D2. Tender Compliance

1. A compliant tender is one which;
 - a. answers all the questions in the Defence Sourcing Portal in accordance with the instructions provided for each question and follows the instructions of this DEFFORM 47, it's associated Annexes and Appendices; and
 - b. meets the minimum score for a 'pass' for each question as set out in the Defence sourcing Portal; and

Tenderers who have answered each question will progress to the Commercial (including Price evaluation). Tenders who do not answer all the questions will be considered non-compliant and the whole tender will be excluded from the competition without being scored.

2. Commercial (including Price) Evaluation Process

A price compliance check will be conducted to establish if the total price of the tender, including the price for items 1, 2, 3 and 4 of Schedule 2 Schedule of Requirement is no more than £737,958 ex VAT as detailed in the Contract Notice, the Authority's advertised budget totals £1,475,916 ex VAT with aim to award two contracts within the total budget. Next a Commercial compliance check will take place to establish whether the tenderer accepts all the terms and conditions of the contract. Rejection, partial acceptance or attempts to negotiate on the terms and conditions of the contract will result in the tender being classed as non-compliant and the tender will be excluded from the competition without being scored.

n.b. If the winning Tenderer's company turnover is less than that of the price of the tender for year one of the Contract then a parent company or bank guarantee will need to be uploaded to the DSP to provide the Authority with financial assurance before any offer of contract is made.

Each of the Authority's evaluators will independently assess responses to the technical questions using the marking scheme at Table 1 below, except for the single Project Management Plan Question which will be scored using the marking scheme at Table 2.

A moderation meeting between all evaluators will be held once all the evaluators have independently assessed the answers and a moderated score for each question will be reached. **If any question scores '0' it shall be considered a 'fail' and the whole tender will be excluded from the competition.** The moderated score for each question will be multiplied by that questions weighting to calculate the weighted score for each question and each weighting will be added to provide a total score out of 100. The score will be used to calculate the Value For Money Index Score- see Section D3 for details.

n.bThe weightings for the questions may be presented differently in DSP but this Section D contains the correct weightings.

4. Social Value Evaluation Process

The Social Value questions, along with relevant weightings, scoring criteria and word count for answers can be found on DSP and responses must be submitted through DSP.

The Social Value questions are situated in the Technical area of DSP but note that they are weighted **10% of the total 100% available for the whole tender**, not 10% of the total technical score. Social Value is therefore worth up to 14.3% of the total available marks for a tender.

Each of the Authority's evaluators will independently assess responses to the Social Value questions using the marking scheme at Table 5 below.

A moderation meeting between all evaluators will be held once all the evaluators have independently assessed the answers and a moderated score for each question will be reached. **If any question scores '0' it shall be considered a 'fail' and the whole tender will be excluded from the competition.** The moderated score for each question will be multiplied by that questions weighting to calculate the weighted score for each question and each weighted score will be added to provide a total score out of 100. The score will be used to calculate the Value For Money Index Score- see Section D3 for details.

Table 4: Social Value Marking Scheme

Social Value Marking Scheme		
Score	Result	Criteria
0	FAIL	Nil or poor response. Either does not provide any detail or explanation of how the requirement will be fulfilled OR the response addresses some of the requirement but does not fully detail and explain how the requirement will be fulfilled.
30%	PASS	Satisfactory - The response addresses all criteria of the requirement but does not fully detail or explain how all the requirement will be fulfilled.
70%	PASS	Good - The response addresses all criteria of the requirement and provides a good level of detail and explanation on how the requirement

		will be fulfilled
100%	PASS	Excellent - The response addresses all criteria of the requirement and fully details and explains in a clear and unambiguous way how the requirement will be fulfilled

Table 5 Worked Example: Calculation of Social Value Weighting

Reference	Requirement Theme	Weighting (100% of the total 10% for Social Value)	Score	Weighted Score
2.2.2	Fighting Climate Change	25%	70	17.5
2.2.3	Equal Opportunity	25%	30	7.5
2.2.4	Tackling Economic Equality	50%	100	50
Total Social Value score				75 %

n.bThe weightings for the questions may be presented differently in DSP but this Section D contains the correct weightings.

D4. How the Authority will assess your bid

Tenders will be evaluated using the Most Economically Advantageous Tender (MEAT) methodology based on Regulation 31 of the Defence and Security Public Contracts Regulations 2011.

In this competition, MEAT means tenders will be assessed on the overall weightings for each element contained within Table 6 below and scores calculated using the Weighted Value for Money Index which is a MEAT methodology.

Table 6 Overall Weightings

Criteria	Total Weighting
Price	30%
Non- cost: Technical 60% + Social Value 10%	70%

Commercial	N/A- pass/fail
TOTAL	100%

Tenderers answers to the non- cost questions (Technical- including Project Management Plan- and Social Value) will be scored in accordance with Tables 1, 2 and 4 respectively of this Section D. Technical- including Project Management Plan- scores will then be weighted in accordance with Table 3 and the Social Value scores will be weighted in accordance with Table 6 of this Section D.

The total technical score (excluding Social Value) will be multiplied by 0.857 and the Social Value score (excluding technical) will be multiplied by 0.143. The two scores will be added to give the total non- cost score (out of 100).

The following calculation will then be done; total non-cost score to the power of [Xy symbol on a scientific calculator or ^ symbol (shift 6) on a keyboard] (70/30) divided by the price of the tenderers bid, adjusted to two decimal points. This gives the WVFM Index Score. Tenders are then ranked and the winning tender will be the one with the highest WVFM Index Score.

In the event that more than one tender achieves the same score, the WVFM Index Score will be adjusted to three decimal places and so on until a differentiator is found. The winning tender will be the one with the highest WVFM Index Score.

Formula for Weighted Value For Money Index:

wQ = weighting of non-cost criteria 70% (comprising 60% Technical Criteria including Project Management Plan question + 10% weighted Social Value Criteria)

wC = weighting applied to cost (30%)

$$\frac{\text{Non - cost score}^{\frac{wQ}{wC}}}{\text{cost}}$$

Worked example;

Technical Score

Tenders Technical score is 80 out of a possible 100.

0.857 is total available non-cost score minus Social Value.

$$80 \times 0.857 = 68.56$$

Social Value score

Tenders Social Value score is 75 out of a possible 100.

0.143 is total available non-cost score for Social Value minus the Technical score.

$$75 \times 0.143 = 10.725$$

Total non-cost score

$$68.56 + 10.725 = 79.285 \text{ which is the non-cost score out of 100.}$$

Price

Tender price is £700,000

Value for Money Index Score

79.285 to the power of [XY symbol on a scientific calculator or use ^ symbol (shift 6) on a keyboard] (70/30) / 700,000 = 0.03857870967

The score is then multiplied by 1000 and rounded to 2 decimal places to give a readable VFM Index Score of 38.58.

Worked example of ranking tenders

Example Tender	Non-cost (combined Technical and Social Value) score	Price	VFM Index Score	Rank
A	79.285	£700,000	38.58	2
B	82	£675,000	43.28	1 (the winning tender)
C	60	£725,000	19.44	3

Section E - Instructions on Submitting Tenders**DEFFORM 47
(Edn 04/22)****Submission of your Tender**

E1. Your Tender and any ITT Documentation must be submitted electronically via the Defence Sourcing Portal (DSP) by 16 May 2022 12:00 noon GMT+1. The Authority reserves the right to reject any Tender received after the stated date and time. Hard copy, paper or delivered digital Tenders (e.g. email, DVD) at OFFICIAL SENSITIVE classification are no longer required and will not be accepted by the Authority. Tenderers are required to submit an electronic online Tender response to 702596452.

E2. You must provide all responses to the ITT via the DSP, you must ensure no prices are included within the technical envelope. The Authority has the right to request, at its discretion, that any pricing information found in the technical envelope is redacted in accordance with paragraph E3.

E3. The Authority may, in its own absolute discretion allow the Tenderer to rectify any irregularities identified in the Tender by the Authority or provide clarification after the Tender return date. For example, this may include, but is not limited to, redacting pricing information in the unpriced copy of the tender, rectifying, or providing clarification in relation to a corrupt or blank document. Tenderers will be provided with instructions via the DSP on how they can correct such irregularities which must be completed by the deadline set. The Authority will cross reference the amended Tender with the original Tender submitted to the DSP before the Tender return date to ensure that no other amendments, other than in relation to the specific irregularity/clarification communicated by the Authority, have been made. Should Tenderers make additional amendments to the Tender other than those relating to the specific irregularity/clarification communicated to the Tenderer by the Authority, this will result in a non-compliant bid.

E4. The DSP is accredited to OFFICIAL SENSITIVE. Material that is protectively marked above this classification must not be uploaded to the DSP. Please contact Thomas.shields101@mod.gov.uk if you have a requirement to submit documents above OFFICIAL SENSITIVE

E5. You must not upload any ITAR or Export Controlled information as part of your Tender or ITT documentation into the DSP. You must contact Thomas.shields101@mod.gov.uk to discuss any exchange of ITAR or Export Controlled information. You must ensure that you have the relevant permissions to transfer information to the Authority.

