SCHEDULE 3: INSURANCE REQUIREMENTS

1.OBLIGATION TO MAINTAIN INSURANCES

The Supplier shall ensure that each of the Insurances is effective no later than the Commencement Date.
- 1.2 The Insurances shall be maintained in accordance with Good Industry Practice and (so far as is reasonably practicable) on terms no less favourable than those generally available to a prudent Contractor in respect of risks insured in the international insurance market from time to time.
- 1.3 The Insurances shall be taken out and maintained with insurers who are of good financial standing and of good repute in the international insurance market.
- 1.4 The Supplier shall ensure that the public and products liability policy shall contain an indemnity to principals clause under which FCDO shall be indemnified in respect of claims made against FCDO in respect of death or bodily injury or third party property damage arising out of or in connection with the Services and for which the Supplier is legally liable.

2.GENERAL OBLIGATIONS

- 2.1 Without limiting the other provisions of this Contract, the Supplier shall:
 - 2.1.1 take or procure the taking of all reasonable risk management and risk control measures in relation to the Services as it would be reasonable to expect of a prudent Contractor acting in accordance with Good Industry Practice, including the investigation and reports of relevant claims to insurers;
 - 2.1.2 promptly notify the insurers in writing of any relevant material fact under any Insurances of which the Supplier is or becomes aware; and
 - 2.1.3 hold all policies in respect of the Insurances and cause any insurance broker effecting the Insurances to hold any insurance slips and other evidence of placing cover representing any of the Insurances to which it is a party.

3.FAILURE TO INSURE

- 3.1 The Supplier shall not take any action or fail to take any action or (insofar as is reasonably within its power) permit anything to occur in relation to it which would entitle any insurer to refuse to pay any claim under any of the Insurances.
- 3.2 Where the Supplier has failed to purchase any of the Insurances or maintain any of the Insurances in full force and effect, FCDO may elect (but shall not be obliged) following written notice to the Supplier to purchase the relevant Insurances, and FCDO shall be entitled to recover the reasonable premium and other reasonable costs incurred in connection therewith as a debt due from the Supplier.

4.EVIDENCE OF POLICIES

- 4.1 The Supplier shall upon the Commencement Date and within 15 Working Days after the renewal of each of the Insurances, provide evidence, in a form satisfactory to FCDO, that the Insurances are in force and effect and meet in full the requirements of this Framework Schedule 2. Receipt of such evidence by FCDO shall not in itself constitute acceptance by FCDO or relieve the Supplier of any of its liabilities and obligations under this Agreement.

5.AGGREGATE LIMIT OF INDEMNITY

- 5.1 Where the minimum limit of indemnity required in relation to any of the Insurances is specified as being "in the aggregate":
 - 5.1.1 if a claim or claims which do not relate to this Contract are notified to the insurers which, given the nature of the allegations and/or the quantum claimed by the third party(ies), is likely to result in a claim or claims being paid by the insurers which could reduce the level of cover available below that minimum, the Supplier shall immediately submit to FCDO:
 - (a) details of the policy concerned; and

- (b) its proposed solution for maintaining the minimum limit of indemnity specified; and
- 5.1.2 if and to the extent that the level of insurance cover available falls below that minimum because a claim or claims which do not relate to this Contract are paid by insurers, the Supplier shall:
 - (a) ensure that the insurance cover is reinstated to maintain at all times the minimum limit of indemnity specified for claims relating to this Contract; or
 - (b) if the Supplier is or has reason to believe that it will be unable to ensure that insurance cover is reinstated to maintain at all times the minimum limit of indemnity specified, immediately submit to FCDO full details of the policy concerned and its proposed solution for maintaining the minimum limit of indemnity specified.

6.CANCELLATION

In the event that FCDO receives a claim relating to or arising out of the Services or this Contract, the Supplier shall co-operate with FCDO and assist it in dealing with such claims including without limitation providing information and documentation in a timely manner.
- 7.2 Except where FCDO is the claimant party, the Supplier shall give FCDO notice within twenty (20) Working Days after any insurance claim in excess of £10,000 relating to or arising out of the provision of the Services or this Contract on any of the Insurances or which, but for the application of the applicable policy excess, would be made on any of the Insurances and (if required by FCDO) full details of the incident giving rise to the claim.
- 7.3 Where any Insurance requires payment of a premium, the Supplier shall be liable for and shall promptly pay such premium.
- 7.4 Where any Insurance is subject to an excess or deductible below which the indemnity from insurers is excluded, the Supplier shall be liable for such excess or deductible. FCDO Supply Partner Code of Conduct

Principles

The FCDO aims to create an inclusive culture of best practice with the delivery partners with whom it engages and which receive UK taxpayers’ funds. All Supply Partners should adhere to the overarching principles of the Supply Partner Code of Conduct (hereafter “the Code”).

Overarching Principles for Supply Partners

- ✓ **Act responsibly and with integrity**
- ✓ **Be transparent and accountable**
- ✓ **Seek to improve value for money**
- ✓ **Demonstrate commitment to poverty reduction and FCDO priorities¹**
- ✓ **Demonstrate commitment to wider HMG priorities²**

FCDO Supply Partner responsibilities

Supply Partners and their subcontractors (delivery chain partners) should ensure they have read and understood the Code and their required compliance level and seek clarification from FCDO where necessary. In particular, it is important that the Supply Partners and their subcontractors (delivery chain partners) understand any risks and have systems in place to manage them. The 3 compliance levels are:

Compliance Level 1 - Supply Partners with an individual contract value of £1m or above, or two or more contracts/grants with FCDO with a combined value of £5m or above;

Compliance Level 2 - Supply Partners with an individual contract value below £1m, or two or more contracts /grants with FCDO with a value of less than £5m;

Compliance Level 3 - Supply Partners with an individual Contract value, or component of a Contract/Grant, with a value below the EU contracting threshold. At this level Supply Partners are required to adhere to the overarching Code principles and recognise, mitigate and manage risks. These Supply Partners will not be monitored against the contractual KPIs.

Scope

This Code forms part of the FCDO’s standard contractual terms and conditions and full compliance and annual verification via a signed declaration, to be found at Annex 1b, is mandatory for contracted Supply Partners.

Adherence to the Code at the appropriate level is also a requirement for FCDO direct and delivery chain Supply Partners in receipt of funding. The FCDO will monitor Supply Partners in six priority areas as set out below using a set of Key Performance Indicators (KPIs) as referenced in Annex 1a and 1b.

1. Value for Money and Governance

Key Performance Indicators KPI 1 a - c

Value for Money and financial transparency is an essential requirement of all FCDO commissioned work. All Supply Partners must seek to maximise development results, whilst driving cost efficiency, throughout the life of commissioned programmes. This includes budgeting and pricing realistically and appropriately to reflect delivery requirements and levels of risk over the life of the programme. It also includes managing uncertainty and change to protect value in the often challenging environments that we work in.

Supply Partners must demonstrate that they are pursuing continuous improvement and applying stringent financial management and governance to reduce waste and improve efficiency in their internal operations and within the delivery chain. FCDO expects Supply Partners to demonstrate openness and honesty and to be realistic about capacity and capability at all times, accepting accountability and responsibility for performance along the full delivery chain, in both every-day and exceptional circumstances.

Specific requirements include:

- ✓ Provision of relevant VfM and governance policies and a description of how these are put into practice to meet FCDO requirements (e.g. Codes on fraud and corruption, due diligence);
- ✓ A transparent, open book approach, which enables scrutiny of value for money;
- ✓ Strict adherence to all UK and in-country government tax requirements;
- ✓ Processes for timely identification and resolution of issues and for sharing lessons learned which might be requested by FCDO at any time.

2. Ethical Behaviour

Key Performance Indicators KPI 2 a- f

FCDO Supply Partners and their delivery chain partners act on behalf of the UK government and interact globally with country governments, other aid donors and their delivery partners, many stakeholders including citizens and directly and indirectly with aid beneficiaries. These interactions must therefore meet the highest standards of ethical and professional behaviour in order to uphold the reputation of the UK government.

Arrangements and relationships entered into, whether with or on behalf of FCDO, must be free from bias, conflict of interest or the undue influence of others. Particular care must be taken by Supply Partner and delivery chain staff who:

- a) are directly involved in the management of a programme or procurement of services; or
- b) who engage with i) frontline FCDO staff ii) other deliverers of aid iii) beneficiaries (of aid)

Where those in a) and b) could be susceptible to undue negative or detrimental influence.

Supply Partners and their delivery chain partners must declare to FCDO where there may be instances or allegations of previous unethical behaviour by an existing or potential staff member or where there is a known or suspected conflict of interest. Where a potential or existing staff member has been employed by FCDO or the Crown in the

² <https://www.gov.uk/government/organisations/hm-treasury/about#priorities>

preceding two years Supply Partners and their delivery chain partner must provide proof of compliance with the HMG approval requirements under the Business Appointment Rules.

Supply Partners and their delivery chain partners must have the following policies and procedures in place:

- ✓ Development and proof of application and embedding of a Staff Recruitment, Management and Retention policy (which must address circumstances where there may be potential or actual conflict of interest and embedding of a Whistleblowing Policy)
- ✓ Ongoing monitoring of potential or existing personal, business or professional conflict of interest and their mitigation and management
- ✓ Ethical training for every staff member and staff updates in ethical working practices suitable to the development sector (e.g. UN Global Compact principles) including awareness of modern day slavery and human rights abuses
- ✓ Procedures setting out how, staff involved in FCDO funded business, can immediately report all suspicions or allegations of aid diversion, fraud, money laundering or counter terrorism finance and any suspicions/allegations/concerns which relate to safeguarding to the FCDO Investigations Department at reportingconcerns@fcdo.gov.uk or on +44(0)1355 843747.

3. Transparency and Delivery Chain Management
Key Performance Indicators KPI 3 a – f

The FCDO requires full delivery chain transparency from all Supply Partners. All direct Supply Partners and their delivery chain partners must adhere to wider HMG policy initiatives including the support and capacity building of micro, small and medium sized enterprises (MSMEs), prompt payment, adherence to human rights and modern slavery policies and support for economic growth in developing countries.

The FCDO recognises the critical value that downstream delivery partners contribute. Direct Supply Partners must engage their delivery chain partners in a manner that is consistent with FCDO’s treatment of its direct Supply Partners. This includes, but is not limited to: appropriate pricing of services; fiduciary and financial risk management processes; applying transparent and responsive measures where delivery chain partners underperform against the KPI areas; taking a zero tolerance approach to tax evasion, corruption, bribery and fraud in subsequent service delivery or in partnership agreements. Direct Supply Partners must cascade the principles of the Code throughout their delivery chain to ensure FCDO ethical behaviour standards are embedded and maintained.

Specific requirements for direct Supply Partners include:

- ✓ Provide assurance to the FCDO that the policies and practices of their delivery chain Supply Partners and affiliates comply with the Code;
- ✓ Maintaining and sharing with FCDO up-to-date and accurate records of all downstream partners in receipt of FCDO funds and/or FCDO funded inventory or assets. This should map how funds flow from them to end beneficiaries and identify risks and potential risks along the delivery chain;
- ✓ Ensuring delivery chain partner employees are expressly notified of the FCDO ‘reporting concerns’ mailbox³ found on FCDO’s external website and of the circumstances in which this should be used;
- ✓ Publication of FCDO funding data in accordance with the International Aid Transparency Initiative (IATI)⁴
- ✓ Supply Partners shall adhere to HMG prompt payment policy and not use restrictive exclusivity agreements with sub-partners.

⁴ <http://www.aidtransparency.net/>

4. Environmental issues
Key Performance Indicators KPI 4 a – b

FCDO Supply Partners must be committed to high environmental standards, recognising that FCDO activities may change the way people use and rely on the environment, or may affect or be affected by environmental conditions. Supply Partners must demonstrate they have taken sufficient steps to protect the local environment and community they work in, and to identify environmental risks that are imminent, significant or could cause harm or reputational damage to the FCDO.

