RFQ045 Computer Desks for STEM Centre

Clarification Questions - 04 January 2016

1. Is height adjustability essential for all desks?
 - a. Yes, all desks must be height adjustable.

2. Could you please clarify that the desks to be considered have to comply with the following:
 - 4 legged
 - Round legs
 - 200 mm adjustment
 - Twist action adjustment
 - a. All desks must have four legs and have the height adjustability of 200mm

It is preferable that the legs are round and that the adjustability comes from a twist mechanism, however if you wish to offer an alternative you may do so; please clearly indicate this on the pricing schedule and within your written document.

Please be advised that should your bid be successful, a sample would be required. If the alternative solution is not felt to meet the College's requirements they may chose not to award.

3. Am I able to offer a number of solutions for consideration?
 - a. Yes. Please provide a separate copy of Appendix A for each solution offered, and ensure that it is clearly marked. This will assist with the analysis process.

4. Desks with four legs are usually height "settable" rather than height "adjustable"; is that what you require?
 - a. The desks must be suitable for adjusting or re-setting with a variance of 200mm. Height "settable" desks are suitable.
