

ILead-Time and Price Combination Scoring Matrix

Serial	DMC	Description	Drawing Number/ Part Number	Dof Q	PPQ	Pack Code	Currency	Quantity	Unit Price	MOQ	Price Break 1 Quantity	Price Break 1 Price	Price Break 2 Quantity	Price Break 2 Price	Lead Time (Working Days)
1	W115	IFF TEST SET		EA	1	A		7							
2	W115	ACCESSORY TRIPOD		EA	1	A		5							

- Insert the manufacturers part number and the respective drawing number for technical information that relates to the product, (this drawing number is for our records only and will not be used without further consultation with the tenderer).
- Insert the unit price per item, this will be for a quantity of 1.
- The Authority does not wish to receive a Minimum Order Quantity (MOQ) against any line item. If, by exception, the Tenderer deems it necessary to impose an MOQ then they must provide adequate justification with the bid. If a quoted MOQ exceed the sum of the Evaluation Quantity and Lead Time Quantity then the MOQ shall be used in its place to calculate the total cost.
- If MOQ applies, at the Tenderers Discretion, Insert price breaks to allow the authority the opportunity to assess best value for money.
- The Tenderer shall insert a lead-time which the they are confident can be fulfilled once an order is placed (Late deliveries will be subject to consequences as detailed at **clause L3**)
