FATS Direct Award/Single Source Declaration

Project/Delivery team:	
Task Title:	
FATS 5 Task Number:	

I confirm that this procurement strategy has been developed in accordance with EU Procurement Directives and the UK Procurement Regulations and MOD Commercial policy, following an assessment and clear understanding of the supplier market and associated risks linked with delivery of the requirement.

I confirm that I am content to approve this technical support services task and its associated procurement strategy as a direct award, single source contract to a named prime contractor under FATS 5 and that I have the appropriate Commercial Licence and delegation to duly authorise this task.

Furthermore, I confirm that engagement with Commercial Assurance, Scrutiny and Due Diligence (CASDD) team, Defence Intellectual Property Services (DIPR), Central Legal Services (CLS) and Commercial Policy and all other relevant business case approving bodies has been undertaken and concluded, as is necessary and appropriate.

This declaration shall be formally recorded on file and will be retained for the duration of this contract and made available for scrutiny as required.

Date	

The member of staff signing this declaration must be as a minimum, a Government Commercial Officer at Band B2 (or equivalent) holding the appropriate Commercial licence and delegation.

FATS Technical Filter descriptors

Overview

FATS 5 filters are a mixture of domain specific and MOD wide filters.

Domain definitions

Air. Tasks related to all Air platforms inclusive of fast jets, support aircraft, training aircraft, helicopters, unmanned air vehicles (UAVs) and simulators. All supporting airfield equipment, platform ground support equipment and infrastructure required to operate, maintain and sustain the associated capabilities and the context/environment in which Air capabilities operate e.g. airspace, airfields.

Land. All land based equipment from soldier systems including clothing and body armour through to all classes of Land vehicles and supporting infrastructure and the context/environment/terrain in which Land capabilities operate.

Maritime. All shipping including surface ships, submarines, minor craft, auxiliaries, boats and their associated combat systems, supporting infrastructure and the context/environment in which they operate.

Nuclear. All technical matters related to UK Nuclear capabilities.

WOME (Weapons, Ordnance, Munitions and Explosives). All munitions across Air, Land and Maritime environments including complex weapons and supporting infrastructure.

C4ISTAR (Command, Control, Communications, Computers, Information, Surveillance, Target Acquisition and Reconnaissance). All equipment's and infrastructure associated with the UK C4ISTAR capabilities and the elements linking them together.

Filter Definitions

1. Air Engineering

Covering all engineering tasks in the Air domain including but not limited to: Requirements elicitation and writing, Engineering Analysis, Failure Investigation and Analysis (including failure trend analysis), Design Services (propulsion, structures, avionics, software), Technology Management, Evaluation, Trials and Testing (including but not limited to Electro Magnetic Capability (EMC), Climatic, Legislative and Regulatory compliance, Reliability), Obsolescence Management, Systems Engineering, Platform performance and handling, Platform protection, Aerial delivery

2. Land Engineering

Covering all engineering tasks in the Land domain including but not limited to: Requirements elicitation and writing, Engineering Analysis, Failure Investigation and Analysis (including failure trend analysis), Design Services, Technology Management, Trials and Testing (including but not limited to Electro Magnetic Capability (EMC), Climatic, Legislative compliance, Reliability), Obsolescence Management, Systems Engineering, Tie Down Scheme Assessment

3. Maritime Engineering

Covering all engineering tasks in the Maritime domain including but not limited to: Requirements elicitation and writing, Engineering Analysis, Failure Investigation and Analysis (including failure trend analysis), Design Services, Technology Management, Trials and Testing (including but not limited to Electro Magnetic Capability (EMC), Climatic, Legislative compliance, Reliability), Obsolescence Management, Systems Engineering