E6. You must ensure that your DEFFORM 47 Annex A is signed, scanned and uploaded to DSP with your Tender as a PDF (it must be a scanned original). The remainder of your Tender must be compatible with MS Word and other MS Office applications.

Lots

E7. This requirement has not been split into lots.

Variant Bids

E8. The Authority will not accept variant bids.

- a. your name and address;
- b. the Tender Reference Number and due date for return of the Tender; and
- c. the Description and Item Number as shown in the Schedule of Requirements.

E10. You should send any samples to the named Commercial Officer before the Tender return date.

E11. The Authority may retain all samples for twelve (12) months from the Tender return date. After this period, the Authority will destroy the samples unless you specifically state you require their return. The Authority may keep samples associated with a successful Tender indefinitely.

E12. Samples that are consumed will not be returned.

Section F - Conditions of Tendering

F1. The issue of ITT Documentation or ITT Material is not a commitment by the Authority to place a Contract as a result of this competition or at a later stage. Neither does the issue of this ITT or subsequent Tender submission create any implied Contract between the Authority and any Tenderer and any such implied Contract is expressly excluded.

F2. The Authority reserves the right, but is not obliged to:

- a. vary the terms of this ITT in accordance with applicable law;
- b. seek clarification or additional documents in respect of a Tenderer's submission during the Tender evaluation where necessary for the purpose of carrying out a fair evaluation. Tenderers are asked to respond to such requests promptly;
- c. visit your site;
- d. disqualify any Tenderer that submits a non-compliant Tender in accordance with the instructions or conditions of this ITT;
- e. disqualify any Tenderer that is guilty of misrepresentation in relation to its Tender, expression of interest, the dynamic PQQ or the tender process;
- f. re-assess your suitability to remain in the competition, for example where there is a material change in the information submitted in and relating to the PQQ response, see paragraphs A31 to A34;
- g. withdraw this ITT at any time, or choose not to award any Contract as a result of this tender process, or re-invite Tenders on the same or any alternative basis;
- h. re-issue this ITT on a single source basis, in the event that this procurement does not result in a 'competitive process' as defined in the Single Source Contract Regulations 2014, making such adjustments as would be required by the application of the Defence Reform Act 2014 and/or the Single Source Contract Regulations 2014;
- i. choose not to award any Contract as a result of the current tender process;
- j. where it is considered appropriate, ask for an explanation of the costs or price proposed in the Tender where the Tender appears to be abnormally low;

F3. The Contract will be entered into when the Authority sends written notification of its entry into the Contract, via a DEFFORM 159. Written notification will be issued, to the address you provide, on or before the end of the validity period specified in paragraph C3.

Conforming to the Law

F4. You must comply with all applicable UK legislation and any equivalent legislation in a third state.

F5. Your attention is drawn to legislation relating to the canvassing of a public official, collusive behaviour and bribery. If you act in breach of this legislation your Tender may be disqualified from this procurement. Disqualification will be without prejudice to any civil

remedy available to the Authority or any criminal liability that your conduct may attract.

Bid Rigging and Other Illegal Practices

F6. You must report any bid rigging, fraud, bribery, corruption, or any other dishonest irregularity in connection to this tendering exercise to:

Defence Regulatory Reporting Cell Hotline

0800 161 3665 (UK) or

+44 1371 85 4881 (Overseas)

Conflicts of Interest

F7. Any attempt by Tenderers or their advisors to influence the contract award process in any way may result in the Tenderer being disqualified. Specifically, Tenderers shall not directly or indirectly at any time:

- devise or amend the content of their Tender in accordance with any agreement or arrangement with any other person, other than in good faith with a person who is a proposed partner, supplier, consortium member or provider of finance;
- enter into any agreement or arrangement with any other person as to the form or content of any other Tender, or offer to pay any sum of money or valuable consideration to any person to effect changes to the form or content of any other Tender;
- enter into any agreement or arrangement with any other person that has the effect of prohibiting or excluding that person from submitting a Tender;
- canvass the Authority or any employees or agents of the Authority in relation to this procurement; or
- attempt to obtain information from any of the employees or agents of the Authority or their advisors concerning another Tenderer or Tender.

F8. Where you have advised the Authority in relation to this procurement procedure or otherwise have been or are involved in any way in the preparation or conduct of this procurement procedure or where any other actual or potential conflict of interest (COI) exists or arises at any point before the Contract award decision, you must notify the Authority immediately.

F9. Where an actual or potential COI exists or arises, you must provide a proposed Compliance Regime within seven (7) calendar days of notifying the Authority of the actual or potential COI. The proposal must be of a standard which, in the Authority's sole opinion, appropriately manages the conflict, provides sufficient separation to prevent distortion of competition and provides full details listed in F9 a to g below. Where the Contract is awarded and the COI is still relevant post-Contract award decision, your proposed Compliance Regime will become part of the Contract Terms and Conditions. As a minimum, the Compliance Regime must include:

- a. the manner of operation and management;
- b. roles and responsibilities;
- c. standards for integrity and fair dealing;

- d. levels of access to and protection of competitors' sensitive information and Government Furnished Information;
- e. confidentiality and/or non-disclosure agreements (e.g. DEFFORM 702);

- g. physical and managerial separation.

F10. Tenderers are ultimately responsible for ensuring that no COI exist between the Tenderer and its advisers, and the Authority and its advisers. Any Tenderer who fails to comply with this requirement (including where the Authority does not deem the proposed Compliance Regime to be of a standard which appropriately manages the conflict) may be disqualified from the procurement at the discretion of the Authority.

Government Furnished Assets

F11. Where the Authority provides Government Furnished Assets (GFA) in support of this competition, you must include details of the GFA in your Public Store Account and treat it in accordance with Def Stan 05-099. If unsuccessful in this competition, you must seek instructions for the GFA from the named Commercial Officer.

Standstill Period

F12. The Authority is allowing a space of ten (10) calendar days between the date of dispatch of the electronic notice of its decision to award a Contract to the successful Tenderer before entering into a Contract, known as the standstill period. The standstill period ends at 23:59 on the 10th day after the date the DEFFORM 158s are sent. If the 10th day is not a business day, the standstill period ends at 23:59 of the next business day.

Publicity Announcements

F13. If you wish to make an announcement regarding this procurement, you must seek approval from the named Commercial Officer and Press Office and such permission will only be given at the sole discretion of the Authority. Requests must be made in writing to the named Commercial Officer and a copy of the draft announcement provided. This shall then be forwarded to the Press Office and their contact details will be provided for further follow up.

F14. Under no circumstances should you confirm to any Third Party the Authority's Contract award decision before the Authority's announcement of the award of Contract.

F15. All Central Government Departments and their Executive Agencies and Non-Departmental Public Bodies are subject to control and reporting within Government. In particular, they report to the Cabinet Office and HM Treasury for all expenditure. Further, the Cabinet Office has a cross-governmental role delivering overall Government policy on public procurement, including ensuring value for money, related aspects of good procurement practice and answering Freedom of Information requests.

F16. For these purposes, the Authority may share within Government any of the Tenderers documentation/information (including any that the Tenderer considers to be confidential

and/or commercially sensitive such as specific bid information) submitted by the Tenderer to the Authority during this procurement. Tenderers taking part in this competition must identify any sensitive material in the DEFFORM 539A (or SC1B Schedule 4 or SC2 Schedule 5) and consent to these terms as part of the competition process. This allows the Authority to share information with other Government Departments while complying with our obligations to maintain confidentiality.

F17. Where required, the Authority will disclose on a confidential basis any information it receives from Tenderers during the tender process (including information identified by the Tenderer as Commercially Sensitive Information in accordance with the provisions of this ITT) to any Third Party engaged by the Authority for the specific purpose of evaluating or assisting the Authority in the evaluation of the Tenderer's Tender. In providing such information the Tenderer consents to such disclosure.

Sub-contracts Form 1686

15. [Form 1686](#) (also known as Appendix 5) is to be used in all circumstances where contractors wish to place a Sub-Contract at OFFICIAL-SENSITIVE with a contractor outside of the UK, or where the release of SECRET or above information is involved within the UK or overseas. The process will require submission of the single page document either directly to the MOD Project Team or, where specified, to the DE&S Security Advice Centre. Form 1686 and further guidance can be found in the Cabinet Office's [Contractual Process](#).

