Annex 2 – Specification

The Nature for Climate Fund (NCF) supports the UK's climate and biodiversity goals through woodland creation. To assess environmental outcomes from NCF-funded planting, Liverpool John Moore's University (LJMU) were contracted to develop indicators across five priority areas: carbon sequestration, biodiversity, air quality, flood mitigation, and water quality. LJMU developed scalable indicators to evaluate impacts from site to programme level for planting between 2020-2024. These incorporate spatial context, enabling analysis of how planting location and layout affect outcomes and whether trees were planted in the right places. LJMU generated a portal and a report to demonstrate the findings which highlight NCF's contribution to net zero, nature recover, public health and climate resilience.

It is important that the indicators incorporate all NCF planting, therefore there is a need to refresh these indicators to include planting from 2024-25 (the final year of the NCF project). It is imperative that LJMU be able to complete this work. Defra will be in addition to the refresh commissioning LJMU to include social indicators in the new report, which was out of scope in the last report. This report and the accompanying portal will enable Defra to assess the success of the NCF Tree Planting Programme, establish regional differences and ensure the right trees were planted in the right place.

In addition to this work, LJMU will be assisting a research fellow with an additional project on the assessment of the environmental benefits for different land management case studies including different types of planting such as conifer, broadleaf and 50-50.

The proposal covers two work packages building on the previous NCF Scientific Indicators work (2023-2025) undertaken by LJMU for Defra's Nature for Climate Trees programme:

WP1: Refresh of the five scientific indicators to include the last year (2024-25) of NCF planting, and addition of a new access indicator (social metric)

WP2: Assessment of environmental benefits for land management case studies

The Nature of the procurement is Services.

This is a new contract which will be a follow on from the one previously in place for Phase 1. The original contract was issued in June 2023. The contract started 12th July 2023 until 31st September 2024.

Total cost: £66,134 (+VAT where applicable)

Annex 4 – Tender Submission

Nature for Climate Fund – Scientific Indicators, Phase 2

Summary

This proposal covers two work packages building on the previous NCF Scientific Indicators work (2023-2025) undertaken by LJMU for Defra’s Nature for Climate Trees programme:

WP1: Refresh of the five scientific indicators to include the last year (2024-25) of NCF planting, and addition of a new access indicator (social metric)

WP2: Assessment of environmental benefits for land management case studies

Start date: as soon as possible (1st November)

End date: 31 March 2026 (WP1), 9th January 2026 (WP2)

WP1: Scientific Indicators refresh

This piece of work will start by collating, processing and quality-checking planting locations (data returns and spatial boundaries) from delivery partners. The Defra team has been gathering and reconciling data in a central location, so the task is expected to be less onerous than in the first phase of the project (and there is only one year of new data).

We will then re-run the five scientific indicators developed in the first phase of the study with the updated planting file, in order to get the full estimate of benefits generated by 5 years of NCF around:

- Carbon sequestration
- Biodiversity
- Air quality
- Water quality
- Water flow

The refresh will be an opportunity to expand the documentation of each indicator and consolidate all project outputs (codebase and data) for sharing and internal use within Defra. The aim is to facilitate in-house application of the indicators by upskilling and training relevant staff.

Additionally, the data portal produced to accompany the report in Phase 1 will be refreshed with the latest results. Reviewers had made several out-of-scope suggestions for the portal in the final review; these have been noted as “nice-to-have” features and will be triaged and addressed as much as possible during this phase. The list of features to action will be agreed upon with the project team.

The work is to feed into the wider evaluation of the NCF programme.

WP2: Land management case studies

Defra are creating case studies to explore how landowners might make decisions on land management based on social, economic and environmental values. LJMU have been asked to contribute to the environmental modelling, aligning with approaches used for the NCF Scientific Indicators.

The focus is on biodiversity and water quality. There are four scenarios to be assessed:

- 1- Productive conifer woodland (85 ha planting)
- 2- Mixed-use forest (50:50 broadleaf:conifer) (85 ha planting)
- 3- Fruit and timber agroforestry on arable land (22.5 ha planting)
- 4- Fruit and timber agroforestry on sheep pasture (22.5 ha planting)

The work is to employ a pragmatic approach, deriving benefit rates (amount of benefit per hectare of planting) for representative planting conducted under the Nature for Climate programme and evaluated by LJMU through the Scientific Indicators work.

Contribution to woodland ecological networks (Biodiversity)

Metric description: For each of the 4 case studies, a measure of how much expansion the woodland ecological network could undergo as a result of the intervention, compared to the baseline.

Method: extract network change statistics for all NCF sites in the region of interest (Lowland North West England). Derive an uplift rate (hectares of network created per hectare planted) for woodland vs TOW. Calculate bracketed projections (average and likely range) for the 4 scenarios using mean and standard deviation.

Note: the majority of NCF sites were broadleaf/mixed so we may not get a robust conifer rate. In this case, we will re-model the ecological networks, swapping NCF broadleaved sites by conifers to get a benefit rate appropriate for the region selected for this study.

Pollution removal (Water Quality)

Metric description: For each of the 4 case studies, a measure of potential avoided pollution (N / P) to watercourses.

Method: From NCF Indicators data, derive an uplift rate (kg pollution removed per hectare planted) for woodland vs TOW. Calculate bracketed projections (average and likely range) for the 4 scenarios (and baselines) using mean and standard deviation.

Priority woodland species (Biodiversity)

Metric description: species most likely to shift their ranges into / be lost from the area based on climate suitability under two climate change scenarios. *NB*: applies to woodland scenarios only.

Caveat: The Natural England dataset we used for the biodiversity indicator models the range shifts of priority species under climate change. We only retained species associated with woodland, therefore we cannot estimate how beneficial scenarios 3 & 4 would be to those species.

