Subject: RE: Renovation and Expansion of The Bowl, Town Gardens, Swindon

Hi ,

We had commissioned a feasibility study for The Bowl refurbishment pre-covid. That budget has been uplifted to reflect inflation since then and the total project budget will be circa £1m but of course defined by the architect designs and resulting recommendations.

The budget of £25-40k should cover the works as described within the tender, I believe this would be RIBA Stage 4 –

- 1. An architectural concept masterplan of phases 1 and 2 for the renovation and expansion of The Bowl in Town Gardens for the Council's approval (the Council may commission the development of stage 2 options and drawings for additional facility space(s) within the grassed auditorium in the future);*
- 2. Following Council approval, the development of final architectural proposal and drawings including technical design for phase 1 from which a main construction contractor will be able to undertake the construction phase;*

I hope this answers the questions you had but if you have any further please do not hesitate to contact me.

Kind Regards,

Jake Mee FMAAT

Hello Jake

I hope this email finds you well?

We have come across your exciting tender for The Bowl in Swindon and had just a couple of questions if we may please.

Please can you share the anticipated project or construction budget?

And please can you clarify which RIBA stages you would like included for the fee of £25k-£40k?

Thank you kindly in advance.

Best wishes
