Nothing in this clause shall exclude liability for fraud or fraudulent misrepresentation.
- 20.5 Any waiver or relaxation either partly, or wholly of any of the terms and conditions of the Agreement shall be valid only if it is communicated to the other Party in writing and expressly stated to be a waiver. A waiver of any right or remedy arising from a breach of contract shall not constitute a waiver of any right or remedy arising from any other breach of the Agreement.
- 20.6 The Agreement shall not constitute or imply any partnership, joint venture, agency, fiduciary relationship or other relationship between the Parties other than the contractual relationship expressly provided for in the Agreement. Neither Party shall have, nor represent that it has, any authority to make any commitments on the other Party's behalf.
- 20.7 Except as otherwise expressly provided by the Agreement, all remedies available to either Party for breach of the Agreement (whether under the Agreement, statute or common law) are cumulative and may be exercised concurrently or separately,

and the exercise of one remedy shall not be deemed an election of such remedy to the exclusion of other remedies.

- 20.8 If any provision of the Agreement is prohibited by law or judged by a court to be unlawful, void or unenforceable, the provision shall, to the extent required, be severed from the Agreement and rendered ineffective as far as possible without modifying the remaining provisions of the Agreement, and shall not in any way affect any other circumstances of or the validity or enforcement of the Agreement.

- 21.3 Notices under clauses 15 (Force Majeure) and 16 (Termination) may be served by email only if the original notice is then sent to the recipient by personal delivery or recorded delivery in the manner set out in clause 21.1.

22. Governing Law and Jurisdiction

- 22.1 The validity, construction and performance of the Agreement, and all contractual and non contractual matters arising out of it, shall be governed by English law and shall be subject to the exclusive jurisdiction of the English courts to which the Parties submit.

SCHEDULE 1 - Specification

This Section sets out the Authority's requirements.

1. Project Aim

Develop a robust spatial map of where sea angling occurs in England.

2. Background

Sea angling is a major pastime around English coastal waters however the specific spatial information needs improving. This project will create a national dataset showing the most important sites used in sea angling in English waters. This will improve the delivery of marine plan policies relating to recreational and commercial sea angling and their consideration alongside other uses of space in marine plan areas. Spatial information on sea angling will also assist the Marine Management Organisation (MMO) and Inshore Fisheries Conservation Authorities (IFCAs) in managing potential impacts on Marine Protected Areas.

3. Objectives

The objectives in this scoping exercise are as follows:

- compile existing public sources of local knowledge of where sea angling is commonly undertaken to identify a list of unique sites and the species targeted
- provide robust data on the spatial and temporal distribution of the sites currently important for sea angling
- identify changes in activity patterns and species targeted over time
- use stakeholder engagement to validate the approach through testing the spatial outputs using key stakeholder knowledge

The Centre for Environment, Fisheries and Aquaculture Science (Cefas) have been involved in a similar piece of work in Wales led by Bangor University and have worked closely with the MMO in the development of this specification.

4. Outputs

The main outputs from this project will include the following:

- inception report including an agreed detailed programme of work
- technical report associated outlining methods including data gathering and analysis, and containing completed evidence and data quality assessments (data and evidence QA templates will be supplied by the MMO)
 - stakeholder engagement report
 - a draft final report for review by MMO
 - final report with associated comments log identifying how comments and recommendations identified at the draft final stage have been addressed

- GIS shapefiles, associated styling including collation of GIS files (ESRI format (compatible with ArcGIS 10.2) and MEDIN compliant metadata) and data processing logs. The required attribution and structure of any GIS data outputs will be defined and agreed at project inception

5. Timetable

The exact project timeline, which the tenderer is expected to put forward in their proposal, will be agreed at the inception meeting. As the outputs from this project are needed to feed into plan polices in summer 2019, it is anticipated that the project will be completed no later than 31st July 2019. The Inception meeting will happen within 1 month of the contract being agreed, with a subsequent report being issued within 1 week. Progress updates will be monthly. Draft deliverables will be submitted to comment to the MMO at least 1 month before delivery of the final project report.

6. MMO Quality / Reporting Standards

Quality Assurance

It is essential that any evidence used in preparing the final report has been collected, processed and published with rigour and that appropriate quality assurance (QA) processes are in place, and embedded, within the contracting organisation. The Contractor will provide the MMO with relevant assurances around QA procedures and/or certifications from recognised standards providers (for example ISO). This will be done using MMO QA forms.

Appendix I (Proposed Governance and Contract Management Arrangements) to this ITT, will be incorporated into the resultant contract.

Coordinate Reference System

Digital GIS datasets will be provided in the following the ETRS 1989 coordinate reference system. The appropriate virus checks and Quality Assurance of data will be completed on all data prior to dissemination.

Metadata

XML metadata records will be expected for all GIS files produced – these should follow the layer following the MEDIN Discovery Standard and a particular focus should be placed on detailing the exact specification in the lineage and abstract sections.

Data Style Definition

All datasets should come with style definition (ideally in the form of ESRI layer files).

Confidence Assessments

For all data products produced the MMO will require a confidence assessment is undertaken following the MMOs approach and standard .xls template.

