WORK PACKAGES

WP1 – Planning and Reporting for Synergy Programme

Deliverable identified in the requirements

1. Conduct effective stakeholder engagement at all levels to deliver an end-to-end Level 2 Plan on a Page (PoaP) for the Synergy Programme working in various business areas and Government Departments across Synergy to principles provided by the Programme;
2. Conduct effective stakeholder engagement at all levels to deliver a Level 3 Programme Plan for the Design and Validate phase of the Synergy Programme working in various business areas and Government Departments across Synergy to principles provided by the Programme;
3. Develop and implement the initial planning cadence across the Synergy Programme;
4. Develop and generate planning reports and data to align with the Governance reporting process;
5. Draft and issue the first iteration of the Synergy Project Planning Standards document;
6. Develop a planning assumption log that details all of the planning assumptions used in each Programme Plan.

Our Approach

The Blue Border team have vast experience in Planning and Programme Office Management and ensure that the following is exercised across planning and PMO engagement. Our Team blends experts in Planning Reporting and Business change to deliver optimally against the specified requirements and deliverables.

Face to face and Teams/Virtual meetings with all stakeholders and their teams are to be held ensuring constant collaboration and liaison with adherence to governance and approval routes maintained

Planning workshops would be attended as per the following and on request;

- Ongoing review of the high-level plans through to Q4 2023
- Initiate and further develop the Level 3 Programme Plan for the Design & Validate phase of the Synergy Programme.

During delivery we will create high-level view (PCN) of all the combined set of workstream plans to be produced and published on a fortnightly basis. All L3 Programme Plans would be updated in line with outcomes of planning events and workshops, liaising closely with the PMO and feedback from the workstreams. We will continue to liaise and advise/assist Workstream leads in the expansion of high-level activities for the Design and subsequent stages.

We will work with the Synergy PMO Lead to ensure that all phases are analysed and reviewed with stakeholder engagement throughout in the capture of assumptions and resultant plans for scenario modelling. Planning cadence with reports will be generated to support the fortnightly meetings arranged with Synergy Programme Workstream leads / Project Managers to review progress against the OBC plan.

Workstream plans will be monitored and progressed in accordance with the fortnightly planning/reporting cycle feeding into the checkpoint reports based upon the workstream plans and the risks log.

WP 2 – Change Delivery

Deliverable identified in the requirements

1. Contribute to the strategy and direction setting for the programme to enable the building of short/medium and long- term collateral, including: Training analysis.
2. Create the development and production options study for a/multiple training needs analysis
3. Development of Stakeholder pack v3 and associated engagement materials to support deliverables (including TROs)
4. Other activities for Business Engagement – provide other workstreams/teams within the 3GSS Programme with collateral to support activity (examples but not exhaustive)

Our Approach

We will work with the existing Business Change team to further the development of key products and specific time lines for their creations and refinement. We would look to contribute to the development of a single SharePoint repository for all products and deliverables.

The Training needs analysis would be formed from the inclusion of the business needs to produce a summary of options for the delivery of training suitable to support the delivery of ERP systems. We would look to establish a training needs analysis working group of stakeholders ensuring representation of MoJ teams (HQ, HMPPS, HMCTS and ALB/Agencies). We would contribute to the review of any training elements of any supplier proposals. We would support a review and summarisation of existing MoJ People Group strategies and identify where existing resources can potentially be leveraged to support the 3GSS programme. This would include reviewing existing examples of best practice and lessons learnt from similar organisation wide programmes.

We would continue to operate in a collaborative manor to expand on the other activities required and input into the delivery plan, identifying the products and deliverables.

WP 3 – Technical Projects

Deliverable identified in the requirements

1. Data Maturity Assessments
2. Reachback
3. Grey IT
4. Pipeline register

Our Approach

We will work with the MoJ technical workstream leads and the existing Project team to continually evaluate and develop the plan, manage the RAID and deliver the successful outcomes of each of the projects.

