E8.9 The Contractor grants to the Authority and, if requested by the Authority, to a Replacement Contractor, a royalty-free, irrevocable, worldwide, non-exclusive licence (with a right to sub-license) to use any Intellectual Property Rights that the Contractor owned or developed prior to the Commencement Date and which the Authority (or the Replacement

E9.1 The Contractor shall keep and maintain until 6 years after the end of the Contract Period, or as long a period as may be agreed between the Parties, full and accurate records of the Contract including the Services supplied under it, all expenditure reimbursed by the Authority, and all payments made by the Authority. The Contractor shall provide such explanations as are reasonably required for these purposes.

E10.2 If the Contractor or any Staff are liable to be taxed in the UK or to pay NICs in respect of consideration received under the Contract, the Contractor shall:

(b) indemnify the Authority against any income tax, NICs and social security contributions and any other liability, deduction, contribution, assessment or claim arising from or made in connection with the provision of the Services by the Contractor or any Staff.

F. CONTROL OF THE CONTRACT

F1 Failure to meet Requirements

F1.1 If the Authority informs the Contractor in writing that the Authority reasonably believes that any part of the Services do not meet the requirements of the Contract or differs in any way from those requirements, and this is not as a result of a default by the Authority, the Contractor shall at its own expense re-schedule and carry out the Services in accordance with the requirements of the Contract within such reasonable time as may be specified by the Authority.

F2 Monitoring of Contract Performance

F2.1 The Contractor shall immediately inform the Authority if any of the Services are not being or are unable to be performed, the reasons for non-performance, any corrective action and the date by which that action will be completed.

F2.2 At or around 6 Months from the Commencement Date and each anniversary of the Commencement Date thereafter (each being a "Review Date"), the Authority shall carry out a review of the performance of the Contractor ("Checkpoint Review"). Without prejudice to the generality of the foregoing, the Authority may in respect of the period under review consider such items as (but not limited to): the Contractor's delivery of the Services; the Contractor's contribution to innovation in the Authority; whether the Services provide the Authority with best value for money; consideration of any changes which may need to be made to the Services; a review of future requirements in relation to the Services and progress against key milestones.

F2.3 The Contractor shall provide at its own cost any assistance reasonably required by the Authority to perform such Checkpoint Review including the provision of data and information.

F2.4 The Authority may produce a report (a "Checkpoint Review Report") of the results of each Checkpoint Review stating any areas of exceptional performance and areas for improvement in the provision of the Services and where there is any shortfall in any aspect of performance reviewed as against the Authority's expectations and the Contractor's obligations under this Contract.

F2.5 The Authority shall give the Contractor a copy of the Checkpoint Review Report (if applicable). The Authority shall consider any Contractor comments and may produce a revised Checkpoint Review Report.

F2.6 The Contractor shall, within 10 Working Days of receipt of the Checkpoint Review Report (revised as appropriate) provide the Authority with a plan to address resolution of any shortcomings and implementation of improvements identified by the Checkpoint Review Report.

F2.7 Actions required to resolve shortcomings and implement improvements (either as a consequence of the Contractor's failure to meet its obligations under this Contract identified by the Checkpoint Review Report, or those which result from the Contractor's failure to meet the Authority's expectations notified to the Contractor or of which the Contractor ought reasonably to have been aware) shall be implemented at no extra charge to the Authority.

F3 Remedies for inadequate performance

F3.1 If the Authority reasonably believes the Contractor has committed a Material Breach it may, without prejudice to its rights under clause H2 (Termination on Default), do any of the following:

- (a) without terminating the Contract, itself supply or procure the supply of all or part of the Services until such time as the Contractor has demonstrated to the Authority's reasonable satisfaction that the Contractor will be able to supply the Services in accordance with the Specification;
- (b) without terminating the whole of the Contract, terminate the Contract in respect of part of the Services only (whereupon a corresponding reduction in the Price shall be made) and thereafter itself supply or procure a third party to supply such part of the Services;
- (c) withhold or reduce payments to the Contractor in such amount as the Authority reasonably deems appropriate in each particular case; and/or
- (d) terminate the Contract in accordance with clause H2.

