

Shared Services Connected Limited are seeking Tier 3 Support Rough Order of Magnitude (ROM) pricing for existing custom solutions and on-premise installation of Open Street Maps.

This is to include,

- Future software packaging
- Assistance with configuration or set up new OSM instances / software
- Quarterly requests for data and software updates
- More frequent updates if required
- Ongoing, maintenance, support etc.
- On request or scheduled OSM data validation and correction (specific addresses, streets, speed limits, etc.)
- Future potential software packaging
- Assistance with future potential configuration or set up new OSM instances / software
- A monthly license for one on-prem API instance (e.g. single server providing Routing API or Geocoding API)
- License to use second instance or an additional API
- Identification of any volume discounts and what the instances break points are

The supplier is to assume that the initial contract period will be for 12 months.