We provide a blended team of skilled professionals that will include Business Analysts, data specialists and Technical Architects to deliver the appropriate stages of each of the projects. Our success to date is based upon the open and collaborative style ensuring all stakeholders are engaged and armed with the most up to date information.

We have included example screenshots of our plans into this document that we maintain in conjunction with inputting into the MoJ plans. For Reachback and Grey It they are both dependent

upon the SSCL RFC's. we don't currently have a date for the response from SSCL. The Reachback Discovery work is underway and will confirm the full scope of applications (also dependent upon the SSCL RFC) and the service models for applications not managed by SSCL, should any exist.

The first image is the Grey IT plan and the second is the Reachback plan. Once the Pipeline Register work is more mature, we will develop a plan to support that project too.

The data maturity plan is managed by the MoJ 3GSS data lead and is currently being supported by our data business analyst and our technical architects to complete the required GSS data templates. Where these have not existed or do not appear to be ready, we are continuing using other templates and will transpose the detail when available.

In all aspects we report progress through the technical workstream governance and will continue to do so and operate in an open and collaborative manor.

Our dependencies are currently the SSCL RFC and GSS issuing the correct data templates.

We are also aware we are approaching the same MoJ Functional leads as other areas of the programme and so are trying to keep the ask as a minimum, but their knowledge is key in identifying business users and any other key information not detailed elsewhere.

WP 4 – Benefits

Deliverable identified in the requirements

1. Provide a set of Benefits which are included on a benefit register calling out MoJ benefits and Synergy benefits providing regular updates as the programme changes / scope moves.
2. Create a Benefits Realisation plan having engaged with the programme and stakeholders. Blue Border are dependent upon the MoJ supplying detailed scope / requirements / cluster and MoJ detailed delivery plans
3. Governance – collaborative approach to ensure clear signed off audit trail.

Our Approach

Our experience staff have a wealth of SOP, SSCL and cross department expertise that enable us to manage MoJ's identification, calculation and data evidence of benefits. We have a strong reputation for delivery across all of MoJ's business functions that enable us to broker quality outcomes. We can provide evidence of where we have added value and able to de-risk MoJ from over commitment and enabling the Synergy cluster to maintain its momentum to deliver the SOBC and OBC. The Benefits Working Group (BWG) contains some challenging attendees. We have been able support the BWG Lead in some challenging conversations to develop a way forwards that all parties can accept.

We will continue to foster an open and collaborative approach as we progress towards finalising the OBC and the future iterations of the FBC.

Our dependencies are borne from the Synergy Cluster and the Benefits Working Group (BWG) to ensure we have clear direction, achievable timelines, and updated information in a timely manner. Conversations to date within the BWG have been challenging at times and we have had to broker mutual agreements to progress benefits and outcomes. Support from the MoJ's Programme leadership has been strong and supportive of the challenges.

We are also dependent upon the COM outcomes from the KPMG and engagement from the Synergy Cluster to enable us to add value and update the benefits accordingly. We will continue to present updates / escalations to the 3GSS SLT and present recommendations and ways to track progress.

Ian Welsh has been very clear he sees the benefits activities to be iterative throughout the programme - to achieve this the cluster needs to flow the technical designs into the MoJ programme to ensure departments are aware to the proposed designs.

We will continue to maintain the MoJ benefits register, with support of the functional Leads and feed this into the BWG. We are committing to the MoJ Benefit Owners to keep them updated with changes to the strategic or technical direction that may influence the benefit realisation.

All of our work is kept in the benefits Team's folder where a full audit trail of updates to the register, BWG templates, presentations and decisions are recorded. We also record risks relating to delivery and identify where possible any additional costs or disbenefits associated with the new solution.

Once the procurement of the new ERP elements is complete, we will be able to define the realisation plan as the solution is deployed. The Benefit Owners and Functional Leads will join on this journey and confirm the approach and mechanism for measure and control the realisation.