F3.2 Without prejudice to its right under clause C3 (Recovery of Sums Due), the Authority may charge the Contractor for any costs reasonably incurred and any reasonable administration costs in respect of the supply of any part of the Services by the Authority or a third party to the extent that such costs exceed the payment which would otherwise have been payable to the Contractor for such part of the Services.

F3.3 If the Authority reasonably believes the Contractor has failed to supply all or any part of the Services in accordance with the Contract, professional or industry practice which could reasonably be expected of a competent and suitably qualified person, or any legislative or regulatory requirement, the Authority may give the Contractor notice specifying the way in which its performance falls short of the requirements of the Contract or is otherwise unsatisfactory.

F3.4 If the Contractor has been notified of a failure in accordance with clause F3.3 the Authority may:

- (a) direct the Contractor to identify and remedy the failure within such time as may be specified by the Authority and to apply all such additional resources as are necessary to remedy that failure at no additional charge to the Authority within the specified timescale; and/or

(b) withhold or reduce payments to the Contractor in such amount as the Authority deems appropriate in each particular case until such failure has been remedied to the satisfaction of the Authority.

F3.5 If the Contractor has been notified of a failure in accordance with clause F3.3, it shall:

(a) use all reasonable endeavours to immediately minimise the impact of such failure to the Authority and to prevent such failure from recurring; and

(b) immediately give the Authority such information as the Authority may request regarding what measures are being taken to comply with the obligations in this clause F3.5 and the progress of those measures until resolved to the satisfaction of the Authority.

F3.6 If, having been notified of any failure, the Contractor fails to remedy it in accordance with clause F3.5 within the time specified by the Authority, the Authority may treat the continuing failure as a Material Breach and may terminate the Contract immediately on notice to the Contractor.

F4 Transfer and Sub-Contracting

F4.1 Except where clauses F4.6 and F4.7 both apply, the Contractor shall not transfer, charge, assign, sub-contract or in any other way dispose of the Contract or any part of it without Approval. All such documents shall be evidenced in writing and shown to the Authority on request. Sub-contracting any part of the Contract shall not relieve the Contractor of any of its obligations or duties under the Contract.

F4.2 The Contractor shall be responsible for the acts and/or omissions of its Sub-Contractors as though they are its own. If it is appropriate, the Contractor shall provide each Sub-Contractor with a copy of the Contract and obtain written confirmation from them that they will provide the Services fully in accordance with the Contract.

F4.3 The Contractor shall ensure that its Sub-Contractors and suppliers retain all records relating to the Services for at least 6 years from the date of their creation and make them available to the Authority on request in accordance with the provisions of clause E9 (Audit). If any Sub-Contractor or supplier does not allow the Authority access to the records then the Authority shall have no obligation to pay any claim or invoice made by the Contractor on the basis of such documents or work carried out by the Sub-Contractor or supplier.

F4.4 If the Authority has consented to the award of a Sub-Contract, the Contractor shall ensure that:

(a) the Sub-Contract contains a right for the Contractor to terminate the Sub-Contract if the relevant Sub-Contractor does not comply in the performance of its contract with legal obligations in environmental, social or labour law;

(b) the Sub-Contractor includes a provision having the same effect as set out in clause F4.4 (a) in any Sub-Contract which it awards; and

(c) copies of each Sub-Contract shall, at the request of the Authority, be sent by the Contractor to the Authority immediately.

F4.5 If the Authority believes there are:

- (a) compulsory grounds for excluding a Sub-Contractor pursuant to regulation 57 of the Regulations, the Contractor shall replace or not appoint the Sub-Contractor; or
- (b) non-compulsory grounds for excluding a Sub-Contractor pursuant to regulation 57 of the Regulations, the Authority may require the Contractor to replace or not appoint the Sub-Contractor and the Contractor shall comply with such requirement.

F4.6 Notwithstanding clause F4.1, the Contractor may assign to a third party (the “Assignee”) the right to receive payment of the Price or any part thereof due to the Contractor (including any interest which the Authority incurs under clause C2 (Payment and VAT)). Any assignment under this clause F4.6 shall be subject to:

- (a) reduction of any sums in respect of which the Authority exercises its right of recovery under clause C3 (Recovery of Sums Due);
- (b) all related rights of the Authority under the Contract in relation to the recovery of sums due but unpaid; and
- (c) the Authority receiving notification under both clauses F4.7 and F4.8.