Commitment to environmental sustainability may be demonstrated by:

- ✓ Formal environmental safeguard policies in place;
- ✓ Publication of environmental performance reports on a regular basis
- ✓ Membership or signature of relevant environmental Codes, both directly and within the delivery chain such as conventions, standards or certification bodies (e.g. the Extractive Industries Transparency Initiative⁵).

5. Terrorism and Security
Key Performance Indicators KPI 5 a – d

FCDO Supply Partners must implement due diligence processes to provide assurance that UK Government funding is not used in any way that contravenes the provisions of the Terrorism Act 2000, and any subsequent regulations pursuant to this Act.

FCDO Supply Partners must maintain high levels of data security in accordance with the Data Protection Act 1998 and any subsequent regulations pursuant to this Act, or new Act and with the General Data Protection Regulation (Directive 95/46/EC).

Specific requirements:

- ✓ Development and proof of application and embedding of a comprehensive Terrorism and Security Policy
- ✓ Development and proof of application and embedding of personal data processing processes within a Data Protection Policy
- ✓ FCDO Supply Partners must safeguard the integrity and security of their IT and mobile communications systems in line with the HMG Cyber Essentials Scheme⁶. Award of the Cyber Essentials or Cyber Essential Plus badges would provide organisational evidence of meeting the UK Government-endorsed standard;
- ✓ All FCDO Supply Partners who manage aid programmes with a digital element must adhere to the global Principles for Digital Development⁷, which sets out best practice in technology-enabled programmes
- ✓ Ensure that FCDO funding is not linked to terrorist offences, terrorist activities or financing.

6. Safeguarding, Social Responsibility and Human Rights
Key Performance Indicators: KPI 6 a – d

Safeguarding, social responsibility and respect for human rights are central to FCDO’s expectations of its Supply Partners. Supply Partners must ensure that robust procedures are adopted and maintained to eliminate the risk of poor human rights practices within complex delivery chain environments funded by FCDO. These practices include sexual exploitation, abuse and harassment; all forms of child abuse and inequality or discrimination on the basis of

⁵ <https://eiti.org/>
⁶ <https://www.gov.uk/government/publications/cyber-essentials-scheme-overview>
⁷ <http://digitalprinciples.org/>

race, gender, age, religion, sexuality, culture or disability. Supply Partners must place an emphasis on the control of these and further unethical and illegal employment practices, such as modern day slavery, forced and child labour and other forms of exploitative and unethical treatment of workers and aid recipients. FCDO will expect a particular emphasis on the management of these issues in high risk fragile and conflict affected states (FCAS), with a focus on ensuring remedy and redress if things go wrong.

Specific requirements:

- ✓ Development and proof of application and embedding of a Safeguarding Policy;
- ✓ Delivery of Social Responsibility, Human Rights and Safeguarding training throughout the delivery chain;
- ✓ Compliance level 1 Supply Partners must be fully signed up to the UN Global Compact⁸;
- ✓ Practices in line with the International Labour Organisation (ILO) 138⁹ and the Ethical Trading Initiative (ETI) Base Code¹⁰ are to be encouraged throughout the delivery chain;
- ✓ Policies to embed good practice in line with the UN Global Compact Guiding Principles 1 & 2 on business and human rights throughout the delivery chain are required, as detailed in Annex 2;
- ✓ Compliance level 1 Supply Partners to submit a Statement of Compliance outlining how the organisation's business activities help to develop local markets and institutions and further how they contribute to social and environmental sustainability, whilst complying with international principles on Safeguarding and Human Rights labour and ethical employment, social inclusion and environmental protection;
- ✓ Overarching consideration given to building local capacity and promoting the involvement of people whose lives are affected by business decisions.

Compliance KPIs and contractual checking mechanisms - FCDO Contracts

Supply Partner and delivery chain compliance checking processes will take place in accordance with the agreed compliance levels and the specific contractual clauses down the delivery chain, the FCDO shall undertake compliance checks.

Where appropriate, a plan setting out the Code of Conduct delivery methodology for the Supply Partner arrangements during the contract term may be jointly developed with the FCDO during Contract mobilisation.

Contractual Annual Compliance Declaration

Prior to Contract Award and thereafter on an annual basis at the end of each financial year, the Supply Partner is required to submit a Compliance Declaration in connection with the management of any FCDO Contract in place and on behalf of their delivery chain partners. Supply Partners should be aware that spot check compliance monitoring will take place to verify responses.

UN Global Compact – Human Rights

Principle 1: businesses should support and respect the protection of internationally proclaimed Human Rights

Principle 2: businesses should ensure they are not complicit in Human Rights abuse

Organisations should do this by giving attention to vulnerable groups including women, children, people with disabilities, indigenous groups, migrant workers and older people.

Organisations should comply with all laws, honouring international standards and giving particular consideration to high risk areas with weak governance.

Examples of how suppliers and partners should do this are set out below:

<p>In the workplace</p> <ul style="list-style-type: none">• by providing safe and healthy working conditions• by guaranteeing freedom of association• by ensuring non-discrimination in personnel practices• by ensuring that they do not use directly or indirectly forced labour or child labour• by providing access to basic health, education and housing for the workers and their families, if these are not provided elsewhere• by having an affirmative action programme to hire victims of domestic violence• by making reasonable accommodations for all employees' religious observance and practices
<p>In the community</p> <ul style="list-style-type: none">• by preventing the forcible displacement of individuals, groups or communities• by working to protect the economic livelihood of local communities• by contributing to the public debate. Companies interact with all levels of government in the countries where they operate. They therefore have the right and responsibility to express their views on matters that affect their operations, employees, customers and the communities of which they are a part• through differential pricing or small product packages create new markets that also enable the poor to gain access to goods and services that they otherwise could not afford• by fostering opportunities for girls to be educated to empower them and also helps a company to have a broader and more skilled pool of workers in the future, and• perhaps most importantly, a successful business which provides decent work, produces quality goods or services that improve lives, especially for the poor or other vulnerable groups, is an important contribution to sustainable development, including human rights• If companies use security services to protect their operations, they must ensure that existing international guidelines and standards for the use of force are respected

1. TEFOS Pillar 3 Overview

The Foreign, Commonwealth and Development Office (FCDO) is seeking a Supplier to assist in the design and implementation of the third pillar of Territorios Forestales Sostenibles (TEFOS). Please refer to Annex 1 for a summary of the TEFOS programme, rationale and purpose. Pillar 3 will be focused on kickstarting and improving livelihoods in prioritised deforestation hotspots, through:

- i. Increasing communities' skills and knowledge of sustainable agricultural practices and sustainable forest management to protect and increase forest cover.
- ii. Promoting commercialisation and improving market access for sustainable commodities and services through public-private partnerships that protect standing forests in the deforestation border.
- iii. Promoting conservation incentives (such as Payment for Ecosystem Services (PES) and conservation agreements¹ led by environmental authorities) in areas with land use restrictions.

Pillar 3 will have a core period of 39 months and a budget of up to £9.9m. There will be an extension option of an additional 12 months and up to £1m conditional on internal approval and a business case addendum.

1.1 Pillar 3 Objectives, Barriers and Challenges

The objective of Pillar 3 is to improve the livelihoods of people living in prioritised conflict-affected, deforestation hotspots, ensuring that forests are increasingly valued, and incentives are established that encourage local stewardship of the forests and a reduction in deforestation and conflict. The focus of this action will be to kickstart projects, promote public-private partnerships, and improve the capacity of business to meet market demands. The action could aim to:

- Support communities to consolidate value chains according to relevant economic activities in selected hotspot areas (i.e. forestry economy, bioeconomy, Non-Timber Forest Products (NTFP), eco-tourism)², as well as set up relevant social agreements with communities, while ensuring alignment with the guidelines of the Deforestation Containment Plan.
- Strengthen community-based businesses according to methodologies and policy steer from the Government of Colombia (GoC). This includes but is not limited to Colombian environmental authorities' guidelines.
- Improve market access for goods and services that protect and sustainably use forests by fostering public-private partnerships and actively involving private sector on the promotion of sustainable livelihoods.
- Promote conservation incentives for rural communities living in prioritised environmentally protected areas where relevant for Pillar 3 geographical scope.

It will achieve this by:

- Contributing to the implementation of the GoC's Deforestation Containment Plan and the deforestation target in Colombia's Nationally Determined Contribution (NDC).
- Working to both stimulate demand and improve the supply of sustainably produced commodities.
- Fostering partnerships to commercialise products and facilitate market access (we are not prioritising any specific products and welcome supplier's expertise).
- Scaling up existing and successful forestry livelihoods projects and other relevant economic initiatives relevant to the Sustainable Forest Management Areas
- Supporting conservation incentives, where relevant, in prioritised protected areas
- Providing targeted technical assistance to local producers/service providers in selected deforestation clusters, according to GoC's guidelines

¹ We expect these to lead to behaviour change in land users to comply with laws, regulations and planning related to land use and tenure, thereby supporting the work conducted by pillar 1.

² In some instances, these value chains will have not yet been fully formed, in which case the Supplier will support in the creation of these. In other cases, there will be gaps or weaknesses along the value chain where the support should focus on. Balance between new and existing value chains will be validated in the inception face.

Pillar 3 must be designed and executed with the active participation of local communities, as entry to the prioritised territories is only possible through community channels and representatives. It is also critical the programme builds on robust community involvement from the beginning, fostering all necessary social agreements to scope and develop economic alternatives, promoting ownership for local stakeholders.

The programme’s theory of change can be found in Annex 2. The section of Pillar 3 may be adapted by the selected Supplier, after Consultation with the GoC, Indigenous Peoples and Local Communities (IPLC), the Monitoring, Evaluation and Learning (MEL) partner and FCDO.

1

1.2 Challenges

In presenting its proposal the Supplier will want to address how it will overcome the constraints inherent in working in remote, conflict-prone areas, including:

- Difficult to attract market investment and poor infrastructure making it challenging to develop markets and businesses.
- Security issues which may limit access.
- Conflict dynamics may mean some communities are discouraged from engaging with the project.
- Lack of trust of externally driven actions in some communities.

In addition to the challenges of working in remote, conflict-affected forest areas, the Supplier should indicate its approach to overcoming the challenges of:

- Coordination with existing programmes in the region.
- Building on existing initiatives and crowding in additional finance to achieve transformational change.
- Lack of technical knowledge of participant communities.
- Coordination with the Ministry of Environment and Sustainable Development (MADS) to ensure regional and thematic alignment with the actions proposed in the Deforestation Containment Plan.

The Supplier should provide and maintain a project risk register, which will build upon those initial risks identified in their proposed solution. As a minimum this risk register will detail how the Supplier’s approach will mitigate and where appropriate overcome each identified risk/challenge. As a minimum, this risk register will consider the following challenges, in addition to those above:

- A time-lag in observing outcomes and impacts at all levels of TEFOS.
- Managing results, data, information, and knowledge
- Working in the COVID-19 context
- Managing delays
- Working in a conflict-sensitive way
- Security concerns in Colombia
- Managing high turnover in GoC officials

1.3 Pillar 3 Geographical Scope

In order to channel and focus efforts from national and international funds, it is important to coordinate with GoC’s policy guidelines. An initial assessment with GoC has identified the Cuemaní deforestation cluster, in the towns/veredas listed below, as a priority area for Pillar 3 as it has accounted on average for 15% of deforestation in the Amazon for the past 5 years – however this could be subject to change. The Supplier should, during inception, confirm with the GoC where it is most useful for Pillar 3 to provide support, update costings and reassess the number of families in these areas.

