Section 2 – About Our Customer

Science and Technology Facilities Council (STFC)

STFC is a world-leading multi-disciplinary science organisation, whose goal is to deliver economic, societal, scientific and international benefits to the UK and its people – and more broadly to the world.

STFC support an academic community of around 1,700 in particle physics, nuclear physics, and astronomy including space science, who work at more than 50 universities and research institutes in the UK, Europe, Japan and the United States, including a rolling cohort of more than 900 PhD students.

The organisation's large-scale scientific facilities in the UK and Europe are used by more than 3,500 users each year, carrying out more than 2,000 experiments and generating around 900 publications.

The combination of access to world-class research facilities and scientists, office and laboratory space, business support, and an environment which encourages innovation has proven a compelling combination, attracting start-ups, SMEs and large blue chips such as IBM and Unilever.

Examples of funded research

- STFC is providing the design infrastructure for the £23bn UK microelectronics sector that underpins strategically important industries worth £78bn to the UK economy
- STFC's ISIS facility and its users, working in partnership with the NHS, developed a novel material to improve the treatment of cleft lip and palate, speeding up healing times and reducing operating costs
- STFC's Synchrotron Radiation Source was used to understand how conventional anti-malarial drugs work, allowing the development of more effective treatment to reduce the devastating global impact of malaria
- STFC's ISIS facility is identifying new materials that can safely and conveniently store hydrogen, enabling the development of hydrogen-fuelled cars reducing reliance on fossil fuels and cutting carbon emissions

RAL has had significant involvement in over 200 space missions and are at the forefront of Space research in the UK. RAL Space provides space instrumentation testing and ground-based facilities, it has expertise in instrument design and fabrication as well as data processing, analysis and curation facilities. RAL Space operates S- and X-band ground-station facilities, as well as leading conceptual studies for future missions. RAL Space works with space and ground-based groups around the world.

The STFC Newton Agri-Tech Fund

The STFC Newton Agri-tech fund is a RAL Space run programme aimed at developing China through the UK strengths in space enabled technology and remote sensing data and modelling. This fund provides real solutions for:

Sustainable intensification:

- Improving yields
- Minimising environmental impacts

Climate smart farming:

- Reducing emissions from agriculture
- Climate change resilience

Pests and diseases monitoring and detection:

- Detection and monitoring

- GNSS based technologies for targeted in field resource use
- Remote monitoring systems.

The STFC Newton Agri-Tech Fund is a 5-year programme with a budget of £13.5M. This initiative uses the UK's expertise in remote sensing and modelling in the area of agricultural technology (agri-tech) to work with and aid the Chinese farming community. The Agri-Tech programme will use the breakthroughs in satellite imaging, remote sensing and modelling to which they are helping to provide facilities and technologies that are supporting research driven, decision making tools for farmers and policy makers.

Aims

The Newton Agri-Tech programme requires Impact and Technical Analyst(s) advice and support with the aim of ensuring the impact of the research in the area of agricultural technology to China.

The Impact and Technical Analyst(s) will plan and be responsible for the delivery of a strategic programme of work to support and improve agricultural technology in China.

Objectives

The Impact and Technical Analyst(s) will provide will need to achieve four key objectives:

- Ensure findings from the programme's research are effectively cohered, disseminated and utilised by policy makers and users, particularly in developing countries
- Ensure the programme is meeting the Overseas Development Assistance (ODA) guidelines

Background to the Requirement

Background:

The STFC Newton Agri-Tech Fund is a 5 year programme with a budget of £13.5M. So far on the programme we have done the following

Pathfinder projects

31st December 2014- 31st march 2015

The Pathfinder projects developed science and technology partnerships between the UK and China. As well as testing novel agri-tech solutions developed from space related programmes. The aim of the pathfinder projects was to act as a seed-corn funding mechanism. By successfully de-risking novel concepts these pathfinder projects would enable larger proposals and thereby, maximise the potential to realise opportunities for next-stage funding.