F4.7 If the Contractor assigns the right to receive the Price under clause F4.6, the Contractor or the Assignee shall notify the Authority in writing of the assignment and the date upon which the assignment becomes effective.

F4.8 The Contractor shall ensure that the Assignee notifies the Authority of the Assignee’s contact information and bank account details to which the Authority shall make payment.

F4.9 The provisions of clause C2 shall continue to apply in all other respects after the assignment and shall not be amended without Approval.

F4.10 Subject to clause F4.11, the Authority may assign, novate or otherwise dispose of its rights and obligations under the Contract or any part thereof to:

- (a) any Contracting Authority;
- (b) any other body established or authorised by the Crown or under statute in order substantially to perform any of the functions that had previously been performed by the Authority; or
- (c) any private sector body which substantially performs the functions of the Authority

provided that any such assignment, novation or other disposal shall not increase the burden of the Contractor’s obligations under the Contract.

F4.11 Any change in the legal status of the Authority such that it ceases to be a Contracting Authority shall not, subject to clause F4.12, affect the validity of the Contract and the Contract shall bind and inure to the benefit of any successor body to the Authority.

F4.12 If the rights and obligations under the Contract are assigned, novated or otherwise disposed of pursuant to clause F4.10 to a body which is not a Contracting Authority or if there is a change in the legal status of the Authority such that it ceases to be a Contracting Authority (in the remainder of this clause both such bodies being referred to as the "Transferee"):

(a) the rights of termination of the Authority in clauses H1 and H2 shall be available to the Contractor in respect of the Transferee; and

(b) the Transferee shall only be able to assign, novate or otherwise dispose of its rights and obligations under the Contract or any part thereof with the prior consent in writing of the Contractor.

F4.13 The Authority may disclose to any Transferee any Confidential Information of the Contractor which relates to the performance of the Contractor's obligations under the Contract. In such circumstances the Authority shall authorise the Transferee to use such Confidential Information only for purposes relating to the performance of the Contractor's obligations under the Contract and for no other purpose and shall take all reasonable steps to ensure that the Transferee gives a confidentiality undertaking in relation to such Confidential Information.

F4.14 Each Party shall at its own cost and expense carry out, or use all reasonable endeavours to ensure the carrying out of, whatever further actions (including the execution of further documents) the other Party reasonably requires from time to time for the purpose of giving that other Party the full benefit of the provisions of the Contract.

F5 Waiver

F5.1 The failure of either Party to insist upon strict performance of any provision of the Contract, or the failure of either Party to exercise, or any delay in exercising, any right or remedy shall not constitute a waiver of that right or remedy and shall not cause a diminution of the obligations established by the Contract.

F5.2 No waiver shall be effective unless it is expressly stated to be a waiver and communicated to the other Party in writing in accordance with clause A4 (Notices and Communications).

F5.3 A waiver of any right or remedy arising from a breach of the Contract shall not constitute a waiver of any right or remedy arising from any other or subsequent breach of the Contract.

F6 Variation

F6.1 If, after the Commencement Date, the Authority's requirements change, the Authority may request a Variation subject to the terms of this clause 6.

F6.2 The Authority may request a Variation by notifying the Contractor in writing of the Variation and giving the Contractor sufficient information to assess the extent of the Variation and consider whether any change to the Price is required in order to implement the Variation within a reasonable time limit specified by the Authority. If the Contractor accepts the Variation it shall confirm it in writing.

F6.3 If the Contractor is unable to accept the Variation or where the Parties are unable to agree a change to the Price, the Authority may:

- (a) allow the Contractor to fulfil its obligations under the Contract without the Variation to the Specification; or
- (b) terminate the Contract immediately except where the Contractor has already delivered all or part of the Services or where the Contractor can show evidence of substantial work being carried out to fulfil the requirements of the Specification; and in such case the Parties shall attempt to agree upon a resolution to the matter. If a resolution cannot be reached, the matter shall be dealt with under the Dispute Resolution procedure detailed in clause I2 (Dispute Resolution).

F6.4 No Variation will take effect unless and until it is recorded in a validly executed CCN. Execution of a CCN is made via electronic signature as described in clause 1.2 of Section 1 of the Contract.

