THE SPECIFICATION, INCLUDING PROJECT TIMETABLE AND EVALUATION OF TENDERS

GENERAL INTRODUCTION

The Food Standards Agency is an independent Government department working across England,

Wales and Northern Ireland to protect public health and consumers wider interest in food. We make sure food is safe and what it says it is. The National Food Crime Unit (NFCU) is a dedicated law enforcement function of the Food Standards Agency (FSA). The unit provides leadership on food crime across England, Wales and Northern Ireland.

The Agency is committed to openness, transparency and equality of treatment to all suppliers. As well as these principles, for science projects the final project report will be published on the Food Standards Agency website (www.food.gov.uk). Also, in line with the Government's Transparency Agenda which aims to encourage more open access to data held by government, the Agency is developing a policy on the release of underpinning data from all of its science- and evidence-gathering projects. Underpinning data should also be published in an open, accessible, and re-usable format, such that the data can be made available to future researchers and the maximum benefit is derived from it. The Agency has established the key principles for release of underpinning data that will be applied to all new science- and evidence-gathering projects which we would expect contractors to comply with. These can be found at <http://www.food.gov.uk/about-us/data-and-policies/underpinning-data>

This work is aimed to support the FSA's main statutory objective, to safeguard public health and protect the interest of consumers in relation to food. The National Food Crime Units (NFCU) strategic assessment adopts a 4P (Pursue, Protect, Prevent, Prepare) approach and looks to describe the threat to the UK and its interests, from food crime, serious fraud and related criminality within food supply chains. This work will support our work on the key strategic threat area of dangerous non-foods, and criminality relating to the marketing of substances unsafe for consumption.

This work is specifically aimed to support the Prevention strand of the plan and seeks to identify consumer attitudes to the use of DNP and highlight other yet unidentified dangerous non-foods, for example those for which use may precede the recourse of consumers to DNP.

A. THE SPECIFICATION

Background

2,4-dinitrophenol (DNP) is a highly toxic industrial chemical. It has been illegally sold as a diet pill for weight loss. DNP is poisonous to humans and can cause death, as well as other serious physical side effects.

It is a crime to sell DNP for human consumption in the UK. The effects of DNP can be catastrophic and cause serious harm to health. Taking DNP has resulted in a significant number of deaths in the UK.

Some people wrongly believe taking DNP will enhance their physical appearance or cause weight loss

and users are believed to be those seeking to improve body image (body building / slimming).

The NFCU are seeking to better understand users awareness of the potential threat from DNP and identify other substances that this audience may use which could cause a similar threat to health, or which might be experimented with before users move to using DNP. Many seek support and advice from like-minded individuals through on-line engagement in group blogs, social media sites and product review streams.

The Specification

Tenders are invited to carry out research to identify relevant on-line forums that the key audience may engage. Whilst the tender are not be considered a public authority they should be aware that any material / data processed for the FSA / NFCU must comply with the Regulation Of Investigatory Powers Act (2000), Any sites / blogs identified should then be subject to a period of monitoring and assessment to provide insight into the key intelligence requirements.

The tender :

- Must have experience in on-line assessment of social media sits and production of audience sentiment reporting. Evidence of previous work should be provided to demonstrate this requirement
- Must have in place and comply with their own on- line security policies and procedures.
- Any costs attributed to the requirement of licenses to either maintain cyber security or access specific on-line forums must be accepted by tender and consumed within the agreed cost of the contract . The tender should adhere to their own policies and procedures to maintain the service required.
- The tender must be aware of public authority responsibilities to ensure compliance with Regulation Of Investigatory Powers Act (2000) with Investigatory Powers Commissioners Office oversight .
- An interim paper outlining findings at each milestone should be shared with the project manager for onward distribution with NFCU management team.
- The milestone paper should be accompanied with a meeting with the PM and NFCU management to present the initial paper at each milestone.
- The tender should provide the following minimum outputs:
 - A list of the sites and on-line spaces with a synopsis of each site
 - A summary of the size of audience and assessment of demographic attributed to each site
 - An overall assessment on the known risk attributed to DNP based on audience engagement / discussion
 - An overview of other 'fat burning' products discussed which may present a potential risk to health (and a sense of audience awareness of linked dangers), whether used before DNP or instead of DNP

- Provide recommendation to the NFCU on preventative communications that may be used within audiences and ways this may be achieved.
- Whilst the final report will not be peer reviewed it will be shared with the project manager for onward distribution with NFCU management
- Any report , document must comply with the Web Content Accessibility Guidelines (WCAG) 2.1 at AA standards.
- The tender may suggest different techniques in order to enhance the end product

Data Security

It is anticipated that the tender will process personal data. The tender must ensure that any personal data is in compliance with the GDPR, all personal data should be redacted for the purpose of reporting , recognising the commissioning authority's role as the 'data controller' and the contractors role as the 'data processor', and responding to the sections below. If successful you may also be asked to carry out a Privacy Impact Assessment (PIA), and a privacy notice may be required, which will be reviewed by the FSA data security team.

Please confirm in your tender that you have in place, or that you will have in place by contract award, the human and technical resources to perform the contract to ensure compliance with the General Data Protection Regulation and to ensure the protection of the rights of data subjects.

Please provide details of the technical facilities and measures (including systems and processes) you have in place, or will have in place by contract award, to ensure compliance with the General Data Protection Regulation and to ensure the protection of the rights of data subjects. Your response should include, but should not be limited to facilities and measures:

- to ensure ongoing confidentiality, integrity, availability and resilience of processing systems and services;
- to comply with the rights of data subjects in respect of receiving privacy information, and access, rectification, deletion and portability of personal data;
- to ensure that any consent based processing meets standards of active, informed consent, and that such consents are recorded and auditable;
- to ensure legal safeguards are in place to legitimise transfers of personal data outside the EU (if such transfers will take place);