These costings include activities such as the creation of community forest management plans; issuing of forest harvesting permits; administrative, technical and financial feasibility studies; capacity building for forestry associations or organisations; community forest monitoring; technical assistance (TA), training and education;

creating processing centres; acquisition of goods; PES; creating alliances / partnerships with private sector. These are all indicative.

Table 1. Prioritized deforestation cluster in Caquetá

N	Municipality	Deforestation cluster	Veredas/Towns	% Amazon deforestation accumulated 2014-2021	N° of families	Forest cover in the area (2021)

Other options for the supplier to consider are the deforestation clusters in Guaviare and in Tinigua National Park as shown below. A possible intervention in these areas should be also validated with the GoC in the inception phase. Any initiative in National Parks should be closely developed and validated with the National Parks Authority.

Table 2. Prioritized deforestation clusters in Guaviare and National Parks

N	Municipality	Deforestation cluster	Veredas/Towns	% Amazon deforestation accumulated 2014-2021	N° of families	Forest cover in the area (2021)

4	PNN Tinigua	PNN Tinigua	PNN Tinigua	8.5%	1.768	138.731ha

The scoping exercise during the inception phase should build on lessons learned from other UK funded programmes already present in the Amazon region to inform methodologies, activities, budgets, costs, stakeholders identification, etc. Similarly, activities should be carried out in close cooperation and coordination with ongoing programmes and initiatives in the selected areas, such as those funded by German Agency for International Cooperation (GIZ), US Agency for International Development (USAID), Green Climate Fund (GCF), Global Environment Facility (GEF), United Nations (UN) among others. It is also expected that the Supplier will work closely with the GoC, including but not limited to the Ministry of Environment and relevant institutions in charge of implementing the Peace Agreement in Territorially Focused Development Programmes (PDET) municipalities, since TEFOS territories fall under the PDET strategy.

As mentioned above, these options are all indicative at this stage and subject to change and further discussion during the inception phase. Please note that TEFOS will only work in municipalities that have been prioritised for Pillar 1 implementation which are centred in deforestation clusters that include San Jose del Guaviare and Cartagena del Chairá³ (see Annex 4 for more information). We hope to prioritise areas where all pillars can be implemented during the Programme’s lifespan. Therefore, municipalities not mentioned in the annex will not be considered for Pillar 3.

³ The rest of the municipalities are currently in the process of being selected by MADS.

The Supplier will need experience working in conflict affected areas and working in a conflict sensitive way. As part of this, it is critical that the Supplier map out local stakeholders and consider the dynamics and influence of illegal activities and armed groups when engaging on the ground. The Supplier should actively consider engagement methodologies and strategies that prioritise action with no harm to avoid exacerbating conflict or mistrust among beneficiaries. Well managed communication with communities on the ground will be critical to facilitate entry, manage security risks and secure continued delivery. Risk assessments on conflict dynamics should be continuously updated with relevant stakeholders. Finally, considering a differentiated approach for different population groups will be fundamental for designing and implementing activities.

2. Contract Information

2.1 Programme Timeframe

The contract will start approximately in Autumn2023 and will initially run for 39 months. The inception phase will be six months. There will be an extension option of an additional 12 months subject to internal approval and a business case addendum. FCDO will conduct reviews at the following points:

1. 6 months from the start of the contract: Inception Review
2. 18 months from the start of the contract: Implementation Review (12 months after the end of the inception phase)
3. 6 months before the end of the contract: Final Evaluation Review. At this point, the option to implement the extension period will be explored.

In certain circumstances, FCDO may need flex over the duration of the contract. These reviews act as break points and to determine if any adjustments to the scale, scope and / or direction of the programme will be required. This could mean:

1. Nonmaterial changes of scope: e.g., changing policies regarding programme delivery (safeguarding, risk or due diligence approaches used), or making changes to the way activities are delivered as part of maintaining good value for money (see Section 5.1).
2. Scaling Up: e.g., implementing the £1m extension option, or additional funding transfers to the Supplier through the FCDO as the contracting authority.
3. Scaling Down: e.g., reduction in budget, or programme ending earlier than planned.

The circumstances in which this might happen are:

1. Nonmaterial changes of scope: e.g., changing priorities of FCDO and HMG; political economy reasons, including a change in the security situation or government stability; result of work completed by the Supplier in the inception phase, which may highlight changes are required to follow best practice and / maintain or value for money; changes in FCDO policy; or recommendations from FCDO reviews.
2. Scaling Up: e.g., internal approval and a business case addendum allowing use of the £1m contract extension option; scale up being consistent with HMG objectives; scale up is shown to be deliverable within TEFOS Pillar 3, as determined by FCDO; or activities to be covered are in line with TEFOS Pillar 3 objectives
3. Scaling Down: e.g., changes in FCDO or HMG priorities, such as a change in ICF strategy; political economy changes; or dissatisfaction with performance of the programme, which is at the discretion of FCDO and based on evidence from performance management, results collection and evaluation evidence.

This is a non-exhaustive list and FCDO cannot foresee all circumstances that would require a change of scope, scale up or scale down. The decision whether to change the scope, scale up or scale down the programme will be made at the discretion of the FCDO. If a change is required, the FCDO will inform the Supplier as early as possible, and the Supplier will be consulted on how this should be managed. Any changes will be nonmaterial, made in line with the T&Cs of the Contract and be reviewed to ensure robust VfM. To note, no compensation or

damages would be due to the Supplier if a scale down is required. For scale up, FCDO will expect economies of scale to be factored in.

2.2 Budget

The core period of this contract will have an anticipated budget of up to £9.9m. There will be an extension option of up to an additional £1m conditional on internal approval and a business case addendum.

Yearly budgets will be updated according to the progress of the implementation, but we would expect a phased and scalable approach. According to the Ministry of Environment’s current costing structure, the £9.9 million could benefit up to 500 families directly, by a ratio of £2m per 100 families for 3 years of implementation of sustainable forest management activities. It is the Supplier’s responsibility to revalidate costs and activities during the inception phase, which FCDO will approve.

Therefore, we expect year 1 to include a thorough inception phase, where activity costs and number of families are analysed and verified on the ground in order to set realistic targets and milestones. Year 1 should also consider kicking off activities to benefit, at least, the first 100 beneficiary families. An indicative breakdown of the distribution of resource allocation throughout the programme is shown in Table 3.

Table 3. Pillar 3 –Example of the annual budget. Note that each annual budget will be subject to internal approvals

2.3 Programme operations and MEL

There is a full-time FCDO TEFOS project manager in-country who works across the TEFOS programme. For Pillar 3, they will act as a central point of coordination during the entirety of the contract. This individual will support in coordinating logistics between stakeholders; escalating/resolving key issues; and managing internal communications. They will ensure relationships and expectations between the delivery partners (World Bank (WB), United Nations Office for Drugs and Crime (UNODC), MEL partner and the Pillar 3 Supplier) are clearly set out and will support and promote collaboration.

The FCDO expects close interaction between the in-country project manager and the Supplier throughout the duration of the Contract to ensure that emerging issues are dealt with promptly and that the FCDO fully understands the assumptions and approach taken. The in-country project manager and Supplier point of contact are expected to maintain frequent contact in the early stages of the Contract (i.e., short weekly calls during the inception phase and monthly thereafter). These can include the FCDO’s International Climate Finance (ICF) Economist, and the London based manager as and when required.

2.3.1 Working with the MEL partner

The Supplier is expected to collaborate and work together with the MEL partner: Tetra Tech. This includes responding to information requests, providing timely and relevant monitoring data when requested, promptly answering any queries, and producing an annual progress report. We also expect some members of the Supplier group to be interviewed as part of the programme evaluation. Collaborating with the MEL partner may also include extending invitations to the MEL partner for key monitoring meetings and sharing progress updates on delivery.

The Supplier will be required to collect data to feed into the TEFOS logframe. This includes gathering data for impact, outcome, intermediate outcome and output indicators – which include ICF KPIs (refer to Annex 1, Section 1.3). Pillar 3 output indicators remain to be confirmed once the scope of pillar 3 has been defined, this process will be done collaboratively between the Supplier, the TEFOS MEL partner and the TEFOS programme team.

The Supplier will be expected to conduct their own monitoring, evaluation and learning, and will obtain guidance from the MEL Supplier. Data gathering and monitoring methodologies will be revised by the MEL partner to ensure coherence with TEFOS’ other pillars. The Supplier should have the required skills to appropriately construct baselines and collect monitoring data to feed into the wider TEFOS logframe.

3. Project requirements

This section sets out the resource requirements for the Supplier to deliver the TEFOS Pillar 3 programme. The Supplier must have access to the necessary skills and experience to meet the requirements set out in this Terms of Reference. The Supplier may choose to form a consortium or sub-contract certain services and should set out their approach to this in their bid. All sub-contractors and consortium partners must adhere to the FCDO’s Supplier Code of Conduct. The Supplier must keep an up-to-date delivery chain map (refer to Section 5.4). Whatever the Supplier’s approach to staffing the programme, it is crucial that the necessary level of accountability is built in to deliver an ODA programme with adequate assurance for the FCDO. Clear reporting lines within teams, and responsibilities for each role, will be required, supporting the governance and smooth delivery of the programme.

3.1 Required skills and services.

The following skills and expertise are considered particularly important for this work:

Geographic and sectoral experience in Colombia and working with ODA.

- Undertaking forest-related research in Latin America and Colombia specifically.
- Understanding of political economy of deforestation and land use changes in Colombia.
- Expertise in the implementation and effective management of ODA programmes, including intervention design, and operational delivery.
- Capacity to hire a team in Colombia with national experts related to the thematic areas of this programme.
- Experience of working with local associations, private sector and local/national government in programmes that contribute to reducing deforestation.
- Experience promoting and working with value chains.
- Experience working with sustainable forest management.
- Understanding of market access barriers for sustainable commodities and services that protect forests.
- Understanding of barriers and opportunities of conservation incentives.

Conflict understanding

- Experience working in conflict-prone areas and knowledge of conflict sensitivity approaches.
- In depth understanding of conflict drivers and dynamics in Colombia.

General

- Teams need to ensure they have appropriate access to specialist technical social development/gender skills.

3.1.1 Core Programme Management Unit (PMU)

The core PMU will be comprised of the personnel needed for the day-to-day running of the programme and the individuals within the Programme Leadership Team (PLT). The PLT will include a team leader and core team members. FCDO expects the PLT’s expertise to cover key outputs of TEFOS Pillar 3 including the creation of public-private partnerships that improve market access for sustainable commodities and services; building capacities of farmers and sustainable forest management; and approaches to forest conservation. FCDO expects all member of the PLT to work 100% on the programme for the duration of the contract. The Supplier must ensure that the skills and expertise provided by the core PMU clearly meet the requirements set out in this Terms of Reference.

The Supplier must ensure that knowledge transfer of team members occurs appropriately so that this project is not detrimentally affected by changes to personnel throughout the Contract. It is expected that within the first two years, core PMU team members will remain in the same roles delivering the project as long as they remain

part of the Supplier's organisation. Suitable replacements should be presented to FCDO for approval which have comparable skill sets to deliver that role's activities and new replacements will be charged at a day rate no higher than the person they are replacing.

If a team member is promoted by the Supplier's organisation, but their role in delivering this project remains the same, then their day rate must not change. If their role were to change (i.e., move to a supporting capacity) then the replacement individual should have fewer days allocated to them to accommodate the support they will then receive from the original role holder. The overall cost of this role in contributing to task delivery should remain unchanged.