4. Nuclear Engineering

Covering all engineering tasks in the Nuclear domain including but not limited to: Requirements elicitation and writing, Engineering Analysis, Failure Investigation and Analysis (including failure trend analysis), Design Services, Technology Management, Trials and Testing (including but not limited to Electro Magnetic Capability (EMC), Climatic, Legislative compliance, Reliability), Obsolescence Management, Systems Engineering

5. WOME Engineering

Covering all engineering tasks in the Weapons, Ordnance, Munitions & Explosives (WOME) domain including but not limited to: Requirements elicitation and writing, Engineering Analysis, Failure Investigation and Analysis (including failure trend analysis), Design Services, Technology Management, Trials and Testing (including but not limited to Electro Magnetic Capability (EMC), Climatic, Legislative compliance, Reliability), Obsolescence Management, Systems Engineering, Weapons effects on structures (including but not limited to hardened structures, force protection engineering, explosives storage, building counter terrorist measures and physical security)

6. C4ISTAR Engineering

Covering all engineering tasks in the Command, Control, Communications, Computers, Information/Intelligence, Surveillance, Targeting Acquisition and Reconnaissance (C4ISTAR) domain including but not limited to: Requirements elicitation and writing, Engineering Analysis, Failure Investigation and Analysis (including failure trend analysis), Design Services, Technology Management, Trials and Testing (including but not limited to Electro Magnetic Capability (EMC), Climatic, Legislative compliance, Reliability), Obsolescence Management, Systems Engineering

7. Air Acquisition Safety

Covering all Acquisition Safety aspects of the Air domain including but not limited to: Hazard Identification and Analysis, Safety Assessment Reports, Independent Safety Auditing, Independent Technical Expert advice, Legislative and Regulatory compliance, Airworthiness assessments, Platform Certification, Weapon Carriage & Release, Safety Management & Governance

8. Land Acquisition Safety

Covering all Acquisition Safety aspects of the Land domain including but not limited to: Hazard Identification and Analysis, Safety Case Reports, Independent safety auditing, Legislative compliance audits, Load carriage assessments and clearances

9. Maritime Acquisition Safety

Covering all Acquisition Safety aspects of the Maritime domain including but not limited to: Hazard Identification and Analysis, Safety Case Reports, Independent safety auditing, Legislative compliance audits, Load carriage assessments and clearances, Class Surveys

10. Nuclear Acquisition Safety

Covering all Acquisition Safety aspects of the nuclear domain including but not limited to: Hazard Identification and Analysis, Safety Case Reports, Independent safety auditing, Legislative compliance audits, Regulatory advice and services

11. WOME Acquisition Safety

Covering all Acquisition Safety aspects of the Weapons, Ordnance, Munitions & Explosives (WOME) domain including but not limited to: Hazard Identification and Analysis, Safety Case Reports, Independent safety auditing, Legislative compliance audits, Load carriage assessments and clearances

12. C4ISTAR Acquisition Safety

Covering all Acquisition Safety aspects of the Command, Control, Communications, Computers, Information/Intelligence, Surveillance, Targeting Acquisition and Reconnaissance (C4ISTAR) domain including but not limited to: Hazard Identification and Analysis, Safety Case Reports, Independent safety auditing, Legislative compliance audits

13. Science and Medical

Covering all Scientific and Medical aspects, including but not limited to: Provision of medical advice (not clinical), Provision of specialist medical testing services (not clinical), Provision of specialist animal advice (not veterinary care), Scientific advice in support of Authority tasking's (taken from any branch of science).

14. NOT USED

15. NOT USED

16. NOT USED

17. NOT USED

18. NOT USED

19. Acquisition Environmental Support

Covering all aspects of Acquisition Environmental support: including but not limited to: Hazard Identification and Analysis, environmental management systems, environmental communications and training, independent environmental auditing, legislative compliance audits.

20. Occupational Health and Safety

Covering all aspects of Occupational Health and Safety including but not limited to: Hazard Identification and Analysis, Safety management Systems, health and safety communications and training, Independent safety auditing, Legislative compliance audits

21. Occupational Environmental Support

Covering all aspects of Occupational Environmental support: including but not limited to: Hazard Identification and Analysis, environmental management systems, environmental communications and training, Independent environmental auditing, legislative compliance audits.

