## Section 4 – Specification and about this procurement

### Early Careers Residential Based Learning programme

#### Background information

UKRI-STFC employs 2000 specialist technical, scientific and engineering staff across 5 sites in the UK. Our employees range from those in their early careers (graduates, students and apprentices) to more experienced managers and leaders.

The UKRI-STFC Corporate Strategy demands an agile and sustainable workforce with the necessary knowledge, behaviours and skills to lead UKRI-STFC into the future. Graduates and apprentices are part of the early careers skills strategy and a key part of the UKRI-STFC careers pipeline.

As part of the development of our apprentices and graduates, each year the latest intake from all sites are invited to attend an outward bound residential based learning programme to develop core skills, including but not limited to team working, leadership and communication.

Four days are planned away from the normal workplace to provide a personal development programme for:

- Apprentices to spend time exploring the behavioural elements of the apprenticeship standards; and
- Graduates to provide a leadership and personal development programme linked to CRISTAL competencies (Communication, Responsibility, Integrity, Solution focus, Teamwork, Awareness and Leadership).

The residential courses are aligned to UKRI values and the overall aims of each course are to:

- Provide real and practical opportunities to practice team and/or leadership skills in a safe environment
- Help develop an understanding of the behaviours required within UKRI-STFC whilst emphasising the link to the national apprenticeship standards and internal graduate programme
- Regularly review the learning process in order to continually improve personal performance
- Develop interpersonal skills

The emphasis of this course is on practising and developing skills using activities and exercises through experiential learning in a non-work environment using both wet (i.e. swimming pool or sea) and dry (land based) facilities; enabling participants to safely be taken out of their comfort zones or try activities they may not have had the chance to before. As such,

	<p>we would expect the supplier to have:</p> <ul style="list-style-type: none"> <li>• expertise in designing and delivering residential based learning programmes for technical staff.</li> <li>• expertise in working with graduates, apprentices, industrial placement students and scientific, engineering, technical and professional staff at all levels.</li> <li>• demonstrable knowledge of relevant management and leadership theories and evidence of Continuous Professional Development and up-to-date practice.</li> </ul> <p>Feedback from previous outward bound residential participants is included in Appendix A.</p>
<p><b>Objectives of residential based learning programme</b></p>	<p><u>Graduates</u></p> <p>A leadership and personal development programme linked to CRISTAL competencies (Communication, Responsibility, Integrity, Solution focus, Teamwork, Awareness and Leadership).</p> <p><u>Apprentices</u></p> <p>A personal development programme for apprentices to explore the behavioural elements of their Apprenticeship Standards, to include team working, leadership, presentation skills, and developing a continuous approach to personal development.</p>

With increasing numbers of graduates being accepted onto the programme (potential of over 60 in 2020), there is a possibility that the cohort could be split and attend the residential outward bound in two discrete groups should the supplier not have capacity to accommodate higher numbers than 60. The groups may be split by discipline if this will prove more beneficial for learning, rather than a 50/50 split by number.</p>
<p><b>Timescale</b></p>	<p>Delivery of residential courses in 2020 and 2021 with an option to extend to delivery in 2022 and 2023</p> <p>Graduates – an anticipated 4 day programme in October each year 2020-2021 plus extension period</p> <p>Apprentices – an anticipated 4 day programme in August each year 2020-</p>

As such the supplier may be expected to provide the pre-course material in advance, the specifics of this will be agreed with UKRI-STFC during the pre-course meeting and distributed as agreed.

The supplier will be responsible for collecting feedback on all aspects of each event including but not limited to:

5.4.4. Questions marked 'for information only' do not contribute to the scoring model.

## Award Scoring criteria

### Evaluation Justification Statement

In consideration of this particular requirement the Contracting Authority has decided to evaluate Potential Providers by adopting the weightings/scoring mechanism detailed within this RFP. The Contracting Authority considers these weightings to be in line with existing best practice for a requirement of this type.

Questionnaire	Q No.	Question subject	Maximum Marks
Price	AW5.2	Price	10%
Quality	PROJ1.1	Understanding and Expertise	30%
Quality	PROJ1.2	Contract Delivery	50%
Quality	PROJ1.3.2	Training Venue	10%

## Award Evaluation of criteria

### Non-Price elements

Each question will be evaluated on a score from 0 to 100, which shall be subjected to a multiplier to reflect the percentage of the evaluation criteria allocated to that question.

Where an evaluation criterion is worth 20% then the 0-100 score achieved will be multiplied by 20%.

Example if a Bidder scores 60 from the available 100 points this will equate to 12% by using the following calculation:

$$\text{Score} = \{\text{weighting percentage}\} \times \{\text{bidder's score}\} = 20\% \times 60 = 12$$

The same logic will be applied to groups of questions which equate to a single evaluation criterion.

The 0-100 score shall be based on (unless otherwise stated within the question):

0	The Question is not answered, or the response is completely unacceptable.
10	Extremely poor response – they have completely missed the point of the question.
20	Very poor response and not wholly acceptable. Requires major revision to the response to make it acceptable. Only partially answers the requirement, with major deficiencies and little relevant detail proposed.
40	Poor response only partially satisfying the award question requirements with deficiencies apparent. Some useful evidence provided but response falls well short of expectations. Low probability of being a capable supplier.
60	Response is acceptable but remains basic and could have been expanded upon. Response is sufficient but does not inspire.
80	Good response which describes their capabilities in detail which provides high levels of assurance consistent with a quality provider. The response includes a full description of techniques and measurements currently employed.
100	Response is exceptional and clearly demonstrates they are capable of meeting the requirement. No significant weaknesses noted. The response is compelling in its description of techniques and measurements currently employed, providing full assurance consistent with a quality provider.

All questions will be scored based on the above mechanism. Please be aware that there may be multiple evaluators. If so, their individual scores will be averaged (mean) to determine your final score as follows:

### Example

Evaluator 1 scored your bid as 60  
Evaluator 2 scored your bid as 40  
Evaluator 3 scored your bid as 80  
Evaluator 4 scored your bid as 60  
Your final score will  $(60+40+80+60) \div 4 = 60$

**Price elements** will be evaluated on the following criteria.

The lowest price for a response which meets the pass criteria shall score 100.

All other bids shall be scored on a pro rata basis in relation to the lowest price. The score is then subject to a multiplier to reflect the percentage value of the price criterion.

For example - Bid 1 £100,000 scores 100.

Bid 2 £120,000 differential of £20,000 or 20% remove 20% from price scores 80

Bid 3 £150,000 differential £50,000 remove 50% from price scores 50.

Bid 4 £175,000 differential £75,000 remove 75% from price scores 25.

Bid 5 £200,000 differential £100,000 remove 100% from price scores 0.

Bid 6 £300,000 differential £200,000 remove 100% from price scores 0.

Where the scoring criterion is worth 50% then the 0-100 score achieved will be multiplied by 50

In the example if a supplier scores 80 from the available 100 points this will equate to 40% by using the following calculation: Score/Total Points multiplied by 50 (80/100 x 50 = 40)

The lowest score possible is 0 even if the price submitted is more than 100% greater than the lowest price.