F6.5 A CCN takes effect on the date on which both Parties communicate acceptance of the CCN via Bravo. On the date it communicates acceptance of the CCN in this way the Contractor is deemed to warrant and represent that the CCN has been executed by a duly authorised representative of the Contractor in addition to the warranties and representations set out in clause G2.

F6.6 The provisions of clauses F6.4 and F6.5 may be varied in an emergency if it is not practicable to obtain the Authorised Representative's approval within the time necessary to make the Variation in order to address the emergency. In an emergency, Variations may be approved by a different representative of the Authority. However, the Authorised Representative shall have the right to review such a Variation and require a CCN to be entered into on a retrospective basis which may itself vary the emergency Variation.

F7 Severability

F7.1 If any provision of the Contract which is not of a fundamental nature is held invalid, illegal or unenforceable for any reason by any court of competent jurisdiction, such provision shall be severed and the remainder of the provisions of the Contract shall continue in full force and effect as if the Contract had been executed with the invalid, illegal or unenforceable provision eliminated.

F8 Remedies Cumulative

F8.1 Except as expressly provided in the Contract all remedies available to either Party for breach of the Contract are cumulative and may be exercised concurrently or separately, and the exercise of any one remedy shall not be deemed an election of such remedy to the exclusion of other remedies.

F9 Entire Agreement

F9.1 The Contract constitutes the entire agreement between the Parties in respect of the matters dealt with therein. The Contract supersedes all prior negotiations between the Parties and all representations and undertakings made by one Party to the other, whether written or oral, except that this clause shall not exclude liability in respect of any fraudulent misrepresentation.

F10 Counterparts

F10.1 The Contract may be executed in counterparts, each of which when executed and delivered shall constitute an original but all counterparts together shall constitute one and the same instrument.

G LIABILITIES

G1 Liability, Indemnity and Insurance

G1.1 Neither Party limits its liability for:

- (a) death or personal injury caused by its negligence;
- (b) fraud or fraudulent misrepresentation;
- (c) any breach of any obligations implied by section 2 of the Supply of Goods and Services Act 1982;
- (d) any breach of clauses D1, E1, E2 and E4;

or

- (e) any liability to the extent it cannot be limited or excluded by Law.

G1.2 Subject to clauses G1.3 and G1.4, the Contractor shall indemnify the Authority and keep the Authority indemnified fully against all claims, proceedings, demands, charges, actions, damages, costs, breach of statutory duty, expenses and any other liabilities which may arise out of the supply, or the late or purported supply, of the Services or the performance or non-performance by the Contractor of its obligations under the Contract or the presence of the Contractor or any Staff on the Premises, including in respect of any death or personal injury, loss of or damage to property, financial loss arising from any advice given or omitted to be given by the Contractor, or any other loss which is caused directly by any act or omission of the Contractor.

G1.3 Subject to clause G1.1 the Contractor's aggregate liability in respect of the Contract shall not exceed £5,000,000.00.

G1.4 The Contractor shall not be responsible for any injury, loss, damage, cost or expense if and to the extent that it is caused by the negligence or wilful misconduct of the Authority or by breach by the Authority of its obligations under the Contract.

G1.5 The Authority may recover from the Contractor the following losses incurred by the Authority to the extent they arise as a result of a Default by the Contractor:

- (a) any additional operational and/or administrative costs and expenses incurred by the Authority, including costs relating to time spent by or on behalf of the Authority in dealing with the consequences of the Default;
- (b) any wasted expenditure or charges;

Such an opinion shall be provided on a without prejudice basis and shall not be used in evidence in any proceedings relating to the Contract without the prior written consent of both Parties; and
- (f) if the Parties fail to reach agreement within 60 Working Days of the Mediator being appointed, or such longer period as may be agreed by the Parties, then any dispute or difference between them may be referred to the Courts unless the dispute is referred to arbitration pursuant to the procedures set out in clause 12.6.

SCHEDULE 1 - SPECIFICATION

SPECIFICATION OF REQUIREMENTS

This Section sets out the Authority's requirements.

1. Summary

The requirement is to design and produce a bespoke Theory of Change tool to capture linkages between activities, outputs and outcomes, to assist Defra in policy evaluation and implement the [Public Value Framework](#) approach.