3.1.2 Additional Technical Expertise

If there is additional work which is not currently foreseen, the Supplier might need subject matter experts to supplement the technical expertise within the PMU. This would only be on a short-term basis and FCDO reserves the right to veto any proposition that does not meet these parameters. The maximum rates applied for each expertise level will correspond to the rate card submitted by the Supplier in their commercial response (refer to Vol 6). FCDO expects that national experts will be prioritised over international experts. National is defined as 'Colombia'. A national expert is an individual whose assignment takes place in his / her home country or place of residence. I.e. an individual whose home country is Colombia. International is defined as 'any country outside of Colombia'. An international expert is an individual whose assignment takes place outside of his / her home country or place of residence. I.e an individual whose place of residence or home country is a country outside of Colombia. FCDO also reserves the right to veto any proposed technical expert we do not think are appropriate.

3.2 Inception period (6 months)

The contract will commence with a 6-month inception phase, which will culminate in the production of an inception report.

The inception report will set out a detailed delivery plan for TEFOS pillar 3 over the next year as well as indicative plans for the years after. The inception report will become the delivery plan, which will be updated every year. The FCDO expects the production of this report to be collaborative, with input from the TEFOS programme team in London, GoC (IGAC, ANT, PNN, DNP, MADS, IDEAM, ART), delivery partners (UNODC, WB), FCDO staff in BE Bogota and London. The report should evidence how the proposal aligns to GoC deforestation targets. We suggest that this, at a minimum, involves:

- a) A kick-off meeting, with all relevant parties to ensure requirements are fully understood.
- b) Regular contact and sharing early drafts with the TEFOS programme team.
- c) A workshop or presentation (virtual by default, but with opportunity for some parties to be present in the same meeting space) with all interested cross-Whitehall stakeholders to get feedback on the proposed approach.

3.2.1 Activities

- Meetings with key stakeholders (IPLCs, GoC, grassroots organisations, other programmes (UK financed and from other donors), private businesses) to understand local needs and put in place necessary agreements with communities on the ground according to GoC guidelines⁴
- Strategic discussions with GoC (i.e., DNP, MADS PNN, IDEAM, IGAC, ANT) to understand government deforestation plans and ensure geographic and thematic alignment.
- Meeting with other donors to discuss ways of collaborating and avoiding duplication of efforts.
- Review of existing programmes and government initiatives (i.e., conservation agreements) to plan ways of scaling up existing initiatives and ensuring sustainability over time.
- Convene private sector actors to gather information on barriers and opportunities for various supply chains and services.
- Map existing producer associations to understand key barriers and opportunities in selected deforestation hotspots.

⁴ Our MEL partner has produced an evidence review to assess sustainable livelihood options that could be implemented by TEFOS P3, which can be found [here](#). However, the Supplier is free to suggest alternative options not mentioned in this review. We expect options to be suggested after consulting with GoC and communities.

- Regular communication with programme team.

The Supplier's approach to the inception phase should draw from interests of relevant stakeholders (GoC, other donors, IPLCs, etc), and show an understanding the political economy and ongoing initiatives (including pillars 1 and 2), as well as private businesses operating in these areas.

3.2.2 Outputs

The **inception report** should:

- Include a **project delivery workplan** and set out roles, responsibilities, and specific requirements for each activity. FCDO expects
- Include a detailed political economy analysis for the selected areas, including analysis of IPLC concerns and how they might be addressed by the project.
- Identify key counterparts and stakeholders in selected project areas.
- Identify required baselining activities for Pillar 3.
- Propose timelines of activities to be conducted based on the planned timelines for TEFOS components. The FCDO expects this to include both a specific, detailed timeline of work to be undertaken over the next year and a higher-level, indicative timeline of what will be conducted over the following years.
- Provide detailed budgets for the first two years, including a payment schedule and indicative budgets for the remainder of the Contract.
- Include a risk register.
- Include preliminary GESI assessment outlining how the Supplier will propose to address gender issues in the project design and delivery (for example, including consultations with women or women's groups).

3.3 Implementation period

The workplan agreed at inception will be designed to deliver pillar 3 outputs in the selected areas of geographic focus over a three-year period including:

- Market access strategies and innovative business models to promote commercialisation of sustainable commodities and services.
- Technical assistance delivers skills, knowledge and practical experience to targeted communities and vulnerable populations to meet market demands for sustainably produced goods.
- The design and delivery of conservation incentive schemes (i.e., PES, land use agreements, restoration) in areas where commercial forest harvesting is not allowed⁵.

The planned actions should be focused in specific areas and designed to work in coordination and complement other projects and initiatives. The planned actions would include efforts to share experience and lessons across the conflict affected regions. The Supplier should have a clear strategy for engaging with and building a wider community of practitioners and reflecting on an exit strategy and long-term sustainability requirements from the outset.

3.4 Knowledge Management

The Supplier should manage, and share knowledge generated through pillar 3 delivery to increase and complement existing sectoral knowledge, to facilitate retention of capacity in territories, and to foster synergies and cooperation with similar programmes / academia.

3.5 Security concerns

The FCDO acknowledges that travelling to the programme's target municipalities may create security concerns. Duty of care will be the responsibility of the Supplier. The UK Embassy Staff and the Security team in the Embassy will provide support to the Supplier's team when travelling to and in Colombia. This support will consist of travel

⁵ Possible interventions in National Parks should follow strict rules and regulations established in Management Plans and other land use guidance for these areas. Different areas will have different restrictions (i.e., some will only allow bird watching as a productive activity, others will allow ecotourism as well, and others may allow harvesting of NTFPs).

advice from the Embassy 's Security Office, and support in liaising with relevant local contacts when needed, but it is important that the Supplier has a reliable information source on the ground to keep abreast of latest developments.

For more information on travel advice and guidance on security and safety in Colombia please refer to the FCDO's travel guidance [here](#). This includes information on security and political context and provides practical advice on local travel, public transport, buses and coach services, land border crossings, unexploded ordnance, and air travel. In addition to the support the FCDO can provide, Suppliers should set aside budget for security costs.

3.6 Financial management and administration

The Supplier will be required to provide monthly and quarterly expenditure figures and forecasts to the FCDO. Forecasts should be realistic and free of optimism bias, with the Supplier informing the FCDO of potential slippage or overspend as soon as they are identified. The Supplier will also be required to provide annual audited accounts that separately identify FCDO funds, associated disbursements and any unspent funds. Open book contract management will be required to ensure full transparency of Supplier finances, including any profit margins and Non-Project Attributable Costs associated with the programme.

In addition, during the **implementation phase**, the Supplier will be expected to:

- Provide financial and management reporting monthly and quarterly (focusing on activities that have been undertaken and resources deployed) across all programme activities, including invoicing.
- Draft and report against annual budgets, at appropriate levels of detail, and conduct ongoing financial forecasting and reporting.
- Set up and apply robust fraud and risk management systems that alert FCDO to any fiduciary risk or potential misuse of ODA, or public funds more generally.

As explained above, during the implementation phase, the contract payment mechanism is based on key performance indicators and monthly payments made in arrears for services received. Refer to the 'Reporting and Performance' and 'Payment' sections for full details.

4. Reporting, Performance and Payment

4.1 Reporting and Performance

During the inception phase, the Supplier will submit one formal report. This will occur at month 6 and be tied to payments two and three of the inception phase (Section 4.2.1). The Supplier should note that they will be expected to provide evidence of mobilisation at month 3, which is tied to the first payment of the inception phase (Section 4.2.1).

During implementation, the performance of the Supplier will be monitored both quarterly and annually by the FCDO. Performance is linked to payments (Section 4.2.3). A performance dashboard will be reviewed at a quarterly Performance Review Meeting, and the evidence it contains will be used to determine whether the programme is on track against KPIs. The Supplier will maintain the dashboard and is required to ensure all the information provided is concise, clearly written and user friendly. The performance dashboard and metrics will be agreed and finalised in the inception phase.

The Supplier will be expected to submit four types of reports during the Contract's duration as shown in Table 4. Each type of report has a specific purpose and content. Contents will be agreed during the inception phase with FCDO.

1. **Pillar 3 Annual Report:** The Supplier will be expected to produce an annual report covering progress updates from March to March annually. The report is due at the **end of May each year** and is due to be submitted to the FCDO programme team and to the MEL partner simultaneously. This will provide a critical input for the TEFOs Annual Review the programme team does. The report should:

- Review progress with project objectives and actions including reporting against logframe indicators and assessing progress of outputs to outcomes.
- Identify early indications of transformational change.
- Identify causal links between improvements in alternative livelihoods and deforestation activity.
- Discuss equity considerations such as the extent to which programme results are distributed equally among women and ethnic minority groups and give proactive consideration to how interventions can be adjusted to have a positive impact on these groups. All data should be disaggregated by gender and other key socio-economic characteristics wherever possible.
- Analyse progress against relevant ICF key performance indicators (KPIs) that the programme is committed to report against, to support the programme team in the annual results collection procedure.

This report is expected to be consistent with the shorter Quarterly KPIs report that will be used for performance based payments, which will indicate progress against planned activities, challenges, barriers and a forecast of key actions for the next quarter.

2. **Implementation Reviews:** The FCDO will conduct two reviews of the Supplier’s performance herein referred to as ‘Implementation Reviews’. The core purpose of these reviews will be to ensure the project remains on track and relevant to the objectives of TEFOS, strategic priorities of FCDO and continues to deliver Value for Money. The reviews will also be used to determine opportunities for either scaling up or scaling down requirements and also as break points.
- a) First Implementation Review: 18 months from the start of the contract (12 months from the end of the inception period)
 - b) Final Evaluation Review will be conducted 6 months before the end of the contract. It is during this review that implementing the extension option will be considered.

The Supplier is expected to co-operate fully with all reviews by providing supporting documents, data collection and analysis i.e., any management information/data the Supplier is generating to manage and deliver the programme.

3. **Quarterly KPIs report:** as part of the “Payment by results” performance management system, suppliers are expected to provide evidence on KPIs performance during the implementation period (refer to ‘Financial Management’ section and Table 6). Detailed methods for measuring the KPIs will be agreed between the FCDO and the Supplier during the inception phase. This report will be reviewed in a quarterly Performance Review Meeting with the FCDO. The Supplier is required to ensure all the information provided is concise, clearly written and user friendly.
4. **Financial report:** as part of the implementation period payments schedule, the supplier will be expected to provide monthly expenditure figures and forecasts as explained in the financial management section.

results and an additional 5% retained where the Supplier has a Rectification Plan and not met the agreed milestones. Performance categories for each KPI are aligned to Cabinet Office reporting categories and are defined as ‘Inadequate’, ‘Required Improvement’, ‘Approaching Target’ and ‘Good’ (shown in Table 5).

Scoring Methodology	Definition	% of the KPI amount that is payable
Inadequate	The performance of the supplier is significantly below that of the KPI targets that are set out within the contract	0%
Requires Improvement	The performance of the supplier is below that of the KPIs target that are set out within the contract	60%
Approaching Target	The supplier is close to meeting the KPI targets that are set out within the contract	75%
Good Performance	The supplier is meeting or exceeding the KPI targets that are set out in the contract	100%

Table 5. Scoring Methodology definitions

The following actions will be taken based on the scoring of the KPIs.

Red (Inadequate) Score: If performance falls into the red (inadequate) performance category (as defined in table 5 and 6) for any KPI then the Supplier must create a Rectification Plan at their own cost (see Section 40.2 of the standard T&Cs). This Rectification Plan must detail how they will change practices to prevent another red score being awarded for this KPI. The timeline for production of this Rectification Plan is to be agreed between the Supplier and FCDO and should as a minimum contain agreed measures to prevent a red score being awarded in the future as well as mitigation measures to limit the impact of this event if it should occur again. The Rectification Plan must have agreed milestones for introducing these measures, and evidence will be required to demonstrate that the content of the Rectification Plan has been implemented for monitoring purposes.

Amber (Requires Improvement) or Yellow (Approaching Target) Score: If performance falls into the amber (requires improvement) or yellow (approaching target) performance category (as defined in table 5 and 6) for any KPI then the Supplier should examine and implement measures to prevent this KPI being scored a yellow/amber in subsequent reporting periods. Formal improvement measures will not be expected at this stage. If a single KPI is awarded yellow/amber in two consecutive quarters, or twice in four consecutive quarters then the Supplier should create a Rectification Plan at their own cost.

