# Section C - Supplier Response

The ITQ document sets out the full specification of requirements including the project deliverables, functional requirements and performance requirements. The original ITQ and the supplier's response are appended to this contract document below:

# Section D - Protection of Personal Data

Should the services involve the Processing of Personal Data, the following table should be completed pursuant to Clause 23.6.13 of the Call Off Contract.

| Description                      | Details  |
|----------------------------------|--|
| Subject matter of the Processing | The data collected during the pre-tests is to be used for informing the analysis of the test results and for ensuring that the tests are operating appropriately for all pupils.  The Standards and Testing Agency (STA) has engaged the National Foundation for Educational Research (NFER) to carry out the administration of the pre-tests. The purpose of the pre-tests is to produce robust and reliable tests for possible future use at the end of the KS1 and KS2 national curriculum assessments in |

|  | English reading, grammar, punctuation and spelling and mathematics. It is a statutory requirement for the selected schools to participate in the tests.  |
|--|--|
|  | STA will use the test results and pupil background data to determine which questions in the tests are suitable, including for pupils with different background characteristics, for the purposes of developing appropriate tests for use nationally by other pupils in the future.   |
|  | The results of the tests will not be published, and no individual school or pupil will be identified in any reports produced by STA or NFER  |
| Duration of the Processing   | 12/12/2022 – 25/09/2023 – the duration of the contract.  |
| Nature and purposes of Processing  Type of Personal Data   | STA will provide NFER with school census data containing pupil name, date of birth, gender, special educational needs and home language information. NFER will then request that individual schools view the census data, amend the data where necessary, and add the names and data of any new pupils that may have joined the school. NFER will also ask schools to provide details of special arrangements that individual pupils might require (enlarged tests, coloured tests papers, readers, scribes and/or additional time) to enable the pupils to access the tests. NFER will also collect the names of pupils who are exempt from taking the test if they are working below the standard of the test or are excused from the test for any other reason. All data is sent to STA using secure file transfer protocol.  • Pupil name and background data are shared |
|  | to cross check against pupil ID and test data  Test attendance data by pupil is shared so that STA know which pupils from the sample have taken the tests  Data for access arrangements is shared with STA  Pupils' test results are sent to STA so they can analyse whether the tests are operating appropriately for pupils  Coders and test administrators' personal data will be processed to administer the project. Marker/coder performance data will also be provided to STA.  |
| Categories of Data Subjects  | Teachers and pupils. Coders/markers and test administrators  |
| Plan for return of the data once the Processing is complete unless requirement under union or member state law to preserve that type of data | Data is not kept longer than necessary and is deleted in accordance with NFER's and STA's internal policy and also in accordance with the rights given to individuals under data protection legislation.  • Data received from STA or collected from schools will be kept by NFER for 6 months following the end of the testing period as required by the contract between STA and NFER.  • Once approval has been received from STA to  |
|  | delete or destroy data then computer files are permanently deleted from NFER systems.  |

| <ul> <li>Paper copies of testing materials are shredded</li> </ul> |