A practical tool is required to better enable Defra teams to generate robust and dynamic Theories of Change for the evaluation of programmes and strategies across Defra's complex policy remit. The Defra Theory of Change tool will provide clear accountability on how initiatives will deliver and measure outcomes, including metric development.

The tool should be informed by a review of existing tools and literature on Theory of Change and complexity aware evaluation, including Defra's [Complexity Evaluation Framework](#), and should be developed using an agile methodology while delivering Theory of Change workshops on a number of Defra's priority programmes.

This commission will be delivered between January and early June 2021.

2. Background to the requirement

Defra's evidence context

In 2017, the [review into the delivery of public value](#) led by Sir Michael Barber was published, providing an assessment of public sector productivity and identifying key issues faced by the public sector in maximising that productivity and outcomes for the public. The review recommended the introduction of a rigorous framework to inform spending decisions and processes, the Public Value Framework, and improvement in the quality and use of data across government.

HM Treasury has since worked closely with government departments, including Defra, to trial the use of the Public Value Framework through a series of pilots. This includes producing a revised [Public Value framework](#) in 2019 and embedding it in processes, such as providing an emphasis and commitment to measuring outcomes and public value within the most recent Spending Review.

Evidence of the delivery of public value and outcomes therefore plays a central role in government policy and spending decisions, and government departments are increasingly required to evidence more clearly how their interventions and activities achieve outcomes.

Defra recognises the importance of using evidence and evaluation in designing its policy and in assessing the impact of policies on people, communities, industry, other organisations, and the environment. As demonstrated in the Supplementary evidence report of the [Defra 25 Year Environment Plan](#), Defra is also committed to using evaluation and evidence to support complex environmental planning, through use of robust metric and evaluation development.

Defra policies work across environmental, economic and social systems which are characterised by contexts of substantial uncertainty, long timescales and many diverse components which interact in adaptive, unpredictable, and non-linear ways¹. For policy

and evaluation, this changing context leads to challenges in measuring and attributing change to interventions. This means there can be difficulties in building an evidence base for how policies, or a programme of policy interventions, are achieving their intended outcomes.

Defra is well aware of the benefits of using system based approaches to meet the challenges of setting environmental policy, and has commissioned the [Systems Research Programme](#) to support greater clarity on the interconnectedness of environmental issues for policy making.

Specifically to support evaluation, in 2019 Defra published evaluation guidance, the [Complexity Evaluation Framework](#): a toolkit to support the design, commissioning, management and dissemination of complexity aware evaluation, which builds on systemic approaches and offers analysts ways to incorporate this thinking into understanding, designing and embedding policy evaluation.

The role of Theory of Change

In evaluation, Theory of Change identifies the intended logic of an intervention: setting out the inputs and activities, and how these are understood to achieve the intended outputs, outcomes and wider impacts. Theory of Change is widely recognised as being a method to derive programme theory for an intervention to support policy evaluation and monitoring, and enables a clear view of outcomes and the impact of delivery, in line with Public Value Framework principles.

Within evaluation literature there are a wide range guidance and resources for developing Theories of Change, including the new [HM Treasury Magenta Book](#) guidance for government evaluation.

However, traditional approaches to Theory of Change models and guidance often take a linear or static view of system characteristics, which may be more appropriate for simple or less complex policy contexts. Applying these models in the fast-paced changing context in which Defra operates can mean evaluation frameworks rapidly lose relevance and that data is collected in the wrong parts of the system to best estimate impact. As recommended in the Defra Complexity Evaluation Framework, rapidly changing contexts such as these require more flexible and adaptive means to scope and frame policy evaluations.

There are a number of studies which have previously attempted to do this for the evaluation of environmental initiatives, including: [complex Theory of Change for the Food Standards Agency](#)², and [dependency modelling work](#)³ to illustrate and understand how programme activities contribute to outcomes in Flood and Coastal Erosion Risk Management. This commission seeks to build on these approaches, by developing a tool to unify approaches to adaptive programme theory. This tool needs to be applicable across Defra's policy areas and support policy evaluation, to ensure Defra can better

account for how outcomes are being achieved and implement a Public Value Framework approach.