If a Rectification Plan has been put in place, it will be reviewed at subsequent performance meetings. If the agreed milestones in the plan have not been met, then the additional 5% of the quarterly total Supplier Costs that have been invoiced will be retained for that quarter. If a Rectification Plan cannot be agreed to the satisfaction of FCDO or is not adhered to, the contract can be terminated as per Section 44.1.4 of the standard T&Cs.

Table 6 details draft KPIs. The score of each KPI and the assigned weighting will inform the level of payment retained in each quarter. Note that detailed methods for measuring the KPIs will be agreed during the inception phase. There will also be allowances in the ToR for review of the PbR system (to ensure that is incentivises and rewards appropriately) and for KPIs to be revised during the contract, if deemed appropriate and agreed by the FCDO and Supplier.

Table 6 Draft KPIs

No.	Description	Time	Evidence	Target	Part of PbR	Weighting	Inadequate	Requires Improvement	Approaching Target	Good
1	Number of activities that have been executed according to the action plan without disruption.	Quarterly	Quarterly programme action plan and reporting on activities	90% of active programming in progress with no disruption	Yes	25%	<70%	70 – 80%	81 – 94%	90%
2	Supplier develops and maintains effective working relationships with local stakeholders/ beneficiaries on engagement ensuring clarity of requirements, effective escalation channels and a high level of satisfaction with the process.	Every 2 quarters	Annual engagement survey providing feedback from the beneficiary and local stakeholders, quarterly reporting, team updates	Beneficiary reports as satisfied or very satisfied in 85% of milestones achieved during the term	Yes	25%	<65%	66-74%	75-84%	85%
3	<i>To be confirmed once logframe output reporting has been confirmed.</i> Programme is performing against expected results as set out in the programme logframe	Annually	Annual and quarterly programme reports on programme logframe	90% of the log frame report is rated 'good'	No	NA	TBC	TBC	TBC	TBC
4	Quality of reporting: Supplier maintains a high quality of reports (both quarterly and annual) and good reporting on timelines	Quarterly	Quarterly programme report on activities	100% of the report is rated 'good' after the second submission	Yes	25%	<89	90-94%	95-99%	100%
5	The supplier maintains a high level of financial management ensuring the programme is delivered to budget	Quarterly	Quarterly reporting, Forecasting	Forecasting variance and annual spend vs annual budget are both within 4%	Yes	25%	>10%	8%	6%	<4%

Here are two examples of how the PbR system will work for each KPI:

- a) In this example, the total amount involved for quarter 1 totals £200,000. The total amount available to be retained by the FCDO in this quarter is £40,000 (i.e 20%)

KPI 2 has a 25% weighting relating to the quarter. KPI 2 receives a ‘requires improvement’ score

The following calculation will apply for quarter 1:

- 25% of £40,000 = £10,000 is the maximum amount that can be retained for KPI 2
- £10,000 (maximum amount subject to retention) x 60% (% payment due for an ‘requires improvement’ score) = £6,000 of retention amount to be paid in the quarter

Total payment for quarter 1 = £196,000 (£4,000 retained).

- b) If, for example, KPI 2 had received a score of ‘inadequate’ for quarter 1.

The following calculation would instead apply for quarter 1:

- 25% of £40,000 = £10,000 is the maximum amount that can be retained for KPI 2
- £10,000 (maximum amount subject to retention) x 0% (% payment due for an ‘requires improvement’ score) = £0 of retention amount to be paid in the quarter

Total payment for quarter 1 = £190,000 (£10,000 retained).

The supplier will be required to put a rectification plan in place. If the agreed milestones are not met, a further 5% of the next quarter’s invoiced Supplier Costs will be subject to retention.

The total amount invoiced for quarter 2 totals £200,000. The Supplier received a ‘requires improvement’ score for KPI 2 in this period and the agreed actions put in place via a rectification plan in the previous quarter have not been met. In addition to the 20% quarterly KPI retention, this quarter is also subject to a further 5% retention linked to the rectification plan. As such, the total amount available to retain is £50,000 (20% + 5%).

- 25% of £40,000 = £10,000 is the maximum amount that can be retained for KPI 2
- £10,000 (maximum amount subject to retention) x 60% (% payment due for an ‘requires improvement’ score) = £6,000 of retention amount to be paid in the quarter
- 5% of £200,000 = £10,000 deduction for failure to meet rectification plan milestones.

Total payment for quarter 2 = £186,000 (£4,000 + £10,000 retained).

5. Other departmental requirements

5.1 Value for Money (VfM)

The Supplier will produce a high-quality VfM strategy to be delivered alongside the inception report. The Supplier will demonstrate competence and capability in ensuring VfM and in managing all downstream partners to deliver VfM. The bidder will present its VfM strategy which will outline how it achieves VfM according to the four E’s (Economy, Efficiency, Effectiveness, Equity) as outlined in the Business Case. The Supplier will monitor VfM throughout the programme period and seek ways to improve it. The Supplier will continuously demonstrate how VfM is being accurately measured during programme implementation. To this end, they will provide VfM summaries per output area on in their annual reporting to the FCDO.

5.2 Commitment to leaving no one behind

The UK has made a commitment to leave no one behind in achieving the global goals. The Supplier will be expected to set out how their work will identify and address the challenges faced by IPLCs, low-income communities and vulnerable groups including through monitoring and collection of disaggregated data.

TEFOS will be fully compliant with the Gender Equality Act (2014) and must ensure that all activities consider gender equality, both in terms of process and outcomes. TEFOS Pillar 3 must ensure the activities it supports deliver and contribute to:

- Minimum compliance: meet the basic needs of women, vulnerable and marginalised groups.
- Empowerment: contribute to building assets for women, vulnerable and marginalised groups, especially IPLC.
- Structural Transformation: adequately challenge and address unequal power relations and look to create change at an institutional and society level.

The Supplier must also ensure that the impact on disability is equally considered through the same approach and will aim to mainstream disability inclusion into programme design and across the programme's life cycle. The Supplier must demonstrate how it will monitor and evaluate the programme's impact on gender and social inclusion including through the collection and monitoring of disaggregated data and through specific logframe targets.

The Supplier must also comply with the Public Sector Equality Duty by 1) ensuring that harassment and discrimination are not tolerated and 2) promoting equal opportunity between people who share protected characteristics with those who do not.

5.3 Safeguarding

The FCDO maintains a zero-tolerance approach to sexual exploitation and abuse by the Supplier, which includes their downstream partners. In this programme, this means suppliers, members of the consortium and any partner organisations. We expect FCDO partners to follow our lead and robustly consider environmental and social safeguards through their own processes. The capacity of our partners to do this and their effective performance will be a key risk assessment factor in programme design, delivery and monitoring and evaluation.

Social value is a mandatory element of all FCDO programmes. To this end TEFOS will require the use of local consultants and emphasise local capacity building as an important element of technical assistance to be provided through TEFOS.

5.4 Delivery Chain Mapping

Delivery chain mapping is a process that identifies and captures, usually in visual form, the names of all partners involved in delivering a specific good or, service, ideally down to the end beneficiary. The FCDO's Competitive tendering processes are designed to test supplier's capability / capacity to ensure risks are managed and mitigated, and to provide assurances on the successful delivery of the programme. This will include a requirement to provide visibility of the flow of FCDO monies via a delivery chain map. In advance of any release of funds, the Supplier will be required to produce a delivery chain map, and a delivery chain risk map which will, identify all partners (funding and non-funding e.g., legal/contributions in kind) involved in the delivery of a programme. The delivery chain map, and delivery chain risk map should be reviewed and updated regularly, in line with agreed programme monitoring processes and procedures. As a minimum, it should include details of the name of all downstream partners and their functions; funding flows (e.g. amount, type) to each downstream partner; high level risks involved in programme delivery, mitigating measures and management controls.

5.5 UK Aid Branding

Suppliers that receive funding from the FCDO must follow UK Aid branding guidelines and use the UK Aid logo on their programmes to be transparent and acknowledge UK taxpayers' support. The Supplier will acknowledge funding from the UK Government in all communications related to TEFOS. No publicity of any activities shall be undertaken without the prior written consent from the FCDO. To this end the Supplier will discuss the TEFOS visual identity with the FCDO and agree on a visibility statement prior to contract signature.

5.6 Digital Spend

The UK Government defines digital spend as 'any external-facing service provided through the internet to citizens, businesses, civil society or non-governmental organisations.' The Government Digital Services (GDS), on

behalf of the Cabinet Office, monitors all digital spend across government and the FCDO is required to report all spend and show that what we have approved meetings with GDS Digital Service Standard. In the FCDO, this applies to any spend on web-based or mobile information services, websites, knowledge or open data portals, transactional services such as cash transfers, web applications and mobile phone apps. Any digital services or products developed under TEFOS must therefore adhere to the following principles and be approved beforehand.

- a) Design with the user
- b) Understand the existing ecosystem.
- c) Design for scale
- d) Build for sustainability.
- e) Be data driven.
- f) Use open standards, open data, open source & open innovation.
- g) Reuse & improve.
- h) Address privacy & security
- i) Be collaborative.

The Supplier will discuss with the FCDO any digital services or products it intends to develop under TEFOS, setting out the potential budget assigned to these interventions, any licenses or permissions required and sustainability of investment.

5.7 Transparency

The FCDO requires all Suppliers receiving and managing funds, to release open data on how this money is spent, in a common, standard, re-usable format and to require this level of information from immediate sub-contractors, sub-agencies and partners. It is a contractual requirement for the Supplier to comply with this, and to ensure they have the appropriate tools to enable routine financial reporting, publishing of accurate data and providing evidence of this to the FCDO – further information is available from: <http://www.aidtransparency.net/>.

5.8 Duty of Care

The Supplier will be expected to meet the appropriate UK and overseas duty of care in relation to its employees and other personnel it retains, and logistical arrangements. If deemed necessary, the FCDO may need to be convinced that systems and procedures that the Supplier has in place are adequate, if there is travelling to conflict affected or similar high security risk areas.

All Supplier personnel (including its employees, sub-contractors or agents) engaged under an FCDO contract will come under the duty of care of the lead Supplier. The Supplier is responsible for the safety and well-being of its personnel and any third parties affected by its activities, including appropriate security arrangements. The Supplier will also be responsible for the provision of suitable security arrangements for its domestic and business property. The FCDO will share available information with the Supplier on security status and developments in-country where appropriate. Travel advice is also available on the Foreign & Commonwealth Office website (<https://www.gov.uk/foreign-travel-advice>) and the Supplier must ensure it (and its personnel) are up to date with the latest position.

The Supplier may be required to operate in conflict-affected areas, parts of which may be highly insecure, and the security situation may be volatile and subject to change at short notice. The Supplier should be comfortable working in such environments and should be capable of deploying to any areas required within any area in scope in order to deliver the contract. It is not expected that the Supplier would put staff at risk or send them to the most insecure areas, but the Supplier must have the ability to monitor programmes in a wide range of districts / sub-districts across all areas in scope.

The Supplier is responsible for ensuring that appropriate arrangements, processes and procedures are in place for its personnel, taking into account the environment they will be working in, and the level of risk involved in delivery of the contract. The Supplier must ensure its personnel receive the required level of training prior to deployment (where applicable).

The Supplier must comply with the general responsibilities and duties under relevant health and safety law including appropriate risk assessments, adequate information, instruction, training and supervision, and appropriate emergency procedures. These responsibilities must be applied in the context of the specific requirements the Supplier has been contracted to deliver (if successful in being awarded the contract).