Small and Medium Enterprises

16. The Authority is committed to supporting the Government's Small and Medium-sized Enterprise (SME) policy, and we want to encourage wider SME participation throughout our supply chain. Our goal is that 25% of the Authority's spending should be spent with SMEs by 2022; this applies to the money which the Authority spends directly with SMEs and through the supply chain. The Authority uses the European Commission definition of SME.
17. A key aspect of the Government's SME Policy is ensuring that its suppliers throughout the supply chain are paid promptly. All suppliers to the Authority and their sub-contractors are encouraged to make their own commitment and register with the [Prompt Payment Code](#).
18. Suppliers are also encouraged to work with the Authority to support the Authority's SME initiative, however this is not a condition of working with the Authority now or in the future, nor will this issue form any part of the Tender evaluation. Information on the Authority's purchasing arrangements, our commercial policies and our SME policy can be found at [Gov.UK](#) and the DSP.
19. The opportunity also exists for Tenderers to advertise any sub-contract valued at over £10,000 on the Defence Sourcing Portal and further details can be obtained directly from: <https://www.gov.uk/guidance/subcontract-advertising>. This process is managed by the Strategic Supplier Management team who can be contacted at: DefComrcISSM-Suppliers@mod.gov.uk.

Transparency, Freedom of Information and Environmental Information Regulations

20. The Authority shall publish notification of the Contract and publish Contract documents where required following a request under the FOI Act except where publishing such information would hinder law enforcement; would otherwise be contrary to the public interest; would prejudice the legitimate commercial interest of any person or might prejudice fair competition between suppliers.
21. The Authority may publish the contents of any resultant Contract in line with government policy set out in the Government's [Transparency Principles](#) and in accordance with the provisions of either DEFCON 539, SC1B Conditions of Contract Clause 5 or SC2 Conditions of Contract Clause 12.
22. Before publishing the Contract, the Authority will redact any information which is exempt from disclosure under the Freedom of Information Act 2000 ("the FOIA") or the Environmental Information Regulations 2004 ("the EIR").
23. You must complete the attached Tenderer's Commercially Sensitive Information Form (DEFFORM 539A, SC1B Schedule 4 or SC2 Schedule 5) explaining which parts of your Tender you consider to be commercially sensitive. This includes providing a named individual who can be contacted with regard to FOIA and EIR.
24. You should note that while your views will be taken into consideration, the ultimate

decision whether to publish or disclose information lies with the Authority. You are advised to provide as much detail as possible on the form. It is highly unlikely that a Tender will be exempt from disclosure in its entirety. Should the Authority decide to publish or disclose information against your wishes, you will be given prior notification.

Electronic Purchasing

25. Tenderers must note that use of the [Contracting, Purchasing and Finance \(CP&F\)](#) electronic procurement tool is a mandatory requirement for any resultant contract awarded following this Tender. By submitting this Tender, you agree to electronic payment. You may consult the service provider on connectivity options. Failure to accept electronic payment will result in your Tender being non-compliant and excluded from the tender process.

Change of Circumstances

26. In accordance with paragraph A31, if your circumstances have changed, please select 'Yes' to the appropriate question on DEFFORM 47 Annex A and submit a Statement Relating to Good Standing with your Tender.

Asbestos, Hazardous Items and Depletion of the Ozone Layer

27. The Authority is required to report any items that use asbestos, that are hazardous or where there is an impact on the Ozone. Where any Contractor Deliverables fall into one of these categories select 'Yes' to the appropriate question on DEFFORM 47 Annex A and provide further details in your Tender.

Defence Safety Authority (DSA) Requirements

28. There are no DSA Requirements.

Bank or Parent Company Guarantee

29. You will be informed whether you are required to provide a Bank or Parent Company Guarantee. In the event that you are selected as the winning Tenderer, you must provide your Bank or Parent Company Guarantee (in the form of DEFFORM 24/24A as appropriate) during the standstill period. No Contract will be awarded until a suitable Bank or Parent Company Guarantee, as appropriate, is in place. Failure to provide a Bank or Parent Company Guarantee during the standstill period, will result in you being de-selected as the winning Tenderer. The Authority reserves the right to re-evaluate the Tenders, (if necessary) to take into account the absence of the de-selected Tenderer, enabling the Authority to establish the next winning Tenderer and award a Contract.

In relation to a disclosure of Information made under clause 13.f.(3) above, if reasonably requested by the Contractor within 2 Business Days of such notice being given, where the Authority has not already done so, it will endeavour to procure from the intended recipient of the Information an agreement containing confidentiality terms the same as, or substantially similar to, those placed on the Authority under this Condition.

h. Before sharing any Information in accordance with clause 13.f, the Authority may redact the Information. Any decision to redact Information made by the Authority shall be final.

i. The Authority shall not be in breach of the Contract where disclosure of Information is made solely and to the extent necessary to comply with the Freedom of Information Act 2000 (the "Act") or the Environmental Information Regulations 2004 (the "Regulations"). To the extent permitted by the time for compliance under the Act or the Regulations, the Authority shall consult the Contractor where the Authority is considering the disclosure of Information

under the Act or the Regulations and, in any event, shall provide prior notification to the Contractor of any decision to disclose the Information. The Contractor acknowledges and accepts that their representations on disclosure during consultation may not be determinative and that the decision whether to disclose Information in order to comply with the Act or the Regulations is a matter in which the Authority shall exercise its own discretion, subject always to the provisions of the Act or the Regulations.

If any of the Contractor Deliverables Delivered to the Authority do not conform to the Specification or any other terms of the Contract, then (without limiting any other right or remedy that the Authority may have) the Authority may reject the Contractor Deliverables (in whole or in part). The Authority shall return these Contractor Deliverables to the Contractor at the Contractor's risk and cost.

b. Rejection of any of the Contractor Deliverables under clause 29.a shall take place by the time limit for rejection specified in Schedule 3 (Contract Data Sheet), or if no such period is specified, the Contractor Deliverables shall be deemed to be accepted within a reasonable period of time.

(1) notify the Contractor of its suspicion and reasons therefore;

(2) where reasonably possible, and if requested by the Contractor within 10 Business Days of such notification, (at the Contractor's own risk and expense and subject to any reasonable controls specified by the Authority) afford the Contractor the facility to (i) inspect the Contractor Deliverable or consignment and/or (ii) obtain a sample thereof for validation or testing purposes.

(3) give the Contractor a further 20 Business Days or such other reasonable period agreed by the Authority, from the date of the inspection at 29.c.(2).(i) or the provision of a sample at 29.c.(2).(ii), to comment on whether the Contractor Deliverable or consignment meets the definition of Counterfeit Materiel; and

(4) determine, on the balance of probabilities and strictly on the evidence available to it at the time, whether the Contractor Deliverable or consignment meets the definition of Counterfeit Materiel

Where the Authority has determined that the Contractor Deliverable, part or consignment of Contractor Deliverables contain Counterfeit Material then it may reject the Contractor Deliverable, part or consignment under 29.a and 29.b (Rejection).

d. In addition to its rights under 29.a and 29.b (Rejection), where the Authority reasonably believes that any Contractor Deliverable or consignment of Contractor Deliverables contains Counterfeit Materiel, it shall be entitled to:

(1) retain any Counterfeit Materiel; and/or

(2) retain the whole or any part of such Contractor Deliverable or consignment where it is not possible to separate the Counterfeit Materiel from the rest of the Contractor Deliverable, or consignment;

and such retention shall not constitute acceptance under Condition 28 (Acceptance).

e. Where the Authority intends to exercise its rights under clause 29.d, it shall where reasonable permit the Contractor, within a period specified by the Authority, to arrange at their own risk and expense and subject to any reasonable controls specified by the Authority, for:

If the value of the scrap or other disposal payment exceeds the amount due to the Authority under clause 29.f.(4) then the balance shall accrue to the Contractor.

h. The Authority shall not use a retained Article or consignment other than as permitted in clauses 29.c – 29.j.

i. The Authority may without restriction report a discovery of Counterfeit Materiel and disclose information necessary for the identification of similar materiel and its possible sources.

- f. The Contractor shall be entitled to reasonable additional delivery and packaging costs incurred in complying with the Diversion Order or cancellation. Claims are to be submitted by the Contractor to the Authority's Commercial Officer together with applicable receipts and agreed as an amendment to the Contract in accordance with Condition 6 (Formal Amendments to the Contract). The Contractor shall comply with the requirements of the Diversion Order upon receipt of the Diversion Order.

31.Self-to-Self Delivery

Where it is stated in Schedule 3 (Contract Data Sheet) that any Contractor Deliverable is to be Delivered by the Contractor to their own premises, or to those of a Subcontractor ('self-to-self delivery'), the risk in such a Contractor Deliverable shall remain vested in the Contractor until such time as it is handed over to the Authority.