WP 5 – Transformation and Innovation

Deliverables

1. Transformation Readiness
2. Automation

Our Approach

We have used MOJ governance structures (Technical Design Authorities (TDA)) to gain approval of the High-Priority Transformation Readiness Opportunities (TRO) to proceed. The Blue Border team will now begin to build out more detailed analysis on each of the TROs within the priority shortlists and engage with key MOJ stakeholders to gather further knowledge / information around each change opportunity. We can then work with the business teams to produce detailed delivery plans, resourcing requirements, accurate time scales, analysis of process volumetrics, costs / SSCL touchpoints.

A number of the transformation opportunities are cross-cutting (i.e. span across HR, Finance, Data, Commercial etc.) so these will be co-owned across functions, with planning workshops and scoping sessions with Functional Leads, SMEs, Global Process Owners (GPOs) due to take place in May/June 2022. We have secured a placeholder HR TDA Presentation for July 2022, in which we will be going back to HR with our full report, recommendations and 't-shirt sizing' of each previously approved TRO. This will conclude Step 2 Detailed Discovery. For Finance, we will be attending Finance TDA on a monthly basis to provide an update / report. HR already having an 'Improvement Road Map', where HR appear to have progressed further in their thinking and the TRO work will map into their Road Map.

In managing Step 2 Detailed Discovery, our Blue Border team will work closely with the MOJ Project Delivery team (meeting on a weekly basis) to plan and scope the business change required. We also update regularly at the MOJ Transformation Call, which is attended by Functional Leads, SMEs and GPOs.

Our Business Analysts use agile methodology in managing 'Actions Back Logs' to ensure the project is mobilised and driven forward. They have also established weekly Working Groups within HR to ensure effective management of each TRO and achieve alignment with the wider business (ongoing Change Initiatives, HR Improvement Road Map etc.) to control any risk of work duplication.

The automation deliverable is a new requirement and further work is required to scope this in terms of where automation is required / expected to bring value to MoJ. We would like to conduct a couple of workshops to define the remit and understand how this will link into the KPMG COM work and where the automation may influence the MoJ's Grey IT landscape.

Knowledge Transfer (KT) Plan

We will work with the MoJ to create KT sessions to discuss and share details surrounding activities completed to date and the plan within any outstanding contracted period. We will ensure that all productions remain on the MoJ's infrastructure. As part of KT we will articulate the location and a description of all products and their state of development or approval.

We will run a set number of KT sessions that will be structured to ensure the best transfer of knowledge.

SOCIAL VALUE COMMITMENT TO SUPPORTING HEALTH AND WELLBEING IN THE WORKFORCE

As a small organisation, we see our people as our strength and we often talk about the Blue Border Family. As such we promote the concept of looking after each other and raising where we see changes of behaviour or we recognise workload may becoming too much in any given period.

The Partners also recognise other life factors influence more in an individual's well-being and can be invisible to work colleagues. We talk openly about how we are feeling to lead by example that times can be tough and talking is one of the first steps in getting support.

We try to prevent a single point of failure at any point in the process of service delivery this not only protects the end services to the client but also enables us to share and move staff around to ensure we do not overload people and we are able to provide support where and when its needed.

Pre-Covid we would hold monthly informal events where the whole Blue Border team comes together to relax and unwind. During Covid we replaced this with Quiz events and other discussions. In one such event the Partners, Dave and I, started the discussion by talking openly about how Covid and lockdown impacted each of us. Others quickly followed and a support network of smaller groups commenced via WhatsApp. Post Covid we are looking to establish more physical activities away from the office to help support well-being (dependant on any future lockdown restrictions).

The new ways of working during Covid has had a big impact on the workplace and social interactions, everyone has responded differently at different times. As the UK comes to term with the long term need to live with Covid and return to work is becoming the norm we fully understand this will be difficult for people who suffer from anxiety or have venerable dependants. We will continue to support individuals with their specific requirements and provide the levels of support to make them comfortable. We will also offer opportunities for these people to join social events outdoors when possible to reduce the Covid risk as much as possible.