The Supplier must confirm in their proposal that:

- a) They fully accept responsibility for Security and Duty of Care.
- b) They understand the potential risks and have the knowledge and experience to develop an effective risk plan.
- c) They have the capability to manage their Duty of Care responsibilities throughout the life of the contract.

The FCDO will not award a contract to a Supplier which cannot demonstrate that it is willing to accept and has the capability to manage its duty of care responsibilities in relation to the specific procurement.

5.9 Conflict of Interest

Whilst current involvement or interaction with the TEFOS Programme (inclusive of Pillar 1, Pillar 2 and MEL) does not exclude organisations from being included in a bid for this contract, where such an involvement exists, FCDO requires Suppliers to be transparent about any conflict of interest. FCDO expects the Supplier to detail firewalls and measures they have taken / will take internally to ensure that appropriate safeguards are in place to prevent any unfair advantage as well as impact on the delivery, outcomes or legitimacy of the work. FCDO reserves the right to clarify with the Supplier during the tender process and disqualify should the safeguards not be satisfactory. Where a conflict of interest exists, please upload the requested information as an attachment in the appendices of Volume 4.

Appendix A – Schedule of Processing, Personal Data and Data Subjects

This schedule must be completed by the Parties in collaboration with each-other before the processing of Personal Data under the Contract.

The completed schedule must be agreed formally as part of the contract with FCDO and any changes to the content of this schedule must be agreed formally with FCDO under a Contract Variation.

Annex 1 – TEFOS Programme Rationale and Purpose

1.1 Context

Armed conflict has affected Colombia since the 1960s. It arose due to a variety of complex factors including high levels of socioeconomic inequality, the lack of a strong state presence especially in rural and remote areas, and an unequal distribution of land.⁶ The environmental impacts of this conflict were diverse and have not always been negative.⁷ Although the main armed group, the Revolutionary Armed Forces of Colombia – People's Army (FARC [Spanish abbreviation]), directly contributed to some environmental degradation, they also enforced strict guidelines in the territories they controlled which in some cases supported environmental conservation.

The 2016 peace deal between the FARC and the Colombian government (GoC) created a power and governance vacuum in forested regions where the FARC guerrilla relinquished control. Since the peace process, previously inaccessible forested areas have become vulnerable to land speculation, and increased presence of criminal activity.⁸ Colombia has experienced higher rates of deforestation since then, particularly in the conflict-affected regions where almost 60% of deforestation occurs.⁹ Since 2018 there have been positive signs the tide is beginning to turn. Donor and GoC actions have focussed in areas where the negative trend in deforestation is being reversed, demonstrating that concerted action can lead to real change. However, urgent and effective interventions are still needed. In 2021, the deforestation rate increased by 1.5% from 2020, and over the past 5 years, almost 800.000 ha of forests have disappeared.¹⁰

Drawing on experience from the UK's International Climate Finance (ICF) portfolio and the work of the UK's Conflict, Stability and Security Fund (CSSF), TEFOS - "Territorios Forestales Sostenibles" - is addressing some of the core drivers of deforestation in Colombia: land tenure insecurity, weak law enforcement and insufficient livelihood options for rural communities living in conflict affected forested regions.

1.2 Description of programme

TEFOS is a £64m bilateral forest programme that aims to stabilise the deforestation frontier in conflict-affected areas of rural Colombia through three key, complimentary actions: i) improving and updating information for sustainable land use management, ii) strengthening institutions in charge of establishing an environmental rule of law and iii) supporting sustainable livelihoods. The programme's starting point is to recognise that tackling deforestation, especially in conflict-affected, rural areas, requires a holistic approach that addresses the various and complex drivers mentioned above.

These three key actions are structured as phased pillars (Figure 1) that are expected to work in synergy in selected municipalities where deforestation and peace implementation are key challenges for the Colombian government. The reduction in deforestation is expected to be achieved through behaviour change as stakeholders i) become better informed about responsibilities, rights and restrictions related to land administration and use, ii) are disincentivised to engage in illegal deforestation due to stronger administrative capacities to conduct environmental crime investigations, and iii) have more opportunities to engage in legal, sustainable livelihoods. TEFOS has been co-created with the GoC and therefore responds to national strategic policies. Lasting and transformational change is secured through targeted support for a wide range of

institutions, beyond environmental authorities, using technical assistance, trainings, improved information systems and data sharing practices.

Pillar 1 focuses on updating cadastre information with an environmental focus, by improving information systems and strengthening capacities for decision-makers on land use. It feeds into a wider effort Colombia has been working on for the past 5 years to have more accurate and interoperable land information. This wider effort is led by the GoC with the support of multilateral banks. This is why, by request of the GoC, and in order to secure alignment and coherence between TEFOS and national policy, the World Bank (WB) was selected as the delivery partner. For implementation and administration purposes, the GoC selected a national fiduciary body, Fondo Accion (FA), which is supporting the delivery of TEFOS.

Pillar 2, delivered by The United Nations Office for Drugs and Crime (UNODC), aims to increase the effectiveness of environmental rule of law in-country. TEFOS focuses specifically on enhancing capacities within key institutions across various sectors (climate, security, justice) to investigate illegal drivers of deforestation, especially those related to land grabbing. This is done through improving coordination, skills and data access between relevant state agencies. This pillar is co-funded and co-delivered with the UK Government’s Conflict, Stability and Security Fund (CSSF).

Finally, pillar 3 (expected to start mid 2023) will support sustainable activities for rural communities in areas where pillars 1 and 2 are being or will be implemented. This is expected to improve capacities for local producers involved in sustainable supply chains or services, to enhance market opportunities for sustainable production and to provide conservation incentives for rural populations in strategic environmental areas.

Figure 1 – Pillars for TEFOS

Pillar	Phase 1		Phase 2				
	2020	2021	2022	2023	2024	2025	2026
1	Strengthening & supporting the Government of Colombia to update the multipurpose cadastre and incentivise sustainable land management. (£43m – delivery partner: World Bank)						
2		Building capacity in multiple agencies to investigate environmental crime, focussing on activities that are driving deforestation, such as land grabbing. (£10m – delivery partner: UNODC)					
3			Promote sustainable economic activities and conservation incentives appropriate for conflict-affected, deforestation hotspots. (£9.9m – delivery partner tbc)				

The three pillars are intentionally staggered over the lifetime of the programme as shown above. As outlined in the programme’s theory of change (ToC), the expectation was that starting with the implementation of the cadastre in deforestation hot spots (pillar 1) and increasing capacity to more effectively tackle environmental crime (pillar 2), would create the right enabling conditions to work on alternative livelihoods (pillar 3). At the same time, we recognise that not everything has to be finalised (i.e., cadastral survey complete) before enabling conditions begin to materialise. Despite substantial delays with the cadastre (see light touch annual review (AR) [here](#) for more details and 21/22 AR [here](#)), the programme as a whole has made significant progress strengthening national institutions and on the ground especially in terms of working with local communities. Pillars can be implemented in parallel and still achieve the desired impact.

The implementation of Pillar 3 has been delayed slightly to ensure the new Colombian administration is able to co-create it with us. The delay in implementation does not pose a risk to any of the other pillars, in fact, it balances out the delays experienced in kickstarting the programme, and ensures we deliver a demand-led, co-created pillar that is backed by political will.

Across all three intervention pillars, the programme will ensure additionality by prioritising investment in regions that are deforestation hotspots, acutely conflict affected, and do not have the budget to implement these activities independently. Pillar 3 will be key in ensuring synergies between pillars are identified and utilised in the regions. We have a Monitoring, Evaluation and Learning (MEL) component (£1.1m) that focuses on providing coherence and oversight of MEL data across all pillars and which will conduct an end of programme impact evaluation, to be delivered at the end of 2027.

1.3 TEFOS expected results.

Specifically, the TEFOS programme will:

- Deliver an updated multipurpose cadastre with data on land rights, restrictions and responsibilities in deforestation hotspots across approx. 16 million hectares (ha), providing the foundation for increased land security.
- Increase capacity for at least 180 institutional staff in the investigation of environmental crimes.
- Incentivise sustainable land use and bring mixed-use forest and agriculture landscapes under sustainable management through the provision of sustainable alternative livelihoods.

This programme will deliver against ICF Key Performance Indicators (KPIs)¹¹:

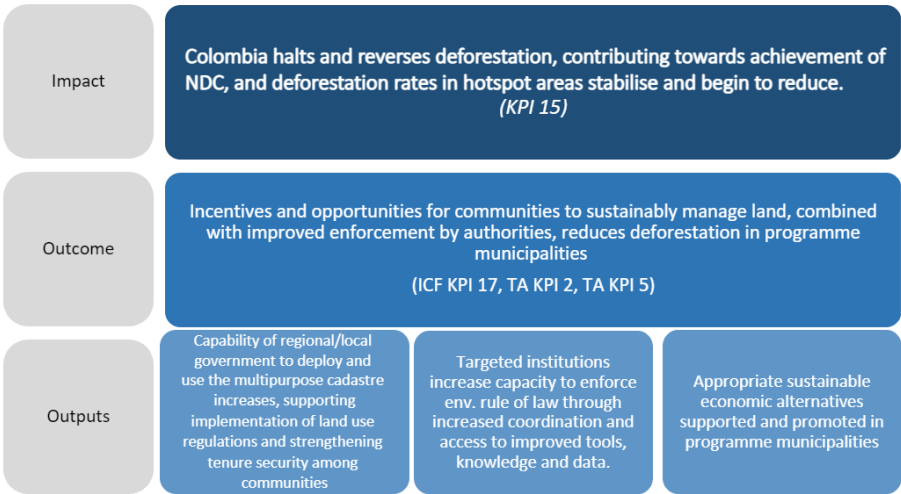

- [KPI 15](#) – Extent to which ICF intervention is likely to lead to Transformational change (unchanged from the Business Case)
- [KPI17](#)- Hectares of land that have received sustainable land management practices as a result of ICF (unchanged from the Business Case)
- [TA KPI 2](#) – Number of individuals and organisations supported by ICF technical assistance.
- [TA KPI 5](#) – Volume of emissions reductions avoided/supported by ICF technical assistance.

In addition to ICF KPIs, the programme will deliver other benefits including improvement of livelihoods, protection of biodiversity and improved water security. It will also help to build resilience by creating fairer, greener, and more resilient economic opportunities for communities in deforestation hotspots affected by conflict and, more recently, Covid-19. It is worth noting that although TEFOS will deliver against the ICF KPIs mentioned above, each pillar will also be measured and scored independently in the annual review process.

The programme’s expected impact, outcomes, and outputs (subject to revisions) are outlined in the diagram below.

Figure 2 – Summarised Theory of Change

¹¹ We expect the Supplier to provide the data to enable monitoring of the KPIs and other outcomes/outputs

1.4 Progress so far and lessons learned.

To date the programme has primarily focussed on enhancing capacities within national institutions in charge of leading implementation for pillars 1 & 2. Pillar 1 has identified 20 municipalities and 2 National Parks where the cadastre would be implemented. Once the prior consultation¹² is finalised in Q2 2023, the first phase of the cadastre operation is expected to kick-off in critical deforestation clusters in the Amazon (Guaviare Department); the second phase will cover critical deforestation clusters in Caquetá and south of Meta, subject to GoC’s strategic steer. On the other hand, pillar 2 beneficiary national institutions have been running investigations and case studies in municipalities such as San Vicente del Caguán, La Macarena and San José del Guaviare. (see TEFOS light touch annual review [here](#) and 21/22 AR [here](#), for a more detailed description of progress). Implementation of pillars 1 and 2 so far, has produced the following lessons to consider for the development of pillar 3:

- Pillar components benefit immensely from having a senior official within key institutions responsible for supporting implementation, championing activities, and leading on indicators. This facilitates decision-making and coordination with other stakeholders and delivery partners.
- Pillar governance requires flexibility and adaptability to adjust plans and activities to changing priorities and government strategies, whilst continuing to work towards key impact targets. It is critical that activities financed by the programme align to national and subnational deforestation priorities.
- Early and continuous engagement with Indigenous Peoples and local communities (IPLCs) is crucial to ensure they understand and support the objectives of TEFOS. Pillar 1 was delayed by over a year due to a prior consultation process with IPLCs that was not factored into the original project plan.
- There is a high turnover of technical staff in GoC agencies, it is important to push for knowledge-management and knowledge sharing to promote knowledge and skill retention.
- It is important to identify and collaborate with other relevant initiatives present in the region. GoC has identified almost 15 programmes in the Amazon biome aimed at halting deforestation. The pillar 3 Supplier will be expected to engage regularly with relevant institutions leading on addressing deforestation.
- Understanding conflict dynamics in prioritised areas is key to manage risks and stakeholders.