Licences and Intellectual Property

32.Import and Export Licences

- a. If, in the performance of the Contract, the Contractor needs to import into the UK or export out of the UK anything not supplied by or on behalf of the Authority and for which a UK import or export licence is required, the responsibility for applying for the licence shall rest with the Contractor. The Authority shall provide the Contractor with sufficient information, certification, documentation and other reasonable assistance in obtaining any necessary UK import or export licence.
- b. When an export licence or import licence or authorisation either singularly or in combination is required from a foreign government for the performance of the Contract, the Contractor shall as soon as reasonably practicable consult with the Authority on the licence requirements. Where the Contractor is the applicant for the licence or authorisation the Contractor shall:
 - (1) ensure that when end use or end user restrictions, or both, apply to all or part of any Contractor Deliverable (which for the purposes of this Condition shall also include information, technical data and software), the Contractor, unless otherwise agreed with the Authority, shall identify in the application:
 - (a) the end user as: Her Britannic Majesty's Government of the United Kingdom of Great Britain and Northern Ireland (hereinafter "HM Government"); and

- (b) the end use as: For the Purposes of HM Government; and
 - (2) include in the submission for the licence or authorisation a statement that "information on the status of processing this application may be shared with the Ministry of Defence of the United Kingdom".
- c. If the Contractor or any Subcontractor in the performance of the Contract needs to export materiel not previously supplied by or on behalf of the Authority for which an export licence or import licence or authorisation from a foreign government is required, the responsibility for instituting expeditious action to apply for and obtain the licence shall rest with the Contractor or that Subcontractor. For the purposes of this Condition materiel shall mean information, technical data and items, including Contractor Deliverables, components of Contractor Deliverables and software.
- d. Where the Contract performance requires the export of materiel for which a foreign export licence or import licence or authorisation is required, the Contractor shall include the dependencies for the export licence or import licence or authorisation application, grant and maintenance in the Contract risk register and in the risk management plan for the Contract, with appropriate review points. Where there is no requirement under the Contract for a risk management plan the Contractor shall submit this information to the Authority's representative.
- e. During the term of the Contract and for a period of up to 2 years from completion of the Contract, the Authority may make a written request to the Contractor to seek a variation to the conditions to a foreign export licence or import licence or authorisation to enable the Authority to re-export or re-transfer a licensed or authorised item or licensed or authorised information from the UK to a non-licensed or unauthorised third party. If the Authority makes such a request it will consult with the Contractor before making a determination of whether the Authority or the Contractor is best placed in all the circumstance to make the request. Where, subsequent to such consultation the Authority notifies the Contractor that the Contractor is best placed to make such request:
 - (1) the Contractor shall, or procure that the Contractor's Subcontractor shall, expeditiously consider whether or not there is any reason why it should object to making the request and, where it has no objection, file an application to seek a variation of the applicable export licence or import licence or authorisation in accordance with the procedures of the licensing authority. Where the Contractor has an objection, the Parties shall meet within five (5) working days to resolve the issue and should they fail the matter shall be escalated to an appropriate level within both Parties' organisations, to include their respective export licensing subject matter experts; and
 - (2) the Authority shall provide sufficient information, certification, documentation and other reasonable assistance as may be necessary to support the application for the requested variation.
- f. Where the Authority determines that it is best placed to make such request the Contractor shall provide sufficient information, certification, documentation and other reasonable assistance as may be necessary to support the Authority to make the application for the requested variation.
- g. Where the Authority invokes clause 32.e or 32.f the Authority will pay the Contractor a fair and reasonable charge for this service based on the cost of providing it.
- h. Where the Contractor subcontracts work under the Contract, which is likely to be subject to foreign export control, import control or both the Contractor shall use reasonable endeavours to incorporate in each subcontract equivalent obligations to those set out in this Condition. Where it is not possible to include equivalent terms to those set out in this Condition, the Contractor shall report that fact and the circumstances to the Authority.
- i. Without prejudice to HM Government's position on the validity of any claim by a foreign government to extra-territoriality, the Authority shall provide the Contractor with sufficient information, certification, documentation and other reasonable assistance to facilitate the

granting of export licences or import licences or authorisations by a foreign Government in respect of the performance of the Contract.

j. The Authority shall provide such assistance as the Contractor may reasonably require in obtaining any UK export licences necessary for the performance of the Contract.

k. The Contractor shall use reasonable endeavours to identify whether any Contractor Deliverable is subject to:

- (1) a non-UK export licence, authorisation or exemption; or
- (2) any other related transfer or export control,

that imposes or will impose end use, end user or re-transfer or re-export restrictions, or restrictions on disclosure to individuals based upon their nationality. This does not include the Intellectual Property-specific restrictions of the type referred to in Condition 33 (Third Party Intellectual Property – Rights and Restrictions).

l. If at any time during the term of the Contract the Contractor becomes aware that all or any part of the Contractor Deliverables are subject to clause 32.k.(1) or 32.k.(2), they shall notify the Authority of this as soon as reasonably practicable by providing details in the DEFFORM 528 or other mutually agreed alternative format. Such notification shall be no later than thirty (30) days of knowledge of any affected Contractor Deliverable and in any event such notification shall be not less than thirty (30) days prior to delivery of the Contractor Deliverables.

m. If the information to be provided under clause 32.l has been provided previously to the Authority by the Contractor under the Contract, the Contractor may satisfy these requirements by giving details of the previous notification and confirming they remain valid and satisfy the provisions of clause 32.l.

n. During the term of the Contract, the Contractor shall notify the Authority as soon as reasonably practicable of any changes in the information notified previously under clauses 32.l or 32.m of which they become or are aware that would affect the Authority's ability to use, disclose, re-transfer or re-export an item or part of it as is referred to in those clauses by issuing an updated DEFFORM 528 to the Authority.

o. For a period of up to 2 years from completion of the Contract and in response to a specific request by the Authority, the Contractor shall notify the Authority as soon as reasonably practicable of any changes in the information notified previously under clause 32.l or 32.m of which they become aware that would affect the Authority's ability to use, disclose, re-transfer or re-export an item or part of it as is referred to in those clauses by issuing an updated DEFFORM 528 to the Authority.

p. Where following receipt of materiel from a Subcontractor or any of their other suppliers restrictions are notified to the Contractor by that Subcontractor, supplier or other third party or are identified by the Contractor, the Contractor shall immediately inform the Authority by issuing an updated DEFFORM 528. Within [X] days of such notification, the Contractor shall propose to the Authority actions to mitigate the impact of such restrictions. Such proposals may include, where appropriate, mutually supported attempts to obtain removal or modification to the restrictions or to obtain appropriate authorisations from the relevant foreign government. The Authority shall notify the contractor within [X] days of receipt of a proposal whether it is acceptable and where appropriate the Contract shall be modified in accordance with its terms to implement the proposal.

q. If the restrictions prevent the Contractor from performing their obligations under the Contract and have not been removed, modified or otherwise satisfactorily managed within a reasonable time, the Authority may at its absolute discretion elect to amend the contract in accordance with Condition 6 or as otherwise may be provided by the Contract, or to terminate the Contract. Except as set out in clause 32.r, in the event of termination in these circumstances termination shall be on fair and reasonable terms having regard to all the circumstances including payments already made and that would otherwise be due under the Contract, costs incurred by the Contractor and benefits received by the Authority. The Parties,

acting in good faith, will use all reasonable endeavours to agree such fair and reasonable terms failing which either Party may refer the matter to dispute resolution in accordance with the provisions in the Contract.

r. In the event that the restrictions notified to the Authority pursuant to clause 32.l were known or ought reasonably have been known by the Contractor (but were not disclosed) at contract award or if restrictions notified to the Authority pursuant to clauses 32.n or 32.p were known or ought reasonably to have been known by the Contractor at the date of submission of the most recent DEFFORM 528 submitted to the Authority in accordance with clause 32.l, termination under clause 32.t will be in accordance with Condition 42 (Material Breach) and the provisions of clause 33.v will not apply.

s. The Authority shall use reasonable endeavours to identify any export control restrictions applying to materiel to be provided to the Contractor as Government Furnished Assets (GFA). Where the Authority is to provide materiel necessary to enable the Contractor to perform the Contract or in respect of which the Services are to be provided, and that materiel is subject to a non-UK export licence, authorisation, exemption or other related transfer or export control as described in the provisions of clause 32.k, the Authority shall provide a completed DEFFORM 528 or will provide a new or updated DEFFORM 528 to the Contractor within thirty (30) days of the date of knowledge and in any case not later than thirty (30) days prior to the delivery of such materiel to the Contractor.

t. In the event that the Authority becomes aware that the DEFFORM 528 disclosure was incomplete or inaccurate or in the event additional such materiel is identified then the Authority shall provide, as soon as reasonably practicable a new or revised DEFFORM 528. In the event that the Authority becomes aware that a prior disclosure included in DEFFORM 528 submitted to the Contractor was incomplete or inaccurate less than thirty (30) days prior to the delivery to the Contractor of any material to which the updated or new disclosure relates, the Parties will meet as soon as reasonably practicable to discuss how to mitigate the impact of the incomplete or inaccurate disclosure.

u. Where:

- (1) restrictions are advised by the Authority to the Contractor in a DEFFORM 528 provided pursuant to clauses 32.s or 32.t or both; or
- (2) any of the information provided by the Authority in any DEFFORM 528 proves to be incorrect or inaccurate;

the Authority and the Contractor shall act promptly to mitigate the impact of such restrictions or incorrect or inaccurate information. Such mitigation shall include, where appropriate, mutually supported attempts to obtain removal or modification to the restrictions or to obtain appropriate authorisations from the relevant foreign government. If the restrictions or incorrect or inaccurate information adversely affect the ability of the Contractor to perform their obligations under the Contract, the matter shall be handled under the terms of Condition 6 (Formal Amendments to the Contract) or as may otherwise be provided by the Contract as appropriate and if no alternative solution satisfies the essential terms of the Contract and the restrictions have not been removed, modified or otherwise satisfactorily managed within a reasonable time the Authority may terminate the Contract. Termination under these circumstances will be under the terms of Condition 41 (Termination for Convenience) and as referenced in the Contract.

v. Pending agreement of any amendment of the Contract as set out in clause 32.q or 32.u, provided the Contractor takes such steps as are reasonable to mitigate the impact, the Contractor shall be relieved from their obligations to perform those elements of the Contract directly affected by the restrictions or provision of incorrect or incomplete information.

