Definition – Increase supply chain resilience and capacity policy outcome

Growing and diversifying supply chain opportunities is at the heart of government's Industrial and Civil Society Strategies. An economy with diverse, resilient and innovative supply markets is a cornerstone of prosperity. It provides the best environment to start and grow a business. Markets with a broad range of suppliers of different types can offer better value for money, promote innovative solutions and give public services access to expertise and knowledge on complex issues. There is also a commercial advantage to spreading risk more broadly since it reduces commercial risk.

COMMERCIAL - SENSITIVE

Whether as prime contractors or within the supply chain, it is essential that new businesses, entrepreneurs, start-ups, small and medium-sized enterprises (SMEs), voluntary, community and social enterprises (VCSEs) and mutuals have the same opportunity to tender for and, where appropriate, win government contracts as other firms. Government is therefore monitoring progress under this policy outcome by asking contracting authorities to report the number, value and proportion of total contract spend of prime or subcontracting opportunities awarded to these types of business as the Reporting Metrics for this policy outcome.

Definition – Covid-19 Recovery policy outcome

The COVID-19 pandemic has exacerbated existing economic and social challenges, and created many new ones. Social value provides additional benefits which can aid the recovery of local communities and economies, especially through employment, re-training and return to work opportunities, community support, developing new ways of working and supporting the health of those affected by the virus. Government will monitor delivery of a number of related outputs to assess the effect of these commercial interventions.