These projects provided a rapid funding route enabling researchers to demonstrate how UK science and technological capabilities can be applied to global agricultural challenges of countries such as China.

These projects performed scoping studies, developed proof of concept ideas or and ran small scale trials.

We had 12 pathfinder projects with the following themes

- **Climate smart agriculture** – developing systems and solutions to improve decision support processes at national, regional and local scales.
- **Dealing with pest and disease threats** – forecasting and monitoring systems to deal with emerging pest and disease threats.
- **Sustainable intensification** – assisting Chinese producers attain higher outputs with the same or lower inputs.
- **Precision agriculture** – advancing progress in the development and exploitation of context-specific precision application and management technology.
- **Enabling technologies** – demonstration of novel technical solutions that show high potential for addressing any of the above challenge topics.

Review papers

31st December 2014- 31st march 2015

The Newton Agri-Tech programme asked for 7 review papers from specialists in many areas to help identify areas of priority and need for Agri-tech in China

Sandpit projects

31st march 2015 to 31st march 2016

In march 2015 we held a joint workshop in China, this is where partnerships of academia and industry between the UK and China worked together to produce 7 projects relating to the themes of the pathfinder projects.

R&D UK/China Joint projects

31 March 2016 -

The R&D projects (5) are all part of an international collaboration, involving academic and Industrial institutes from UK and China bringing together expertise advance scientific research in space applications in remote sensing, information acquisition, data processing, modelling and simulation, which target challenges faced by the Chinese agricultural sector.

The R&D UK/China Joint projects aim to combine the UK and China's research strengths in satellite technologies and expertise in satellite-derived data products to solve fundamental scientific and technology barriers and provide research-driven decision making tools for farmers and policy makers.

The overall value of the R&D projects is £5m (80% FEC) on the UK side plus an equivalent resource from the China side.

The Newton Agri-Tech Network +

31 March 2015

The Network+ are facilitating knowledge sharing and the creation of new partnerships and play a strategic role in ensuring that research is aligned with user needs.

The overall value of the Network + is £2.5M at 100% FEC (£2.0m at 80% FEC).

The aims of the Network+ include:

To ensure that the Agri-Tech in China Newton projects and the associated institutes are networked with other activities, existing or planned (e.g. the RCUK Global Food Security programme, ESRC Nexus Network, Agri-Tech Catalyst, Satellite Applications Catapult)

- To develop a multi-disciplinary community focused on addressing agri-tech development issues in China
- To deliver scoping and proof of concept studies to test and de-risk ideas

Award Scoring criteria

Evaluation Justification Statement

In consideration of this particular requirement UK SBS has decided to evaluate Potential Providers by adopting the weightings/scoring mechanism detailed within this RFP. UK SBS considers these weightings to be in line with existing best practice for a requirement of this type.

Questionnaire	Q No.	Question subject	Maximum Marks
Price	AW5.2	Price	20%

Quality	PROJ1.2	Demonstrating Expertise, Capacity and Project Plan	20%
Quality	PROJ1.3	Methodology and Strategy	45%
Quality	PROJ 1.4	Social and Economic impact	Information only

Award Evaluation of criteria

Non-Price elements

Each question will be judged on a score from 0 to 100, which shall be subjected to a multiplier to reflect the percentage of the evaluation criteria allocated to that question.

Where an evaluation criterion is worth 20% then the 0-100 score achieved will be multiplied by 20.

Example if a Bidder scores 60 from the available 100 points this will equate to 12% by using the following calculation: Score/Total Points available multiplied by 20 ($60/100 \times 20 = 12$)

Where an evaluation criterion is worth 10% then the 0-100 score achieved will be multiplied by 10.

Example if a Bidder scores 60 from the available 100 points this will equate to 6% by using the following calculation: Score/Total Points available multiplied by 10 ($60/100 \times 10 = 6$)

The same logic will be applied to groups of questions which equate to a single evaluation criterion.