33.Third Party Intellectual Property – Rights and Restrictions

a. The Contractor and, where applicable any Subcontractor, shall promptly notify the Authority as soon as they become aware of:

- (1) any invention or design the subject of patent or registered Design Rights (or application thereof) owned by a third party which appears to be relevant to the performance of the Contract or to use by the Authority of anything required to be done or delivered under the Contract;
- (2) any restriction as to disclosure or use, or obligation to make payments in respect of any other intellectual property (including technical Information) required for the purposes of the Contract or subsequent use by the Authority of anything delivered under the Contract and, where appropriate, the notification shall include such Information as is required by Section 2 of the Defence Contracts Act 1958;
- (3) any allegation of infringement of intellectual property rights made against the Contractor and which pertains to the performance of the Contract or subsequent use by the Authority of anything required to be done or delivered under the Contract.

clause 33.a does not apply in respect of Contractor Deliverables normally available from the Contractor as a Commercial Off The Shelf (COTS) item or service.

b. If the Information required under clause 33.a has been notified previously, the Contractor may meet their obligations by giving details of the previous notification.

c. For COTS Contractor Deliverables patents and registered designs in the UK, in respect of any question arising (by way of an allegation made to the Authority or Contractor, or otherwise) that the manufacture or provision under the Contract of Contractor Deliverables normally available from the Contractor as a COTS item or service is an infringement of a UK patent or registered design not owned or controlled by the Contractor or the Authority, the Contractor shall, subject to the agreement of the third party owning such patent or registered design, be given exclusive conduct of any and all negotiations for the settlement of any claim or the conduct of any litigation arising out of such question. The Contractor shall indemnify the Authority, its officers, agents and employees against any liability and cost arising from such allegation. This Condition shall not apply if:

- (1) the Authority has made or makes an admission of any sort relevant to such question;
- (2) the Authority has entered or enters into any discussions on such question with any third party without the prior written agreement of the Contractor;
- (3) the Authority has entered or enters into negotiations in respect of any relevant claim for compensation in respect of Crown Use under Section 55 of the Patents Act 1977 or Section 12 of the Registered Designs Act 1949;
- (4) legal proceedings have been commenced against the Authority or the Contractor in respect of Crown Use, but only to the extent of such Crown Use that has been properly authorised.

d. The indemnity in clause 33.c does not extend to use by the Authority of anything supplied under the Contract where that use was not reasonably foreseeable at the time of the Contract.

e. In the event that the Authority has entered into negotiation in respect of a claim for compensation, or legal proceedings in respect of the Crown Use have commenced, the Authority shall forthwith authorise the Contractor for the purposes of performing the Contract (but not otherwise) to utilise a relevant invention or design in accordance with Sections 55 and 56 of the Patents Act 1977 or Section 12 of the Registered Designs Act 1949 and to use any model, document or information relating to any such invention or design which may be required for that purpose.

f. For all other Contractor Deliverables patents and registered designs in the UK, if a relevant invention or design has been notified to the Authority by the Contractor prior to the Effective Date of Contract, then unless it has been otherwise agreed, under the provisions of Sections 55 and 56 of the Patents Act 1977 or Section 12 of the Registered Designs Act 1949, the Contractor is hereby authorised to utilise that invention or design, notwithstanding the fact that it is the subject of a UK Patent or UK Registered Design, for the purpose of

performing the Contract.

g. If, under clause 33.a, a relevant invention or design is notified to the Authority by the Contractor after the Effective Date of Contract, then:

- (1) if the owner (or its exclusive licensee) takes or threatens in writing to take any relevant action against the Contractor, the Authority shall issue to the Contractor a written authorisation in accordance with the provisions of Sections 55 and 56 of the Patents Act 1977 or Section 12 of the Registered Designs Act 1949, and
- (2) in any event, unless the Contractor and the Authority can agree an alternative course of action, the Authority shall not unreasonably delay the issue of a written authorisation in accordance with the provisions of Sections 55 and 56 of the Patents Act 1977 or Section 12 of the Registered Designs Act 1949.

h. The Authority shall assume all liability and shall indemnify the Contractor, their officers, agents and employees against liability, including the Contractor's costs, as a result of infringement by the Contractor or their suppliers of any patent, utility model, registered design or like protection outside the United Kingdom in the performance of the Contract when such infringement arises from or is incurred by reason of the Contractor following any specification, statement of work or instruction in the Contract or using, keeping or disposing of any item given by the Authority for the purpose of the Contract in accordance with the Contract.

i. The Contractor shall assume all liability and shall indemnify the Authority, its officers, agents and employees against liability, including the Authority's costs, as a result of infringement by the Contractor or their suppliers of any patent, utility model, registered design or like protection outside the UK in the performance of the Contract when such infringement arises from or is incurred otherwise than by reason of the Contractor following any specification, statement of work or instruction in the Contract or using, keeping or disposing of any item given by the Authority for the purpose of the Contract in accordance with the Contract.

j. The Contractor shall not be entitled to any reimbursement of any royalty, licence fee or similar expense incurred in respect of anything to be done under the Contract, where:

- (1) a relevant discharge has been given under Section 2 of the Defence Contracts Act 1958, or relevant authorisation in accordance with Sections 55 or 57 of the Patents Act 1977, Section 12 of the Registered Designs Act 1949 or Section 240 of the Copyright, Designs and Patents Act 1988 in respect of any intellectual property; or
- (2) any obligation to make payments for intellectual property has not been promptly notified to the Authority under clause 33.a.

k. Where authorisation is given by the Authority under clause 33.e, 33.f or 33.g, to the extent permitted by Section 57 of the Patents Act 1977, Section 12 of the Registered Designs Act 1949 or Section 240 of the Copyright, Designs and Patents Act 1988, the Contractor shall also be:

- (1) released from payment whether by way of royalties, licence fees or similar expenses in respect of the Contractor's use of the relevant invention or design, or the use of any relevant model, document or information for the purpose of performing the Contract; and
- (2) authorised to use any model, document or information relating to any such invention or design which may be required for that purpose.

l. The Contractor shall assume all liability and indemnify the Authority and its officers, agents and employees against liability, including costs as a result of:

- (1) infringement or alleged infringement by the Contractor or their suppliers of any copyright, database right, Design Right or the like protection in any part of the world in respect of any item to be supplied under the Contract or otherwise in the performance of the Contract;
- (2) misuse of any confidential information, trade secret or the like by the Contractor in

performing the Contract;

(3) provision to the Authority of any Information or material which the Contractor does not have the right to provide for the purpose of the Contract.

m. The Authority shall assume all liability and indemnify the Contractor, their officers, agents and employees against liability, including costs as a result of:

(1) infringement or alleged infringement by the Contractor or their suppliers of any copyright, database right, Design Right or the like protection in any part of the world in respect of any item provided by the Authority for the purpose of the Contract but only to the extent that the item is used for the purpose of the Contract;

(2) alleged misuse of any confidential Information, trade secret or the like by the Contractor as a result of use of Information provided by the Authority for the purposes of the Contract, but only to the extent that Contractor's use of that Information is for the purposes intended when it was disclosed by the Authority.

n. The general authorisation and indemnity is:

(1) clauses 33.a – 33.m represents the total liability of each Party to the other under the Contract in respect of any infringement or alleged infringement of patent or other Intellectual Property Right (IPR) owned by a third party;

(2) neither Party shall be liable, one to the other, for any consequential loss or damage arising as a result, directly or indirectly, of a claim for infringement or alleged infringement of any patent or other IPR owned by a third party;

(3) a Party against whom a claim is made or action brought, shall promptly notify the other Party in writing if such claim or action appears to relate to an infringement which is the subject of an indemnity or authorisation given under this Condition by such other Party. The notification shall include particulars of the demands, damages and liabilities claimed or made of which the notifying Party has notice;

