Schedule 2 Specification

1. Introduction

- 1.1. The Department for Transport (DfT) invites proposals for the provision of a **cyber security assessment (the Assessment) of a piece of screening equipment (the Equipment)**. This contract will be subject to Schedule 1 Order Form and Short Form Conditions. DfT will not accept other terms and conditions or any proposed changes.
- 1.2. The anticipated value of the project is **approximately £15,000 - £20,000 (excluding Travel & Subsistence (T&S))**. This value is given in good faith as a guide to bidders planning for submitting their Tender. It should not be interpreted as an undertaking to purchase any goods or services to any value and does not form part of the contract.
- 1.3. The anticipated length of the contract will be approximately three weeks of research time, including time to develop and deliver the Final Report.

2. Background

- 2.1. The DfT requires an Assessment of the Equipment, that looks at both its Architecture and Use of Data (confirming where it is stored, processed and where it flows). This analysis must support understanding of any potential vulnerabilities, flaws or other weaknesses that could allow the Equipment to be exploited. Moreover, the analysis must outline how long it would take, and the resources required, to undertake any mitigating actions to exploit any areas of vulnerability identified. The outcome of this research, the Final Report, will enable DfT policymakers to understand and further develop a suitable response to these vulnerabilities.
- 2.2. The Assessment must also focus on Penetration Testing of the Equipment, which is defined according to the definition provided by the National Cyber Security Centre (NCSC): a method for gaining assurance in the security of an IT system by attempting to breach some or all of that system's security, using the same tools and techniques as an adversary might.

3. Procurement Timetable

Activity	Date
Launch of Procurement	1st March 2024
Clarification Period Closes	4th March 2024 – 12:00 (Midday)
Deadline for Submission of Bids	5th March 2024 – 12:00 (Midday)

Evaluation of Tenders	5th March 2024 – 7th March 2024
Proposed Award Date of Contract	8th March 2024
Contract Commencement	11th March 2024

4. Scope

4.1. Planning Phase – Communication and Delivery

4.1.1. The Planning Phase will provide the opportunity for the Supplier and DfT to discuss the subsequent phases of the contract, how communication will be maintained and to explain in more detail DfT's desired outcomes. It will also be used to discuss the Supplier's response to Schedule 6 Bidder Response and agree the formatting/delivery of the Final Report. The Planning Phase must be complete prior to Review Phase commencement.

4.1.2. This Planning Phase is expected to be delivered by the 13 March 2024

4.2. Review Phase – Document Review

4.2.1. The Review Phase of the Assessment will be, for the Supplier, to gain an initial understanding of any previous testing results or information of the Equipment, which will be gained through the evaluation of documentation and user guides/manuals that may be available online, or that will be supplied at contract commencement. This will provide a basic understanding of the Equipment, and should be used to support subsequent testing, with a full summary to be included in the Final Report. This Review Phase will aid in identification of any specific areas of interest/focus to maximise the Outputs of the technical phase of the contract, as well as potentially providing a steer on the types of attacks that may be most effective against the Equipment.

4.2.2. The Supplier must keep the DfT informed of progress and provide a comprehensive overview of the Review Phase within the Final Report.

4.2.3. This Review Phase is expected to be delivered by 22 March 2024

4.3. Technical Phase - Penetration Test & Physical Breakdown

4.3.1. The Technical Phase of the Assessment will include a hands-on **digital** assessment and high-level Penetration Test of the Equipment to understand the Equipment's Use of Data.

4.3.2. To do this, the supplier resource will be required to attend the site where the Equipment is stored. The details of the site (near Salisbury) will be provided to the Supplier at contract commencement.

- 4.3.3. Supplier testing equipment must be mobile. It isn't foreseen for there to be limitations on what the supplier can bring on-site but this, and all associated details, will be clarified at Planning Phase meeting.
- 4.3.4. The Technical Phase will enable analysis of the Equipment's architecture, including but not limited to both within the Equipment and within a deployed environment, how the device stores, collects and/or transmits any data and, if so, where it is stored and/or transmitted. It will also seek to identify what level of technical risk this data storage, collection or transfer presents, should an adversary seek to take advantage of a specific vulnerability.
- 4.3.5. The Technical Phase of the Assessment will also seek to understand how the Equipment could be impacted/accessed if connected to a network of similar devices, and what data could subsequently be gathered, stored and/or disseminated.
- 4.3.6. If during the Assessment, the Supplier identifies additional systems or components which lie outside of Penetration Test and Use of Data but have a potential impact on the security of the Equipment, the Supplier will form a Proposal to the DfT with the associated benefits and/or costs of this further investigation. The DfT will then discuss this with the Supplier and, at the DfT's sole discretion, propose next steps taking into account the impact on the contract and associated researched time budgeted for.
- 4.3.7. This Technical Phase must also include a physical breakdown of the Equipment to identify any unusual components that may warrant further investigation.
- 4.3.8. The Supplier must keep the DfT informed of progress and provide a comprehensive overview of the Technical Phase within the Final Report.

- 5.1. **Planning Documentation:** Following contract award, during the Planning Phase, the Supplier will outline how the research will be carried out using their response to Question 2c of Schedule 6 Bidder Response. This will outline the types of tests to be carried out, the logistics of the allocated research time, how the data gathered will be stored and written up/delivered to DfT and any wider aspects of the contract delivery. DfT and the Supplier agree this approach prior to the Assessment commencing.
- 5.2. **Update Meetings:** After the completion of each key phase (Review, Technical and Report), the Supplier and DfT will meet to discuss the work undertaken in each Phase to discuss any issues that arise and to agree the next steps. This will allow DfT to review progress and then subsequently provide approval for the Supplier to proceed to the next phase of work.
- 5.3. **Final Report:** Following the completion of the Assessment (Review and Technical Phases), and notification to DfT that all actions outlined in the scope have been completed, the Supplier will incorporate the findings into a Final Report.
