

EMA Accelerator – Early Market Engagement – Industry Day

The Dstl EMA Programme has the mandate to conduct S&T research to identify and develop Generation after Next (GAN) Electromagnetic Warfare (EW) concepts and technologies. To support this undertaking the EMA Programme is considering the need for a new service delivery construct to deliver the required EMA S&T research.

Further to the Prior Information Notice Questionnaire released on DSP 08/07/2024 we would like to continue with our early market engagement.

We will be holding a virtual Industry Day, duration 1 hour on 15th October 10:00 – 11:00.

The proposed format of the 1 hour session:

- EMA Programme presentation on the latest Statement of Requirement
- The procurement timeline and approach
- Questions and answers opportunity

The session may also serve as a networking opportunity to assist in the connecting of interested parties in support of the procurement. We will be asking attendees the following questions after the session, format to be confirmed:

1. Are you interested in taking part in this procurement activity?
2. In which capacity are you interested: Lead Supplier, Consultation Group member or Delivery Group member?
3. Are you happy for your details to be shared with all the attendees of the session?
4. Please provide contact details accordingly.

Please be advised that this activity does not constitute a commitment by the Authority and the supplier undertakes any engagement at their own risk. There is no obligation for MOD to continue with this requirement and any resulting procurement procedure will be conducted competitively.

Discussion points from the session will be noted and information gathered may be shared at a later stage with all potential bidders in order to maintain a fair competition.