3. Research objectives

This commission is to develop a practical Theory of Change tool for use across Defra programmes, policies and strategies. The overarching aim of the tool is to enable complex Defra policies, programmes and strategies to have robust frameworks through which to understand and evidence impact and progress, and to collect evidence against organisational outcomes, as part of the delivery of the Public Value Framework approach.

The research has the following objectives (with research questions embedded below them):

1. To understand and critically review existing programme theory literature and resources, and to scope Defra's Theory of Change requirements.
 - To what extent are there existing viable models for developing Theories of Change that handle complexity?
 - To what extent do existing approaches and resources meet Defra's needs?
 - What additional needs does Defra have for developing Theories of Change, and how should these be met?
2. To co-develop Theory of Change models with a selection of Defra's complex, priority policy and programme areas, embedding Public Value Framework principles.
 - What are the local policy needs and strategic requirements for Theories of Change?
 - What are the practical challenges faced by Defra policy teams in developing Theories of Change and the development of evaluation and metrics?
 - How can a Theory of Change tool capture complex system dynamics and enable teams to monitor change over time?
3. To produce a practical Defra Theory of Change tool for use by policy teams and analytical leads across the department in developing robust, complexity-aware Theories of Change for evaluation and wider policy planning.
 - What evidence is there that this tool will effectively support the robust evaluation of complex policies and programmes across Defra?
 - How is this tool best implemented to ensure policy and analytical buy in?
 - What guidance and support is required for teams to practically use and implement the final product?

Figure 1, below, describes more fully how the Defra Theory of Change is intended to actualise systems thinking and shape metric and evaluation development.

Figure 1: Defra Theory of Change tool objectives

The Theory of Change tool should enable a Defra strategy, programme or project to present clearly what outcomes are being delivered and how, and how this can be evidenced, in line with Public Value Framework principles.

The Defra Theory of Change tool should provide a framework to:

To ensure that Defra has a better account of how it delivers outcomes and is able to track and evidence them in a more robust way as part of implementing a Public Value Framework approach

- Designed to be developed and updated iteratively
- Providing a longer term view of evidence needs and quality
- Supporting collaboration across teams and disciplines

4. Methodology

The overall objective of this research is to produce a Defra Theory of Change tool for use across the department in developing complexity aware Theories of Change. These are to provide a clear, robust account of how activities will achieve outcomes, and be the basis for policy evaluation and metric development. The tool is intended to be practical, ready to be used by analysts and policy makers.

The Defra Theory of Change tool is to be developed iteratively with Defra's Strategic Evaluation Team (SET) in the Analysis and Insight Directorate (AID), policy advisors and wider analytical teams to ensure it meets the specific requirements of Defra.

The project is intended to be delivered based on the following principles:

- **Participatory:** engaging Defra policy and analyst stakeholders throughout the development of the tool, to ensure it is practical and relevant for the Defra context.
- **Innovative:** drawing on and together the existing Defra developments in this space, including: as the [Complexity Evaluation Framework](#), [Systems Research Programme](#) and the Defra approach to implementing the Public Value Framework.
- **Agile:** inductively defining what needs to be included in a Defra Theory of Change tool and using insight from delivering Theory of Change to test and adapt the development of a tool.

A suggested research design is presented below, which is anticipated to meet the requirements of the research. However, bidders are encouraged to propose alternative methods which may more effectively achieve the specified aims and objectives.

a) Inception

An initial phase for the contractor and Defra project team to agree a shared vision of the project objectives; discuss and add detail to the proposed methodology; establish project management processes and the handling of risk. This phase will include an inception meeting with the SET project manager and for the contractor to produce an updated project plan for Defra sign-off.

b) Scoping with Defra policy and analytical leads

Scoping interviews to be undertaken with approximately ten strategic stakeholders to establish the project context and the strategic and practical needs for a Theory of Change tool. Stakeholders are anticipated to include Defra's Strategic Evaluation Team (SET) and a selection of Defra policy teams with whom the contractor will be delivering Theory of Change workshops (see section (d) for further details), in order to gain a full understanding of the local needs and challenges for Theory of Change.

c) Literature review

A rapid evidence review of academic and grey literature on existing tools, reviews of programme theory approaches and wider literature on Theory of Change. We also anticipate the contractor to draw on their knowledge of Theory of Change and knowledge of 'what works' in undertaking complexity-aware evaluation. The literature review should seek to explore the following questions:

- What are the existing approaches to developing Theories of Change or programme theory that handle complexity?
 - a. What are the core principles and themes?
 - b. How do these models identify complex system approaches?

