STATEMENT OF REQUIREMENT

Unique Tasking Number FTS/5/CBRN/13	Issue Number & Date 1 - 08/02/2018	Supplier Reference Number: FATS5
Task Title: Fuchs Seat Belt Replacement Study		
Brief Description of Task (or see attached detailed Statement of Requirement): Study into the replacement of the operator 1 and 2 seatbelts in the Fuchs Area Survey and reconnaissance platform (AS&R) (See SOW, Annex B for further detail).		
Background/Justification: The Fuchs vehicle fleet was regenerated in 2014 and remains in service at present. The regeneration project saw the vehicles returned to service in the same state as that when they were put into storage in 2010 and the CBRN DT have conducted multiple packages of work to support the re-introduction of Fuchs to service including vehicle modifications. The Legislation Compliance Assessment (LCA) for Fuchs confirmed that the seat belts at all seating positions are compliant to the legislation extant at In-Service Date (ISD) and they met the requirements of UK legislation. This regulation stated that vehicles first used on or after 1 April 1982 (46) and on or 1 April 1981 (47) must have anchorages for every forward-facing front seat and every non-protected seat and shall be provided with three-point belts (minimum three-point) for the driver's seat and for the specified passenger's seat respectively. Installation should ensure the shoulder straps do not cut into the occupant's neck or have a tendency to slip off the shoulders. This regulation also applies to every seat belt with which a motor vehicle is required to be provided in accordance with Regulation (47) and to the anchorages, fastenings, adjusting device and retracting mechanism (if any) of every such seat belt and also to every anchorage with which a goods vehicle is required to be provided in accordance with Regulation 46 (3). The anchorages and anchorage points of a seat belt shall, in the case of a seat which incorporates integral seat belt anchorages, include the system by which the seat assembly itself is secured to the vehicle structure. The anchorage points provided for seat belts shall be used only as anchorages for the seat belts for which they are intended to be used or capable of being used. After the completion of the LCA it has been recognised as Duty of Care, that the CBRN Project Team should consider fitting 4 Point 4 Part Harness seatbelts in both operation crew positions. A study into the possible replacement of the Operator 1 and 2 seatbelts in the rear of the Fuchs Area Survey & Reconnaissance platform is required to support the decision making process.		
Activities to be Undertake: The activities to be undertaken and completed under the contract have been identified and detailed in Annex B (SOW) – Please see that document for further detail.
