

Painted WBP Plywood · See specification

Underside of roof panel left exposed (matt white powder coated steel). Care should be taken during construction to conserve the appearance of this surface, with surfaces free from any scratches or depressions visible to the naked eye from 2m away.

Dark grey fibre cement board in flat panels, matt finish. Boards not longer than 1200mm parallel to front of building; 8mm gap at joints between panels. Face fixed with BZP screws. Installed as per working drawing on sheet D09.
