Date: 21 December 2018

Dear Colleague

East Sussex Clinical Commissioning Groups are reviewing the way they commission services for those individuals who are eligible for fully funded NHS Continuing Healthcare.

The views of current and future Providers are sought to help them to develop services that achieve excellent outcomes for Patients and at the same time deliver innovative, efficient and sustainable services for both Providers and Commissioners. Views are particularly sought relating to quality standards, finances, and performance monitoring.

The Commissioners would like to thank all providers that have responded to the Request For Information (RFI) so far. In light of the Christmas period we would like to extend the deadline for responses to midday on Friday 25 January 2019 (Providers that have already replied to the RFI do not need to respond again, but can still request a telephone appointment, see below).

In order to assist Providers with understanding and responding to this RFI, the Commissioners are making themselves available for a telephone conversation to take place during the week commencing 14 January 2019. If you wish to take up the offer of a phone conversation to discuss this further you can schedule a telephone conversation with the Commissioners by contacting 01323 466120 (option 1) and ask for a CHC procurement telephone appointment.

As CCG commissioners we understand that your views are key to this process and would appreciate if you could respond to a set of questions (please click on the link below). Whilst this process is not the commencement of procurement your responses will help shape the future of the service.

We would like to thank you in advance for taking the time in completing the Request for Information (RFI).

Yours sincerely

For and on the behalf of the East Sussex CCGs
