

Please could you send us some pictures of the 'Concrete Constructed raised bays for benches to be fixed to, these bays will be 2400mm x 1200mm x 150mm' so we can get a better understanding of what we need to price.

We would be looking for a solid platform – similar to those shown in the photo above (but without the bonded gravel surface and adjacent pathway).

Also, we propose the use of bow top fence instead of the palisade fencing as this will be more pleasant to look at. If this is of interest, we can send pictures to aid with your decision.

Yes, that would be helpful – thanks.
