# Schedule 1 – Services

## 1. PRINCIPLES, SCOPE AND SERVICE DEFINITIONS

### 1.1. PRINCIPLES AND OVERVIEW

- 1.1.1. **Limited system administration capacity and skills** – Due to internal capacity constraints, Buyer has not acquired the system administration skills necessary to maintain and change the LINK data model. A Buyer system administrator has been identified, but has only received sufficient training to load, not modify, the existing system. These Support Services therefore include some of the activities normally performed by an in-house system administrator.
- 1.1.2. **Knowledge transfer and self-sufficiency** – Notwithstanding the constraint summarised above, Buyer is still aiming to acquire self-sufficiency or at least to retain the option of doing so. Supplier strongly supports this ambition and commits to creating as many knowledge transfer opportunities as possible in providing the Services.
- 1.1.3. **Risk management** – Three specific risks have been identified as part of project closure and are addressed by this support service:
- a) The risk that Buyer organisation will change and the internal skills (e.g. LINK Power Users) will be lost;
  - b) The same risk, but associated to the specific circumstances of key individuals, in particular the in-house system administrator; and
  - c) The risk that the data feeds on which the LINK AppStore is reliant will change and that the system will become unusable as a result.
- 1.1.4. **Access to Buyer data** – Buyer needs access to the data loaded or created in LINK with no restrictions, but bulk data extraction is normally a system administrator task. This is therefore included in the Support Services.
- 1.1.5. In summary, the overall aim is to support the LINK AppStore whilst Buyer creates the internal skills to do so without the help of a third-party and, when this is achieved, provide maximum flexibility for exiting the arrangement.

### 1.2. SCOPE

- 1.2.1. Some degree of support is already included in the Board software subscription and mainly covers bug fixes and system upgrades (both provided by others). The Support Service are provided as an additional level of support.

### 1.3. SERVICES INCLUDED IN THE SOFTWARE SUBSCRIPTION

- 1.3.1. The following are provided by a 3<sup>rd</sup> party and not by the Supplier but the Supplier may act as the Buyer's agent in the consumption/use of said 3<sup>rd</sup> party services.

1.3.2.

- **Data management** – Data management activities (e.g. data cleansing, transformation and load).

## 2. VERACITY SERVICE DESK

### 2.1. CLIENT INTERFACE AND TICKETING SYSTEM

- 2.1.1. Some support activities will be performed independently by the Supplier Service Desk (e.g. Monthly data loading check), while some others will be initiated by the Buyer (e.g. Queries or requests to transfer data).
- 2.1.2. All activities initiated by the Buyer will start from an email sent by a LINK Power User or by the internal LINK System Administrator to a general support email account [email address TBC]. Upon receipt, all Buyer requests will be logged and assigned a ticket reference. An email confirmation will be sent to the Buyer, acknowledging receipt of the service request and providing the relevant ticket reference.
- 2.1.3. From this point, the interaction with the Buyer will be shaped by the nature of the request and may involve email exchanges, phone calls or (where possible) screen sharing.
- 2.1.4. Once the matter raised in the service request will be resolved, the Supplier Service Desk will notify the Buyer and ask for permission to close the ticket. In absence of a response from the Buyer, the ticket will be closed 5 working days after the notification and confirmation sent to the Buyer.

### 2.2. SUPPORTED HOURS

- 2.2.1. The Supplier Service Desk will operate from 09:00 to 17:00 GMT Monday to Friday, except English Bank Holidays.

### 2.3. INTEGRATION WITH BUYER'S SUPPORT DESK

- 2.3.1. The option to integrate the Supplier support service with Buyer's internal IT Service Desk has been discussed with Buyer Digital Change team and considered not necessary at this stage. It may be a desirable option in the future (e.g. if the number of users increases significantly) and Services will flex to adapt to that if required. The main reasons for not utilising the internal IT Service Desk are:
- The limited number of LINK users doesn't justify it.
  - The desire to empower LINK Power Users and Buyer' internal System Administrator, which would be bypassed if all requests were routed through the internal IT Service Desk.
- 2.3.2. Should the Buyer decide to integrate the two support functions, this will be done by switching the general support email account to an internal one.

## 3. PERFORMANCE MANAGEMENT

### 3.1. SERVICE LEVELS

#### PRIORITY LEVELS

The priority levels in the table below measure the seriousness of the issue raised by its impact on the business or on the users of the Buyer’s application. Whilst levels 1-4 relate to system issues of various severity, level 5 relates to requests to execute activities included in the Services (e.g. Create user, extract and transfer data).

Level	Description
<b>P1</b>	<b>Critical</b> – Entire BOARD SAAS system unavailable, causing major business impact.
<b>P2</b>	<b>High</b> – Substantial functionality unavailable or unusable, potentially affecting a large user community.
<b>P3</b>	<b>Medium</b> – Elements of functionality unavailable or unusable, affecting a limited number of users with minor business impact.
<b>P4</b>	<b>Low</b> – Minor functionality unavailable/unusable, cosmetic issues, no immediate business impact.
<b>P5</b>	<b>Queries</b> – No product or application functionality issues. The Buyer is requiring guidance, support or the execution of a service activity included in this document (e.g. Create user).

## SLA

## 3.2. PERFORMANCE AND ESCALATION

### 3.3. PERFORMANCE REVIEWS

- 3.3.1. Service performance reviews should be held quarterly and should be attended by a representative of the Supplier Service Desk, of the Buyer and of the Buyer’s internal IT team.
- The agenda of these reviews should include the following:
    - System diagnostic report
    - Performance against Service Level Agreements
    - Areas of improvement

### 3.4. SERVICE CREDITS

- 3.4.1. Failure to meet the SLA in this support service proposal will result in service credits, which can be converted in non-chargeable consulting days by the Buyer at the ratio of 0.25 days per service credit. A service credit is recorded every time a SLA is not met.
- 3.4.2. Whilst service credits are calculated automatically, the resulting consulting days will need to be claimed and utilised by the Buyer within three months of the performance review when they are agreed. After that time the balance will be cleared.
- 3.4.3. Service credits will not be assigned is the SLA was not met for reasons beyond Supplier’s control (force majeure).

### 3.5. ESCALATION ROUTES

For each individual Service, the applicable Call-Off Contract Charges (in accordance with the Supplier's Digital Marketplace pricing document) can't be amended during the term of the Call-Off Contract. The detailed Charges breakdown for the provision of Services during the Term will include:

- 4.5.3. The Buyer will be able to exit this support arrangement with three months' notice.

### 4.6. ADDITIONAL CHARGES

- 4.6.1. In response to Buyer request for additional, tailored support, this proposal has been sized very aggressively (e.g. the amount of query handling and issue resolution hours included is approximately 2.5 times higher than normal) and it is very unlikely that additional support will be required. Should that be the case, any support request above the limits set in this document will be charged at £35/hour.

4.5 The Buyer may End this Call-Off Contract for Material Breach if the Supplier is delivering the Services Inside IR35.

4.6 The Buyer may need the Supplier to complete an Indicative Test using the ESI tool before the Start Date or at any time during the provision of Services to provide a preliminary view of whether the Services are being delivered Inside or Outside IR35.