(4) the Party benefiting from the indemnity or authorisation shall allow the other Party, at its own expense, to conduct any negotiations for the settlement of the same, and any litigation that may arise therefrom and shall provide such information as the other Party may reasonably require;

(5) following a notification under clause 33.n.(3), the Party notified shall advise the other Party in writing within thirty (30) Business Days whether or not it is assuming conduct of the negotiations or litigation. In that case the Party against whom a claim is made or action brought shall not make any statement which might be prejudicial to the settlement or defence of such a claim without the written consent of the other Party;

(6) the Party conducting negotiations for the settlement of a claim or any related litigation shall, if requested, keep the other Party fully informed of the conduct and progress of such negotiations.

o. If at any time a claim or allegation of infringement arises in respect of copyright, database right, Design Right or breach of confidence as a result of the provision of any Contractor Deliverable by the Contractor to the Authority, the Contractor may at their own expense replace the item with an item of equivalent functionality and performance so as to avoid infringement or breach. The Parties will co-operate with one another to mitigate any claim or damage which may arise from use of third party IPR.

p. Nothing in Condition 33 shall be taken as an authorisation or promise of an authorisation under Section 240 of the Copyright, Designs and Patents Act 1988.

q. Notwithstanding any other provisions of the Contract and for the avoidance of doubt, award of the Contract by the Authority and placement of any contract task under it does not constitute an authorisation by the Crown under Sections 55 and 56 of the Patents Act 1977 or Section 12 of the Registered Designs Act 1949. The Contractor acknowledges that any such authorisation by the Authority under its statutory powers must be expressly provided in writing, with reference to the acts authorised and the specific intellectual property involved.

- e. The approval for payment of a valid and undisputed invoice by the Authority shall not be construed as acceptance by the Authority of the performance of the Contractor's obligations nor as a waiver of its rights and remedies under the Contract.
- f. Without prejudice to any other right or remedy, the Authority reserves the right to set off any amount owing at any time from the Contractor to the Authority against any amount payable by the Authority to the Contractor under the Contract or under any other contract with the Authority, or with any other Government Department.

36. Value Added Tax

- a. The Contract Price excludes any UK output Value Added Tax (VAT) and any similar EU (or non-EU) taxes chargeable on the supply of Contractor Deliverables by the Contractor to the Authority.
- b. If the Contractor is required by UK VAT law to be registered for UK VAT (or has registered voluntarily) in respect of their business activities at the time of any supply, and the circumstances of any supply are such that the Contractor is liable to pay the tax due to HM Revenue and Customs (HMRC), the Authority shall pay to the Contractor in addition to the Contract Price (or any other sum due to the Contractor) a sum equal to the output VAT chargeable on the tax value of the supply of Contractor Deliverables, and all other payments under the Contract according to the law at the relevant tax point.
- c. The Contractor is responsible for the determination of VAT liability. The Contractor shall consult their Client Relationship Manager or the HMRC Enquiries Desk (and not the Authority's Representative (Commercial)) in cases of doubt. The Contractor shall notify the Authority's Representative (Commercial) of the Authority's VAT liability under the Contract, and any changes to it, within twenty (20) Business Days of becoming aware the liability is other than at the standard rate of VAT. In the event of any doubt about the applicability of the tax in such cases, the Authority may require the Contractor to obtain, and pass to the Authority, a formal ruling from HMRC. The Contractor shall comply promptly with any such

requirement. Where the Contractor obtains a ruling from HMRC, they shall supply a copy to the Authority within three (3) Business Days of receiving that ruling unless they propose to challenge the ruling. Where the Contractor challenges the ruling they shall supply to the Authority a copy of any final decisions issued by HMRC on completion of the challenge within three (3) Business Days of receiving the decision.

d. Where supply of Contractor Deliverables comes within the scope of UK VAT, but the Contractor is not required by UK VAT law to be registered for UK VAT (and has not registered voluntarily), the Authority shall be responsible for assessing and paying over directly to HMRC any UK output VAT due in respect of the Contractor Deliverables. The Contractor shall be responsible for ensuring they take into account any changes in VAT law regarding registration.

e. Where Contractor Deliverables are deemed to be supplied to the Authority outside the UK, the Contractor may be required by the laws of the country where the supply takes place to register there for EU (or non-EU) turnover or similar tax. In that event, the Authority shall pay to the Contractor in addition to the Contract Price (and any other sum due to the Contractor under the Contract) a sum equal to the tax the Contractor is liable to pay to the tax authorities of the country in question in relation to the Contractor Deliverables within thirty (30) calendar days of a written request for payment of any such sum by the Contractor.

f. In relation to the Contractor Deliverables supplied under the Contract the Authority shall not be required to pay any sum in respect of the Contractor's input VAT (or similar EU or non-EU or both input taxes). However, these input taxes will be allowed where it is established that, despite the Contractor having taken all reasonable steps to recover them, it has not been possible to do so. Where there is any doubt that the Contractor has complied with this requirement the matter shall be resolved in accordance with Condition 39 (Dispute Resolution).

g. Should HMRC decide that the Contractor has incorrectly determined the VAT liability, in accordance with clause 36.b above, the Authority will pay the VAT assessed by HMRC. In the event that HMRC so determines, the Contractor shall pay any interest charged on any assessment or penalties or both directly to HMRC. Such interest or penalties or both shall not be recoverable from the Authority under the Contract or any other contract. The Contractor shall supply the Authority with a copy of all correspondence between HMRC and the Contractor's advisors regarding the VAT assessment within three (3) Business Days of a written request from the Authority for such correspondence.

37. Debt Factoring

a. Subject to the Contractor obtaining the prior written consent of the Authority in accordance with Condition 11 (Assignment of Contract), the Contractor may assign to a third Party ("the Assignee") the right to receive payment of the Contract Price or any part thereof due to the Contractor under the Contract (including interest which the Authority incurred through late payment under the Late Payment of Commercial Debts (Interest) Act 1998 ("the Act")). Any assignment of the right to receive payment of the Contract Price (or any part thereof) under this Condition 37 shall be subject to:

- (1) reduction of any sums in respect of which the Authority exercises its right of recovery under clause 35.f;
- (2) all related rights of the Authority under the Contract in relation to the recovery of sums due but unpaid; and
- (3) the Authority receiving notification under both clauses 37.b and 37.c.(2).

b. In the event that the Contractor obtains from the Authority the consent to assign the right to receive the Contract Price (or any part thereof) under clause 37.a, the Contractor shall notify the Authority in writing of the assignment and the date upon which the assignment becomes effective.

c. The Contractor shall ensure that the Assignee:

- (1) is made aware of the Authority's continuing rights under clauses 37.a.(1) and 37.a.(2); and
 - (2) notifies the Authority of the Assignee's contact information and bank account details to which the Authority shall make payment, subject to any reduction made by the Authority in accordance with clauses 37.a.(1) and 37.a.(2).
- d. The provisions of Condition 35 (Payment and Recovery of Sums Due) shall continue to apply in all other respects after the assignment and shall not be amended without the prior approval of the Authority.

38.Subcontracting and Prompt Payment

- a. Subcontracting any part of the Contract shall not relieve the Contractor of any of the Contractor's obligations, duties or liabilities under the Contract.
 - b. Where the Contractor enters into a subcontract, they shall cause a term to be included in such subcontract:
 - (1) providing that where the Subcontractor submits an invoice to the Contractor, the Contractor will consider and verify that invoice in a timely fashion;
 - (2) providing that the Contractor shall pay the Subcontractor any sums due under such an invoice no later than a period of thirty (30) days from the date on which the Contractor has determined that the invoice is valid and undisputed;
 - (3) providing that where the Contractor fails to comply with clause 38.b.(1) above, and there is an undue delay in considering and verifying the invoice, that the invoice shall be regarded as valid and undisputed for the purposes of clause 38.b.(2) after a reasonable time has passed; and
 - (4) requiring the counterparty to that subcontract to include in any subcontract which it awards, provisions having the same effect as clauses 38.b.(1) to 38.b.(4).
- Termination

39.Dispute Resolution

- a. The Parties will attempt in good faith to resolve any dispute or claim arising out of or relating to the Contract through negotiations between the respective representatives of the Parties having authority to settle the matter, which attempts may include the use of any alternative dispute resolution procedure on which the Parties may agree.
- b. In the event that the dispute or claim is not resolved pursuant to clause 39.a the dispute shall be referred to arbitration. Unless otherwise agreed in writing by the Parties, the arbitration and this clause 39.b shall be governed by the Arbitration Act 1996. For the purposes of the arbitration, the arbitrator shall have the power to make provisional awards pursuant to Section 39 of the Arbitration Act 1996.
- c. For the avoidance of doubt, anything said, done or produced in or in relation to the arbitration process (including any awards) shall be confidential between the Parties, except as may be lawfully required in judicial proceedings relating to the arbitration or otherwise.

	c	Description.
	d	Value (Ex VAT) - contractual value of the activity.
	e	Progress % work completed on the activity as at report date.
4		Financial Profile - The report is to collect information on actual and planned accruals: that is the contractual value of work undertaken (earned value of work) within a period, for which the MOD will be [was] liable to pay. It includes work undertaken by sub-contractors. It includes work completed and invoiced. The total value of work [to be] completed is expected to be comparable to the contract price. If a fixed or firm price has been agreed for the contract then the value of work should be assessed on this basis.
	a	Prior Years: Work completed (value to sales) in previous financial years.
	b	Earned Value: Work completed (value to sales) in month - this is the value of work done (accrued/earned value) during that calendar month.
	c	Earned Value: Cumulative Work Completed (value to sales) - this is the value of work done

		(accrued/earned value) on the activity to date.
	d	MOD Current Financial Year monthly - this will be a mix of actual completed to the end of the current period and forecast beyond that date.
	e	After the Current Financial Year an annual estimate by MOD Financial Year (Apr XX to Mar XY) until contract end date - Forecast periods show the expected work to be undertaken during each period on the activities in the contract. Insert additional years as required.

