Contractors are expected to provide technical information and manufacturers data sheets/reports to support their answer

Weighting = 35

2. Experience

The contractor is to detail pitches completed over the last 5 years where they have installed a sand dressed artificial turf from the turf supplier proposed in their response to question 1.

The client is seeking project name, location, date project completed as a minimum.

The contractor shall detail all pitch resurfacing projects completed by their company in the last 5 years.

The client is seeking project name, location, date project completed, value of contract issued to contractor, final cost of project as a minimum. Notes explaining differences between contract value and final project cost will be accepted.

Weighting = 35

3. Maintenance

The tender document requires the contractor to include for specialist maintenance upon a quarterly basis. Provide details of the maintenance procedures required to maintain the pitch for the proposed usage arrangements including any specialist processes that are necessary. Specialist maintenance visits are expected to be undertaken in October, February, May and July in the first year.

Contractors are expected to detail the processes to be employed in the specialist maintenance and how this will benefit the performance of the artificial turf system + how it will help prolong the life of the pitch. The contractors maintenance proposals should be cross referenced with the conditions of the warranty document provided in 1c.

Weighting = 15

4. Environment & Sustainability

Please briefly detail how you plan on minimising environmental and sustainability impacts on the local community and physical geography. This may include information on; sustainability policies, travel plans, control and use of potentially hazardous materials and management of the product supply chain.

In particular, the client is seeking details of how materials removed from site will be recycled, re-used or re-purposed.
