building extension.	C	1	Retain / Remove
				Clear Stem Ht.	NA	S	1.5m								
						W	1.5m Avg.								
T 02	<i>Quercus petraea</i> (Sessile Oak)	620mm Ø	7.50m	Height Overall	13.0m	N	7.5m	Early Mature	40 + yrs	Good	Good	Early mature Oak lying to the top of a low bank adjacent to a car parking area. The tree has a single stem and a spreading habit, extensive hard standing lies to the south and a retaining wall is located to the south-west. Two concrete plinths (bench foundations) lie adjacent to the basal area.	B	1	Retain
				Clear Stem Ht.	3.0m	S	6.5m								
						W	8.5m								
T 03	<i>Quercus robur</i> (English Oak)	680mm Ø	8.10m	Height Overall	17.0m	N	3.0m	Early Mature	40 + yrs	Good	Good	Tall Oak which lies adjacent to Eastern Road - the tree has a single stem and a ditch lies immediately to the south. The tree has an slightly asymmetrical and there is dense shrub planting to the base (Holly and Yew). The tree forms part of a tree line to the edge of Eastern Road.	A	2	Retain
				Clear Stem Ht.	3.0m	S	8.5m								
						W	7.0m								
T 04	<i>Quercus robur</i> (English Oak)	820mm Ø	9.90m	Height Overall	17.0m	N	6.5m	Early Mature	40 + yrs	Good	Good	An Oak which lies in very close proximity to T 03 - the tree has a single stem and dense shrubs lie to the base. The tree forms part of a tree line to the edge of Eastern Road.	A	2	Retain
				Clear Stem Ht.	3.0m	S	8.0m								
						W	6.0m								
T 05	<i>Quercus robur</i> (English Oak)	900mm Ø Est.	10.80m	Height Overall	12.0m	N	3.5m	Over Mature	40 + yrs	Fair	Poor	Large and mature tree with a substantial single stem. The tree is in serious decline and has undergone a crown reduction. Dense ivy to the main stem limited measurement and full visual inspection - a (dissicated) fungal fruiting body was observed to the northern side of the trunk. (Tree is not included within the measured survey - location is indicative)	B	1	Retain
				Clear Stem Ht.	6.0m	S	5.0m								
						W	6.0m

CASCADE CHART FOR TREE QUALITY ASSESSMENT (BS5837 Trees in relation to design, demolition and construction – Recommendations)

TREES UNSUITABLE FOR RETENTION

Category U: Trees in such a condition that they cannot realistically be retained as living trees in the context of the current land use for longer than 10 years

- *Trees that have a serious, irremediable structural defect such that early loss is expected due to collapse;*
- *Trees that are dead or showing signs of significant, immediate and irreversible decline;*
- *Trees infected with pathogens of significance to health and / or safety of other trees nearby;*
- *Trees of very low quality suppressing adjacent trees of better quality;*
- *Trees that would be unviable after the removal of other, adjacent trees for the reasons above.*

TREES TO BE CONSIDERED FOR RETENTION

1. Mainly arboricultural qualities

2. Mainly landscape qualities

3. Mainly cultural values including conservation

Category A: Trees of high quality (with an estimated remaining life expectancy of at least 40 years)

- | | | |
|---|--|--|
| <ul style="list-style-type: none"> • <i>Trees that are particularly good examples of their species (especially if rare or unusual);</i> • <i>Trees which are essential components of groups of trees or formal / semi-formal arboricultural features.</i> | <ul style="list-style-type: none"> • <i>Trees, groups or woodlands of particular visual importance as arboricultural and/or landscape features.</i> | <ul style="list-style-type: none"> • <i>Trees, groups or woodland of significant conservation, historical, commemorative or other value (eg. veteran trees / wood pasture).</i> |
|---|--|--|

Category B: Trees of moderate quality (with an estimated remaining life expectancy of at least 20 years)

- | | | |
|--|--|--|
| <ul style="list-style-type: none"> • <i>Trees that might be included in the higher category, but because of impaired condition (eg. significant but remediable defects / unsympathetic historical management / storm damage) are downgraded;</i> • <i>Trees lacking the special quality to merit Category A designation.</i> | <ul style="list-style-type: none"> • <i>Trees present in numbers (groups or woodlands) such that they attract a higher collective rating than as individuals;</i> • <i>Groups of trees whose location mean they make little visual contribution to the wider locality.</i> | <ul style="list-style-type: none"> • <i>Trees with material conservation or other cultural value.</i> |
|--|--|--|

Category C: Trees of low quality (with an estimated remaining life expectancy of at least 10 years or young trees with a stem diameter below 150mm)

- | | | |
|--|---|---|
| <ul style="list-style-type: none"> • <i>Unremarkable trees of very limited merit or such impaired condition that they do not qualify for the higher categories.</i> | <ul style="list-style-type: none"> • <i>Trees present in groups or woodlands without offering significant landscape value;</i> • <i>Trees offering low or temporary / transient landscape benefits.</i> | <ul style="list-style-type: none"> • <i>Trees with no material conservation or other cultural value.</i> |
|--|---|---|