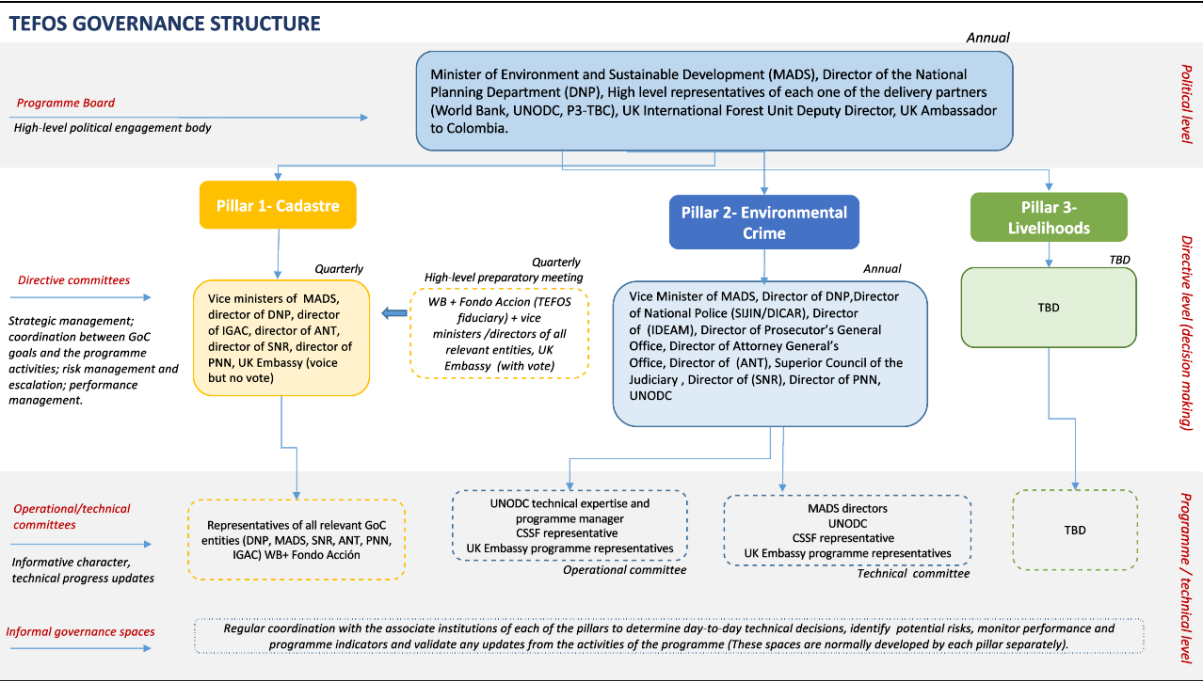

¹² The prior consultation is a mechanism to guarantee a fundamental right of Indigenous Peoples and other ethnic groups, whenever a decision is taken that may affect them directly or when projects, work or activities are intended to be carried out within their territories.

1.5 TEFOS governance

A governance structure that brings together GoC’s key institutions and delivery partners (DPs) for discussions and strategic decision-making promotes interaction between pillars. The TEFOS MEL partner (Tetra Tech) also plays a key role in overseeing the programme’s rationale and contribution from each of the pillars to the wider outcomes and impact.

The TEFOS governance structure (see **Error! Reference source not found.**) includes representatives from the WB, GOC, Tetra Tech, and the UK government. This governance has three levels: a high-level board that aims to meet yearly, directive instances per pillar that meet at a different frequency according to agendas and decisions to be made and operational (technical level) committees per pillar that convene monthly, where possible. The first instance gathers all pillars and will include the pillar 3 Supplier once contracted, whilst the directive and operational committees happen separately for each pillar. However, the programme remains flexible and can convene ad-hoc meetings when key decisions need to be made.

Figure 3 – TEFOS Governance Structure

INFO BOX: TEFOS as part of a wider UK-COL sustainable growth cooperation

UK has been working jointly with countries, communities and external partners to put nature and forests at the core of climate discussions. Only by reducing GHG emissions coming from agriculture, forestry and other land uses, will it be possible to limit temperature warming to below 1.5°, in line with Paris Agreement objectives.

This is why, at COP 26, as part of the Global Forest Finance Pledge, relevant donors committed to collectively provide US\$12 billion for forest-related climate finance between 2021-2025. UK's contribution to this pledge will be £1.5 billion, as part of a wider £3 billion ring fence for nature, which includes up to £300 million for the Amazon. This pledge is critical to support countries like Colombia, which make part of a core group of high ambition countries that have endorsed the Glasgow Leaders' Declaration on Forests and Land use (GLD) in COP 26 and that joined the Forests and Climate Leader's Partnership (FCLP) in COP 27 to help maintain a political spotlight on forests.

UK and Colombia have been long standing partners in critical areas for climate mitigation. Since 2012, UK Forest and Land Use (F&LU) programming in-country has reached almost £140 million, including UK's contributions to SPS-Ganaderia Colombiana Sostenible, REM-Vision Amazonia, ISFL-Biocarbono Orinoquia, Partnerships for Forests, UKPACT and TEFOS.

Programming in-country underpins two major policy vehicles to promote political ambition to target deforestation. Alongside Norway and Germany, the UK signed a Joint Declaration of Intent (JDI) with Colombia in 2015, aiming to coordinate efforts for Colombia to meet zero natural forest loss by 2030. In addition, UK and Colombia have signed a bilateral Partnership for Sustainable Growth, which prioritised halting deforestation as a critical milestone for Colombia to meet its ambitious NDC target.

TEFOS was co-created and structured as a deliverable of the Partnership for Sustainable Growth. It aims at being a highly responsive, demand-led, ambitious programme to tackle deforestation in a complex context, where deforestation has been increasing due to legal and illegal causes intertwined in territories where the State has promised to implement actions from the Peace Agreements signed in 2016.