46.6.1 The Social Value Performance Indicator Targets are determined in the Contractor's tender response for this requirement and set out at Table 1 to this Condition 46.6 against the three Social Value Themes; Tackling Economic Inequality, Fighting Climate Change, and Equal Opportunity.

46.6.2 The Contractor shall report progress against the Social Value Performance Objectives at Table 1 below to the Authority in accordance within the Project Management Plan, (paragraph 4.2.5 within Statement of Requirement at Annex A to Schedule 2).

Table 1: Social Value Performance Objectives

Social Value Theme	Reporting Metrics	Performance Indicator Targets
Theme 2 Tackling Economic Inequality	<p>Evidence of the Framework Contractor's progress towards the following:-</p> <ul style="list-style-type: none"> ● Number of people-hours of learning interventions delivered under the contract, by UK region. 	[to be determined in Contractor's tender]
Theme 3: Fighting climate change	<p>Evidence of the Framework Contractor's progress towards the following:-</p> <ul style="list-style-type: none"> ● Number of people-hours spent protecting and improving the environment under the contract, by UK region. 	[to be determined in Contractor's tender]
Theme 4: Equal opportunity	<p>Evidence of the Framework Contractor's progress towards the following:-</p> <ul style="list-style-type: none"> ● Total percentage of full-time equivalent (FTE) disabled people employed under the contract, as a proportion of the total FTE contract workforce, by UK region.. 	[to be determined in Contractor's tender]

46.6.3 The Authority will rate Contractor's progress under each Performance Indicator Target according to scoring methodology in Table 2 below.

OFFICIAL

Table 2: Social Value Performance Indicators Scoring Methodology

Rating	Description	Score
Good (the Required Standard)	The Contractor is meeting or exceeding the PI targets that are set out in Table 1 of this Condition 46.6.	95- 100%
Approaching Target	The Contractor is close to meeting the PI targets that are set out in Table 1 of this Condition 46.6.	90- 94.9%
Requires Improvement	The performance of the Contractor is below that of the PI targets that are set out in Table 1 of this Condition 46.6.	85.1- 89.9%
Inadequate	The performance of the Contractor is significantly below that of the PI targets that are set out in Table 1 of this Condition 46.6.	Below 85%

46.6.4 The Contractor shall present any mitigating evidence for not achieving the Required Standard and present a rectification plan for how the Required Standard will be met during the next reporting period at the Project Review Meeting for the Authority's consideration. The Authority will not unreasonably reject such mitigating evidence. Where the mitigating evidence and rectification plan are acceptable to the Authority, the Contractor shall receive relief from his obligation to meet the Required Standard of the affected PI for the affected period.

46.6.5 Where the Contractor cannot demonstrate to the satisfaction of the Authority, that failure to meet the required standard is reasonable and that the rectification plan gives confidence that the Required Standard will be met during the next reporting period then the obligation to meet the Required Standard remains unaffected. The Authority's decision in this respect will be final.

46.6.6 Subject to clause 46.6.5 above, if the Contractor fails to meet the Required Standard in any PI at three consecutive Project Review Meetings, the appropriate senior-level personnel from both parties will meet to discuss a mutually acceptable rectification plan. The Authority shall escalate the issue up to a maximum of 1* Commercial level.

46.6.7 Where the parties cannot reach an agreement following senior-level escalation, Condition 39 Dispute Resolution shall be invoked.

ALTERNATIVE NAVIGATION DATA MERGING

STATEMENT OF REQUIREMENT

8 April 22

1 Introduction

This Statement of Requirement covers the contractor's minimum activities for a proposed Data Merging technology de-risking activity. The Alternative Navigation (Alt Nav) programme aims to develop global, 24/7 and all-weather precise Position, Navigation and Timing (PNT) information in military operational environments, including where Global Navigation Satellite System (GNSS) measurements are either degraded or completely unavailable. The Alt Nav programme will aid a wide range of MoD land, air and maritime equipment and platforms (applications) working in all operational environments.

2 Alt Nav Programme Background

The Alt Nav programme consists of two projects:

2.1 Alt Nav Technologies

Further development of PNT sensor technologies identified by Defence Science and Technology Laboratory (Dstl), which are at varying levels of maturity, to Technology Readiness Level (TRL) 6 within 7 months. Contractors will undertake technical de-risking and demonstration activities for potential solutions. The three technology themes under contract for Concept phase studies are:

- Resilient Timing (Clocks)
- Signals of Opportunity (SOO)
- Visual Navigation (VN)

Subject to funding approval, a new competition will be run at the start of the Assessment Phase to develop technologies to TRL 8, where other non-GNSS PNT technologies may be considered.

2.2 Alt Nav Data Merging

Activities to help de-risk and inform the integration of Alt Nav sensor technologies with existing MoD PNT systems to improve resilience to GNSS signal interference. To investigate and produce prototype system designs that achieve cost-effective integration between existing PNT technologies in use on the applications and the new Alt Nav sensor technologies.

3 Alt Nav Programme Aims, Objectives and Benefits

3.1 Aims

The overall aim of the Alt Nav programme is to develop a capability which enables UK forces to effectively utilise alternative sources of PNT data to supplement or substitute for a degraded or denied GNSS source.

Multi-Sensor data fusion is a well-established technological discipline, but it is experiencing renewed interest as the range, nature, and characteristics of PNT data sources diversifies and the subject of PNT Assuredness matures. These developments bring new and challenging dimensions to the Data Merging task. The de-risking activities of this immediate integration/insertion task need to proceed in a synergistic manner with the wider initiatives in this field.

The long-term aim of the Alt Nav programme is that there will be a catalogue of non-GNSS PNT technologies characterised and readily available, together with credible application integration system solutions of sufficient maturity to satisfy the portfolio of Defence needs for Assured PNT for both in the near-term and for future existing and new platforms.

3.2 Objectives

The Strategic objectives of the Alt Nav Programme are:

- a. Acceptable size, weight and power matched to the application.
- b. Low unit production costs.
- c. Low through life costs.
- d. Readily available information and facilities to support integration by application platforms.
- e. Where practical, free from overseas export restrictions.
- f. An open-architecture approach with Government controlled non-proprietary interfaces.
- g. The ability to be used in a range of PNT system configurations through modular design.
- h. Designed for capability updates through life.

4 Data Merging Work Package (WP) Scope

4.1 Scope

The Data Merging task will proceed in parallel with the Alt Nav technologies development activities. To this end, the activities of the Data Merging task are divided into Core and Optional work packages to manage the availability and maturity of data.

One of the first tasks for all DE&S Alt Nav Project's PNT sensor Technology Concept Phase studies was the definition of the Interface Control Documents (ICDs) which are required to allow them to supply their data to a Data Merging capability in a System of Systems design.

The UK joins other nations in following a Systems of Systems approach to mitigate over-reliance on GNSS for PNT data. It is widely recognised that an open-architecture approach with Government controlled, non-proprietary interfaces will help diversify solutions and better enable interoperability. NATO's Science and Technology Organisation NATO STO are, through their Sensors and Electronics Technology panel, running an Exploratory Team SET-309 on NATO PNT Open System Architecture & Standards to Ensure PNT in NAVWAR Environments. The US plan to share their All-Source Position and Navigation (ASPN) interface with the group.

To gather evidence for the Outline Business Case for the Alt Nav programme, the MoD team has engaged their Engineering Delivery Partner (EDP) to survey a sample of in-service applications across all of the operational domains to determine: reliance on GNSS, how degradation or denial might impact mission success, system design architectures (including existing interfaces), application-specific PNT requirements and Domain Business Processes that must be followed to achieve the installation of new equipment onto the platforms. The Data Merging task will proceed in parallel with the EDP work and should exploit the EDP-generated information as it becomes available.