The 0-100 score shall be based on (unless otherwise stated within the question):

0	The Question is not answered or the response is completely unacceptable.
10	Extremely poor response – they have completely missed the point of the question.
20	Very poor response and not wholly acceptable. Requires major revision to the response to make it acceptable. Only partially answers the requirement, with major deficiencies and little relevant detail proposed.
40	Poor response only partially satisfying the selection question requirements with deficiencies apparent. Some useful evidence provided but response falls well short of expectations. Low probability of being a capable supplier.
60	Response is acceptable but remains basic and could have been expanded upon. Response is sufficient but does not inspire.
80	Good response which describes their capabilities in detail which provides high levels of assurance consistent with a quality provider. The response includes a full description of techniques and measurements currently employed.
100	Response is exceptional and clearly demonstrates they are capable of meeting the requirement. No significant weaknesses noted. The response is compelling in its description of techniques and measurements currently employed, providing full assurance consistent with a quality provider.

All questions will be scored based on the above mechanism. Please be aware that there may be multiple evaluators. If so, their individual scores will be averaged (mean) to determine your final score as follows:

Example

Evaluator 1 scored your bid as 60

Evaluator 2 scored your bid as 40

Evaluator 3 scored your bid as 80

Evaluator 4 scored your bid as 60

Your final score will $(60+40+80+60) \div 4 = 60$

Price elements will be judged on the following criteria.

The lowest price for a response which meets the pass criteria shall score 100.

All other bids shall be scored on a pro rata basis in relation to the lowest price. The score is then subject to a multiplier to reflect the percentage value of the price criterion.

For example - Bid 1 £100,000 scores 100.

Bid 2 £120,000 differential of £20,000 or 20% remove 20% from price scores 80

Bid 3 £150,000 differential £50,000 remove 50% from price scores 50.

Bid 4 £175,000 differential £75,000 remove 75% from price scores 25.

Bid 5 £200,000 differential £100,000 remove 100% from price scores 0.

Bid 6 £300,000 differential £200,000 remove 100% from price scores 0.

Where the scoring criterion is worth 50% then the 0-100 score achieved will be multiplied by 50

In the example if a supplier scores 80 from the available 100 points this will equate to 40% by using the following calculation: Score/Total Points multiplied by 50 ($80/100 \times 50 = 40$)

The lowest score possible is 0 even if the price submitted is more than 100% greater than the lowest price.

5.5. Evaluation process

5.5.1 The evaluation process will feature some, if not all, the following phases

Stage	Summary of activity
Receipt and Opening	- RFP logged upon opening in alignment with UK SBS's procurement procedures. - Any RFP Bid received after the closing date will be rejected unless circumstances attributed to UK SBS or the e-sourcing tool beyond the bidder control are responsible for late submission.
Compliance check	- Check all Mandatory requirements are acceptable to UK SBS. - Unacceptable Bids maybe subject to clarification by UK SBS or rejection of the Bid.
Scoring of the Bid	Evaluation team will independently score the Bid and provide a commentary of their scoring justification against the Selection criteria.
Clarifications	The Evaluation team may require written clarification to Bids
Re - scoring of the Bid and Clarifications	Following Clarification responses, the Evaluation team reserve the right to independently re-score the Bid and Clarifications and provide a commentary of their re-scoring justification against the Selection criteria.
Shortlisting of Bidders	UK SBS will shortlist the Bidders based on the Responses received and the Evaluation Model detailed in Section 5 of the RFP.
Validation of unsuccessful Bidders	To confirm contents of the letters to provide details of scoring and relative feedback on the unsuccessful Bidders Bid in comparison with the successful Bidders Bid.

In particular, UK SBS is required to form an independent judgment concerning whether the information is exempt from disclosure under the FoIA or the EIR and whether the public interest favours disclosure or not. Accordingly, UK SBS cannot guarantee that any information marked 'confidential' or "commercially sensitive" will not be disclosed.