1.6 TEFOS contribution to GoC priorities on climate and forests

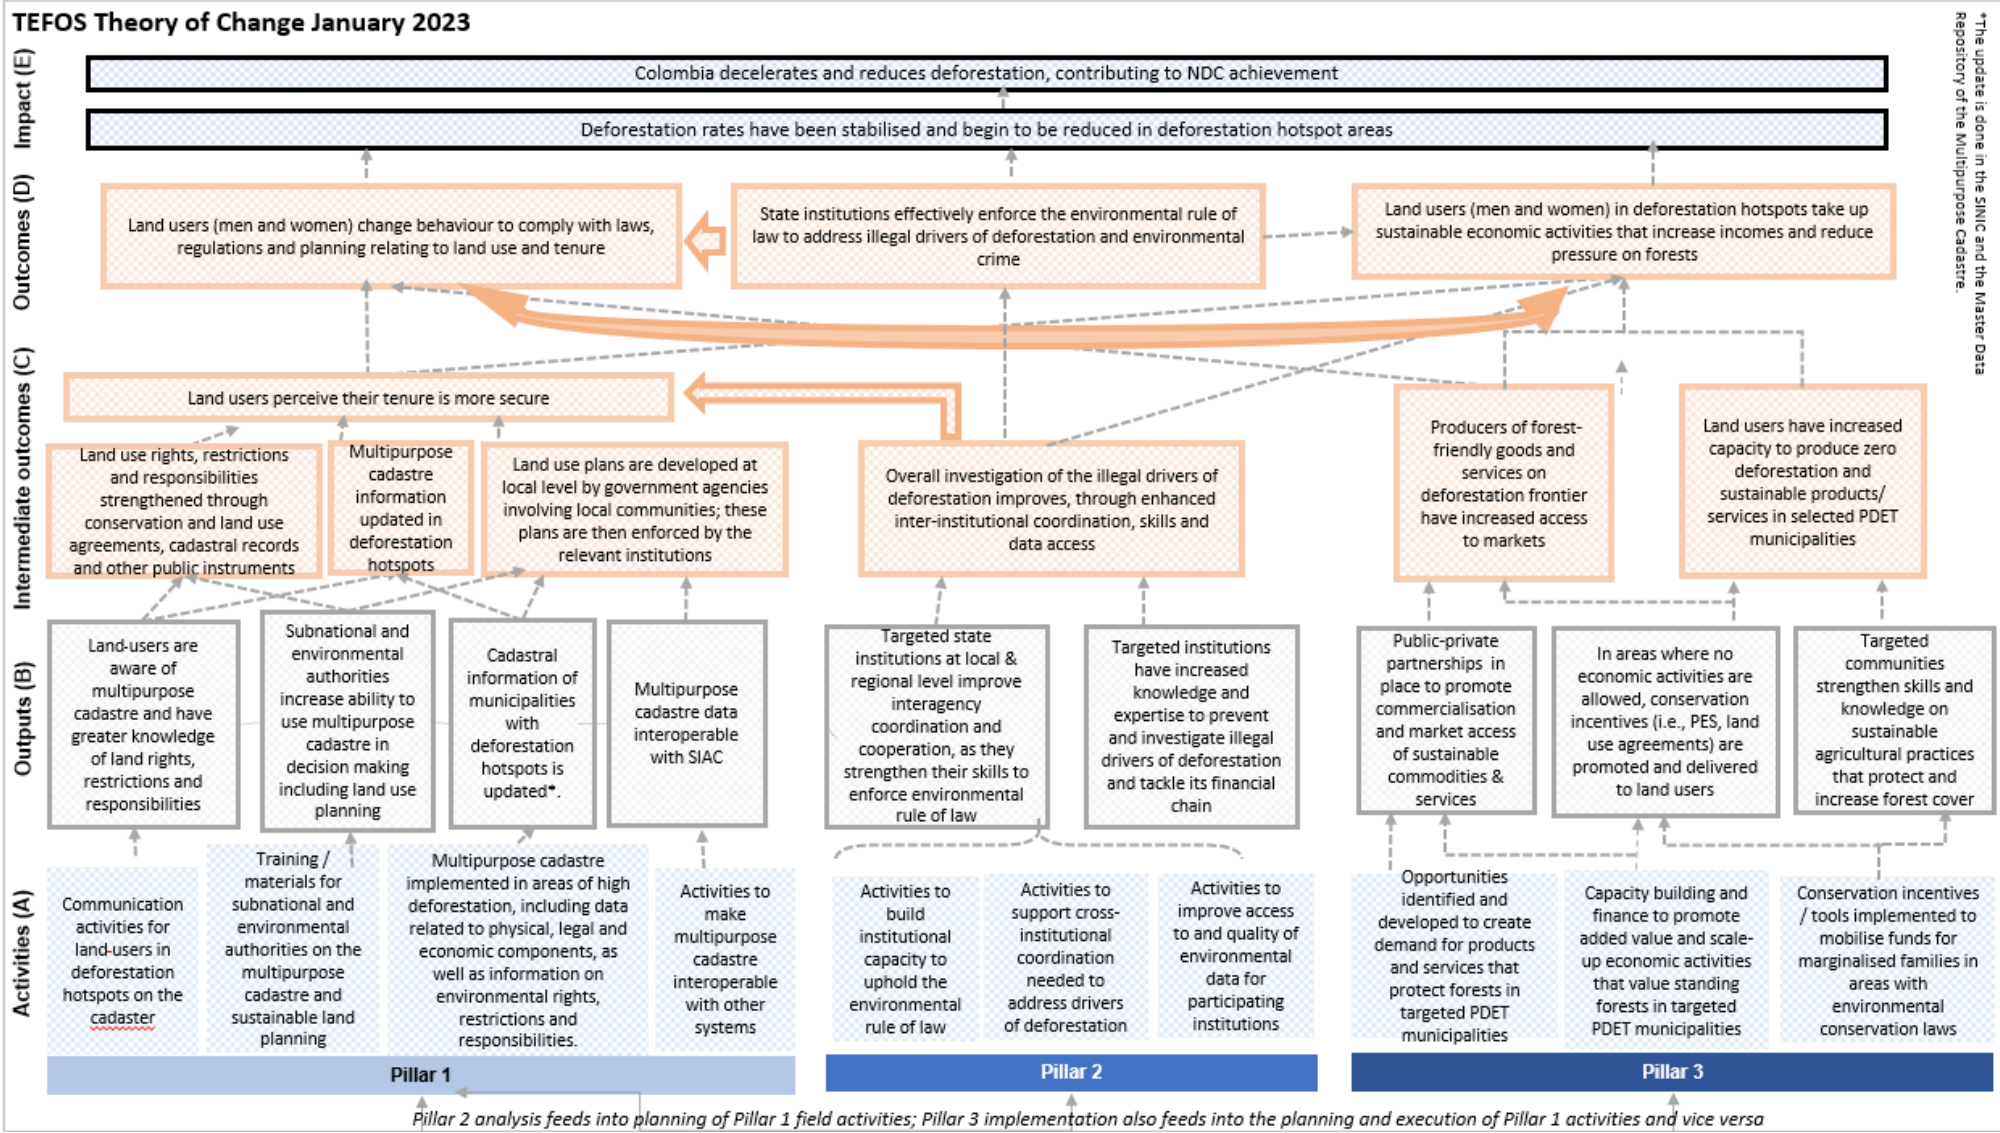

In 2020 Colombia submitted one of the highest ambition targets in the region to the UNFCCC, committing to reduce its GHG emissions by 51% by 2030 compared to the projected baseline. Since Agriculture, Forestry and other Land Use (AFOLU) emissions account for almost half of Colombia's GHG inventory, reducing deforestation plays a critical role in meeting its NDC target, which will require a decrease in the deforestation rate by 50.000ha by 2030. These targets remain a real challenge since the last available deforestation data showed a rate of 174.103ha in 2021¹³. Data for Q1 2022 showed that 50.000ha had already been deforested, underlining the need for the new government to take immediate action.

Currently, the GoC is finalising the approval process of the National Development Plan 2022-2026, which will set out the roadmap for the government to meet strategic objectives around peace, climate ambition, land tenure, and other relevant actions to tackle deforestation. Relevant points for TEFOS objectives on cadastre, environmental rule of law and sustainable livelihoods have already been included in a first draft which reinforces how TEFOS is strategically aligned to the current government's ambitions.

Aiming to coordinate peace implementation, rural development and environmental protection goals, the GoC, led by the Ministry of Environment, has put forward a "Deforestation Containment Plan", which has prioritised 22 Forest Development Clusters (Núcleos de Desarrollo Forestal). The goal is to transform those clusters into Sustainable Forest Management Areas (Núcleos de Manejo Forestal Sostenible)" through an intervention that covers technical assistance, forest management, restoration, sustainable businesses, payment for ecosystem services (PES), land tenure, ecotourism, environmental education, and monitoring. As explained below, we expect pillar 3 delivery to contribute to the implementation of this plan.

Annex 4 – Territorios Forestales Sostenibles (TEFOS) – Main activities and actors

The programme

The UK government is providing £64m of International Climate Finance (ICF) over seven years (2020-2026) to the Government of Colombia (GoC) to reduce deforestation in conflict-affected and high-deforestation areas of rural Colombia through a bilateral forest programme: TEFOS (Communities and Sustainable Forest Territories, or ‘Territorios Forestales Sostenibles’, in Spanish).

The programme has three intervention pillars:

- i) Strengthening land registry systems to incentivise sustainable land management (£43 million – delivered by the World Bank),
- ii) Strengthening the criminal justice system to tackle environmental crime in deforestation hotspots (£10 million – delivered by UNODC), and
- iii) Promoting sustainable economic opportunities for communities in deforestation hotspots (up to £9.9 million – currently in the process of selecting delivery partner).

Pillar 1

In December 2020, the Government of the United Kingdom approved a £43m grant to support the Government of Colombia to update cadastre information with an environmental focus and strengthen institutions involved, including the ministry of environment. This pillar seeks to improve information systems and strengthen capacity for decision-makers on land use, including through the use of conservation agreements with National Natural Park Authorities (PNN) and right of use contracts with the National Land Agency (ANT).

Objective: Strengthening land registry systems to incentivise sustainable land management.

Delivery Partner: World Bank /Fondo Acción (fiduciary)

Main activities:

1. Communication activities for land users in deforestation hotspots on the cadastre.
2. Training/materials for subnational and environmental authorities on the multipurpose cadastre and sustainable land planning.
3. Multipurpose cadastre implementation in areas of high deforestation, including updating data related to physical, legal and economic components, as well as information on environmental rights, restrictions and responsibilities.
4. Activities with Colombia’s Environmental Information System (SIAC) to make multipurpose cadastre interoperable with other systems.

Through its activities, Pillar 1 works with the following institutions:

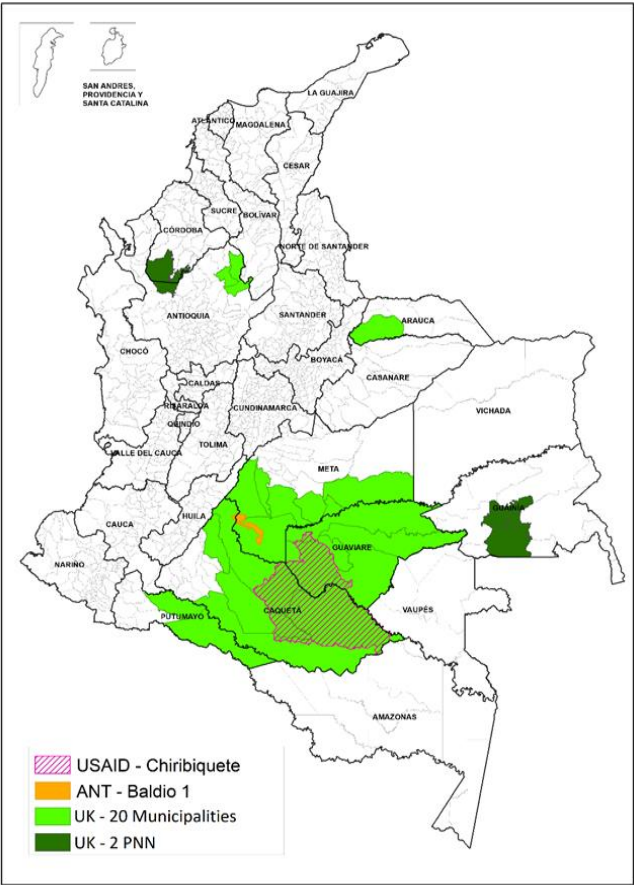

- Ministry of Environment and Sustainable Development (MADS)

- National Land Agency (ANT)
- National Planning Department (DNP)
- Institute of Hydrology, Meteorology and Environmental Studies (IDEAM)
- Geographic Institute Augustin Codazzi (IGAC)
- National Natural Parks (PNN)
- Superintendency of Notaries and Registry (SNR)

Coverage area:

This is the approved coverage area as of today, but it is important that the supplier is in contact with the programme team and the GoC for more details and possible the prioritised municipalities.

Pillar 2

In 2020, the Government of the United Kingdom approved £10m in grant finance to support the Government of Colombia to strengthen its enforcement of the environmental rule of law as a way to deter environmental crimes associated to deforestation. Pillar 2 of TEFOS started implementation in 2021 and is currently closing its second year of activities.

Objective: disrupting criminal activity associated with deforestation by strengthening the environmental rule of law of the Colombian State.

Delivery Partner: UNODC

Main activities

Three main activities guide nine outcomes to address the objective of Pillar 2.

Activity	Outcome
1. Promoting coordination between the judiciary, environmental and security sectors to address the deforestation drivers	1. Strengthening the planning and inter-institutional coordination capacities of the environment, justice, and security sectors to deal with environmental crimes and other damages to strategic ecosystems through spaces including but not limited to the National Council for Combating Deforestation and Other Environmental Crimes (CONALDEF).
	2. Creating and participating in an international conference to share knowledge on the prevention, control, investigation, and prosecution of crimes against the environment.
2. Strengthening the State’s capability to investigate and prosecute environmental crimes	3. Strengthening the coordination capacities of the Ministry of Defence and the National Police to prevent, investigate and control crimes against natural resources and the environment.
	4. Strengthening the capacities for the prosecution of crimes associated with deforestation, offences or infractions against natural resources and the environment.
	5. Strengthening the processes of prevention and control of crimes and other behaviours against the environment at the local and regional level.
	6. Improving capacities to deal with speculative land markets and unsustainable use of natural resources.
	8. Developing specialised, technical and operational tools to investigate and affect the financial chain of deforestation.
	9. Developing an action plan to address the main risks of corruption in the multipurpose cadastre and around deforestation, and create tools for analysis, early detection, and mitigation.
3. Improving information and data to respond to deforestation.	7. Improving the production, quality, and distribution of environmental data for justice and security agencies.

Through its activities, Pillar 2 works with the following institutions:

- Ministry of Environment and Sustainable Development (MADS)
 - National Planning Department
 - Ministry of Defence
 - Ministry of Transport

TEFOS Governance Structure version 2¹

Pending approval by GoC and DP stakeholders in the next programme board.

TEFOS is an International Climate Finance (ICF) programme approved by ministers on 4th February 2020. It aims to use £64 million in grant finance (2020 – 2026) to support the Government of Colombia (GoC) in reducing deforestation in areas affected by conflict. The programme seeks to i) strengthen land registry systems to incentivise sustainable land management, ii) strengthen the criminal justice system to tackle environmental crime in deforestation hotspots, and iii) create and promote innovative, sustainable economic opportunities for communities. These are phased as follows, noting that the third intervention is subject to effective progress in the first two.

Pillar	Phase 1		Phase 2				
	2020	2021	2022	2023	2024	2025	2026
1	One-year inception phase, strengthening & supporting the expansion of land registry systems and incentivising sustainable land management.					Aligned with Government targets, pillar closes.	
2	CSSF delivery with UNODC	Building capacity in multiple agencies to disrupt and prosecute environmental crime, focussing on activities that are driving deforestation.					Pillar close
3	Evidence gathering,			Identify & pilot new sustainable economic opportunities appropriate for conflict-affected forest regions and a delivery partner			
MEL	Procure contractor	Ongoing MEL support, consolidation and reporting of data collected by delivery partners, subcontracting independent evaluations as necessary					

Due to its phased approach, it is crucial that there is adequate collaboration between the delivery partners, and with the independent MEL contractor. This will ensure successful programme implementation, will allow for robust learning and will ensure value for money. This document lists the programme’s governance structure and the expectations of delivery partners.

TEFOS governance is divided in three levels that cut across the whole programme. (1) The **Political Level** which is where the Programme Board takes place as the high-level political engagement body, (2) The **Directive Level** made by the Directive Committees that are the decision-making body and (3) the **Technical Level** where operational committees and informal governance spaces take place.

The below table proposes terms of reference for these structures and includes further detail participation, representation and frequency.