Data processing logs

For all data products (i.e.: data derived from other data) the MMO requires that a data processing log is completed to ensure full transparency in the process. The MMO will provide a template document and example for guidance. This data processing log should include a flow diagram which summarises the processing steps.

Style Guide and Map Templates

The MMO have developed a style guide for the production of reports which will be expected to be followed. This details the layout and formatting including guidance on the production of maps and figures and referencing.

Proposed Governance and Contract Management Arrangement (including KPIs)

1. Governance and Contract Management

- 1.1 The quality of the service provided will be regularly monitored by the Authority against the elements outlined in Section 1 and Section 2 below.
- 1.2 The Contractor shall participate in regular review meetings with the Authority to review the quality and performance of the services provided. The Contractor shall be appropriately represented at the review meetings which will usually be conducted via teleconference or held face to face in where this can coincide with other meetings.
- 1.3 The Contractor will appoint a nominated person of appropriate grade to be the Contractor's Authorised Representative to manage the provision of the service and to liaise with the Authority as required. At any meeting it will be assumed the Contractor's Authorised Representative will be authorised to make critical decisions.
- 1.4 The Contractor will be responsible for agreeing dates and drafting the agenda for and producing a note of the review meetings.

2. Efficiencies and Continuous Improvement in Service Lifetime

- 2.1 During the Contract, the Contractor will develop, maintain, and improve efficiency, quality and where possible provide a reduction in charges to enhance the overall delivery of the Contract.
- 2.2 The Contractor has an ongoing obligation throughout the Contract to identify new and potential improvements to the Services which will include, but are not limited to:
 - New and evolving relevant technologies which could improve the Services;
 - New or potential improvement which enhances the quality, responsiveness, procedures, methods and/or customer support services; and
 - Changes in business processes and ways of working that would enable the Services to be delivered at lower costs and /or at greater benefits to the Authority.
- 2.3 Where such improved efficiency is achieved the Contractor shall propose a reduction in the level of charges and effect such reductions by agreement with the Authority.

3. Performance Management

- 3.1 Key Performance Indicators (KPIs) are essential in order to align supplier performance with the requirements of the Authority and to do so in a fair and practical way. KPIs have to be realistic and achievable; they also have to be met otherwise indicating that the service is failing to deliver.
- 3.2 The proposed KPIs are set out in Section 1 and Section 2.

4. SECTION 1: PERFORMANCE MANAGEMENT FRAMEWORK

4.1 Overview of the PMF

- 4.1.1 As part of the Authority's continuous drive to improve the performance of all Contractors, this PMF will be used to monitor, measure and control all aspects of the Supplier's performance of Contract responsibilities.
- 4.1.2 The PMF purpose is to set out the obligations on the Contractor, to outline how the Contractor's performance will be evaluated and to detail the sanctions for performance failure.
- 4.1.3 The Authority may define any reasonable performance management indicators for the Contractor under the following categories:
- Delivery and Support
 - Contract Management
 - Quality of Service
- 4.1.4 The above categories are consistent with all Contract awards allowing the Authority to monitor Contractor' performance at both individual level and at the enterprise level with the individual Contractor.

4.2 Management of the PMF

- 4.2.1 KPI's shall be monitored on a regular basis and shall form part of the Contract performance review. Performance of KPI's will be reported by the Contractor to the Authority on monthly basis. The Contractor shall detail performance against KPI's in Monthly Reports and at quarterly Contract Meetings with the Authority; who will review this and make comments if any.
- 4.2.2 The Contractor shall maintain their own management reports, including a Risk and Issues Log.
- 4.2.3 Any performance issues highlighted in these reports will be addressed by the Contractor, who shall be required to provide an improvement plan ("Remediation Plan") to address all issues highlighted within a week of the Authority request.
- 4.2.4 Performance failure by the Joint Contractor may result in administrative costs to the Authority¹⁴. Where the Contractor fails to meet the KPI's then the service credit regime shall apply.
- 4.2.5 KPIs are essential in order to align the Joint Contractor' performance with the requirements of the Authority and to do so in a fair and practical way. KPIs have to be realistic and achievable; they also have to be met otherwise indicating that the service is failing to deliver. Without the use of service credits in such a situation, this service failure places strain on the relationship as delivery falls short of agreed levels. As a result, the only recourse would be to terminate and seek alternative supply.
- 4.2.6 The Authority reserves the right to amend the existing KPI's detailed in Section 2 or add any new KPI's. Any changes to the KPI's shall be confirmed by way of a Contract Change

Section 2: Key Performance Indicators (KPI's)

Metric	KPI	What is required to make this measurable	KPI Measurement	KPI Rating		
				1-3	4-8	9-10
Delivery	KPI 1 – Project Deadlines	Deliverables will be presented by the Contractor(s) to the Authority at the agreed date and quality as outlined in the deliverables.	Quality deliverables are presented to the Authority on the day and or time (if appropriate) that has been agreed by both parties. The Authority's project officer deems the deliverable to be of sufficient quality.	Deliverables sent to the Authority greater than 5 (five) working days after the agreed deadline.