Where individuals experience life changing events we provide the best levels of support we possibly can. Each person will require different things at different times, our approach is to offer support throughout the lifetime of their engagement with us. We offer additional time off, financial assistance, breaks away, change of taking up professional services.

We look at our clients in a similar way to ensure the asks of us are not placing any individual under too much pressure. We look at the engagement, verbal and written response to see if characteristics change and we have provided additional support our life experiences to try and help individuals.

When we look for individuals to join Blue Border, while they need to have the skills and experience to deliver the outcomes, we do not discriminate. We see diversity as a positive addition to the team since this opens up different perspectives and opportunities for all across Blue Border. We focus on personality and I think we welcome new members into the Blue Border family exceptionally well.

7. Liabilities for Data Protection Breach

7.1 If financial penalties are imposed by the Information Commissioner on either the Buyer or the Supplier for a Personal Data Breach ("Financial Penalties") then the following shall occur:

- (a) if in the view of the Information Commissioner, the Buyer is responsible for the Personal Data Breach, in that it is caused as a result of the actions or inaction of the Buyer, its employees, agents, contractors (other than the Supplier) or systems and procedures controlled by the Buyer, then the Buyer shall be responsible for the payment of such Financial Penalties. In this case, the Buyer will conduct an internal audit and engage at its reasonable cost when necessary, an independent third party to conduct an audit of any such Personal Data Breach. The Supplier shall provide to the Buyer and its third-party investigators and auditors, on request and at the Supplier's reasonable cost, full cooperation and access to conduct a thorough audit of such Personal Data Breach;
- (b) if in the view of the Information Commissioner, the Supplier is responsible for the Personal Data Breach, in that it is not a Personal Data Breach that the Buyer is responsible for, then the Supplier shall be responsible for the payment of these Financial Penalties. The Supplier will provide to the Buyer and its auditors, on request and at the Supplier's sole cost, full cooperation and access to conduct a thorough audit of such Personal Data Breach; or
- (c) if no view as to responsibility is expressed by the Information Commissioner, then the Buyer and the Supplier shall work together to investigate the relevant Personal Data Breach and allocate responsibility for any Financial Penalties as outlined above, or by agreement to split any Financial Penalties equally if no responsibility for the Personal Data Breach can be apportioned. In the event that the Parties do not agree such apportionment then such Dispute shall be referred to the procedure set out in clauses 8.66 to 8.79 of the Framework terms (Managing disputes).

7.2 If either the Buyer or the Supplier is the defendant in a legal claim brought before a court of competent jurisdiction ("Court") by a third party in respect of a Personal Data Breach, then unless the Parties otherwise agree, the Party that is determined by the final decision of the Court to be responsible for the Personal Data Breach shall be liable for the losses arising from such Personal Data Breach. Where both Parties are liable, the liability will be apportioned between the Parties in accordance with the decision of the Court.

7.3 In respect of any losses, cost claims or expenses incurred by either Party as a result of a Personal Data Breach (the "Claim Losses"):

- (a) if the Buyer is responsible for the relevant Personal Data Breach, then the Buyer shall be responsible for the Claim Losses;
- (b) if the Supplier is responsible for the relevant Personal Data Breach, then the Supplier shall be responsible for the Claim Losses: and
- (c) if responsibility for the relevant Personal Data Breach is unclear, then the Buyer and the Supplier shall be responsible for the Claim Losses equally.

7.4 Nothing in either clause 7.2 or clause 7.3 shall preclude the Buyer and the Supplier reaching any other agreement, including by way of compromise with a third party complainant or claimant, as to the apportionment of financial responsibility for any Claim Losses as a result of a Personal Data Breach, having regard to all the circumstances of the Personal Data Breach and the legal and financial obligations of the Buyer.