Method: From the NE dataset and for the analytical footprint, extract the species expected to be gained/lost in each grid cell. Provide results as frequency (~ likelihood), e.g. 75% chance that planting on arable land in the lowland NW would be in the projected range of species X.

3. How the Contract works

3.1 The Order Form is an offer by the Authority to purchase the Deliverables subject to and in accordance with the terms and conditions of the Contract.

3.2 The Supplier is deemed to accept the offer in the Order Form when the Authority receives a copy of the Order Form signed by the Supplier.

3.3 The Supplier warrants and represents that its Tender Submission and all statements made and documents submitted as part of the procurement of Deliverables are and remain true and accurate.

4. What needs to be delivered

4.1 All Deliverables

(a) The Supplier must provide Deliverables: (i) in accordance with the Specification and Tender Submission; (ii) to a professional standard; (iii) using all reasonable skill and care; (iv) using Good Industry Practice; (v) using its own policies, processes and internal quality control measures as long as they don't conflict with the Contract; (vi) in accordance with such policies and procedures of the Authority (as amended from time to time) that may be specified in the Contract (vii) on the dates agreed; and (viii) in compliance with all applicable Law.

(b) Without prejudice to the Specification the Supplier must provide Deliverables with a warranty of at least 90 days (or longer where the Supplier offers a longer warranty period to the Authority) from Delivery against all obvious damage or defects.

4.2 Goods clauses

(a) All Goods Delivered must be capable of meeting the requirements set out in the Specification and be either (i) new and of recent origin, (ii) reused or (iii) recycled.

(b) All manufacturer warranties covering the Goods will be assigned to the Authority on request and for free.

(c) The Supplier transfers ownership of the Goods on completion of Delivery (including off-loading and stacking) or payment for those Goods, whichever is earlier.

(d) Risk in the Goods transfers to the Authority on Delivery but remains with the Supplier if the Authority notices any damage or defect following Delivery and lets the Supplier know within three Working Days of Delivery.

(e) The Supplier must have full and unrestricted ownership of the Goods at the time of transfer of ownership.

(f) The Supplier must Deliver the Goods on the date and to the specified location during the Authority's working hours.

(g) The Supplier, its subcontractor(s) and supply chain must minimise packaging used whilst providing sufficient packaging for the Goods to reach the point of Delivery safely and undamaged. The Supplier must take back any primary packaging where it is possible to do so. Packaging must be 100% re-usable, recyclable or compostable, use recycled content where reasonably practicable and support the Government's commitment to eliminate single use plastic.

(h) All Deliveries must have a delivery note attached that specifies the order number, type, quantity of Goods, contact and details of traceability through the supply chain.

(i) The Supplier must provide all tools, information and instructions the Authority needs to make use of the Goods. This will include, where appropriate, any operation manuals which, unless specified otherwise, will be written in English and provided in electronic form.

(j) The Supplier will notify the Authority of any request that Goods are returned to it or the manufacturer after the discovery of safety issues or defects that might endanger health or hinder performance and shall indemnify the Authority against the costs arising as a result of any such request. Goods must be disposed of in line with the waste management hierarchy as set out in Law. The Supplier will provide evidence and transparency of the items and routes used for disposal to the Authority on request.

(k) The Authority can cancel any order or part order of Goods which have not been Delivered. If the Authority gives less than 14 calendar days' notice then it will pay the Supplier's reasonable and proven costs already incurred on the cancelled order as long as the Supplier takes all reasonable steps to minimise these costs.

(l) The Supplier must at its own cost repair, replace, refund or substitute (at the Authority's option and request) any Goods that the Authority rejects because they don't conform with clause 4.2. If the Supplier doesn't do this it will pay the Authority's costs including repair or re-supply by a third party.

(m) The Authority will not be liable for any actions, claims, costs and expenses incurred by the Supplier or any third party during Delivery of the Goods unless and to the extent that it is caused by negligence or other wrongful act of the Authority or its servant or agent. If the Authority suffers or incurs any damage or injury (whether fatal or otherwise) occurring in the course of Delivery or installation then the Supplier shall indemnify from all losses, damages, costs or expenses (including professional fees and fines) which arise as a result of or in connection with such damage or injury where it is attributable to any act or omission of the Supplier or, where related to the Contract, any of its subcontractors or suppliers.

4.3 Services clauses

(b) The Supplier must co-operate with the Authority and third party suppliers on all aspects connected with the delivery of the Services and ensure that Supplier Staff comply with any reasonable instructions including any security requirements.

(c) The Authority must provide the Supplier Staff with reasonable access to its premises at such reasonable times agreed with the Authority for the purpose of supplying the Services.

(f) The Supplier must take all reasonable care to ensure performance does not disrupt the Authority's operations, employees or other contractors.

(g) On completion of the Services, the Supplier is responsible for leaving the Authority's premises in a clean, safe and tidy condition and making good any damage that it has caused to the Authority's premises or property, other than fair wear and tear and any pre-existing cleanliness, safety or tidiness issue at the Authority's premises that existed before the commencement of the Term.

(h) The Supplier must ensure all Services, and anything used to deliver the Services, are of the required quality and free from damage or defects.

Any disputed amounts shall be resolved through the dispute resolution procedure detailed in clause 35.

5.6 If any sum of money is recoverable from or payable by the Supplier under the Contract (including any sum which the Supplier is liable to pay to the Authority in respect of any breach of the Contract), that sum may be deducted unilaterally by the Authority from any sum then due, or which may become due, to the Supplier under the Contract or under any other agreement or contract with the Authority. The Supplier shall not be entitled to assert any credit, set-off or counterclaim against the Authority in order to justify withholding payment of any such amount in whole or in part.