GNSS are currently MoD's de-facto technological solution to meet Users' PNT requirements however, some applications already benefit from additional sensors. This situation is unlikely to change in the near to mid-term. Therefore, the Alt Nav sensor technologies are expected to contribute to the calculation of the PNT solution alongside GNSS receivers and other sources of information in a PNT System of Systems. The most likely configurations for existing applications will be:

- a. Configuration 1 - A GNSS receiver alone. Note that modern GNSS receivers commonly offer the ability to function in several modes:
 - i) using only signals from satellites
 - ii) using signals from satellites plus data from other sources.
- b. Configuration 2 – A collection of navigation related technologies with data blending and distribution as a separate function distinct from the GNSS receiver.
- c. Configuration 3 – An embedded GPS receiver within an Inertial Navigation System implementing loose or tight coupling.

Deliverables that the contractors shall supply are detailed in Section 5 Table 2.

A list of GFx including Alt Nav technology supplier draft ICDs, SET 309 artefacts and EDP deliverables can be found in Annex A.

Please note: While MoD is the customer for this information, it should be anticipated that observations and recommendations will be passed on to other developers in industry under MoD contracts.

Security classification of the project is detailed in the Security Aspects Letter (SAL) at Annex B to Schedule 2.

4.2 Core Activities - Work Package 1.0

4.2.1 WP 1.1 - Architecture Studies

The contractor shall use their knowledge and experience to formulate and document architecture descriptions of a wide and diverse range of distinct in-service PNT systems. Once these are agreed with the Authority, the contractor shall develop and document a set of Alt-Nav technology insertion/merging options for each of the PNT system architectures, with associated information on: strengths, weaknesses, limitations, risks, complexity and relative cost. The contractor shall then seek agreement from the Authority as to which insertion options to take forward to the next stage (WP1.3).

Example configurations have been outlined in the scope and illustrative examples of integration configurations are provided in Annex G, Figure 1.

4.2.2 WP 1.2 - Interface Development

The Data Merging contractors shall engage with the NATO SET-309 Task Group to de-risk interoperability with other Alt Nav initiatives across the NATO nations. The Data Merging contractors shall engage with the contractors that are developing the Alt Nav PNT data sources to develop and refine the definitions of their data interfaces, to enable and refine the data merging task.

4.2.3 WP 1.3 - Technology De-risking

Using the architectural study outputs in WP1.1, and information gleaned from WP1.2, the contractor shall mature the data merging technology through the TRL's building towards or achieving TRL 6 including a demonstration of this maturity.

The Authority expects the demonstration of Data Merging maturity to be achieved through the development, documentation and demonstration of real-time emulations of the whole PNT system (legacy plus Alt Nav) using representative ICDs of in-service PNT devices (e.g., INS GPS) where possible and chosen in conjunction with the Authority and draft Alt Nav Technology ICDs (see WP1.2). These emulations should in corporate representative data rates and latencies as well as a representative spread of simulated PNT sub-system (in particular Alt Nav) errors – from best to worst performance. Emulations should, for lower TRL demonstrations be software based with Higher TRL demonstrations being hardware in the loop – with data flowing across genuine data interfaces between physically separate hardware units.

A key consideration for the fusion of data within the data merging architectures is the 'assuredness' of the PNT data throughout. The contractor shall seek advice on 'assuredness' from the Authority. The Authority acknowledges that use of existing PNT data interfaces will constrain the extent of PNT assuredness, but it is essential that every reasonable attempt is made to avoid misleading PNT data from corrupting the main platform PNT solution(s). As an aid to this, statistically valid estimated uncertainty and system health meta data should be passed to any data fusion element of the data merging system with every single Alt-Nav technology measurement.

The integration development effort is to explore the value of mathematical models implemented in software to simulate the measurement outputs from Alt-Nav technologies, both for demonstration purposes and in due course as a method of checking that the Alt Nav PNT data source system is operating within normal parameters. Should the PNT solution stray outside normal behaviour, its contribution should be excluded.

In the early stages this de-risking activity process will include mathematical analysis, modelling, algorithm development and simulation. The contractor shall produce a generic system behaviour model.

4.2.4 WP 1.4 - Requirements Setting

The contractor shall provide information to the Authority to help define System requirements from the Data Merging Function framed as:

- a. Key User Requirements (KURs).
- b. Entries for the System Requirement Document (SRD).

Provided with the SRD of a Generic GNSS Rx, what refinements would be needed to describe the functions of the Data Merging process.

4.2.5 WP 1.5 - Project Management

The contractor shall identify a list of activities to be undertaken and provide a Project Management Plan in a format compatible with MS Office, against which progress can be assessed. This should include (but is not limited to):

- a. Regular update briefings / meetings with the authority team.
- b. Regular contact (at least weekly) with the authority Project Manager.
- c. Identification of risks, mitigations, issues and efficient early flagging of problems arising.
- d. Identification of assumptions and dependencies.
- e. Provision of timely monthly evidence of progress to support Authority Accruals processes (percentage progress against all milestones and associated financial value of work completed as a minimum).
- f. Proposed strategies for managing engagement with key stakeholders (i.e., EDP, DSTL, other Alt Nav suppliers (as appropriate), platform POCs).
- g. Proposed reporting formats (both document and presentational).
- h. Reporting progress against the Social Value Performance Objectives at Table 1 of Condition 46.6 of the contract.

4.3 Option 1 - Work Package 2

The Core Tasks establish generic Data Merging designs. Optional Task 1 builds on this activity by adding the findings of the EDP tasks. The intention is to broaden and deepen the activities described in the Core Tasks, guided by the platform specific information determined by the EDP contractors.

4.3.1 WP 2.1 - Architecture Studies

The contractor shall utilise EDP outputs described in Table 1 to develop a detailed determination of the architectural design and the circumstances that could affect the integration/insertion schema for introducing Alt Nav capability to the representative platforms.

For each distinct, genuine platform PNT architecture provided by the EDP, the contractor shall adapt the most similar generic data merging option from WP1 and demonstrate the validity of that option via software and hardware in the loop emulations of the complete PNT system architecture. The contractor shall, as part of their report include how the EDP GFx

was used to mature their designs for a cost effective, generic design for each proposed architectural integration configuration of Alt Nav PNT systems with justification arguments for each.

7 Annex B – Assured PNT

A set of design principles will be required to enable this evolving, 'All Source', Assured PNT concept. Assured PNT is achieved through a combination of characteristics with the required level of Assuredness determined by the nature of the application and the threats that it faces. Assuredness is made up from a range of characteristics:

- 1) Performance/Quality of Service -
 - a) Availability
 - b) Continuity
 - c) Accuracy
- 2) Security - has implemented risk management measures for:
 - a) Information security (e.g., cyber defence)
 - b) Physical security (e.g., supply chain)
 - c) Personnel security (e.g., clearance of those involved in the service/supply chain)
 - d) Safety
- 3) Robustness - each sub-system contains design measures to achieve dependability e.g:
 - a) Anti-interference (e.g., noise or dazzle)
 - b) Anti-deception
 - c) Design Assurance
- 4) Resilience - sub-systems can be combined and integrated through modularity
 - a) Source data diversification
 - b) Source data redundancy
 - c) Managed degradation and recovery
 - d) Designed to enable intelligent recovery

The characteristics described above are to be applied to:

- 1) Each part of the system that conditions the source signals.
- 2) Each source of PNT information that contributes to an application.
- 3) The higher-level functions of the application:
 - a) Data Fusion/Integration schemes
 - b) The process of directing a platform's movement from one location to another (including waypoints etc.)
 - c) The presentation of PNT information to the user.
 - d) Geospatial library data for the user (e.g., geospatial data, maps, etc)
 - e) Each part of a System of System that processes PNT information for higher-level capability purposes (tracking, situational awareness, etc).
- 4) There are design principles that enable the optimisation of performance and the coherence of technology solutions that will be available to support the Assured PNT vision over time:
 - a) Modularity and scalability of each element of the PNT System of Systems architecture
 - b) Open System architectures.
 - c) Non-proprietary, government-controlled interfaces to carry source meta-data, common to all sources of PNT information.

- d) Tools such as data models should be defined in human readable, data serialization language (like ASN-1) which is not implementation specific for programming language or data transport layer.

 - b. would, if implemented, cause any existing consent obtained by or on behalf of the Contractor in connection with their obligations under the Contract to be revoked (or would require a new necessary consent to be obtained to implement the Change(s) which, after using reasonable efforts, the Contractor has been unable to obtain or procure and reasonably believes it will be unable to obtain or procure using reasonable efforts); and/or
 - c. would, if implemented, materially change the nature and scope of the requirement (including its risk profile) under the Contract;
and:

 - e. further to such notification:
 - (1) either the Authority notifies the Contractor in writing that the Authority agrees, or (where the Authority (acting reasonably) notifies the Contractor that the Authority disputes the Contractor's notice under Clause 5.d) it is determined in accordance with Condition 40 (Dispute Resolution), that the relevant Change(s) is/are a Change(s) falling within the scope of Clauses 5.a, 5.b and/or 5.c; and