- c. In which contexts have these models been applied?
- d. What are the opportunities and challenges of implementing these?
- e. What gaps are there?
- What existing examples are there of practical Theory of Change tools or toolkits? To what extent are they effective and accessible? How and in what context?
- How applicable are these approaches to monitoring outcomes as part of implementing a Public Value Framework approach?

d) Delivery of four Theory of Change workshops

The delivery of half-day workshops to develop Theories of Change with four Defra teams working on priority strategies or programmes, which may include commitments around the 25 Year Environment Plan. These workshops should be delivered in February 2021 to serve two purposes:

- To directly support identified Defra teams in establishing Theories of Change, to support Defra in developing its plans for the delivery and evidencing priority outcomes.
- To inductively define what needs to be included in a Defra Theory of Change tool, challenges with existing approaches, and to make use of agile approaches in developing the final Theory of Change tool.

The project manager for the research will share with the contractor a number of complex, priority policy areas which would benefit from use of a Theory of Change approach as part of implementing the Public Value Framework. During the inception phase these policy areas will be shared with the contractor for review and feedback, and on agreement the Defra project manager will facilitate contact with these teams.

Following scoping interviews with Defra policy teams (section (b)), the contractor will arrange the Theory of Change workshops. The contractor will then facilitate the workshops using bespoke drafted Theory of Change tools based on scoping and literature review findings, in addition to any learning from use of tools in previous Defra sessions.

The contractor should provide a write-up or summary note for the Defra team following delivery of each workshop, including a visual representation of the Theory of Change model.

e) Draft reporting

The Defra Theory of Change tool will be developed based on the scoping and literature review, and further developed and tested iteratively across the delivery of the four workshops, to produce a full draft tool.

Specification for the Defra Theory of Change tool:

- An innovative, bespoke approach to Theory of Change, learning from the requirements and experience of delivering the Theory of Change workshops, and building on academic and grey literature.
- A fully integrated Theory of Change tool (including blank templates if appropriate for teams to use and complete) and supporting 'user guidance', allowing policy makers and analysts to use the tool independently within their own policy areas.

Alongside the draft tool, the contractor will provide a short internal paper, summarising the literature reviewed and presenting the outputs from the Theory of Change workshops, and therefore the recommendations for the form of the Theory of Change tool.

f) Testing and feedback workshop

As part of the development and refinement of the final Theory of Change tool, the contractor will deliver a 2-hour workshop with key internal stakeholders to discuss and test the drafted Theory of Change tool.

g) Final reporting

There will be two main outputs from this research, required to be publication ready: a Defra Theory of Change tool and a short accompanying research report.

The final Defra Theory of Change tool will include refinements to the draft based on the testing workshop.

The short accompanying report will outline the approach taken and the development of the tool; detailing findings from Theory of Change workshops, the literature review and synthesising feedback informing the development and testing of the tool. This should also include the four bespoke Theories of Change produced for Defra teams, as a separate annex (as described in section (d)).

5. Project Governance

Management of the project will be led by Defra's Strategic Evaluation Team (SET) in the Analysis and Insight Directorate (AID). The SET project manager will facilitate invitations to meetings/workshops and make introductions with relevant Defra contacts where necessary for the contractor. It is anticipated the contractor will need to use an agile methodology to the contract, working with the SET project manager to iterate and develop the final products. Bidders are requested to include within their bids costings for at least one project management discussion per week (by phone).

Defra will establish an internal steering group for this commission, which might include colleagues from the Analysis and Insight Directorate, Strategy, and policy evidence leads. We request at least three project meetings (held virtually) with this group over the course of the contract; an inception meeting, progress reporting, and deliverables testing and feedback workshop (see section on Deliverables).

COVID-19 guidelines need to be considered and adhered to in undertaking this contract. It is anticipated that project meetings and fieldwork will be undertaken virtually, given current guidelines, and bidders are asked to outline consideration of this in their proposals.

The contractor will be paid by invoice following satisfactory completion of the deliverables at payment points 1, 2, 3 and 4 as set out in the following section.