22. Quality and Configuration Management

Covering all Quality and Configuration, including but not limited to: Quality Management Systems Development, Quality Management Systems Audit, Quality Assurance, Inspections and Audit, Configuration Management Planning and Auditing

23. Integrated Logistics Support (ILS)

Covering all aspects of ILS, including but not limited to: Support requirements setting; ILS/Reliability Programme development; Reliability analysis; Logistics Support Analysis; Support Solution modelling; Support Solution planning; North Atlantic Treaty Organisation (NATO) Codification; Support Information management: Specialist Tools, Support and Test Equipment ranging and scaling; Training (including simulation) analysis; Authoring and Update of Publications; Spares Provision modelling; Packaging, Handling, Storage and Transportation; Obsolescence management

24. Mathematical and Statistical Analysis

Mathematical and statistical analysis. Covering all mathematical and/or statistical analysis involving analytical modelling to hydrocode modelling in support of any domain or other MOD wide filter.

25. Operational Analysis

Covering all Operational Analysis but not solely mathematically based approach to contribute to defence strategic guidance, force structures, doctrine, assessment of requirements, planning, acquisitions and system development. To provide objective advice on balance of investment and operational issues from the individual systems to wider issues. Including: development of concepts of analysis, selection of model types and specific models, model development and customisation, data preparation, capture and explanation of assumptions, and preparation and presentation of reports. Includes all operational analysis including static modelling, dynamic simulations and people/equipment in the loop assessments.

26. Software Acquisition and Support

Covering all non-Dii Information System aspects, including but not limited to: Software management and assurance, network design and test, hardware design and test, software safety, security and cyber defence. Advice on development of safety critical software, software and system architectures to manage safety critical software. Advice on information security and cyber vulnerabilities of software based systems. Advice on cyber physical systems.

27. Systems of Systems Engineering

Covering systems thinking and systems engineering to develop an initial understanding of capabilities, systems of systems or information services. Including development of user requirements, measures of effectiveness, alternative capability assessment, capability design and architecting, development of Conduct of Operations (CONOPS) and Concept of Employment (CONEMP). Balance of Investment (BoI), Combined Operational Evaluation and Investment Appraisal (COEIA) Includes System of System Approach (SOSA) services.

28. Human Factors and Human Factors Integration (HFI)

Covering development of Target Audience Descriptions, human centric user and system requirements, Early Human Factors Analyses, early Comparability Analyses, human centric risk identification and management, pan Defence Lines of Development (DLOD) and systems level trade studies, technical advice on formulating the HFI programme of work, application of Human Factors knowledge and tools to specific human centric systems problems, both cognitive and physical from initial pre concept work, through requirements definition, design, development, Integration, Verification and validation.

29. Cost Analysis and Assurance Services (CAAS)

Covering delivery of cost management outputs as articulated in CAAS' products and services catalogue.

Glossary of Acronyms

CCS	Crown Commercial Service
CPS	Commercial Policy Statement
DE&S	Defence Equipment & Support
DIO	Defence Infrastructure Organisation
DSPCR	Defence & Security Public Contract Regulations
Dstl	Defence Science & Technology Laboratory
EDP	Engineering Delivery Partner
FATS	Framework Agreement for Technical Support
FBC	FATS Business Case
FIN	Function Information Notice
ITT	Invitation to Tender
KiD	Knowledge in Defence
OGD	Other Government Department(s)
PCR	Public Contract Regulations
PQQ	Pre-Qualification Questionnaire
SME	Small-Medium Enterprise
SOR	Statement of Requirement
SQUEP	Suitably Qualified & Experienced Person(s)
TOF	Tasking Order Form
VFM	Value For Money
